00:17:00 Ja, kanker, ziekte.

00:17:03 Het is echt kut.

00:17:05 Ik heb niet de tattoo.

00:17:06 En die tattoo vind ik zo wel niet erg.

00:17:08 Dat is alleen de achtergrond.

00:17:10 For the batteries, for the batteries

00:17:13 Can I have a sick turn man?

00:17:16 UFO planes, rendering planes

00:17:20 Dat is ziekte. Waarom wil je dat niet herkennen? Omdat ik spaar?

00:17:30 and three other planes are unaccounted for.

00:17:33 I see five planes are unaccounted for.

00:17:44 It's too fast for us to see how it's online works.

00:17:50 The situation is extremely fluid, fluid, fluid, fluid.

00:18:00 Het zet de sens van je persoonlijkheid, het is een middeltijd, het is goed, het duurt het duizend van de buitenland, het is goed.

00:18:10 Yes, sir?

00:18:12 Who wants to press it back online?

00:18:18 It kept going.

00:18:20 And I have authorization that any aircraft deemed a threat.

00:18:26 Presidential authority?

00:18:27 That is correct.

00:18:28 Call it when I was there.

00:18:30 Ik moet iets doen, ik voel mij over.

00:18:40 What people saw in that room, on that terrible day.

00:18:43 There was confusion.

00:18:46 Fear.

00:18:50 I'm certain to you.

00:18:51 Love.

00:18:56 Different things in your back, more than three years ago.

00:18:58 Then it doesn't are real.

00:18:59 Okay.

00:19:00 I don't know what happened to me, I don't know what happened to me, I don't know what happened to me,

00:19:16 That's right.

00:19:18 That's right.

00:19:20 Mr. Vice-President, Otis, online voice.

00:19:23 Mr. Vice-President, Otis, online voice.

00:19:25 Mr. Vice-President.

00:19:31 situation

00:19:40 Is there a time on the spell? Is it depending on line 3?

00:19:47 Okay.

00:19:52 What, what, what, what

00:22:00 I have no idea who he is or where he came from.

00:22:11 What do you have for it?

00:22:20 Yeah.

00:22:21 Call the last one.

00:22:23 Okay, bye-bye.

00:22:25 Bye-bye.

00:22:27 Hey, you're fine.

00:22:28 It's a great time.

00:22:30 Kanker joints, zwijg vijten.

00:22:36 Dit werkt niet goed.

00:22:37 Zo'n bol niet.

00:22:40 We're going to spread that obscene food.

00:22:42 I'm just saying you're not still here.

00:22:44 We're going to spread that obscene food.

00:22:46 I'm just saying you're not still here.

00:22:48 Thank you.

00:22:50 Aber das ist nicht so, dass ich es nicht so gut bin.

00:22:55 Aber das Auto ist nicht so, dass ich...

00:23:00 Ik heb er geen ogenzicht meer over.

00:23:10 Alleen, je bestuurt die systeem zelf ook voor mij niet.

00:23:20 Go, let's get the present back online.

00:23:22 We have an authorization to shoot down any aircraft.

00:23:28 Life knows a post.

00:23:30 They didn't even wash it.

00:23:32 That is correct.

00:23:33 Both of them.

00:23:34 Both of them.

00:23:35 Both of them.

00:23:36 Both of them.

00:23:37 They didn't.

00:23:38 They didn't.

00:23:39 They didn't.

00:23:40 I didn't badge holler.

00:23:42 To all accounts, what people saw in that room,

00:23:45 on that terrible day, there was confusion.

00:23:51 There's an egg on the garden now.

00:23:53 On the surface.

00:23:55 Remote.

00:23:58 Dick Cheney saw something else.

00:24:00 Er valt niks te houden, behalve als je zonde hebt.

00:24:10 As the world becomes more and more confusing, we tend to show things that are right there in front of us.

00:24:20 While ignoring the massive forces that actually change and shape our lives.

00:24:28 And of people working along.

00:24:30 The longer hours less and less when we do have free time the last thing

00:24:41 But as I said, I can continue.

00:24:43 Traders' agreements.

00:24:45 Traders' agreements.

00:24:50 So it's no surprise that when a monotone bureaucratic vice president came to power, we hardly noticed.

00:25:04 that very few leaders in the history of America ever have.

00:25:10 Come on, you're a built-in after the pain.

00:25:13 Get this, talk to this, talk to this, talk to this.

00:25:17 The rest of the boys, leave the girls.

00:25:20 history for millions of lives, like a ghost, with most people.

00:25:30 Having no idea who he is, and where he came from.

00:25:36 Sexuality.

00:25:40 Ja, zeg ik zullen wel.

00:25:42 Ja, zeg ik.

00:25:44 Ja, zeg ik.

00:25:46 Ja, zeg ik.

00:25:50 Ik kan niet kallen een chicken.

00:25:53 Nee, ik had hem.

00:25:55 Weet er weer een chicken in de.

00:25:58 Ik kan het niet meer.

00:26:01 What can I lose?

00:26:10 Dus ik had het probleem toen de schism, de gay split kwam.

00:26:20 Het is een cadeautje wat lang op zich heeft, laat van wachten, ja precies, dead president.

00:26:30 Eh, boes, haddoe.

00:26:35 Je zegt al haddoe, ik zeg, ik weet nog niet zeker.

00:26:40 Ja, ik kende hem zo van, dat probeer je van net wat.

00:26:46 Zou ik bij de eerste cellen halen.

00:26:50 over oorlogs schreeuwen, Jitske Koer dus over maatschappelijke ontregelingen enzovoort.

00:26:55 Dat ze dat wel geil vinden. Nee, nee, nee, maatschappelijke te horen gaan, toch?

00:27:00 Tellen, oren, gang, konden we het, gewoon logisch.

00:27:05 Er zitten hele soort metrics van individuen.

00:27:10 geschikt is of niet geschikt. Ik vind het wel iets moeilijker te vinden.

00:27:20 Ok, y si, ten que ir a ir, ten que ir a ir a ir a

01:42:22 Be the only one who can do what you do or see yourself replaced in fear sooner or later.

01:42:30 Selected honesty to design your victim. Count Victor Lustig was going to double Al Capone's $50,000. Instead of running with the money, he gave it all back to Capone.

01:42:40 who thought he was being played by a car artist.

01:42:42 Capone gave Lustig the $5,000 simply to help the honest man.

01:42:48 Tell the truth to gain your opponent's chance.

01:42:50 Trust, be honest when expected to be dishonest, to throw your opponent off guard.

01:42:56 Law number four, always say less than necessary.

01:43:00 Due to his unpredictability, Louis XIV would have his courtiers tremble in fear when delivering bad news.

01:43:06 He would say, I shall see. Have them leave the room.

01:43:10 action or decide to do nothing about the issue but always with an intimidating silence only

01:43:16 speak when you have something meaningful to say actions

01:43:20 Aber die Ongel ist echt gut für den Geist.

01:43:30 in a favorable position and the Corinthians were preparing for war

01:43:34 both parties wanted to secure the help of the Athenians. Corinthians chose to

01:43:40 remind them of crucial interests and force of their navy directed at Sparta.

01:43:50 allied with the Corcerians. In sales of any kind, pragmatic arguments will always trump emotional appeals.

01:43:57 The past does not matter. Don't count on...

01:44:26 victim did not notice learn to judge a person's character

01:44:31 of themselves so that you can recognize a threat before it arises. Test people's

01:44:36 honesty before you consider trusting them.

01:44:40 crush your enemy totally.

01:44:42 A priest asked the dying Spanish statesman and general,

01:44:45 Ramon Mariana Valles,

01:44:47 does your excellency forgive all your enemies?

01:44:51 forgive my enemies answered my eyes I've had them all shot the last resort when

01:44:57 words are no longer heard and the enemy can

01:45:00 not possibly be reasoned with. The chances for peace at their lowest, the only option

01:45:04 is total destruction. Merely wound the enemy, he will recover and show no mercy.

01:45:10 Law number 16, his absents trickery. A man said to a dervish, why do I not see you more often? The dervish replied.

01:45:20 Because the words, why have you not been to see me, are sweeter to my ear than the words, why have you come again?

01:45:26 Morlayami, quoted in Idris Shaw's Caravan of Drugs.

01:45:30 1968 give people time to miss you by robbing them of your presence it's when

01:45:36 we lose something that we discover how valuable it had been to us on your

01:45:41 appreciated all. Law number 17, cultivate an air of unpredictability. Once Pablo

01:45:47 Picasso had become a recognized artist

01:45:50 Others would assume that whatever action he took must have been calculated.

01:45:54 The art dealer Paul Rosenberg was confused when one day Picasso told him they would

01:46:00 no longer work together. Rosenberg couldn't find out why, and offered him a much better

01:46:04 deal. The unpredictable is terrifying. When you don't know what to expect, you cannot

01:46:10 properly. You can't devise a clever plan because you're in the dark. Put others in

01:46:15 such a position when negotiating. Law number 18. Isolation is...

01:46:20 dangerous you are isolated the easier it is to deceive you you lose touch with

01:46:25 reality when someone is urging you to cut friends and family out of your life

01:46:29 realize

01:46:30 that they want to control and influence you all by themselves whether they do

01:46:34 this consciously or unconsciously it is malicious be careful and cutting

01:46:38 yourself off from

01:46:40 others for too long. Introverted or not, you may cause yourself great harm psychologically

01:46:45 by pushing others away from you. Law number 19, do not offend the wrong

01:46:50 person. Muhammad, the Shah of Khwarezm and Inalchik had beheaded Genghis Khan's

01:46:55 messengers who had come in peace with great gifts and offerings.

01:47:00 Khan declared war, seized the enemy's capital, and had Inačík killed, quote, by having

01:47:05 molten silver poured into his eyes and ears.

01:47:09 Later Genghis...

01:47:10 seized Samarkand, bringing his brutal conquest of Mohammed's vast empire to an end.

01:47:15 What would have become of Adolf Hitler had he been given the chance

01:47:20 of becoming an artist perhaps history would be very different of more than insulting others

01:47:25 you do not know who you are dealing with even though we live in a time

01:47:30 Everyone is offended and the level of politeness borders on absolute

01:47:40 Alcibiades, Greek soldier and statesman, found himself courted by the Athenians because he had influenced

by the Persians.

01:47:50 because he had influence over the Greek city-states.

01:47:53 Instead of committing to one side, he played all of them in his favor.

01:47:57 Committing to someone is like handing yourself over...

01:48:00 to them it means more obligations and less control law number 21 play a sucker to catch a sucker

01:48:07 socrates said the only

01:48:10 True wisdom is in knowing you know nothing.

01:48:13 He didn't actually believe of himself that he did not know anything.

01:48:16 It was his way of disarming people.

01:48:19 Sometimes...

01:48:20 you have to play dumb so that the other lets his guard down. Being openly smart is foolish.

01:48:25 Being openly foolish is smart. Law number 22. Surrender time.

01:48:30 transform weakness into power.

01:48:32 The Malians were prompted to surrender,

01:48:35 but declined the Athenians' offer.

01:48:36 Despite their alliance,

01:48:38 the Spartans did not come to the...

01:48:40 rescue Melos was conquered and their population slaughtered and sold into

01:48:44 slavery. To quote Cardinal Derec, weak people never give way when they ought

01:48:50 to avoid weakness but when you find yourself in a weak spot choose to fight another day

01:48:55 you will lose the current battle but the war is not over

01:49:00 Concentrate your forces. The greater an empire's territories, the more vulnerability. Great lands need strong borders, else they may be over-

01:49:10 by another barbarian tribe, as seen with the collapse of Rome.

01:49:14 Your armies are strongest when forged together.

01:49:17 Divide them, and they may not be able to protect the em-

01:49:20 from an invasion. Dedicate your complete focus to one front, using every resource at your

01:49:26 disposal and all of your energy to master your craft.

00:00:08 Voilà.

00:00:15 Bitte.

00:00:20 ...pouste op krisse plaats, hierheen komt dat tribetje halen,

00:00:24 ...pouste hier misseling.

00:00:31 I don't, there were no drugs on that boat.

00:00:34 It was a hit.

00:00:35 A suicide mission to whack out the one guy that could finger Kaiser Sosa.

00:00:40 So Sose put some thieves to it.

00:00:42 Man, he knew he could march into certain death.

00:00:45 You're saying Sose sent us to kill someone?

00:00:48 You're saying he did.

00:00:50 Herbal, he left you behind for a reason.

00:00:52 Just do what I tell you.

00:00:53 If you all knew that Sosay could find you anywhere,

00:00:57 why did he give you the money to run?

00:00:59 He could have used you...

00:01:01 I'm wanting me to live.

00:01:03 ...in the world fights and it is hard to save a workless rat cripple...

00:01:10 No, sir, why?

00:01:12 80.

00:01:13 I'll be full of story for a minute.

00:01:16 Even if I did, I certainly don't believe he would send you to...

00:01:21 So why?

00:01:22 Because he was my friend.

00:01:26 No, werewolf.

00:01:27 He wasn't your friend.

00:01:30 He didn't have friends.

00:01:32 What are you doing?

00:01:33 He saved you because he wanted it that way.

00:01:35 It was his will.

00:01:37 His king was Kaiser Sose.

00:01:39 No.

00:01:40 The kind of man who could wrackle the wills of men, like Hockney and like Mattis, the kind of man who could engineer a police ladder through all these years of contacts in NYPD, the kind of man who could have...

00:01:56 I was found yesterday at a hotel in Pennsylvania, shot twice a day.

00:02:06 What do you think about Keaton now, baby?

00:02:10 He used all of you to get him on that boot.

00:02:13 He couldn't get on alone.

00:02:15 He had to pull the trigger himself to make sure he got his man.

00:02:19 But one man...

00:02:20 I can identify him.

00:02:30 You had to hide when you first showed the police cars.

00:02:32 You said you heard the shot before the fire.

00:02:34 But you didn't see him die.

00:02:37 I knew him. He would never...

00:02:38 He programmed you.

00:02:40 He programmed you to tell us what he wanted you to.

00:02:43 He knew we were close.

00:02:44 You said it yourself.

00:02:45 Where was the political pressure coming from?

00:02:47 Why were you being protected?

00:02:48 It was Keaton.

00:02:49 A mut...

00:02:50 it was your reward

00:02:51 why me

00:02:53 why not Fester and McManus and hot me, why me? I'm stupid, I'm a cripple, why me?

00:02:58 unless you're a cripple girl

00:03:00 because she's stupid

00:03:10 If what you say is true, it was his idea to hit the taxi service in New York, wasn't it?

00:03:18 Come on, tell me the truth.

00:03:20 It was all me.

00:03:22 We followed him from the beginning.

00:03:27 I didn't know.

00:03:29 I saw him.

00:03:31 Unbeliever is dead on, right?

00:03:40 I don't say blot up in love, yeah.

00:03:42 Kaiserstoaster?

00:03:44 I don't know.

00:03:50 But like you said, a spook store, if someone is out there pulling strings for you, stay here and let us protect you.

00:04:00 State I posted today, you posted 20 minutes ago, Captain Leader wants you out of your ASAP, unless you turn states, I'll take my chances, thank you.

00:04:10 Hier is gewoon China connectie met z'n andere manier, half-China, drie keer China handstiekelen.

00:04:20 I'm not a rat, did you?

00:04:22 I don't know what I want.

00:04:38 Fuck it.

00:05:05 Can I use your thanks machine?

00:05:10 I'll have to sign a cigarette lighter.

00:05:21 Канкер секретарь.

00:05:28 Можете знать.

00:05:29 Канкер секретарь.

00:05:31 He'll have to know how close we get.

00:05:34 Guys associate or no guys associate.

00:05:37 If Keaton is alive, he's not coming up again.

00:05:40 I'll find it.

00:05:42 May I do it?

00:05:43 What's the time?

00:05:45 Target Street, May I do it?

00:05:47 There's no room and it doesn't die.

00:05:50 What?

00:05:51 I never thought.

00:06:50 Where's your head, Agent Klingon?

00:06:52 What we need to do is think.

00:06:54 Think back.

00:06:56 I'm sure you've had many tall tales.

00:06:58 This isn't right.

00:07:00 Dat is inderdaad ook niet.

00:07:02 Je kijkt nu ik er wel.

00:07:04 Kank is ziekte.

00:07:13 Oh my gosh, she said, I've never seen anything.

00:07:17 That's when I was by the means of Guatemala.

00:07:19 We used to make fresh...

00:07:20 I know you thought he was a good man.

00:07:22 I know he was great.

00:07:24 Tell me every last detail of the strangest thing.

00:07:29 How do you shoot him?

00:07:31 He's protected from up on high, Barry Prince.

00:07:34 Tell me about him.

00:07:34 He's not a pretzel man, what's your story?

00:07:36 There was a lawyer.

00:07:37 What lawyer, Verbal?

00:07:38 I'm Mr. Kobe Ashby.

00:07:41 Tell me every last detail.

00:07:43 What for Kaisershofer?

00:07:44 Convince me. Convince me. Convince me.

00:08:01 I'm a freaking scumbag that works the street for a living

00:08:04 and know the name of Herbal Kent.

00:08:07 Did you see him?

00:08:13 I'm smarter than you, and I'm gonna find out what I want to know, whether you like it or not.

00:08:20 Het, ehm, ja, ik heb de chorgante te steken.

00:08:30 He is close to getting caught and sticks his head out.

00:08:35 He is close to getting caught and sticks his head out.

00:08:40 What I want to know is who's the gem?

00:08:41 You know, you know the whole fucking time.

00:08:43 If he comes up first, he's supposed to get rid of me.

00:08:46 That is dead.

00:08:50 Thanks, Kaiser.

00:08:52 First thing I learned on the job, you know what it was?

00:08:54 I had a spot, I've heard of him.

00:08:56 Tell him you got the cripple in there from New York.

00:08:58 He mentioned Kaiser so there.

00:09:00 After that, my guess is you'll never hear from him again.

00:09:24 Not only is but one man, but by convincing others to believe in him, to follow, to place...

00:09:31 We need to raise an army.

00:12:12 I'm sorry, but I'm not going to be able to challenge GDI.

00:12:15 I'm sorry.

00:12:16 I'm sorry.

00:12:17 I'm sorry.

00:12:46 Thank you.

00:13:08 And we hope that's in line for it.

00:13:17 Grazie.

00:13:22 Gracias.

00:13:30 Thank you.

00:13:31 Thank you.

00:13:41 Perfect.

00:14:01 in a translation of the Tacitus.

00:14:04 There are those who say that he was this exposure to the Tacitus,

00:14:08 by which he evolved the balance.

00:15:43 Gracias.

00:17:13 It's time for a reading of PSO.

00:17:53 So first of all, perhaps much longer than the focus of this technology.

00:19:01 God.

00:19:14 Okay

00:19:21 Yeah, a very different course.

00:19:30 The face of the urchin was only a facade. This is end goal.

00:19:40 Of course, events are housed this way.

00:19:50 I'm going to shoot them

00:20:00 Slavic and his officers were aided by a callous Nod-AI.

00:20:04 The probability of a favorable outcome can be embraced.

00:20:13 Define favorable outcome to Bob.

00:20:15 I don't do.

00:20:21 intelligence cabal comprise the collection of human minds be used as

00:20:25 processes held in suspension tubes in underground bunkers

00:20:30 Shortly after the war, Cabal turned Roam, killing Tratos and launching a joint attack on both GDI and Nard.

00:20:37 Using just a Japanese research...

00:20:40 to create an army of Terium-enhanced cyborgs out of civilians.

00:20:44 The crisis of 2031 marks one of humanity's darkness mode.

00:20:51 My forces were enough to stop Cabal.

00:21:01 After his own defeat, Kane's body had been placed in one of the suspension tubes, and his mind was linked with Cabal's.

00:21:10 My life, my life, my vision has commutated.

00:21:14 My, my, your, my plan to follow a path unpredicted by the universe.

00:21:18 The air flying with a real night.

00:21:20 He didn't reset his part, yeah.

00:21:30 Curse this mask, these tubes that imprison me, it's restored.

00:21:40 And so it is that my thoughts turn to Gabal, that which was my creation and is now, in a way, part of what I have become.

00:21:48 Gurkhasik, bro.

00:21:50 Intimacy, Seminitic Symbolism of Rosebud and Crying Dead.

00:22:00 Oh, rose wine. Duplication juice.

00:22:06 Fire.

00:22:07 The year is now 2034.

00:22:10 Bulls under the airwaves, touchless vacuum, technology to stimulate the clitoris.

00:22:20 This is a cake and then the earth is getting turned against his own.

00:22:31 Yeah, I think it's very successful.

00:22:40 Oh shit

00:22:50 To the kids

00:23:04 Blackhawks.

00:23:10 With the loss of Slavik, it was instead to the memory of Cabal that he turned.

00:23:15 A small part of him obsessed over the megalomaniacal machine.

00:23:20 And so, with precious data preserved from the Tacitus, which had been taken by GDI,

00:23:25 Cain created a new artificial life form out of the remnants of Cabana.

00:23:30 Which he named Legion.

00:23:37 Actions.

00:23:38 The Vision.

00:23:40 Fijn, ik heb een afgeten voor jullie, dat zijn het zo afgebakken.

00:23:53 Come, my brother, but you saw the face.

00:24:00 5, 6, 6, 6, 6, 6, 7, 8, 8, 9, 9, 10, 11, 12, 13, 13, 14, 14, 14, 14, 15, 15, 16, 16, 16

00:24:56 Crack of shit, man.

00:24:57 So have them promote someone who is.

00:25:00 ...sobbing to the political benefits of digging so deep into the territory that weighs the strategic drugs.

00:25:07 Say, the director of the...

00:25:20 I guess I've got a sister.

00:25:22 I've got a sister.

00:25:24 I've got a sister.

00:25:26 And what is a newly appointed director general to do?

00:25:31 the destination would attract the screen to earth for routine tiberium harvesting with thresholds

00:25:36 but they would find a planet armed to the teeth and ready

00:25:41 While GDI keep the visitors busy, Noughts need only secure a single threshold and recover the Tacitus.

00:25:48 Once the Tacitus is linked with Legion...

00:25:51 activate the warp gate within the threshold and achieve ascension as long as his followers

00:26:08 Once again, the world is...

00:26:17 And what transpired in the temple pride did not unfold.

00:26:20 ...exactly as I planned. I could not have planned for an ambush BY MY OWN...

00:26:27 Father.

00:26:30 What?

00:26:31 What?

00:26:32 What?

00:26:33 What?

00:26:34 What?

00:26:35 But unlike many of his more zealous devotees

00:26:38 Come on

00:26:41 She began to doubt his seemingly unsound commands.

00:26:45 Aren't you there, Finn?

00:26:47 She never had been so aggressive.

00:26:50 There's a pain in reaching out for a punishment.

00:26:54 Not understanding that Cain intended for GDI to take Temple Prime and finding herself...

00:27:00 refused her requests for reinforcements. Killian lost her nerve during the siege on Temple

00:27:07 Price.

00:27:10 An unforgivable betrayal for which Cillian would be executed, but command instead came

00:27:16 Abbas Alexa Kovacs, Alexa.

00:27:20 The answer was fanatically reverential to Kane, a fanaticism which turned her dangerously paranoid.

00:27:30 But do you see how she looks at him?

00:27:33 As if she has his equal?

00:27:35 When Alexa discovered that Legion had been built from Cabal,

00:27:39 she projected...

00:27:40 her personal vendetta onto legion

00:27:51 My parents pray I am wrong about you, Legion, I pray.

00:27:56 It says Legion.

00:28:00 was about to interface with the Tacitus, Alexa snapped and sabotaged the AI.

00:28:23 Thank you very much.

00:28:32 Happy, gentle, failures, and days and days and days and days.

00:28:40 Microsoft

00:28:50 and not has a long history of duplicity built for thousands of years to achieve his goal

00:28:57 only for one of his own to snap

00:29:00 I can't sleep, man.

00:29:07 Huh?

00:29:08 Massive data source.

00:29:10 on to the Tacitus. The war was over. The screen had been turned back by GDI and not had captured a threshold, but without the Tacitus.

00:29:20 And without Legion, the threshold could not be activated.

00:29:30 It took five years of repairs before Legion would re-awake them.

00:29:40 Legion has arisen!

00:29:45 Okay.

00:29:47 It turns out this is common to you, my friend.

00:29:49 Come on.

00:29:50 an army of cyborgs that at once belongs to Cabal.

00:29:53 Legion launched one final attack on a heavily fortified G.E.I. compound in the Rocky Mountains.

00:30:00 Successfully recaptured the Tacitus.

00:30:03 The prophecy has come to pass.

00:30:05 At last, the Tacitus is in our hands.

00:30:11 It is time for you to take center stage.

00:30:16 I'm talking for you to achieve the purpose for which you will be waiting.

00:30:20 One minute, one hook.

00:30:32 much of it is no longer able to support terrestrial life.

00:30:36 Despite suffering heavy losses during the invasion, GDR-

00:30:40 has reasserted control over the planets, though they know it is being watched.

00:30:45 The Scrin are not one to sit content with their humiliation.

00:30:58 not as a legion

00:31:00 Nolt has the threshold, Nolt has the Tacitus, and Cain, son of Atom, can finally ascend.

00:31:10 Nice.

00:31:13 My name is Zepa.

00:31:15 Thank you so much.

00:31:17 You're great.

00:31:18 I'll look so much.

00:31:43 Toch onwettelijk geculpt te worden, ja.

00:12:44 En toen zei hij, ja, we hebben toch al een gesprek.

00:12:48 En toen dacht ik gisteravond, ja, maar weer.

00:12:51 en ik noteer altijd de gesprekken.

00:12:55 Ja, ik heb er niet mee bezig geweest.

00:47:22 Ja.

00:47:25 Zeker.

00:47:26 Ik heb het ook al voorgenomen.

00:47:28 Het hele gesprek was eigenlijk alleen nog...

00:47:30 ...maar de tijd is niet of ze letterlijk hopen gewoon of zo, dat ik heb een echt zaak tegen ze start, want dit ding...

00:47:40 die ze zeggen, ik heb maanden nog een gesprek gehad, heel anders dan nu, met Marijke of

00:47:46 Zeggezetta, zeg maar, en daar heb ik ook een...

00:47:50 audio-opname van en wat ze nu zegt ontkrachten taal zeg maar weet je wel de

00:47:55 eigen opinie en professionele kwaliteiten

00:48:00 Je hebt het op een bericht.

00:48:03 Ja, de medisch collecte handelen, zeg maar, dat is hier niet aan de hand.

00:48:10 De orde van de Duitsers, zeg maar.

00:48:11 Hé, en toen wij twee weken geleden gesprek hadden, kwam Marijke met het voorstel van dan hebben wij jullie dus...

00:48:20 Met z'n tweeën een gesprek over de medicatie, wijzigingen, ophogingen.

00:48:25 En toen zei jij, oh daar sta ik helemaal positief in, dat is nooit het probleem.

00:48:30 Ik heb afgelopen maandag ook een goed gesprek gehad, gewoon over medicatie.

00:48:34 Maar toen, hebben zij toen wel, heb zij iets voorgesteld? Of heb jij...

00:48:40 Toen hebben we dus ook afgesproken, daar kom ik later nog op terug.

00:48:43 Daar kwamen we later samen nog op terug, zeg maar.

00:48:46 Ja.

00:48:47 Maar ik had ook een aanvraag gedaan.

00:48:50 medicatie vervangen worden, dus de dexamphetamine die ik nu heb tent in, naar DNB, dus door magistraalbereiders, door de apotheker.

00:49:00 Apotheker of wat dan ook. Dat is dan custom op mijn, weet je wel. Op jou. Op jou gemaakt. Ja, ja. En die had ik voorheen.

00:49:10 Toen ik nog aan het studeren was.

00:49:12 En daar ging het veel beter op.

00:49:14 Dus.

00:49:17 Aan wie? Aan haar?

00:49:19 Ja, maar lekker zeker.

00:49:20 En toen vervolgens is er wel een verandering die heeft plaatsgevonden.

00:49:26 Nu is het een Zweedse fabrikant.

00:49:30 tent inlevert opeens. Die dag daarna of die dag daarna. En dat is het enige wat ik daarover

00:49:40 En vervolgens het gesprek hoorde je net, wat ze vervolgens zegt, dat dat waarschijnlijk bijdraagt aan dat ik psychotischer zou zijn.

00:49:50 Of zo, dat dat de opinie is.

00:49:53 Weet je wel, er wordt niet bij mij gecommuniceerd.

00:49:55 Dus ik ga ook niet met hun communiceren.

00:49:58 Weet je wel, als ze over zichzelf...

00:50:00 Ik denk in de onmogelijke knoop gezet, daar ben ik ze dankbaar voor.

00:50:10 Ja, we weten natuurlijk nog niet precies wat uiteindelijk dan de consequenties zullen zijn.

00:50:14 We hebben natuurlijk wel een vermoedigd, maar...

00:50:16 Alle data op tafel en dus ook elke e-mailtje.

00:50:20 berichtje, elk belletje, elk team, spektater, spektater.

00:50:30 Het zit hem in de stangen, zeggen ze hier wel eens.

00:50:34 Alle data over mijn verblijf in de GGZ-kliniek.

00:50:40 Dus van Aarck in Mentrum, zeg maar.

00:50:43 Maar wat nou, Tom, als het...

00:50:45 Ja, iedereen.

00:50:47 Iedereen die toegang gehad heeft, ook derde partijen.

00:50:50 Ja, dat kunnen toch bijna niemand zijn.

00:50:57 Ja, maar er zijn ook mensen die voor nieuwsgierigheid...

00:51:00 in mijn dossier gekeken hebben die daar helemaal geen...

00:51:02 Die werkzaam zijn geweest.

00:51:04 Ja, en dan een advocaat kan daar, weet je wel, de aanleiding voor je is maar de reserve.

00:51:10 Want ja, dankjewel dit scherp naar herkenementum.

00:51:16 Dat wordt mijn complete geschiedenis, ook van mijn data.

00:51:20 naar voren gehaald. Want het gaat over technische capaciteit enzovoort. En dan zitten we daar

00:51:26 een paar leuke dingen tussen waar ik nu niet over ga kijken.

00:51:30 gaan beginnen. Nee, hoeft niet. En dan wordt het heel snel een heel groot

00:51:35 issue. Dan moeten ze experts erbij gaan halen uit vakgebieden die...

00:51:40 Het liever denk ik Ami Kamel wilde regel achter gesloten deuren dan dat ze...

00:51:47 Ja, die publiek wilde letterlijk eventjes tofkomen wel.

00:51:50 En heb je nu niet het gevoel van, nou het kan zomaar zijn dat ze dan volgende maand zeggen, nou ga maar weg.

00:52:00 Dan ben ik economisch dakloos en dan moet ik voor die tijd even met mijn advocaat gesproken hebben.

00:52:05 Ja, dus die moet je straks even bellen.

00:52:10 Ja, straks. Ik bedoel, ik heb geen aans. Zo gezegd voel ik me ook niet.

00:52:13 Nee, dat denk ik ook niet. Maar goed, ja, het moet natuurlijk wel.

00:52:20 Ja, wat moet, wat moet. Ze forceren we al de hele tijd.

00:52:23 Nou ja, precies. Maar goed, dat is dus wel wat er dan...

00:52:27 De technische werk en dat soort dingen.

00:52:30 De omstandigheden zelfs, waarin ik hier verblijf, zeg maar.

00:52:35 Ja.

00:52:36 Dus ja, weet je.

00:52:40 Nee, niet. Zeker niet.

00:52:51 Dat wordt één grote...

00:52:55 Ik had er niet van te doen.

00:52:58 Nice.

00:53:00 ありがとうございました。

01:22:51 Dat ik het jammer vind op dit schaarste drie.

01:22:58 Ja.

01:23:06 Volgens mij voelt ze jou ook op...

01:23:10 Of vindt ze jou nog steeds heel erg lief?

01:23:13 Ja, maar weet je, het crisis gedeelte, dat stoort me zoveel.

01:23:18 Ja, ik dacht...

01:23:20 Buna bakıyorum, ama bakıyorum ve seni bakıyorum,

01:23:26 ben çok büyük bir şey görüyorum.

01:23:30 betrokkenheid bij jou. Nee, ik ben ook betrokkenheid, ik ben geen gewone dier. Nee, nee, nee, maar dat is een gewone, nee, dat bedoel ik ook niet.

01:23:40 Ik snap wel wat je bedoelt, alleen wat ik zeg, weet je wel, zo voelt dat voor mij.

01:23:46 Ik bedoel...

01:23:47 Ja, oké, en dat is iets dat ga ik ook niet.

01:23:50 Ik probeer het te ontkrachten ofzo, maar als ik gewoon haar aankijk en dan denk ik, ja ik zie wel haar betrokkenheid.

01:24:00 Voor jou? Ja, dat zie ik wel.

01:24:14 Ja, aber das ist dann, oder?

01:24:16 Das ist ja kein Tjaunid.

01:24:19 Ja.

01:24:20 Niet zoals ze je nu liep kennen.

01:24:31 Ja, misschien is dat gewoon bijna niet mogelijk in dat werk, dat weet ik niet.

01:24:40 Ik zei dat tegen de toepgezet voor beleidiging en politie.

01:24:45 Want het zou zorgen zijn als je die clinische kant op zou gaan.

01:24:50 Zo sterioel, zonder passie of emotie.

01:24:54 Ja, ja.

01:24:57 Ik denk dat.

01:25:01 Dat ervaar jij nu natuurlijk anders dan wat zij het volgens mij is.

01:25:08 Zij bedoelt het echt uit.

01:25:10 Evet.

01:25:11 Evet.

01:25:12 Evet.

01:25:13 Evet.

01:25:14 Evet.

01:25:15 Evet.

01:25:16 Evet.

01:25:17 Evet.

01:25:18 Evet.

01:25:19 Evet.

01:25:20 Daar wordt ze wel voor koud.

01:25:25 En niet omdat ze iedereen aardig moet vinden, maar gewoon omdat ze voor iedereen het beste moet.

01:25:30 voor de rest van het zijn of haar leven.

01:25:34 Ja, dat zit wel dit. Je moet sterker zijn.

01:25:38 Je moet goed in je schoenen staan.

01:25:40 Ja, zeker.

01:25:42 Dat respecteer ik ook wel.

01:25:44 Alleen ik ben graag aan de ontvangende kant van de tafel.

01:25:47 Nee, dat is wel.

01:25:50 Ik vind het leuk, ik ben er een beetje verliefd op weer en dat houdt niet mee als je...

01:26:01 Ja weet je, dat gaat ook maar zo ver.

01:26:10 Dat is een persoonlijke gevoel, want dan ook, dat is makkelijk, het is een vet van mensen die natuurlijk altijd dat krijgen als je een beetje persoonlijk gesprek hebt met iemand en je bent een paai.

01:26:20 Ja, een beetje in de kluis. Dan denk ik wel heel snel dat ze een band met je hebben ofzo.

01:26:30 Kijk, ik denk dat ik de hele tijd een beetje hier voor andere mensen was ofzo.

01:26:38 En die dit voor mezelf, ik bedoel.

01:26:40 Ik denk dat ik al langer 108 of 1000 andere dingen wel even gedaan.

01:26:45 Ja, weet je wie ben ik om...

01:26:50 ...een soort public service naams met te geven ofzo.

01:26:54 Ja, maar goed.

01:26:55 Eerlijk gezegd.

01:26:56 Eerlijk gezegd.

01:26:57 Ik vind de eerste...

01:27:00 opname daar was, was dat ook wel iets wat op dat moment noodzakelijk was. Misschien niet

01:27:08 daar en niet de manier waarop.

01:27:10 Dat weet ik niet. Dat het toen niet goed met jou ging, dat was duidelijk.

01:27:20 En ik vind het jammer dat in het zicht van de haven en nu allerlei hobbels.

01:27:30 in de weg gekomen.

01:27:33 Ik vind dat mensen een beetje mentaal gijn.

01:27:35 Ja, maar dat vinden ze van jou ook.

01:27:37 Dus dat is dan allemaal hetzelfde.

01:27:40 Ja, maar intellectueel...

01:27:42 Ja, maar we zaten dan naar hetzelfde toen.

01:27:45 Ja, maar dan moest je niet kleine expertise hebben.

01:27:48 Nee, oké.

01:27:50 Ik heb het van jou uit.

01:28:00 Ik hou er wel van.

01:28:02 Ja goed, niks te vragen.

01:28:05 Behalve dat ik het natuurlijk gevelend vind.

01:28:11 Dat het met jou persoonlijk is. Het is echt gewoon verdrietig genomen.

01:28:20 Dat ik zo niet gewild. Jij ook niet natuurlijk.

01:28:23 Ja precies.

01:28:26 Als ik iemand leuk vind...

01:28:30 Dan zie ik al vaak iemand als de moeder van een kinderpotentieel ooit.

01:28:37 En dan denk ik dat je wel...

01:28:40 bepaald prestige puntje voor me ofzo. Maar verder houdt dat ook al heel snel op. Vandaar ook weet je wel dat er gewoon niks te bespreken valt.

01:28:50 Want we zitten daar helemaal gewoon hier in noodstandigheden in de kritiek zoals je die aantreft.

01:28:57 En verder...

01:29:00 Weet je wel, vanaf mijn thuis situatie op de Zonfrenkel in straat 6-3 tot alles wat er tussen zat,

01:29:06 vrouw Mentrum opnames en zo.

01:29:08 Ja.

01:29:10 Vind ik, weet je, voor mij is dat niet echt makkelijk, een afwezing of zo.

01:29:17 Ik ben namelijk behoorlijk exact.

01:29:20 deterministisch zeg maar over wat ik vind en vond en hoe ze mij de hele tijd besturen als het ware.

01:29:30 Zoals we nu ook op hun strepen gaan staan en zo, dat neem ik ze niet in dank af.

01:29:36 Nee.

01:29:37 Weet je, we hebben niks met de...

01:29:40 mensen die hier verbleven of zo, in de kliniek en zo.

01:29:50 Dus ik probeer ze de hele tijd als het ware mensen te wetten enzovoort.

01:29:57 Nou, ik vind dat de hele tijd.

01:30:02 Jouw eerste en jouw tweede opname.

01:30:10 Als die niet opgenomen geworden zou zijn, weet je niet of je hem nog geweest zou zijn.

01:30:16 Ja, mag maar wel.

01:30:18 Ik bedoel...

01:30:20 Die dapper kokzaafd is en het er heen gebrast.

01:30:23 Ja, je had niks meer. Geen inkomen, geen kluis.

01:30:30 İzlediğiniz için teşekkür ederim.

01:30:40 Dat gaat toch niet vanzelf over?

01:30:42 Of heb jij daar een onderdeel?

01:30:51 We hebben geen handeling bij elkaar.

01:30:53 Had jij, hoe had jij het daar dan als er niet iets was...

01:31:00 En hoe had je dat dan weer op de ritme te gaan krijgen denk je?

01:31:07 Ook met schulden.

01:31:21 Maar het heeft ook geen zin, want het is toen en het is nu.

01:31:30 Das ist die Situation in der Realität, die kommen am Dachau nach Veranstaltungen.

01:31:41 I'm not a kind of stuff you want, so you can eat egg and egg.

01:32:01 Ik heb zo'n chemische, chemo, psychiatrische medicatie gegeven, de corosidine.

01:32:10 Hoe noem je? Sorry, ik zeg het nog eens.

01:32:13 Chloosapine.

01:32:13 Ja, chemo.

01:32:15 Ja, voor je hersenen. Dan ben je niet jezelf.

01:32:20 En dan loopt het allemaal zo in die tijd, in die paar jaar.

01:32:26 Weet je wel wat dat met je doet?

01:32:28 Ja.

01:32:29 We weten het.

01:32:30 zelf niet eens zeggen zo. Dat legt je hele systeem op en ben je helemaal in je eigen persoon.

01:32:37 En dat heb jij gekregen?

01:32:40 Ja, dat valt zelfs je witte bloedlichaam tussen aan, zeg maar, met jouw auto-immuunsysteem en zo,

01:32:46 en daarom dat je op moed teken en dat soort dingen, en het is heel hefty shit, het is a lot.

01:32:50 Het maatste redmiddel noemen ze het ook.

01:32:52 Hoe mensen met psychotische kosten enzovoort.

01:32:56 Oké.

01:32:57 Ja.

01:32:58 Maar dat...

01:33:00 Is een medicijn toch? Ik bedoel, er zijn meerdere medicijnen, dat heb je niet al die tijd gehad.

01:33:06 Nee, dat is helemaal geweldig.

01:33:10 There you go.

01:33:20 That's what I'm going to make.

01:33:33 Vielen Dank.

01:33:40 Ik was dinsdag vrij, nee. Ik was niet dinsdag vrij, ik was maandag vrij.

01:33:46 Toen is ons dan opgekomen.

01:33:50 Die was jarig en toen hebben wij gewoon gegeten samen.

01:33:53 Dus dat was constant tijd.

01:34:00 Constantijnse tijd. Constantijn.

01:34:04 Nou, die ga ik in Duitsland hopen volgende week.

01:34:10 Goed zo.

01:34:11 Ja.

01:34:13 We hebben een 30 jaar gelden.

01:34:16 Nou, boodschap gedaan.

01:34:17 Waarom heb je gewandeld in die dag?

01:34:21 Dinsdag, moestdag gewerkt, op die boodschappen gedaan en vandaag weer en morgen gaan we werken.

01:34:27 Lekker wezen.

01:34:37 and the grits are left

01:34:40 De gegeven doorneemden?

01:34:44 Ja.

01:34:45 En de knuffing?

01:34:48 Ja, precies.

01:34:50 Ja, want bij de ING ging het heel makkelijk, dat heb ik misschien toen al gezegd ook, bij de ABD.

01:35:00 Ben ik zelf altijd kalm geweest en dat is heel ingewikkeld, daarom moest ik toen naar een notaris en, maar achteraf, ze hebben bij...

01:35:10 De ING heel makkelijk was allemaal zo geregeld, alleen daar bleef mijn naam en erf u van achter staan.

01:35:16 Alleen dat is, ze hebben er niet bij gezegd, dat is voor twee jaar.

01:35:20 Zaterdag, zondag is Sjaartse sterfdag en dan is het twee jaar.

01:35:26 Dus, nou moet er dus een die tenaamstelling.

01:35:30 Maar dan geven ze zevenhonderd opties en dan wordt het eigenlijk een beetje in de bar.

01:35:36 Dus ik moet even met iemand daarna kijken van, snap jij nou, lees ik dit.

01:35:40 dat is niet al goed. Anders kan ik niet even bellen, sorry.

01:35:47 Anders kan ik even bellen.

01:35:50 Dat vind je wel online. Alleen, daar staat helemaal geen telefoonnummer.

01:35:53 Nou, ik ga niet met hun boxen wel bellen.

01:35:56 Dat gaan we niet doen.

01:35:58 Nee, waarom?

01:36:01 Misschien heeft m'n broer tijd? Kees?

01:36:05 Ja.

01:36:06 Dan kan ik ook even een magische vraag.

01:36:08 Ik zag het van de week nog.

01:36:10 We hadden naar de film Badwijk-Slootermeerplein, dat was een kutfilm en hij wou blijven kijken, dus toen zei ik van nou...

01:36:20 Ja, ik neem de metrolantbrug van Noordzijdlijn en gewoon de IJburg zeg maar.

01:36:27 Ja.

01:36:29 Ja.

01:36:29 Ja.

01:36:30 Hij is je van niks zeg maar, maar we hadden wel saam gegeten en dat soort dingen, dat was maar rustig goed.

01:36:37 Alleen hij denkt ook heel anders over het leven.

01:36:40 Dat is prima, weet je wel. Maar ik ben ook iemand die wel gewoon zegt hoe ik denk dat het liep.

01:36:47 Ja.

01:36:48 Weet je, dus...

01:36:50 Dus het was niet daarom dat we niet de films aan de wappertij afkeken, zeg maar.

01:36:56 Nee.

01:36:57 Maar het is gewoon...

01:37:00 Ik had geen zin in die kutvel, met een circuszachte kwaliteit, dat ik echt dacht van daarom mij niet gezien.

01:37:10 ja oké ja ja zonde jammer ja zeker

01:37:20 Dit is een beetje het thema, de laatste tijd vind ik een beetje kwalitatief gewoon heel erg leuk.

01:37:30 Ja, verdund zeg maar.

01:37:32 Verwoorden in het leven in het algemeen?

01:37:34 Ja, ik zelf, maar levenskwaliteit is gewoon prima en stabiel.

01:37:42 Weet je, ik moet ergens blijkbaar heen gesluisterd zijn, ik loop zelf met technische afstukken.

01:37:50 waarvan ik hard aan gewerkt heb, niet van mijn werk als het ware, maar gewoon mijn eigen auteursrechtelijke...

01:38:00 Onderwerpen en technische blauwe drukken en zo.

01:38:04 En ja, dat vind ik echt.

01:38:10 Verdund allemaal, alsof we letterlijk zijn waar we al weggesluisd is, er is niks meer gedaan.

01:38:20 Niet positieve dingen enzo, vind ik, in een maatschappelijke zin, in de brede zin inderdaad, weet je.

01:38:27 En hier vind ik op de kliniek ook.

01:38:30 De zorg over het algemeen niet echt lekker, weet je wel.

01:38:34 Ze hebben veel flexors, ze hebben allemaal patiënten die ook een beetje...

01:38:40 Nou ja, ik ben in eigen dingen al in mijn beest en nu nog een beetje eigenaarders.

01:38:45 Ja, daar wonen ze je dan.

01:38:47 Ja, dat snap ik, ik verblijf hier natuurlijk.

01:38:50 Sorry, ja.

01:38:51 Ja, ik heb geen sorry te zeggen, maar het is gewoon, ik wil dat altijd exact houden.

01:38:56 Nee, dat snap ik, ja.

01:38:57 En technisch is er nog mee gekregen van die data.

01:39:00 Ja, ik hoor er wel zoiets.

01:39:02 Hoe heet die taal?

01:39:04 H... H... P...

01:39:08 PHP.

01:39:10 Ik programmeer taal.

01:39:12 Ja, dat vond ik wel schattig zeg maar.

01:39:16 Er zat een lepje in.

01:39:18 Heel veel sites waren...

01:39:20 offline. Dus ook die van ons. Daarom kwam ik erachter. We kregen een berichtje van onze ICT-afdeling.

01:39:30 konden komen omdat de website offline gehaald was. Dus toen heb ik eventjes op de computer

01:39:37 op het werk gewoon even de NOS opgezocht.

01:39:40 met van wat is er aan de hand en nou ja wel dus en ik kwam thuis en ik heb een drie van de gemeente.

01:39:50 Er is binnenkort een bijeenkomst in het buurthuis, een straatje daarachter, voor wat nou als de stroom uitvalt.

01:40:00 Is het een doomsday ofzo vandaag?

01:40:03 Nou precies.

01:40:04 Dus ik zei al van, oh god, het einde der tijden is nabij.

01:40:08 Zeg maar, ja, we zijn er niet.

01:40:10 Dat is wel hart ook erg.

01:40:12 Dat, zeker.

01:40:18 Dus ja.

01:40:20 Dat bedoelde ik net met te zeggen, want er is helemaal niks gebeurd.

01:40:25 Nee.

01:40:26 Nou, er waren dingen waar ik al zeven of acht of negen jaar geleden heb.

01:40:30 Tijdens we bezig was, zijn eigenlijk naar de dingen gebeurd, de schakeltjes zijn gebeurd waarbij ik denk, oké, ze hebben voor eigen gering gekozen op korte termijn.

01:40:40 En niet dat van alles met een lobbydobie, een hippie instelling, iedereen verdient alles en we doen het samen op zo'n collectie.

01:40:50 Ik heb heel weinig teruggezien van vooruitgang, zeg maar, als het ware maatschappelijk.

01:40:56 En nu opeens, ik heb wel eens een keer met Kees, toen hij langs kwam.

01:41:00 de meeste kosten en huigste wandeling gemaakt. Toen kwam het ook te spraken dat de infrastructuur

01:41:07 behoorlijk achterloopt.

01:41:10 Weet je wel, met hoogvoormaatschappelijk en zo.

01:41:13 Dus, dat zijn we nog een van de betere landen, zijn wij nog een van de betere landen he?

01:41:20 Duitsland, maar daar zijn natuurlijk heel veel landen die nog veel slechterder aan toe zijn.

01:41:26 Inderdaad, en dat, het heeft maar een rit.

01:41:30 Hij heeft mijn lijf gekozen toen op de John Franklin Staten S3, toen hij nog zzp'er was en aan het werk was voor dat schijn je zelfstandiger wordt, ik ook niet zou.

01:41:40 En bij wie erboven werkte en zo.

01:41:43 En daarna, jarenlang dus door dit VZ-systeem en zo.

01:41:50 En nu ben ik de laatste paar maanden weer heel veel bezig en dan denk ik, shit man, als ik het in mijn eentje al kan veranderen.

01:42:00 Dan, weet je wel, helpt het niet dat het alleen maar om mensen gaat.

01:42:10 Weet je wel, die dan tijd afnemen en zo.

01:42:15 Je bedoelt de mensen die hier werken?

01:42:16 Ja, of verblijven en zo.

01:42:18 Ja.

01:42:20 Want die hebben dan het idee dat ze, weet ik veel, claim of rechten hebben op mijn tijd en zo, en omgeving en zo.

01:42:30 Dat vind ik echt een bijna insane-achtige ervaring.

01:42:40 Maar goed, even los daarvan. Ik denk gewoon dat er voor alles te doen veel veranderen valt, zeg maar.

01:42:50 Technisch, weet je wel, om facilitaire en infrastructuur voor de bevolking gewoon te regelen en te onderhouden.

01:43:00 goed te krijgen en zo. Alleen, ik sta onder de wind nog en er is een zowelmacht heen gevraagd.

01:43:08 Dus ik kan ook niet.

01:43:10 Jij kan dat niet oplossen voor heel Nederland, maar het streven is in dit geval.

01:43:20 De intentie, weet je wel, laat het nog open enzovoort, want dan denkt iedereen, ok, er valt wat te halen en dan...

01:43:27 Heb je je vrienden?

01:43:28 Ja, of mensen die...

01:43:30 Ik heb het altijd doorgebracht. Ik hoor nooit meer wat van mijn oude collega's, oude vrienden enzovoort.

01:43:38 Nee.

01:43:40 alleen zich er tussendoor denken, dat ze allemaal een beeldje voorstelden ofzo.

01:43:46 Ik heb wel een heel goed beeld gekregen, exact beeld zeg maar.

01:43:50 Vanwaar het bij mensel, het gedrag en mensen zelf op fout gaan en zo, door de Tour, door de VGZ.

01:43:58 Ik weet nou wel, zeg maar, waar...

01:44:00 De pijnpintjes liggen in menselijk gedrag en zo.

01:44:03 Oké.

01:44:03 Dus het heeft wel een beetje volwassenen gemaakt en zo.

01:44:07 Het heeft je inzicht in bepaalde...

01:44:10 dingen gegeten. Ja, zeker. Ja, dat. Daar ben ik eigenlijk wel blij mee, want dat heeft wel

01:44:16 ook geholpen met moeilijke discussies.

01:44:20 Ja, ook een grote blauwdrukje en architectuurdingen en zo. Ja, precies.

01:44:26 Het wordt vandaag geen moment, denk ik.

01:44:30 Moet je kijken hoe hard het erken gaat.

01:44:32 Ja, we hebben nog een paraply, dus dan kunnen we misschien wel even wandelen.

01:44:36 Zullen we een heleboel knoutje halen?

01:44:38 Ja, is goed.

01:44:40 Moet jij eerst echter rokenen of wat kan ik even aan het opzetten?

01:44:45 Kan ik van jou om het weer alleen? Vraag niet graag.

01:44:50 Dus jij kan het erover, maar dan heb ik het denk ik wel.

01:44:52 Ik heb een pakkie tigaretten voor je.

01:44:54 Dankjewel.

01:44:55 Omdat ik, ik kon ook niet een slof betalen.

01:45:00 Ik had vorige week dieslof en dat was echt niet te roken, die heb ik weggegooid, dat ga ik niemand aan doen, dat was echt niet te doen.

01:45:10 Nee, maar goed, dat was ook veertig euro en toen was die door...

01:45:16 Ik heb het al geleden, want ik ga een paar dingen verkopen op Marktplaats en zo.

01:45:20 Ja, dan moet ik thuis eerst even wat overboeken van Spaar.

01:45:27 Maar wanneer krijg ik het dan terug?

01:45:30 Nou ja, ik ga dus even de aankoop er een paar dagen hebben, een paar dingen op markt plaatszetten.

01:45:35 Dus op het moment, ja, oké, je kunt er geen data maken, dat kan volgende week zijn.

01:45:40 Maar het kan ook nog drie maanden duren.

01:45:42 Eh, niet drie maanden. Natuurlijk niet.

01:45:44 Nee, precies maar dan...

01:45:46 Nee, dat was wel zonde.

01:45:48 Maar ik...

01:45:50 Ik zeg, ja, ik heb het niet meer, ik weet ook niet meer waar ik het vandaan moet halen.

01:45:53 Nou ja, als ik dan toch 100 bij 150 ofzo, dan houden we het daarbij over.

01:45:57 Hoeveel? 150?

01:45:58 Ja, en dan krijg je...

01:46:00 Nee, ik hoef niet rijk te worden omdat ik jou iets neem, ik moet ook gewoon mijn eigen lasten kunnen.

01:46:10 betalen en eten. Dat snap ik, maar ik krijg het terug natuurlijk. Het is niet een gif ofzo. Nee.

01:46:15 En ik vind het niet leuk om me zo in een positie te zetten dat ze me...

01:46:20 Blijf moeten staan, zeg maar, want ik doe het al genoeg voor me en ik hou van je en ik worde je.

01:46:24 Dat hoef je allemaal niet te zeggen, dat weet ik.

01:46:26 Om het te verzachten dat ik het ga.

01:46:30 Ja, dat doe je voor jezelf, niet voor mij hoor.

01:46:32 Ik vind het gewoon ongemakkelijk.

01:46:34 Omdat ik, weet je, ik doe mijn stinkende best om.

01:46:37 En daar hoeven we het verder niet over te hebben.

01:46:40 om iedere week voor jou alles te regelen, tot alles aan toe.

01:46:44 En een periode geleden kon jij zelfs nog wel iets...

01:46:50 een paar boodschapjes zelf betalen. Roken hadden we het er al nooit over.

01:46:54 Dan nam ik voor de fun een pakje mee. Maar je kunt eigenlijk helemaal niks meer

01:47:00 En dan vraag ik me wel af, wat doe je dan met je geld?

01:47:05 Het ding is, rook is duur.

01:47:10 Ja, dat weet ik, maar dat is altijd al geweest.

01:47:12 En je hebt het ook altijd zelf betaald.

01:47:16 En zelfs nu kan iets wat...

01:47:20 stuk goedkoper is, is er geen geld voor. Dus dan, je leefgeld gaat dus op aan andere dingen.

01:47:26 Maar dat is niet aan sigaretten of boodschappen.

01:47:31 Dat was het gewoon. Ik was een beetje gestresst namelijk door wat er allemaal gebeurde.

01:47:37 Ja, ik ook.

01:47:38 Ik had geen stressroepen enzo.

01:47:40 Ja, dat is het daarom. Ik denk niet dat ik verder, zeg maar, de hele DSO.

01:47:50 en dat het een uitleg nodig heeft.

01:47:52 Ik vroeg gewoon aan je, kan ik het even lenen?

01:47:55 Als het niet kan, dan moet ik op een andere manier even kijken hoe ik dat ga werken.

01:48:00 Ja, nee, maar ik moet het zelf even thuis even wat rotzooien dan.

01:48:06 Yes, dankjewel. Ik waardeer het voor...

01:48:09 Dat moet je wel.

01:48:10 Kan ik niet lezen? Want dan heb ik jou als ik het gedaan heb en dan moet je het lezen houden he?

01:48:15 Ja, heel erg. Zeg maar soms momentjes dat het dan even niet lekker uitkomt.

01:48:20 Dat gaat het wel, maar dan gaat het meestal over het gewone hoega's, weet je, en dan denk ik, nou, dan komt het wel.

01:48:31 ありがとうございました。

01:48:43 En jij vindt het vervelend dat ik dan moet zeggen dat ik geen zin heb...

01:48:50 Om met diegene te praten.

01:48:54 Dat je geen zin hebt met diegene. Maar over wie hebben we het nu over? Zojuist.

01:49:00 Nee, weet je wel, ik had het met Kees, toen we naar de film waren, op de naagpappen of wat en zo, mee in de situatie.

01:49:10 Ja.

01:49:11 En dan, ja, ik wilde ook niet naar mij in de verjaardag toe en zo.

01:49:17 Weet je, want gewoon, ik heb...

01:49:20 Ik heb een backlog van menselijke kwaaltjes, als het ware. Iedereen zit wel met iets.

01:49:30 Dus ja, dan heb ik gewoon geen zin, weet je wel, alles kan verladen, raak ik alleen maar door voorbeelden van, eh, ik zit hier bij, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh, eh.

01:49:40 vooral de shit. Ik noem tegenwoordig de biomedische afvalbak zeg maar. Ja, echt waar, want ik heb gister zelfs met kooljaren op

01:49:50 dagbesteding erover. Die zei al zelfs van nou we zitten bezig op een punt. Misschien 80% van de mensen, ja.

01:50:00 minder zouden overhouden, zeg maar, als het ware, met zoveel dingen tegelijk die op de planeet gebeurden en zo, en omstandigheden.

01:50:10 Ik vond het wel een redelijk exact uitspraak eigenlijk en ik heb best wel goede ideeën van mensen die...

01:50:21 Nou ja, die vooraan staan op het lijstje van, die hoef ik maar niet meer mee te doen.

01:50:26 Mee te doen, ja.

01:50:27 We gaan, het zal moeilijk worden.

01:50:30 De zon in jullie maand gaat helpen.

01:50:32 Ja, we gaan inderdaad.

01:50:34 Ja, precies.

01:50:40 Ja, leuk op werk, man.

01:50:50 Zijn jij een eigen bedrijfje, nog een eigen bedrijfje, wil je starten man?

01:50:56 Nee.

01:50:57 Nee, maar gewoon als je alles hebt...

01:51:00 Ik bedoel, als ik even geld laat, zou ik dan die bloemenwinkel voor je kunnen financieren.

01:51:09 Wij ook.

01:51:11 Ik ben helemaal klaar. Ja, ik vind het allemaal prima. Ik ga lekker mijn tijd door.

01:51:20 met werken.

01:51:30 Ja precies, 1 per 5 is snel gebeurd zeg maar ja.

01:51:36 Dan hoef ik niet meer 5, 6, 7.

01:51:40 me druk te maken om een eigen winkel of wat dan ook. Als ik het overnieuw zou doen, ja graag, dan doe ik het. Want de instellingen heb ik wel.

01:51:50 Maar ik ben 65,5, ik werk vanaf mijn twaalfde al.

01:52:00 Op zaterdag en donderdagavonden en woensdagmiddagen.

01:52:04 In de vakanties al in de schoonmaak, bekenlan achter elkaar.

01:52:08 En vanaf mijn...

01:52:10 zeventiende gewoon fulltime. Dus als ik mag stoppen met werken, dat ga ik niet doen, anders

01:52:19 dat is een meid.

01:52:20 en de bedrijf uitkomt. Daar heb ik vijftig jaar gewerkt, plus een deel part-time, een soort kinderarbeid.

01:52:30 dan wat er komt doen. Dan vind ik het mooi geweest. Dan ga ik kijken bij de voedselbank voor het

01:52:37 goede doel dat ik met een stel andere aan...

01:52:40 vrouwenwijven nog iets kan regelen voor mensen die het niet kunnen betalen en dan zie ik het wel.

01:52:48 Dan ga ik heel veel boeken lezen.

01:52:50 Op de bank, op een elektrische fiets en dan ga ik af en toe een rondje fietsen, maar het stroomt op de bodas op.

01:53:00 Misschien neem ik een hondje, dat kan ook nog.

01:53:03 Ja, ik zag mezelf al een tijdje geleden wel weer zien zitten.

01:53:11 met een type persoon wel een huishoudetje te beginnen, laat het zoar zeggen,

01:53:16 maar netjes te verwoorden.

01:53:20 Dat vind ik zo'n soort dingen.

01:53:22 Ja.

01:53:23 Maar dat hoeft de pret niet te drukken.

01:53:25 Nee.

01:53:26 Ik heb best wel wat technische dingen bereikt.

01:53:30 Klaar gemaakt zeg maar, ja, en dat is heel veel tijd en energie waard geweest.

01:53:40 En daar ben jij ook heel erg een groot deel van geweest, man.

01:53:43 Nee, hoe schat, dat heb jij zelf terecht.

01:53:45 Nou, gewoon de rust die je, de hele tijd die je het begaf, zeg maar.

01:53:50 Goed schiks, kwaad schiks zeg maar. Hij heeft het de laatste maand toch wel gezorgd, anderhalve maand.

01:54:00 dat ik heel veel weer gedaan heb gekregen.

01:54:03 Weet je, die tussentijd daar in, weet je wel.

01:54:07 Tussentjob, eigenlijk, dat staat zes drie.

01:54:10 Nou ja, tot een halve maand of een maand geleden ofzo, is het voor mij persoonlijk dan opeens weer waard ofzo, weet je wel.

01:54:18 Dat moet ik.

01:54:20 toch zeker weet

01:54:22 hoe dingen werken

01:54:24 nu

01:54:25 dat zijn van die algemene

01:54:28 uitdrukkingen

01:54:30 Ik heb heel exact, concreet, het is niet alleen een product idee of zo.

01:54:40 Het is gewoon een vakgebied, een beetje uitgespeeld.

01:54:48 Ik snap er heel niks.

01:54:50 Mijn vakgebied waar ik voor gestudeerd heb en zo.

01:54:52 Ja, maar uitgespeeld. Dat snap ik niet.

01:54:54 Ja, ik denk niet dat er veel nieuws voor mij te leren valt.

01:55:01 verklaarbaar is met wat ik zo overwist, zeg maar.

01:55:04 Dus dat is best wel cool.

01:55:07 En verder...

01:55:10 Weet ik veel, kom geld tekort alleen om gewoon mijn dagelijks leven gaande te houden en weer een beetje actief in de...

01:55:20 maatschappij mee te doen ofzo, want dat is gewoon zo'n zonde.

01:55:25 Daarom was mijn idee het enige wat ik aan tafel heb ingebracht.

01:55:30 was van nou een part-time baan zou misschien, ja mijn idee hè, niet wat je moet doen, maar

01:55:40 Zou iets zijn van ja dan heb je in ieder geval een gegarandeerd basisinkomen en dat geeft je dan misschien ook meer rust.

01:55:50 Dus om iets anders erbij te gaan doen, omdat je weet dat dat heb ik en dat kan ik en dat levert het mij op.

01:56:00 Dat, dat is een goede, nee, dat is een mescadon.

01:56:10 De domestica, dat is gewoon een huisvlieg en die heeft hele gave ogen, hoe dat bier ook bij gaan is.

01:56:20 Ik heb zo'nzelfde ding als jij.

01:56:25 Ja precies dat, dat doe ik nog vaker inderdaad.

01:56:30 Even met dat ding erop.

01:56:35 Ga jij naar het toilet?

01:56:36 Ja.

01:56:37 Dan doe ik de deur even dicht.

01:57:21 En dan, checkroken zou toch ook gewoon prima kunnen dan?

01:57:30 Ja, maar als ik je geld geef, dan blijf ik toch even op een check blijven over?

01:57:35 Precies, dan blijf ik dat ook doen, dan kan ik het gewoon prima over teruggeven.

01:57:38 Dan is dat even voordeliger.

01:57:39 Precies.

01:57:40 Het is even wat meer werk natuurlijk, dat snap ik ook wel.

01:57:44 En je hoeft niet te wachten, want ik heb gisteren geld gepinkt voor huishoudgeld.

01:57:50 Dus dat denk ik zelf wel.

01:57:54 Ja, dat is goed maar.

01:57:56 Dan kom ik gewoon mee op jou uit.

01:57:58 Ja!

01:58:00 Maar dat is toch ook geen probleem?

01:58:02 Nee, dat doe ik alleen maar om een beetje zinnig te doen.

01:58:04 Dat is het slaapwerk.

01:58:06 Nee, dat kan wel goed maken.

01:58:08 Nee.

01:58:10 Ken je nog niet veel, The Usual Suspect, The Different Spacey en zo?

01:58:15 Ja, dus heeft hij volgens mij voordat hij ook al te vragen. En wie dan?

01:58:20 Dat ken ik wel, maar ik weet niet zo goed hoe die film dan gaat.

01:58:26 Nee, maar het is een oude plaats dat je daar ook werkt.

01:58:30 Een mysterieus kompont, zeg maar, of zo.

01:58:34 Maar dat er allemaal heel goede acteurs in meespelen en zo.

01:58:40 Het is gewoon een heel gave film. Ik hou, weet je wel, best wel veel van de klassiekers van vroeger eigenlijk.

01:58:46 Ja, mag ik even jouw sleutel?

01:58:48 Natuurlijk.

01:58:50 Volgens mij is dit het schoonmaakkast.

01:58:53 Gaat kijken hoor, dat red je niet denk ik met deze.

01:58:56 Zal ik het niet? Zal ik het even proberen?

01:58:58 Ja precies.

01:59:00 Yeah

01:59:14 Nee, dat past niet.

01:59:20 Maar het is er al een uitdruk in de film.

01:59:23 Precies.

01:59:26 Voor de hele tijd.

01:59:30 Ik zou mevrouw met een soort dieper moderne camper aan de reis te zijn over de wereld, met de internet.

01:59:40 en alles erbij. Denk jij dat ook wel gaaf zou vinden, man?

01:59:43 Ik niet.

01:59:44 Nee?

01:59:45 Nee. Ik hou niet van kamperen.

01:59:47 Nee, maar dit is een...

01:59:50 Weet je wat, kenten met tv en zo, en zo mogen we roomen.

02:00:01 I don't know about this, I don't know.

02:00:10 Een AirBnB'tje beginnen?

02:00:12 Ja, met één kamer.

02:00:15 Met één kamer?

02:00:19 Nee, een...

02:00:20 een B&B. Ja, dan gewoon in een huisje en dan in de tuin een hokje wat je verhuurt.

02:00:30 Ja, dat zou ik wel leuk vinden.

02:00:32 Precies. Zullen we er altijd wat...

02:00:34 Zullen we naar buiten rogen? Dan ga ik even verplassen.

02:00:36 Dan gaan we even, want het is nu droog.

02:00:38 Ja, dat is goed. Zodat het altijd een beetje ruwing is.

02:00:39 Ja.

02:00:40 Do you need to do that?

02:00:42 Yeah, I'll show you to do that

02:01:50 Ik had een goede deel bij Albertijn, dat was een aanbieding voor...

02:02:00 Iets goedkoper.

02:02:01 Een bonus aanbieding.

02:02:03 Ja, precies.

02:02:04 Ja, inderdaad, zoiets.

02:02:06 Maar goed, dat je...

02:02:10 Stift is nog steeds een probleemstier.

02:02:14 Dat is inderdaad.

02:02:16 Ja, dat is inderdaad.

02:02:18 Politeiten...

02:02:20 Vielen Dank.

02:02:47 You know

02:02:50 U had misschien anders nog zo'n slof meegenomen, hè?

02:02:55 Dat is gewoon die van 40, ze hebben ook de vorige week.

02:02:58 Ja.

02:03:00 Nee, maar dat had je mij even moeten laten weten.

02:03:04 Ja, maar ik had het zo ontschrikkelijk dat ik echt meteen dacht...

02:03:10 Oké, dan doen we het even andersom.

02:03:12 Hoe verschrikkelijk is het als ik weer een slof meeneem, je gooit hem weer weg?

02:03:15 Ja, precies.

02:03:16 Dat moet je dan toch even laten weten, want ik weet dat ik dat niet meer moet doen.

02:03:20 daar heb je helemaal gelijk in. Want dat geldt dan voor jou op een andere manier uit kunnen geven.

02:03:25 Precies, dat is heel erg exact.

02:03:30 Ja, dat vind ik ook. Ik vind het heel correct van mezelf.

02:03:35 Nee, ik vind dat gewoon, het is zonde als je, zeg maar, iets anders...

02:03:40 dan niet kunnen doen, omdat ik voor jou dat mee neem en dan gooi jij het weg, want ja, ik vind het niet lekker.

02:03:46 Ja, nou ja, weet je...

02:03:48 Dan weten we nu ook dat.

02:03:51 Een maandje of zo, dan ben ik wel rijk en dan hebben we deze dingetjes niet meer en dan kunnen we gewoon genieten van de tafel.

02:04:02 We werken tot daar, we werken tot in de berichthuis en we hebben ook dingen die je kan maken.

02:04:10 Zaken waar ik best wel veel geld kan verliezen.

02:04:13 Weet je, dat betaalt me niet.

02:04:21 Ja. En jij betaalde ook geen uitdaging.

02:04:27 Ja, precies. Ik vind het een beetje zonde allemaal dat is.

02:04:30 Dat is gewoon wakker langsgekomen ofzo, of wat dan ook.

02:04:34 Heb je ook het idee dat mensen gewoon een beetje...

02:04:41 Mag volgens mij in de laatste tijd?

02:04:43 Nee joh.

02:04:45 Als je het nieuws ziet en zo.

02:04:47 Dat is toch niet normaal wat er allemaal voorbij komt.

02:04:49 Ik kijk het nieuws niet.

02:04:50 Nee, daar heb ik geen zin meer in.

02:04:52 Precies, ja dat doe je goed. Dat is een stukje zelfbescherming dat iedereen had moeten doen.

02:05:00 Gisteravond heb ik het heel even gevolgd met die php dingen, dat heb ik dan wel even gevolgd.

02:05:10 gedaan, maar het was eigenlijk een berichtgeving van niks, vond ik. En toen heb ik hem daarna

02:05:15 ook gelijk weer overgezet op een ander net, want de rest hoef ik niet te weten.

02:05:20 We weten dat we volgend jaar weer armer worden, doordat de zorg...

02:05:30 wordt iets van bijna 200 euro duurder in de premie en je gaat van 3,85 naar 400 eigen risico.

02:05:40 Nou ja, dat is dan 15 euro in een jaar, oké, maar dat andere geld, dat is wel veel.

02:05:50 Nee, we zijn met meer en steeds minder mensen die het werk willen doen, want ja, de zorg is ook niet meer echt goed.

02:05:56 We hebben behoorlijk veel in de standen en alles.

02:06:00 We krijgen sociale huurwoningen en die werken niet.

02:06:04 Kinderwijslag, huurtenslag, zorgtenslag.

02:06:08 En dan zijn we hier allemaal.

02:06:11 Ja, toen zegt er iemand tegen mij, ja, als je straks met pensioen bent, dan moet je wel eens, weet je wel, op tijd toeslagen, aanvragen.

02:06:18 Ik zeg, nee hoor, ik blijf gewoon.

02:06:20 En als iedereen een beetje zo dacht, dan werd alles alleen maar goedkoper hoor.

02:06:30 Ja, precies. Je spreekt de liefde.

02:06:33 Ja, je bedoelt mensen die niks markeren en we kennen ze allemaal.

02:06:38 Precies dat.

02:06:40 Dat is het ding, als wij samen gewoon praten enzovoort, dan worden we al snel behoorlijk...

02:06:52 En oplossingen.

02:06:54 Waarheid is altijd persoonlijk, hè?

02:06:56 Jouw waarheid is niet altijd mijn waarheid en andersom.

02:07:00 dat een beetje sociaal weergehouden, zeg maar, dat daar ruimte voor was, of zo, ja, voor, ja, alleen dan.

02:07:11 Weet je, denk je dat mensen denken dat er een soort, het bestaat ofzo, dat ze er weer wegkomen?

02:07:18 Ik denk dat mensen er te dom zijn.

02:07:20 En om er zo over na te denken.

02:07:22 Ja, precies dat.

02:07:24 Ik vind het daarom dat het me over onintigent, want de dom staat ook weer een beetje voor de dom te

horen.

02:07:32 You've been an exceptional award at that, which is what you really kind of do.

02:07:37 Yeah.

02:07:54 Ja, vroeger. Nationaal IP-test.

02:08:00 Dan moet ik daar ook nog niet zo mooi in te filmen.

02:08:03 Ja.

02:08:04 Kijken hoeveel ze komen.

02:08:10 Maar ons gezin altijd wel oké.

02:08:12 Precies.

02:08:13 Ja.

02:08:14 Ja.

02:08:15 Ja.

02:08:16 Ja, daar vinden ze allemaal wat achter je nodig.

02:08:20 Weet ik nog dat ik een keer redelijk scoren wilde.

02:08:24 Ja, en het allerleukste, want dat vergeet ik echt nooit meer, was dat jij...

02:08:30 Spreekwoorden en gezegd dus. Terwijl je was een kind. Dus weet je wat, weet dat heb je op school nog niet geleerd. Of snap je niet waarom.

02:08:40 de ouderwetse woorden, ik zeg het nogal. En dan moest je dus de uitleg, die ik heb de dag

02:08:45 was altijd multiple choice. En, ja, en je va...

02:08:50 en ik wisten dat wel, want wij zijn er namelijk wel mee opgegroeid, maar we zijn ook al veel ouder,

02:08:54 dus je krijgt er ook steeds meer bij. En als je er een kind van, weet ik wat was je, zes, zeven ofzo.

02:09:00 En jij had dan gewoon, zeg maar, niet alles goed, maar een heleboel goed waarvan ik dacht, ja, hoe kan dat nou?

02:09:10 Omdat je gewoon snapt wat het had kunnen zijn.

02:09:14 En ik dacht, ja, oké, je had het.

02:09:20 Het was eigenlijk een mini-Neeëllandicus.

02:09:24 Nee, dat was niet in alles, maar de logica van sommige dingen.

02:09:30 Yeah.

02:09:40 Nee, de drangen uit de muur.

02:09:42 De drangen uit de muur. Ja, precies. Dat soort leuke dingen, weet je wel.

02:09:46 Niet te genoven. Echt niet te genoven. Iedere keer weer.

02:09:50 Ja, tegen helemaal de scheid van het kut gereedschap.

02:09:54 Ja, dat was er nog een foto van op de klappetjes staan.

02:09:58 Ja, tuurlijk.

02:09:59 Ik heb geen motor.

02:10:00 schild, zeg maar, ook maar soms.

02:10:02 Nee, nee.

02:10:03 Of aan een dranger die met een schroef en een...

02:10:10 een plug in de muur zit, hadden wij zo'n gat, je bidden het ga er omheen weg en razendsnel.

02:10:20 En dan moesten we dat weer allemaal vullen, hard laten worden, en dan voorzichtig weer een week later dat gevulsel weer allemaal eruit.

02:10:30 Mooi toch, ja precies.

02:10:32 Nu wel, ja. Maar nu dat was ik echt van al.

02:10:35 Toen ben ik goed terecht gekomen met mijn werk en mijn ouders.

02:10:40 Nog een jaartje en dan is het goed geweest met jou.

02:10:43 Ja, super.

02:10:53 Weet je nog die oude foto?

02:11:00 met kees de gameboy muziek mee zat te luisteren op de voorwaait ook met mijn grote hoofd

02:11:10 Was dat met Keesel of was dat met Robin?

02:11:12 Robin was met een punislaan.

02:11:15 Toen bijvoorbeeld, toen Tante Rita dacht dat het een slim idee was met die...

02:11:20 die spersjebonen uit de moestuin, dat ik toen een voedselvergiftiging had in Kees ook.

02:11:26 Toen is Robin opgepast.

02:11:30 Ik weet dat jij in een pyjamaatje zit te luisteren zo.

02:11:39 Dat.

02:11:40 Maar u weet niet wie de ander was op die foto, Kees of van der Wink.

02:11:44 Ja, samen met Kees.

02:11:50 Echt superlieve, leuke, kostbare herinneringen, dat die tijd van toen ik zo klein was, jong was.

02:12:00 Ja, vandaar ook. Ik ben heel spaarzaam.

02:12:10 Ja, altijd eigenlijk al best wel goed vroeger, natuurlijk zo jong als, samen met jullie.

02:12:21 Alleen, dan word je ouder en dan gebeuren de dingen enzovoort en dan loopt het leven niet zoals je...

02:12:29 Nee, dan loopt het leven.

02:12:30 Ik weet het niet, maar die momenten die dierbaar zijn, die zullen dat ook altijd, zou moeten kunnen blijven.

02:12:40 Doordat het daarna gebeurt of dingen die er later in je leven gebeuren, dat komt niet door goede dingen.

02:12:50 Van vroeger, die mag je gewoon ook nooit vergeten.

02:12:53 Nee, ja precies.

02:12:55 Laten we zo zeggen, ik vergeet een hele hoop.

02:12:57 Omdat ik gewoon alleen maar de kostbare dingen.

02:13:00 Zoals net ook over dat gat in de muur maken en zo met de plastic, nou zo iemand bent.

02:13:10 Ik wil gewoon dingetjes zelf ontdekken in plaats van doorleefd worden ofzo.

02:13:17 Vandaar dat ik ook heel erg...

02:13:20 Ja, maar na één keer dit uithalen, dan was het wel goed.

02:13:25 En dan had je het gezien, ja, het zit zo.

02:13:27 Maar bij jou was het één keer niet genoeg.

02:13:30 ook nog een x-aantal keer. Ja, precies. Ik denk dat het perfect is inderdaad, zo aangevat man. Super lief. Ja, echt. Dat zijn van die dingen die niet veel...

02:13:40 voorkomen. Ik hou het liever zakelijk, zeg maar. Meestal. Nu in deze omstandigheden.

02:13:50 Als ik hier op de kliniek weg ben van de kliniek, dan wil ik nu wel eens de oude foto hebben enzovoort een beetje doorspitten.

02:14:00 Zo een beetje, ja, ik had ook nog met Kees erover toen ik de film was samen met hem, over die foto's.

02:14:10 die nog een hoop foto's had gevonden. Iets wat Kees heeft gebracht. Ja, precies weet je wel.

02:14:15 Want die had een beetje dat album gesplit zeg maar.

02:14:21 Toen jullie uit elkaar gingen of iets ofzo en toen had pap natuurlijk nog een hele hoop van die jeugdfoto's enzo.

02:14:30 Dus als dat nu weer een beetje verlenigd is qua...

02:14:34 Heeft hij dat aan jou gegeven?

02:14:35 Wat?

02:14:36 Naar die foto's.

02:14:37 Nee, zou hij niet.

02:14:39 Nee?

02:14:39 Nee.

02:14:40 Nee, oké, ik weet niet of ze met elkaar gepraat hebben of zo.

02:14:44 Nee, hij heeft van die foto's verteld, dat Simi dat gedaan had.

02:14:48 Maar...

02:14:50 Ja, misschien kun je ook even met z'n drieën kijken.

02:14:52 Wij, ja, zeker.

02:14:54 Het zou wel iets zijn, ja.

02:14:55 Hans en ik hebben dat niet gedeeld. Hans wilde dat niet. Neem alles maar mee.

02:15:00 En toen zei ik, dat is niet oké, want er komt een moment dat je ook daarom wel kunt geven, misschien.

02:15:06 En dan heb je het wel. Dus het was voor hem.

02:15:10 Geen ding, dus toen heb ik uit... Kees heeft volgens mij zelfs de albums, ik heb gewoon de foto's eruit gehaald die ik wilde hebben en de rest heb ik voor hem gelaten.

02:15:17 Ja precies.

02:15:18 En ik wist natuurlijk ook niet waar ik...

02:15:20 ...zou gaan wonen. Dus ik hoefde niet 20 albums mee en helemaal losse foto's, dus ik heb de losse foto's meegenomen en de boeken gewoon in de kast laten staan.

02:15:30 Ja, precies dat, man. En hij heeft ze dus wel bemaakt allemaal.

02:15:36 Ja, goed zo. Dat zegt wel ook iets.

02:15:40 Ja, daarom. Had je trouwens nog die twee foto's gevonden?

02:15:45 Nee, ik heb er nog geen tijd en geen zin in gehad.

02:15:48 Ook even misschien...

02:15:50 Dat is precies het ding ik.

02:15:52 Dan moet ik gewoon een uur even rustig voor gaan zitten.

02:15:56 En die rust heb ik dan gewoon niet.

02:15:58 Dus ik weet nu van mezelf.

02:16:00 Ik wil in deze setting niet zo snel dingen zeggen enzovoort, weet je wel.

02:16:10 openhartig zijn, alsof ik letterlijk, weet je wel, alsof dit een groepsproject is ofzo,

02:16:17 dat ik weer mezelf vind ofzo.

02:16:20 Zo zweverig ben ik helemaal niet. Ik geloof helemaal nergens meer in.

02:16:25 En ik bewaar dat liever.

02:16:30 Weet je wel, vooral als we samen er naar kunnen kijken en alles enzo.

02:16:36 In deze omstandigheden voelt het net een oorlogsgebied.

02:16:40 Ja, maar ik begreep wel dat we natuurlijk vorige week over Tante Ko hebben gesproken en dat jij die foto van de couveuse.

02:16:50 Dat snap ik wel. En ik kom dan niet met een doos vol. Dan zoek ik die twee foto's voor je op.

02:16:56 Precies, precies dat. Want dat is dan het enige wat ik even wil...

02:17:00 Yeah, I'd be concerned about that.

02:17:10 Kom, wil je alsjeblieft even eerst, want dan kan die tas gelijk in de auto.

02:17:14 Dat is waar, maar ja, dan heb ik deze niet vergelijk.

02:17:19 He?

02:17:20 Nou, deze kleur vind ik ook wel mooi.

02:17:22 Ja.

02:17:23 Nog even een zwarte erbij hebben.

02:17:25 Ja, en een kwijs misschien ook nog.

02:17:27 Maar ja, dat...

02:17:30 Nu is het even dit, ja. Over twee weken is het tandartstuin.

02:17:37 Oh kut, sorry.

02:17:40 Nee, sorry.

02:17:41 Misschien ben je dan op dat hoort?

02:17:43 Ja, misschien wel.

02:17:44 Zullen we dan gewoon even afwachten dan?

02:17:46 Ja, precies dat.

02:17:52 Oh, no, no.

02:18:01 Leuk liggen.

02:18:02 Ja.

02:18:03 Ja.

02:18:04 Volg je?

02:18:05 Ja.

02:18:07 Ja.

02:18:11 Vielen Dank.

02:18:21 Dat is ook zo'n zepia uit Nies, toen ik daar nog naar Nies geweest was.

02:18:28 Zijn jullie hier ook zepia?

02:18:30 Yeah, the other case in the custody and the open job bank is sensitive.

02:18:34 Amazing.

02:18:40 Gewoon lekker.

02:18:44 Gewoon lekker.

02:18:46 En dan zit het nergens tegen adem.

02:18:48 Precies daar.

02:18:50 Ja, dat. Had ik vroeger een beetje neurotische tikjes enzo. Ik kan me nog herinneren.

02:19:00 Ik kan er niet tegen, dat kun je bijvoorbeeld met de consumptie praten ofzo, dat je wel aan de eettafel zondag had van broodjes samenaten enzo.

02:19:10 Dat ik dan...

02:19:12 Die spetters op je brood wil, of zo.

02:19:14 Ja, in mijn tijmok, zeg maar.

02:19:16 Ja.

02:19:17 Weet je wel, dat ik dingetjes weg wil.

02:19:20 Ik kan me dat nog herinneren, dat werd ook wel eens tegen me gezegd.

02:19:25 Ik kan het me niet herinneren.

02:19:27 Maar ik kan me wel herinneren een beetje van alle...

02:19:30 ding vies was, terwijl je aan de andere kant de viezigheid uitvoelt en daar niet mee zat.

02:19:40 zo dubbel waarom vind je het een vies en waarom zeg maar maak je iets anders vies en vind je daar

02:19:48 niks van

02:19:50 Dat was wel een bubbel.

02:19:52 Ja, goed.

02:19:54 Gaan we die zakken even meenemen?

02:19:56 Dat, weet je wel. Ik ben er heel erg van.

02:20:00 Een hele tasje, als je opvalt het.

02:20:02 Ehm, ja.

02:20:04 Je hebt even broodjes, want het ding staat er zat.

02:20:10 Welkomst en afgelopen weg.

02:20:15 Welkomst en afgelopen weg.

02:20:16 Ja, dat is wel.

00:01:53 It's like a sequel.

00:02:28 I don't know.

00:04:13 Daar ben ik zo verschrikkelijk vermoeid en gehandicapt vandaag.

00:04:21 O, dat, ja.

00:04:23 Ik was in zijn rolstoel aan de jointjes en waarschijnlijk meer toegang aan het prettige leven.

00:04:30 Net zoals die mensen met Down syndrome enzovoort.

00:04:34 Het is al wel helemaal gekomen.

00:04:46 Er zit heel veel tussenin, ja precies.

00:05:24 Mm-hmm.

00:05:33 Daarom de hele tijd, omdat die NIA is beloofd van die fatlife dingen.

00:05:40 Die Cartman er toe had en ik vroeger voor de kerst een keer die Cartman halsketting gehad heb.

00:05:46 En daarna kijk of hond uitlaten en zo, de meest fucking debiele toren.

00:05:50 Yeah, I like self-referential curls, yeah, larynx, foys.

00:06:00 Scoding the box, outside the box, zink in Vlaardingenlaan, even uitgelaten worden.

00:06:05 Soldaat van Oranje reclamebord stond ik toen.

00:06:10 met diegene die die padel dingen deed

00:06:14 weet je wel, dat hippe

00:06:16 en dan verder

00:06:20 En daar hebben we vladingen aan ook weer gekoppeld eraan, toch?

00:07:54 Het is niet gelukt, technisch.

00:08:28 Mm-hmm

00:08:50 Ja.

01:48:17 Unexpected rings on doors that make me stay out

01:48:23 Only two of them are playing mind games, and it's not our game.

01:48:27 You're playing sideways, and that ain't straight.

01:48:30 It's breaking out, but it's hard for you now.

01:48:32 Wonder what goes on with the rest of the town.

01:53:00 It's actually not good.

01:53:03 It's good.

01:53:04 It's good.

01:53:06 It's good.

01:53:16 Alright, thank you.

01:53:20 Who's times when you should be pleasing face? What they want from me?

01:53:31 The rules we spoke about, I doubt that I'm the sharpest one.

01:53:33 The manuals I come with clearly being eye-cut.

01:53:36 Don't shoot.

01:53:37 So you're not fooling anybody.

01:53:41 You must really think that I am dumb.

01:53:45 So, I'm going to see you too.

01:54:02 Gracias.

01:54:20 No more lies, but you know more problems.

01:54:24 Bless those people.

01:54:30 I got a turn on the mark suit, goodnight.

01:54:40 I think it's basically a dagger, yeah, right, but...

01:54:50 What do you want to hear about it?

01:54:52 Must be out of your goddamn mind.

01:55:03 Dat was een eitman die te kooken houden hulp.

01:55:10 They have to go and find it back to the real sense.

01:55:15 He's slumming out the door.

01:55:20 I'm going to be close to this old town, though.

01:55:24 Here we go.

01:55:37 Keep it that shield on the no-co-prank, though.

01:55:50 Так, спасибо.

01:57:02 Play it up.

01:57:05 This is why I'm writing you down as I claim.

01:57:06 Put it to the water, it's just a still piece.

01:57:08 Look dead, am I drilling the center?

01:57:12 I'll go to China, I'll go to China, I'll go to China, I'll go to China, I'll go to China, I'll go to China, I'll go to China.

01:57:21 Dat kan ik zeker wel.

01:59:50 Ik was ziek, nee dat was, ja maar ik heb daar mijn paal ook in de kamer, voor deze VR en blonde dingen en sportdikke.

02:00:00 Ik ben even door oude Instagram-stores.

00:01:06 Je kunt je lichaam zo manipuleeren dat...

00:01:10 Wanneer we willen lichamelijk alles aan kunnen doen, je vlees hem doen en besturen en reageren.

00:01:20 enzovoort, want blijkbaar is het combinatie enzovoort, het dingetje.

00:01:25 En dan kunnen jullie erin maken.

00:01:30 op die manier.

00:01:33 Een nieuwe convention enzo.

00:01:40 Het is ook lichamelijk vervlezenpunt dat ik er zo voor sta na een paar jaar, dag en nacht en aantal seconden die hele symfonie.

00:08:00 die inspiraat zich vandaan van de Airfryer, omdat Abigail van Fear the Walking Dead exact onderin de kamer beneden was.

00:08:10 tot de begane grond met een hoge plafond met die drie kleuren t-shirts, rood, wit, roze enzo.

00:08:20 Hoor, Pussy Parade, als u het indaast, het zal wel duur geweest zijn.

00:01:00 dag en nacht, 6,5 jaar, 68.400 seconden per dag en nacht, dus mij te verhuren.

00:01:10 Ik zou het forceren in Forza als het ware, een forensische afdeling.

00:01:20 Denken jullie daadwerkelijk dat jullie mensen echt op die manier mogen schenden en alles af mogen pakken en suppressen enzovoort?

00:01:27 Dat mijn hoofd dus niet meer werkt.

00:01:30 ...afschermen enzovoort, Sophie Stromberg en koning Willem-Alexander met z'n pilote-license D.U.

00:01:40 De helft enzovoort. Wist je dat de meeste mensen bij Coctisant?

00:02:17 Waar komt al die kennis vandaan, denken jullie?

00:02:20 Van mijn opleiding van jullie die dat altijd lip synken en kan ik repeaten en het doen met rehashen.

00:02:30 Gott, in der Halle, der ist noch...

00:02:40 Prefrontal cortex en mijn geheugen helemaal afgeschennend en verhuurde me.

00:02:50 Via jullie livestream studio, Pockets enzo, Pockets Studios, hier in de buurt enzovoort op IJburg en ook op andere plekken.

00:03:02 Ik weet niet.

00:03:05 Kijk, ik kan niet mijn lichaam van vlees en blok terug teleporteren enzovoort.

00:03:10 Maar ik kan wel zeker verzekeren, ik zak de waarheid uit de humanistie zelfs.

00:03:20 Hoeveel andere bier heb ik nog over m'n lichaam van vlees en bloed en hoe dat niet helemaal georchestreerd is en spatially, temporally, helemaal gepiast.

00:03:30 ik streamte en uitgehuurd is je haalde

00:03:36 ja maar dan als je weer terug denkt dat je is de A-tijd

00:03:40 Double eyes, dan zit je nu in een depressieve swing, toch?

00:03:51 Hoe verbinding denk je dat ik met Jitske Kouders zelfs met de griep hangen heb?

00:04:06 En heel hard gemarteld bent, zeg maar. Je doet ook een kind.

00:04:10 Het is een mooie keuken, het is ook een kunst.

00:04:14 En dat raad je ook af aan.

00:04:16 In principe alleen, die enige pocket...

00:04:26 En dan hebben jullie geencapsulated. Kijk, we hebben het over als Capture the Flag.

00:04:31 Op basis van die data en haar weerwoord enzo, was er met z'n andere manier.

00:04:37 Ik was de duivel ofzo.

00:04:40 Nu kan ik dus niet meer de positieve thuisherinneringen herinneren en dan moet ik de hele tijd per dag en nacht, elke seconde, vechten.

00:04:50 om autonomie te houden over mijn lichaam van vlees en bloed.

00:04:53 Het is niet een algemeen verhaal, twee, drie dingetje of zo.

00:04:58 Het is...

00:05:00 Afgescheidend en afgebogen?

00:05:03 Goh, nee, maar dan moet je eerst erkennen dat je toch een band met die mensen had ofzo.

00:05:09 Toch?

00:05:10 Dat is toch modus op Hollandisch, zeg maar. We doen het gewoon.

00:05:20 Binnenhof Den Haag voor 12 miljard verbouwd.

00:05:24 Hé, ik was laatst in Den Haag.

00:05:40 The desalination plant, solidity tracking, 5G, KBF, IWR 16240.

00:05:50 fmcw tekkers industrie met de mooie marker eroverheen zodat ze het merkje afvonden waar ik die sensor gekocht had

00:06:00 Toen we al keihard aan het naaien waren bij de KBF Digital Studio, onder zware druk en onder emissie.

00:06:10 dieper niet veel. Geld verdienen voor? WTF ik daar bij de elite consultancy afdeling

00:06:15 deed? Als zzp'er, mooie loophole toch?

00:06:20 pijnzelfstandig enzo.

00:06:25 Ja.

00:06:30 Moet ik dat verder uitleggen of kan je er niet zegelijks van de ziekenheid?

00:01:00 aan dingen die niet waar zijn. Ik heb bijna geen creativiteit meer omdat jullie het zo

00:01:05 afgestreamd hebben, zeg maar, geclampt.

00:01:10 En waar heb ik het dan over? Over mijn eigen hersenen en over creatief na kunnen denken?

00:01:14 Ja, bijna een fotografisch geheugen.

00:01:19 Wat ik vroeger had.

00:01:21 Alleen met vlagen.

00:01:24 Dat is je hele streaming ding.

00:01:26 Prism, Peppers Ghost, Buigie.

00:01:30 van Licht Waveguide. Binnen mijn prefrontal cortex en achter mijn ogen. Met die multiplex Y-switch.

00:09:40 Zijn jullie stupen?

00:09:50 Ja, maar wij kunnen toch met Arkane goede jongens maken van alles.

00:10:00 Volgens mij heeft het iets met kabinet Rutte 3 te maken, met de deel in huisvallen.

00:10:10 Als er daar gewoon logisch tussen zit, zit dat als ratten in de val.

00:00:21 That's sick, man.

00:00:30 Ja, ik weet niet. Als ik niet door de linkse stelsel heen gehaald werd, was ik volgens mij behoorlijk rechts.

00:00:40 geweest en gebleven, zelfredzaam. Dat was mijn hele quest, mijn strategische lange termijn

00:00:47 visie was geld op de bank.

00:00:50 Vrouw op de bank.

00:00:54 En dan weet je wel, ik werk wel eventjes wat harder een tijdje.

00:01:01 Ja, als een hardwerker, dat is intens gewoon je best doen aan het studeren en aan het werken en produceren.

00:01:11 Ik ben het verder niet eens met links.

00:01:31 Als we zo, zeg maar, ben ik niet per se overtuigd aan komende tijden.

00:01:41 Het gaat iets positiefs terecht te doen voor bio-instabiele mensen.

00:01:55 Is Courtney, ik heb de planningen maken.

00:02:00 ideeën voor producten, dan ben je dan misschien wel, weet je wel, soms een beetje aangevuld.

00:02:10 Maar nu sta ik zo, nou ja, pinhole camera afgesteld, Peppers Ghost, Y-splitsing.

00:02:21 Fridge XXX, Amstelaam met IJ.

00:02:30 Amsterdam with the PMO parties, the foreign industry, the underground scene, the sex scene.

00:02:40 Yeah, like the cutscene put it in.

00:02:42 That's kind of shit, man.

00:02:54 Het was altijd interactive, het was een dick joke.

00:02:56 Toch te gelukken en het zei tegen mij, het is stil.

00:03:00 Ik moet je niet vertellen wat die dubbelgelaagde betekenis is van je zzp.

00:03:06 Weet je wel?

00:03:09 Het kan hem verkopen.

00:03:10 Ja, partiet, nog eens gehoord, kan de ziekte.

00:03:20 Die kan ik bijna niet meer nadenken in mijn dagplannen.

00:03:22 Want ik sta nog onder bewind en zorgmachtig ging in je zorgstelsel en zo.

00:03:27 Arkeerde menteren.

00:03:30 En medisch directeur van Arkin, of van de Nederlandse staat.

00:03:44 overtuigd met een plan van aanpakken enzovoort

00:03:47 want ik dacht het even niet

00:03:51 Ik ben er wel je hele powerlijke economisch dakloos.

00:03:54 Ja, dat deed je powerlijke veel dingen.

00:04:01 Anything can happen toch, arts bij Niels Lammer enzovoort en old modus enzovoort.

00:04:10 In Koog, vlakbij Koogstaat, ja, 43 waar gaan ze in de andere manier, 3, 4.

00:04:20 Jan Forfar, wereldkampioenschap, genetisch kweker.

00:04:37 Football, I like the football.

00:04:40 Ja, er zat in het bier dat ze me gewoon, ja, maak je het, dat wil je dus een beetje.

00:04:46 En dan heb je het, de homo-synthesis.

00:04:50 Yeah, isn't it going okay?

00:05:00 Ja, bens, epidermis, daar kan ik google het over eens.

00:05:06 Dankjewel.

00:05:23 Down and down, shrimp fishing, forest gum, bum.

00:05:30 Kom, thanks, thanks, Henk Heijnen naar de Gooi, Sligro, toen had ik een beetje mijn blog op een...

00:05:40 website, wordpress

00:05:42 of iets

00:05:43 weet ik niet meer wordpress

00:05:45 maar over

00:05:46 aan het kankeren

00:05:48 over wat het werd aangeraden

00:05:50 Gijs volgens mij, misschien, nee niet dan, maar Gijs Domen, Domen, Domen, Goed Men.

00:06:00 Uitwormen pindas, pillakaas, pillakaas ofzo, Oost-Indië, Oost-Indië.

00:06:10 So, like we said, bunnies and toe for the tires by, if it is, yeah, let's see.

00:06:20 Ehm, maar we gaan kijken, Domen en Hoed, Centacom, reclame.

00:06:30 Zijden bij Amsterdam Centraal.

00:06:36 Het was dus dat ze op de figures getikt waren toen ik die offerte...

00:06:40 Getaald is, weet je wel.

00:06:43 Bij dat bedrijfje in Hoofddorp volgens mij.

00:06:45 Ik weet niet of dat Hoofddorp is, maar het zou goed kunnen.

00:06:50 Toen wilde ze uiteindelijk dus niet betalen voor die vacature, want dat is even een plotline.

00:06:56 Want Max Müller met z'n land mag dingen airsoft.

00:07:00 Zwarte markt, Bazaar en Beverwijk en zo.

00:07:04 En Jisp.

00:07:11 We schuldigden me van bedrijfsespionage.

00:07:17 Het zal wel een noodverordeling geweest zijn van...

00:07:20 de overheid en zo. Hij moest het melden, zei hij. Dat is jaren geleden. Ik zou bijvoorbeeld evacueren.

00:07:30 Nederland als ik jullie was. Maar bij dat bedrijfje, Didius die reclame zei,

00:07:40 bij Amsterdam Centraal. Weet je wel station NS Amsterdam Centraal. Ja, die...

00:07:50 Er werden op hun vingers getikt, want ze hadden camera's gebruikt.

00:07:54 En dat was tegen de privacy van mensen.

00:07:56 En die vertelden me toen, oh we kunnen via die zendmasten enzo.

00:08:00 Kunnen we letterlijk via derde partij een schaduwprofiel maken van mensen en mensen identificeren.

00:08:10 aan koppelen enzo. Centacom heb ik gezien ook opvallen bij het reclame en zo. QR-code op t-shirts en QR-code maatschappijtatsen.

00:08:20 Dan doe ik het even snel op, zodat jullie het niet kunnen focoden enzovoort weer vergeten.

00:08:30 Gewoon je de CryptoPlay toch?

00:08:36 Ja, en toen had ik dus research gedaan naar sensoren.

00:08:41 En ik had al heel veel kennis enzovoort over, weet je wel, mijn vakgebied enzo.

00:08:47 Alleen ik wist niet hoe ik dus...

00:08:51 Ja, een waardevolle inschatting kon maken van wat zal het ongeveer gaan kosten.

00:08:58 Toen heb ik ze voorgesteld, heb ik eerst...

00:09:00 Een paar weken geresearched naar die sensoren.

00:09:03 Het is de IBR 1642 was er eentje van.

00:09:06 Weet je wel, die KBF dingen enzovoort.

00:09:08 Leuk, 5G-ture.

00:09:10 streaming enzovoort

00:09:15 het ding was

00:09:17 dat het me een paar weken kostte en toen wilde ik

00:09:20 ze uiteindelijk niet betalen voor de factuur. Weet je wel, via hotmail verstuurd en zo,

00:09:26 dat kan ik nu wel terughalen.

00:09:30 Voor mijn tijd die ik daarin gestoken had.

00:09:32 En daarom wilde ik ze niet zeggen welke oplossing ik had gevonden.

00:09:40 En toen heb ik het uiteindelijk maar zelf gebruikt en daar zie je die Instagram dingen van en KBF enzovoort.

00:09:46 En dan ben ik een maternaier enzo en een vijand van de staat enzo.

00:09:52 Als terrordronen door de GGZ-heden enzovoort.

00:09:56 En verhuurt per seconde van de dag en nacht.

00:10:01 Want ik had de binnenkant van die reclamezuilen gezien, een paar foto's gemaakt.

00:10:11 Als je het nog verder terug wilt pakken, Max Muller met de action, zijn we een keer in de action geweest.

00:10:20 volgens mij. Want toen was het nog bij de Bitter Forum 5. En toen wilde ik al een beetje

00:10:25 elektronica gaan leren enzo. Een tuinlampje met een zonnepaneel.

00:10:30 erop enzovoort die van automatisch aangaat, weet je wel, die achtertuin zet of zo. En dat

00:10:35 dan uit elkaar slopen en dan een beetje alvast geïnteresseerd raken in.

00:10:40 Reverse engineer van elektronica enzo.

00:10:44 Dan nog eens een keer dat ik vroeger het PM in Boon.

00:10:50 Dus Neptune is later, dat ik al jullie mensen nog niet kende enzovoort.

00:10:55 Online voor Battlefield 2?

00:11:00 Een soort store, voor die online zeg maar, online met een groepje ofzo.

00:11:10 Gevraagd werd of we voor de mod, voor die Battlefield game, een flamethrower konden maken.

00:11:18 Ik kon het nog niet eens normaal proberen.

00:11:20 opgebeheer laten staan dat het me zou lukken op dat moment.

00:11:24 Videogames en dat soort dingen. Gewoon niet die torts, blowtorts van spacex, die dakbedekking.

00:11:30 door waar Elon Musk even mee stond, cool stond te doen.

00:11:37 Hier, rooftop, VR enzovoort.

00:11:40 Wingspan, isolatie enzo om het laagje erbovenop te maken.

00:11:45 Dat heeft tijd nodig, toch?

00:11:51 Nou, daarom drop ik behoorlijk toch.

00:11:55 Waar jullie altijd op vragen en op hinten en sikken enzo.

00:11:59 Reverse entity.

00:12:00 Mijn hele dataset ofzo is voor jullie en mijn lichaam van vlees en bloed, toch?

00:12:06 Hoe gaan jullie dat aan mij compenseren?

00:12:15 Kankerziekte. Bedankt voor Adler.

00:12:20 They've been shoutcasting

00:09:03 Kijk, bij de tijd, just in time, doen we interrupten enzo.

00:09:13 Então, vamos?

00:09:20 Dat?

00:09:21 Ja, daar moeten we even onderbreken.

00:09:25 Omdat het over een letterlijke gevoel gaat in mijn lichaam en het is seksueel.

00:09:30 Dus met lul, masturberen, serotonineprikkels, dopamine enzovoort.

00:09:36 En dus je lichamelijke functies, fysiologisch enzo.

00:09:40 Dan opeens moeten we de live commentaar geven en interrupten altijd, voor, toch?

00:09:50 Dat spiekt ook een goede film met gallery.

00:10:00 Metrix, niet Metrix, maar als die bus, buslijn.

00:10:05 Lage gaten, 45 km per hour.

00:10:10 Van een proftie.

00:10:42 De Wuwei, Nutrilon en pallets met Nutrilon die achterover gedrukt werden naar China gestuurd.

00:10:50 werden omdat de vergiftiging in de fabriek plaatsvond daarom en dus een

00:10:56 hele hoop baby's gestorven zijn in china

00:11:00 Even een mooie Public Service Announcement, wat indirect hier allemaal plaatsvindt.

00:11:05 Roofbouw, tuifendak.

00:11:12 Ja, daar kan ik mensen niet de schuld van geven, niet allemaal.

00:11:20 Allemaal, maar wel hele groepen.

00:11:31 Het is wel een van mijn favoriete oldschool hiphop nummers.

00:11:36 En niet dat ik dat gemaakt heb ofzo.

00:11:40 Het is een mooi verhaal over iemand die, weet je wel, een heel verhaal te vertellen heeft.

00:11:46 Hij neemde alleen maar bitch en zo, what's up?

00:11:50 Zeig, zeig, leuk.

00:12:00 Dat ik vind de Peutra echt zo lang verleden.

00:12:30 Heeft Stefan alles te horen, uit de horen enzovoort, die ook ADHD had, zeg maar, een paar dingen, afleiding, afleiding, afleiding.

00:12:40 Legend of Edda spelen, Hoofddorp in je hoofd enzovoort.

00:12:43 We wisten te veel.

00:12:45 Scuba Bicca.

00:12:47 En dan Asa.

00:12:50 I have the ex-kun, yeah that's a little coon.

00:13:00 Van mijn ex, de ex heette Koen, Koen Durs, Koen en Daes, Microsoft, Emma Riddle enzovoort.

00:13:10 Die zijn in een trabant omgekomen dan, zo leidt het verhaal.

00:13:20 Na een festival of wat dan ook zijn ze onder een vrachtwagen geraakt.

00:13:23 Omdat letterlijk dat autootje, dat klassiek autootje zeg maar.

00:13:30 Ja, niet zo resistent is tegen botsingen en zo.

00:13:37 Bijna een keer.

00:13:40 wel risicovol. Maar bij Ikea Haarlem de afslag zeg maar dat er iemand besloot bijna parallel.

00:13:50 Ja, haaks zeg maar in te voegen op de afrit zeg maar.

00:13:56 Toen ik nog aan het, ja ik was aan het rijden.

00:14:00 En toen was het nog net op kardipje.

00:14:10 Als je zo snel gaat is dat op het nippertje 80 km per uur nog, zo'n 100, 90 of 90 km per uur.

00:14:20 En ook de wegtrechten van de Archeonis, nee maar Ikea Haarlem, je weet wel, die plekken waren ook die lewd foto's met Asamist en Andermar.

00:14:30 gemaakt zijn en zo en wel meer. Ik had wel doodkennis zijn in dat koekbrikje.

00:14:41 Kijk de car, ja precies. Carston, Carmac, Womac, Womac, Womac, Mac, Mac Daddy's, Big Mac.

00:14:50 Big daddies, big player pips.

00:14:52 Ja, let's say player pips.

00:14:54 Bijvoorbeeld in Marlix en valt die dingen van, je bent een jonge witte pips.

00:15:00 Dirt, maar ik had er ook met David Brom weleens over gehad van

00:15:10 Ik heb in ieder geval tot de conclusie gekomen van wat dan ook, weet je wel, van een beetje persoonlijk gemixt met losjes.

00:15:20 Tussen zakelijk in ofzo, weet je wel.

00:15:22 Zodat je in ieder geval niet als robots met elkaar omgaat in het zakelijk leven.

00:15:28 Dat.

00:15:30 Nerden, Silicon Valley-achtig, die tv-serie. Gewoon.

00:15:40 The answer for day.

00:15:42 That's the camera ain't difficult.

00:15:50 That's why I, yeah, see, I've been out of my brain, ugly boy, I think you're pretty, yeah.

00:15:55 The Elegoa style with the Elegoa style.

00:16:00 look lichamelijk wat erbij hoort en zo en met je haar stijl dat soort dingen dat

00:16:04 vind ik nou niet echt de meeste entree, ik denk. Maar die koeren, die scoemen...

00:16:10 Dan Stefan Aushoorn en dan Legend of Edda, die kwam wel vaker langs zeg maar in de avond en dan kochten we goedkope flesse wijn.

00:16:20 Mooi Kaap. Dus eigen wereld, opgezwollen. Ja, Kaapstad.

00:16:30 Afrikaans, ik weet niet of dat nog het dingetje is of dat het dan weer een beetje onderbreekt, ja dat onderbreekt het wel ja.

00:16:40 Ja, ja, ik weet het altijd met de aas van mezelf.

00:16:50 of the...

00:16:55 Yeah, the artist.

00:17:00 vind enzovoort. Ik, ja, dat. Niet dat dat was het op zich volgens mij dat never.

00:17:10 Die Lego dingetje, ik had in de Tepperware bakje toen ik echt jong was op de Neptunus dan 118, had ik allemaal gaaf.

00:17:20 van lego stukjes uitgezocht, zodat ik ze niet in een hele grote tippere Ikea bak terug hoefde te vinden.

00:17:30 Ik ben altijd al van pocket dimensions geweest en het knus bij elkaar hebben enzovoort.

00:17:36 En seksueel ook handig zijn.

00:17:40 Met mensen waar ik voor kies om samen mee te zijn, in plaats van werk aan het publiek.

00:17:50 Ja, voor mij was het wel wat ik nu, ja, dat.

00:18:03 Tough. Tough.

00:18:16 В этом?

00:18:17 А, окры

00:18:20 Ja, zonder op te zoeken, ik maak het niet uit. Even kijken hoor.

00:18:25 Flux, Pavalium...

00:18:30 It's called UKR, UKR, RK4, U-RK4

00:18:40 I can't stop, maar je gaat gewoon door, toch?

00:18:43 Q-radio, belt Sanders, danser enzovoort, middelopvang team enzovoort.

00:18:50 Ik heb te veel tijd gespendeerd met mensen van andere huizen.

00:19:00 of genetisch iets. Ik weet niet. Moeten we nou weer als dokter?

00:19:12 Enter the Nia, Pizza Nia, oh shit, oh shit, Pizza Intelligence, MySpace Tom

00:19:20 Facebook, Pirateel, CIA, Oezo de Connectie, Facebook, Cambridge Analytica.

00:19:30 CIA, het is gewoon een shoppoppet bedrijf van CIA zeg maar en dan Instagram en dan NoMode.

00:19:41 Geen tond.

00:19:44 Kankerziekte, moedengelen.

00:19:46 Ja, Picasso.

00:19:48 Maar China, buy the restaurant. Check please.

00:19:50 Zonder die oortjes, neem hem maar over en doe dat altijd te desolaten, maar oké.

00:20:00 Tering, ja. Ik heb een keer wel, is dat dan, bij die ID&T winkels zeg maar, of ja, weet ik wel, even een winkel.

00:20:10 dingen enzovoort naast die brug zeg maar waar nu de regenboog oversteekpad zit en zo

00:20:20 Waar het naast de comfort store, schijnt tegenover waar die acupunctuurwinkel nog steeds zit of zat.

00:20:27 Bij de ID&T dingen, flyers gehaald enzo.

00:20:30 Toen heb ik een keer op hardcore nu staan hakken enzo.

00:20:36 Ja ik heb het niet per se op hakken.

00:20:40 Hardcore muziek enzovoort, maar dat, weet je, leuk.

00:20:46 TV.

00:20:50 Ik ben een klein beetje nog een nerd, zeg maar, maar hier ben ik gewoon.

00:21:01 Dit is Hannibal Corta en Kankersiek van Louis Turo.

00:21:08 Ja, ik ben heel erg.

00:21:10 Er waren niet echt Arora, die artiesten die met de Arora Borealis, de Borealis, City 17, Ries.

00:21:20 Jim and Steve Half-Life, they invited to the Half-Life.

00:21:30 singleplayer alleen maar filmpjes over gekeken heb omdat ik letterlijk geen

00:21:34 geduld heb voor singleplayer games

00:21:40 Nou, wat ben je nu aan het doen als Klaas in de hele deeltijd?

00:21:44 Achja, jullie gaan elke keer winnen.

00:21:50 Met Albar en met De Kuil, zeg maar, bij in Utrecht een escape room gedaan enzovoort.

00:22:00 en toen was het ook.

00:22:02 Je gaat aan de ene kant van de kamer zoeken en jij gaat aan de andere kant van de kamer zoeken.

00:22:12 Ja, ik doe wel een succes, ik weet niet, ik weet niet, ik weet niet

00:23:30 I'm just testing you, maar ook andere hints die nu ge-suppressed staan en afgedicht staan.

00:23:37 Dat ik op tijd best...

00:23:40 Maar er zit dus wat licht, dus hoe weet ik nog dat ik dat weet, maar dat u niet kan herinneren.

00:23:45 In plaats van, kijk, de lucht is blauw en paars.

00:23:50 En er komen aliens uit de lucht vanavond om 10 uur.

00:23:55 Die droppen hier op de parkeerplaats en dan komt er een krater.

00:24:00 Dat soort dingen. Weet je wel? Want dat zit er niets aan bij, precies.

00:24:16 Спасибо.

00:24:20 Gewoon, nee, motivatie genoeg, eh, eh, niet op het seksuele vlak, zeg maar.

00:24:30 Behalve als, weet je wel, even een momentje, gewoon een leuk iemand voor zijn kon testen voor.

00:24:37 En dan denk ik, eigenlijk heb ik ook zin in.

00:24:42 Ik kan dus allemaal airways, de muziek en dat soort dingen.

00:24:52 Ik kan nog hoor dat ik hier met mijn hand door een stoel heen slaan en zo.

00:25:00 Dat hebben jullie met Telefreaky Operators, met 5G en zo, reclame dingen, Centacom, toch echt niets gekraakt.

00:25:14 Ja, dat kunnen we daar en daar.

00:25:20 Ik wil geen andere mensen als een soort conference call.

00:25:30 4-way-collar, 3-way-collar, dual, ad-hoc, asymmetrische, multiplayer met het lichaam van vlees en bloednacht en bestuurder.

00:25:41 En reguleren.

00:25:43 Remote controlled.

00:25:45 Ik wil gewoon privacy en ik wil gewoon mijn dagelijks leven ongehemst.

00:25:50 Zwingt nog kunnen genieten van mijn oude dag. Ja precies.

00:25:55 Dankjewel.

00:26:00 Terwijl jullie allemaal naar Barbie of Oppenheimer gingen, ik in een clubje pedo moest uithangen waar iedereen zo mysterieus zag, dat dacht van ja, maar hij wil toch kinderen.

00:26:10 die me zo kan helpen. Iedereen heeft wel iets. Seks, dieren, de natuur, secten enzovoort.

00:26:20 Dan kunnen we, en muziek enzo, en wat er allemaal bezig zijn, kunnen wij en de vrouwen.

00:26:31 Vertrouwen in relaties, weet je wel.

00:26:35 Ik denk niet snel dat het helemaal gaat werken.

00:26:47 Вот так.

00:26:54 Het is wel pangroepen, niet met live ammunition, toch defensie.

00:27:07 Show show clips.

00:27:22 Met dat, ik weet het, kanker is ziekte man.

00:27:27 Gewoon.

00:27:30 Ik ken die vele personen nog niet, zeg maar.

00:27:35 Ja, precies. Ik weet nog wel iets meer over de pure vrouw.

00:27:40 Zeg maar waar ik het net over had, ik ben die 45 graden gedraaid, aan de leke kant.

00:27:45 Vergelijke met Jitsuk Koeders, dat bureau, zeg maar, die heading.

00:27:50 Ik weet niet, jongs.

00:28:00 Ja precies, uit geld.

00:28:04 Accenten horen het Afrikaans, zeg maar.

00:28:08 Die jongen.

00:28:10 Die man en die vrouw, ja precies die daar woont, maar die ouders hebben volgens mij ook geholpen met de verhuizing en hetzovoort.

00:28:20 van de woning zelf. Dat is een beetje kostbaar zeggen waar volgens mij zo'n woning.

00:28:30 Ja, ik kan het niet goed samenvatten of wat dan ook.

00:28:35 Die hebben fliffy katten, ik weet niet hoe die heet en dat soort.

00:28:40 Ik woon z'n kat gisteren die Jago Robo Combo enzovoort op het dak, we kijken het naar op een gegeven moment.

00:28:50 Er lag er nog, van die keien lagen er nog op dat dak, bij de dakbedekking.

00:28:54 En die flikkie kat van hen liep daar toen.

00:28:57 Een beetje moeilijk over die steentjes heen.

00:29:00 De kei, de kei, de kei, sleutelfeestjes, keifeestjes enzovoort, postbus geheim, postbus.

00:29:10 onder de kerk te regeren van John de Smetstraat die niet uit de prullenbak zakken aanhalen enzovoort.

00:29:20 Een beetje mensen onbeerend om mij de hele dag zo, ja, dag en nacht dat aan te doen, per seconde.

00:29:30 Geen remote control, battlefield, hq, special capabilities ofzo.

00:29:35 En dat gebeurt me alsnog.

00:29:38 Dus...

00:29:40 De mensheid is ten einde gekomen.

00:29:48 Dank je ziekte man.

00:29:52 Nou, dan ruik je de muziekluis in en dan kan je ook de flauwe dansen en de marine toch en alles.

00:30:01 Ook met Jaco Gautink in de buurt van de Westerpark enzo.

00:30:06 En dat hij opeens een verjaardagsfeestje met die danser.

00:30:09 Die waaah joh.

00:30:10 al agro was en gay en flamboyant in tal voor huis de tweede keer was niet zo

00:30:17 spiritueel gedrogeerd

00:30:20 Dat was meer met de homo's en roken enzovoort.

00:30:26 En dan twee keer naar het hotel geweest.

00:30:30 Please take a propel for the week.

00:30:37 Applities of Mars, Marshal the virus.

00:30:41 Paul Anthony Smith.

00:30:43 Ja, ik weet het niet.

00:30:50 Lieg ik? Nee, maar wat nou als ik niet wil afgekast.

00:31:00 op jullie genetische, kijk we nemen de tijdklokken over, de veld.

00:31:07 We hebben eigen zo.

00:31:11 Anders kan je niet meer echt opstaan, gravity enzovoort.

00:31:21 En dat krijgt als je ligt op bed enzo, dat dan...

00:31:30 Je hebt er niets anders in je lichaam, niet iets anders.

00:31:35 Je ziet opeens de kop, opeens iets anders in een soort...

00:31:39 Onder normaal...

00:31:40 Mag je er niet, terzij je seks hebt en iemand in je klarkomt of andere dingen.

00:31:46 Micropia, bio-instabeel, leuk.

00:31:50 Het idee van hetzelfde onderhoud en seks.

00:32:00 See the road.

00:32:10 Ik hoop dat jullie weten, lees het af van niemand anders en dan volgen jullie weer, vervoegen jullie.

00:32:20 Wits, eigenlijk geen wits. Daarom moet je er niet liggen, maar er stond bij de Neptunosal 108.

00:32:30 Toen ik daar net naartoe verhuisde, stond er een kanker grote boom op dat plantje, precies voor de Naturauslaan 118, en heb ik met dinosaurussen.

00:32:40 te spelen. Plastica Dinosaurus. Die, nee, niet de idee.

00:32:50 big old

00:32:52 saw or

00:32:54 Marcus

00:32:56 the

00:32:59 laboratory

00:33:00 ...dingen enzovoort, dinosaurus, Kinder Surprise Eggs, of de Android dingen, Apple, EA.

00:33:10 Apple of Android, Google of Apple, ABC of Apple, weet je, heb ik nog wel verhaal of...

00:33:20 Automatiseer ik op natuur, druk of wegje.

00:33:30 Er is een lede waarom ik zo hard geleerd heb.

00:33:35 Dat je behoorlijk hoog opgeleid bent, ondanks dat ik HBO Plus heb.

00:33:39 Minus.

00:33:41 Ja, alles wat erna eraan gehaakt wordt, ja, precies.

00:33:55 Dat is heel apart en peculiar.

00:34:06 Tchau.

00:34:16 Open house hebben ze vaak.

00:34:20 Mensen, de beurden, dat is toch ook een Keesje-achtige noem.

00:34:30 Ik vind het eigenlijk zo een vrouw zeg maar, dreamy, ja ik weet het maar ik moet te veel woorden gebruiken op de bescherming.

00:34:40 schrijven wat Paul Kreden zei precies.

00:34:52 Weet het zo, het is gewoon, kijk hier, het is geen mens hier naast de wc, ja precies.

00:35:00 Weet de zee? Nee, precies.

00:35:04 Nee, je bent boven.

00:35:15 Ja, precies. Nou, niks is meer waar de leefte, ja.

00:35:29 Okay

00:35:30 Ze stekken echt nummer dingen over, jongen.

00:35:33 Goed, dit is wel wat ik precies.

00:35:41 Ik heb echt, zeg maar, weet je wel, ik heb echt wel...

00:35:50 Er zijn bepaalde types die ik interessant vind.

00:35:53 Ik heb andere cultijnen.

00:35:55 Ik ben niet moeders mooiste ofzo.

00:35:58 Dat is een Nederlandse uitdruk. Kankersziek.

00:36:02 Maar... God, dat.

00:36:09 Ja, dat was...

00:36:10 Het lijkt niet voor mij lijden, dat is echt wel wat belang dat helpt.

00:36:21 Ja, ik weet niet waar. Eerlijk gezegd, ja precies.

00:36:31 Grazie

00:36:40 Hoe stoer dat.

00:36:50 Maar dan is het er tijdelijk zoiets, ja precies.

00:37:00 Ja precies.

00:37:03 Weet je, het hangt van jullie agenda.

00:37:06 Ik weet niet hoe jullie het willen...

00:37:08 ...viseerden.

00:37:10 Ja precies. En mix het tussen Woodenclown en The Beatles, zodat Engeland en Asom hetzelfde barrie heeft.

00:37:20 Bijvoorbeeld Yitsuka Koon dus...

00:37:22 Kijk, zo kunnen we graag dat het eigenlijk...

00:37:24 Ja, en multiplexen enzo.

00:37:30 Ik ben niet in een vana, dat is een beetje irritant.

00:37:40 dat je een operator bent, dat beter gaat een beetje in mijn huid.

00:38:02 Ja, bij het truilgebouw.

00:38:04 Met een fucking brandplusser precies in mijn ogen.

00:38:10 ja in het publiek bespijten enzovoort en dat letterlijk helemaal alsof ik

00:38:15 meest ben ofzo

00:38:17 Nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee.

00:38:20 Dus op de jobverenkelingsstraat 6-3 waren ook niet open, precies.

00:38:27 En hier ook wel eens wat.

00:38:30 En de water enzovoort van kankerziekte en dan het riool wat lekte enzovoort en dan bij die medicatiekamer dat is het hoger.

00:38:36 En dan ben je hier met hun menselijke, biologische, biomedische.

00:38:40 afval. Letterlijk vuilniszakken, de lift die stinkt dan en zo, dan krijg je dan allemaal

00:38:47 stoksoplasma binnen en zo.

00:38:50 Is dat niet biologische oorlogsvoerlijk? Want mosterdgas tijdens de Eerste Oorlog enzo staat niet echt...

00:38:55 Glyphosate? Jullie zijn bio-instabiele kankernabielen?

00:39:04 Ja, even serieus. Kijk, het was bijna heel clean. Jij vertelt er al.

00:39:10 Maar hier dus niet, biostabiel. Er zitten allemaal gevaarlijke stoffen in enzovoort.

00:39:24 Niet Star Wars kantine, want kankerlijk ben je in een half seconde via telnet en IP-configure.

00:39:30 Even 4G, 5G neer inderdaad.

00:39:46 Yeah, I like the magnetic pulse, so...

00:39:50 Voor de vijfers is dat het iemand bent aan het huis.

00:40:00 ...maar ook om te helpen, ja dat.

00:40:02 Wil?

00:40:04 Ik weet niet, die briefvrouw maakt, ja, van diegene die misschien de woord is.

00:40:11 Ik vond het niet precies hoe mannen, maar je past best wel van stijl enzovoort, maar die buurvrouw die...

00:40:21 Weet ik wel. Ja, die zie ik wel zitten ofzo, maar ik moet hier voor PBS Midden-Oosten, TBS Nederland.

00:40:30 Thuis bezorgde enzovoort, live gestreamd voor elk facet van de overheid en de bewolking de hele dag, per seconde van de dag en nacht.

00:40:41 Weet ik veel, bestuurd worden enzovoort.

00:40:43 Dan ga je een beetje moeilijk doen over wat hier in de Rijk Studio gezegd mag worden enzo.

00:40:50 Mag ik dragen, ja precies.

00:40:55 Ik heb ook een boeddhistisch trekje, als je op de helft van de trap zit.

00:41:00 Er was dus een gast die was boeddhist bij WonExpress P.V.Wijk en die zat dus op de helft van de trap waar er gerookt werd bij de deur.

00:41:10 En die zegt van ja, weet je, als iets in je dagelijks leven niet helemaal lukt, dan doe je gewoon iets anders, iets minder.

00:41:20 Als hij wil roken, dan doet hij dat gewoon als het ware.

00:41:23 Dat is een beetje de boodschap.

00:41:25 Daar was het bij cognizant, weet je wel. Dat leugde op AI, Actually Indian.

00:41:30 En Brics, tegenhanger van Europa, ze zitten allemaal hier, kijk, Europa moet wraak nemen of zo of iets.

00:41:40 En van Afrika niet vergeten, niet dat ik per se zo'n humanitaire badge moet hebben elke dag, een seconde van de dag.

00:41:50 Humanitaire corridors en dat soort dingen voor, weet ik wel, jullie hebben het luxe leefje hier.

00:41:57 Maar er was ook een...

00:42:00 en die pakken een fles rode wijbenen ze voor.

00:42:10 En toen was het van ja, ik heb ervoor gewerkt enzovoort.

00:42:12 Dat vond ik terecht inderdaad, weet je wel.

00:42:15 Want ja, toentertijd was ik best wel bewust van.

00:42:20 Nou ja, hard werken voor je centen, zeg maar.

00:42:25 Toe de tijd, ja nu nog steeds.

00:42:28 Alleen, ik sta al door...

00:42:30 En een beetje verschip elke dag.

00:42:34 En dan met een thuis situatie waarbij al die pornofilmpjes en situaties geregeld hebben.

00:42:40 Onderlinge hookups en dat soort dingen.

00:42:43 En ik krijg alleen maar de biologische afdankers enzovoort.

00:42:50 Nee, nee, nee,

00:00:40 Dus met een halve androgenige drochten, je hebt allemaal vrouwen en kinderen en mannen in je lijf gehad en allemaal gays enzo, dus dan moet je toch wel een beetje dat accepteren.

00:00:51 Dan moet je eens even op de darkweb opzoeken wat er in Rust al had of in Gitmo gebeurde of wat dan ook.

00:00:59 En dan...

00:01:00 Moet je eens een keer nagaan hoe ik dus op de John Franklin Staten 6.3, hoe 24-7 gestreamd wordt en dat het beaangedaan wordt.

00:01:10 En aan wat me afgenomen wordt enzo, waardoor het allemaal voor jullie ten koste van alles gaat.

00:01:20 Opdrangs en drugs, hoeren, speenscheiden, ik wil een meisje, ik wil een vrouw, dat weet je wel, maar hoe lang? Ja precies, niet per se.

00:01:30 man of zo, ben je het zeker, wat dan ook. Zeker ik op een paar jaren, een decade zeg maar wil ik.

00:01:40 Eigenlijk alleen maar exclusief met vrouwen en seks hebben, zeg maar.

00:01:44 En dus niet met alle vrouwen, want rangschikkingen enzovoort en genen bepalen ook.

00:01:50 Een beetje hoe je eruit ziet enzovoort.

00:01:53 Ja, daar hebben jullie digitaal van mij best wel ver mee gegaan.

00:01:57 Als in een lange afstand.

00:02:01 Je hebt het gebruikbaar.

00:02:10 een kunstpak, voorwinddildo's, femdom, al die vette dingen enzovoort.

00:02:20 6 taboes, alles moet doorbreken worden.

00:02:22 Kijk, het gaat weer over seks al even.

00:00:24 Weet je hoe dat voor mij geregeld is de hele tijd?

00:00:27 Iedereen doet mij besturen, ik hou...

00:00:30 ervaringen over dan moet ik dat samenvatten en verdedigen en verweren

00:00:34 er tegen allemaal mijn hele studie en mijn leven enzovoort wordt alleen maar

00:00:40 Gewoon per seconde dag.

00:00:42 En mijn hoofd staat bijna uit.

00:00:43 En mijn autonomie.

00:00:47 En wordt allemaal gestreamd en geproodcast.

00:00:50 enzovoort, ja. Gewoon, en die verdienen er dingen mee.

00:01:01 Dat gaat even niet weg. Dat snap ik wel uit de verstandigheden.

00:01:10 Ja, ik kan niet zo'n oordeel hebben en zelfs die denken toch weer...

00:01:20 een beetje dik

00:01:22 misvormd een beetje enzovoort en niet zo heel erg

00:01:27 eyecatching zeg maar

00:01:30 Zelfkennis, zelfspot, dus prima. Maar ik heb zoveel krachtkwaliteit.

00:01:34 Ik kan de wildste dromen waarmaken voor bijna elk persoon.

00:01:37 Alleen isolement, tv.

00:01:40 over dingen en sociaal lager de bazaar nee letterlijk ik ben ook dat is een beetje

00:01:50 Dat is creepy. Maar jullie hebben bijna elk lijp, psychologisch, psychiatrisch ding bij mij gedaan.

00:02:00 Ik geloof dat ik zeg met NL26789412 in juli 1990 en jullie gaan als desolators kijken, wij doen de...

00:02:10 remote control als een terrordrone operator.

00:02:14 Ik pak nu terug op ook wel leuke herinneringen en kan het gewoon prima zien enzovoort.

00:02:22 Alleen de dingen die ik zelf prima vind, ja precies.

00:02:30 In Resident Evil Code Veronica, met die FNV enzovoort, vroeger wel gespeeld enzovoort.

00:02:40 waarop chemische wapens en ik gewoon als persoon in kamer 031 zit 130.

00:02:50 en John Franklinstraat63 enzovoort, omdat er baas boven baas is,

00:02:56 alleen voor mij bestaat er geen baas boven de baas.

00:03:00 Nee, dat is niet god of ander ook, maar er bestaat gewoon letterlijk niks.

00:03:04 En dat betekent niet dat het voor jullie individueel allemaal dat waar is.

00:03:14 Thank you.

00:03:20 Obrigado.

00:04:08 Thank you.

00:04:15 ありがとうございました

00:04:20 Ja, ik zeg wel even met de duurtaal aan de rechterkant, dus die kant duurt precies over vier, zegt dat is daar.

00:04:38 Thank you very much.

00:04:48 We've got him a rest of the floors that you do.

00:04:52 So we'll be able to act.

00:05:02 Dat we meteen de draaien cornyoze effecten gaan.

00:05:10 Ik ben speciaal wel opgejaagd met planning en zeg maar ook aan het maken zelf en meewerken over hoe schouder de mensen.

00:05:20 Mensen, toeganggeven of troepen verplaatsen enzovoort.

00:05:25 Weetjes, weetjes, weetjes bij hen enzovoort.

00:05:30 Dat weet ik ook al zo, dat zie je dingetje enzovoort.

00:05:36 Ofwel...

00:05:40 Eten nodig hebben, materialen enzovoort, situaties waarin bepaalde dingen gevoeld waren enzovoort.

00:05:52 이란...

00:06:00 Stay in the tight bed, I like it all, it's not still, it's still late for seats.

00:06:17 the United States of America.

00:06:24 917-4-0-0-0-0-0-0-0-0

00:06:31 Obrigado.

00:06:50 So, Elvin Country Gambit, The Queen's Gambit, Netflix and so forth, and then in Brazil, you could

00:06:58 it actually go and so forth.

00:07:00 Ja, ik kan hier precies met een aanloopje schaken, volgens mij net met een paar boelopdrachten.

00:07:10 Dan tap ik een chat GPT in, maak een abonnement voor PEP, zelfs betaald.

00:07:14 Volgens mij kan ik DeepMind weer inhalen en is ervoor makkelijk.

00:07:20 Gewoon even met wat inspiratie en verschillende muzen bij hem inderdaad.

00:07:30 Is dat geweldig?

00:07:33 Er zijn manieren waarop ik zeg maar bij ontmoede vrouw binnen zou kunnen proberen.

00:07:43 I mean, that'll be creepy or creepy or hook in the airplane.

00:07:47 You can do it all at home or so.

00:07:50 Ja, dat maakt mij niet uit.

00:08:00 Dat is gewoon, weet je wel, dat is ook, wie ga je doen? Ja, die ga je doen, precies.

00:08:12 I appreciate it.

00:08:13 Yeah.

00:08:14 Work.

00:08:15 Yeah.

00:08:16 Yeah.

00:08:18 You got your own three thousand.

00:08:20 Ja, dit is nog snel een aardig volwammer, maar ook in de interventer en precies in de ruimte tussen de tuin.

00:08:33 Thank you very much.

00:08:44 Hier ben ik, bedankt, bedankt.

00:08:47 Tot de volgende keer.

00:08:52 Area, Area, Area, Area, Area, Area, Area, Area, Area, Area, Area, Area.

00:09:00 De batterij en de batterij is op, maar het is niet echt warm of zo.

00:09:10 You need to hold my hand to get a little bit of method acting.

00:09:23 Uitbrengmanagement team S op mijn link.

00:09:30 Nee, maar rechter, onderarm. Het was een behoorlijk rechtse tijd.

00:09:36 Ik had een 7 voor een concentratiekamp tekenen.

00:09:40 op Trias Popelstraat

00:09:43 naast de Beukenstraat

00:09:44 letterlijk in het verlengde van de Beukenstraat waar ik als kind gewoond heb

00:09:48 toen ik er op een manier verhuisde

00:09:52 Ja, ik sla net over dat ik eerst op de beuken sta, vanuit Assendele voorbij.

00:09:58 Als je dat plot...

00:10:00 op Google Maps enzovoort.

00:10:02 Dan krijg je een soort sikkel, volgens mij.

00:10:10 Dit is een beetje Spaceshotemporal uit mijn mouw geschikt.

00:10:21 Als je geospatial cloud anchor, zeg maar, met ARCore of wat dan ook, of Google of Niantic,

00:10:30 of wat dan ook, bij de langitude gps, dan zou het kunnen dat Porsche

00:10:40 I'm just going to put it in there and put it in there.

00:10:50 And middleopvang team, as it sees, they have sexuality captured.

00:11:02 Dan kan ik vroegen, nee niet per se, hoezo kan je dat zo normaal, je bent een robot, nee, nee, nee, ik ben geen robot.

00:11:10 Belast het maar. Ik weet het niet.

00:11:15 Er waren eerst, zeg maar, redenen dat ik Wargame zou spelen en...

00:11:20 Dat er in de military industrial complex toen ik nog zeg maar voor cognizant werkte dat ik dacht.

00:11:27 Oké, kutzaai.

00:11:30 Alle maatschappij, de civiele burgermaatschappij, heeft niet echt zegmaar toegang tot kunning en technologie.

00:11:38 Kunnen we er misschien nog niet mee omgaan?

00:11:40 En de koninklijke adel, zeg maar, heeft al eeuwenlang kennis over, nou ja, het verstopte kunst, zeg maar.

00:11:51 Achterover gedrukt. Dus wat nou als ik echt innovatie wil teweeg brengen enzovoort.

00:12:00 Nou, nu zijn we in het hele, ja precies.

00:12:10 Gaat het niet heen?

00:12:15 Kun je...

00:12:17 Nee. Nee, ik wil niet iemand anders.

00:12:20 alles kunnen. Sperma's zeg maar opblikken of wat dan ook. Het is een klein beetje

00:12:26 in de komende raycasting dingetje geworden en zo.

00:12:30 Waardoor jullie een raar skewpelt hebben van mijn eigen, ik zeg vanille, maar heel situationeel met mensen en musicen.

00:12:41 Best smooth zou kunnen zijn, alleen dat niet helemaal meer.

00:12:50 Ja, dat is uitbesteden aan jullie.

00:12:54 Kijk, ik denk nu precies weer terug gaan een beetje aan...

00:12:57 Oké.

00:13:00 Er komen telefreaky operators en die nemen de suave seksualiteit wel over om even te bewijzen dat ze...

00:13:10 Weet ik veel. Het sociale organisme en de looks enzo en de seksualiteit wel verdedigen enzo.

00:13:18 Helemaal prima.

00:13:20 de medische afvalpak moet eerst opgelegd worden en niet eerst opgelegd worden, dat moest al lang op.

00:13:28 Ja, dat is een foetus!

00:13:31 Ja, abortus enzovoort, in het ziekenhuis enzovoort.

00:13:35 Denken jullie dat ze het gewoon in de grijze of de groene bak gooien?

00:13:40 De prullenbakken die iedereen van de gemeente krijgt, niet in Amsterdam willen hebben van die mooie bakken waar iedereen goed mee omgaat met die ijsklaar.

00:13:50 Enzovoort.

00:13:51 Ik schrijf het arm.

00:13:55 Maar in de zaastat.

00:13:58 Enzovoort.

00:14:00 Wij in ieder geval hadden we eerst de grijze en een groene bak, een klikko.

00:14:06 Nou, eh...

00:14:10 De ene voor letterlijk biologisch afval, maar het is niet biomedisch afval, bioherstel.

00:14:20 dingen enzovoort. Als jullie nou allemaal in een keer pat, pat, boom, sterven ofzo,

00:14:27 door de tenale surface attack, omdat jullie allemaal...

00:14:30 brain-computer interface operators, telefreaky operators zijn.

00:14:33 Ik kan niet een MRI in, want ik weet zeker dat ik dan dood ga.

00:14:40 Ja, maar dat hoeft niet, want jullie hebben een vitals en een dashboard en zo, via een control panel.

00:14:52 Weet je?

00:15:00 Ja, precies. That failure will come back to haunt you down the fucking road.

00:15:05 Kusper rollen met een gasmaarskop enzo, neurotoxins, portal 2, source engine.

00:15:10 John Fragnestad 6.3 was not TNO's oversight, or aternet, or the Kei.

00:15:20 Mijn thuisleven met Asemitz, de andere Marjoff enzovoort en dan op een gegeven moment er weg.

00:15:30 Ja, ga als het ware dat jullie dat opbouwen, die spanning.

00:15:36 Ik heb er nooit misgebruikt en geslagen enzovoort.

00:15:40 Bij alle accounts zijn in ieder geval seksueel best wel veel dingen oké.

00:15:46 Te veel dingen eigenlijk.

00:15:50 En dan de schizem met de psycholoog waar ze heen ging, uiteindelijk na veel aandringen.

00:16:01 Wat me niet in dank afgenomen werd door haar ouders, zeg maar.

00:16:06 Mijn ex. Mijn ex.

00:16:10 Een beetje privacy enzovoort. Weet je hoe moeilijk het is om korte wegen te vinden en afkorten enzo.

00:16:17 En dus kennis te hebben.

00:16:20 Waar jullie niet allemaal mogen beschikken en toegang tot alles enzovoort.

00:16:24 En ik pak terug over tijdspannes van best wel veel.

00:16:30 jaren zeg maar gewoon. Ja kijk, al je herinneringen van vroeger enzovoort, toen geelde je op die paardenstaart van jaren vinken.

00:16:40 Er zat ik daar met mijn jasje aan, naast Koen, waar schijnt tegenover de komeet te zitten.

00:16:50 enzovoort, maar jammer je mag ook binnenkomen. Heel creepy enzovoort. Toen ik

00:16:55 nou, op de komeet zat enzovoort.

00:17:00 En kijk, jeugdherinneringen weer terug.

00:17:02 Kijk, dit is een traumaatje en we moeten allemaal iedereens jeugdherinneringen bijhouden om alles biometrisch te verifiëren.

00:17:10 Kijk, nu wordt het kinderporno-achtig.

00:17:14 Toch wel pedo, toch? Torpedo.

00:17:18 Dan is iedereen vrij.

00:17:22 De wereld is groter dan alleen lokaal in Jeroen en hier.

00:17:31 Ik weet het veel. Dutchwashing.

00:17:40 A man completely outside the system.

00:17:43 A final solution, the cure.

00:17:47 Weet je dat ik heel veel van...

00:17:50 post-apocalyptische dingen hield

00:17:51 gewoon letterlijk als persoon zeg maar

00:17:54 ik toch wel

00:17:57 en dan 2006 789 420

00:18:00 In juli 1990.

00:18:01 Semper Fi.

00:18:05 En de blonde buurvrouw.

00:18:07 Niet zeg maar de schuine hoeken van alles enzovoort.

00:18:10 en zo vast een leuke partner hebben enzovoort maar gewoon ik vind je geen

00:18:20 behoorlijk aantrekkelijk naar lijk

00:00:00 Gas League in de tunnel tussen Amsterdam, Sloterdijk en Zaandam.

00:00:06 Precies een keer Turing van Westerpark.

00:00:10 terug naar huis wou bidden voor een vijf

00:00:15 toen was er een gastlek precies

00:00:20 en daardoor leed de trein niet eens

00:00:23 de Nederlandse spoorwegen en zo

00:00:26 dus toen moest ik met een taxi terug met iemand die helemaal para werd van die

00:00:30 niet vertrouwde en zo en die vlakbij de zaangolf zeg maar bij de weg tussen de voorbouw

00:00:40 Kromen die zeg maar in de middel.

00:00:44 En de zaal van het politiebureau vlak daarna.

00:00:49 Ja.

00:00:50 Die toen de taxi's te opzetten en de auto uitrenden.

00:00:55 Waar loopt provinciaal? Ik weet niet of dat is de A8.

00:01:00 En daarna werd ik bij de voorbouw afgezet.

00:01:10 En toen heb ik met 20 euro ofzo, wat ik nog over had, hem de rest laten betalen.

00:01:16 Want ja, ik moest toch terugkomen ofzo.

00:01:20 Kijk, dan ben je dus een slecht personensupport.

00:01:24 Al die situaties zijn uitgelokt en iedereen wist ervan in de drama mee.

00:01:28 Dus per dag en nacht.

00:01:30 per seconde, ik weet het goed, toch?

00:01:44 Cascade, yeah, precisely.

00:00:00 Yeah, yeah, Townshend Protocol, Blacklist, Nebel, Nebelwerver, Townshend.

00:00:10 The townships in Africa is full.

00:00:20 enzovoort van het lijkt mij best intimiderend

00:00:25 mensen in Zuid-Afrika

00:00:30 Met de apartheid enzovoort door de rigveld, wordt het nou de blanke man onderdrukt?

00:00:38 Of de...

00:00:40 Mensen, ja precies, met een andere uitskleur.

00:00:44 Want volgens mij werd een hele hoop landgoed, werd land, ja.

00:00:50 Afgepakt door de, laten we zeggen, Afrikaanse negers.

00:01:00 Ik weet niet of dat nog steeds aan de hand is, maar jullie met je multiculturele regenboog, we redden de wereld, koopbal.

00:01:10 Altijd koele plee, waaier, onbespoten, genetisch niet gemanipuleerde, biologisch geteelde.

00:01:20 Het is een klein beetje een atoombom.

00:01:24 Dankeschik, het maakt dus niet uit wat we zeggen.

00:01:30 of wat dan ook precies. Dus volop. Gewoon genieten van het leven samen. Hopelijk kom ik bij vrouwen misschien

00:01:40 De buurman tegen enzovoort, ik zou graag elkaar een beetje beter leren kennen, gewoon onder zes ogen of vijf ogen of wat dan ook.

00:01:50 dog.

00:00:10 Gewoon, ik ga niet uitleggen hoe ik weet dat ik niet alleen, gewoon nog alleen.

00:00:16 En dat ik ben in de hele tijd.

00:00:21 Wel. Op de jobverganisatie S3 was het al. Oké, dan hebben we baanbrekende research, zeg maar.

00:00:30 dat is zes en een half jaar geleden

00:00:33 en daarna moet het simpel uitgelegd worden

00:00:40 Huisblijvers, zodat iedereen een weg ernaartoe heeft.

00:00:44 En dan wordt hier door Yitzke Kounders de hele tijd mijn hand geforceerd.

00:00:50 Om letterlijk uit te leggen en anders maar experts erbij te halen waarom ik exacte of...

00:01:00 architectuurdingen, digitaal, paradigma's enzovoort.

00:01:04 Gewoon, ja.

00:01:10 Ik werd ondervraagd.

00:01:20 Tussen, ik teld het dus, edities en zo toen, en een beetje seksueel misbruikt.

00:01:30 in een soort kill room met alle middelen enzovoort

00:01:33 en dan na jaren

00:01:36 door de GGZ kliniek enzovoort ook verhuurd enzo

00:01:40 Ik ben niet een cruissadist, ik ben geen mengomer of wat dan ook.

00:01:48 Dat.

00:01:50 Ik weet niet wat jullie allemaal in het dagelijks leven gedaan hebben in de testtijd, maar ik ben niet per se op zoek naar alle moeilijke mensen, ja precies.

00:02:00 Dat.

00:00:00 Toen weerste gepakken? Ja, dat is hetzelfde als de coach.

00:00:10 It's late.

00:00:11 Yeah.

00:00:13 Yeah, it's really good.

00:00:22 I think that the Lord has got us on the planet.

00:00:31 Thank you.

00:00:41 Gracias.

00:01:00 Yeah.

00:01:10 Ja, das war schön.

00:01:21 I'll keep you late, it's good, yeah, see, okay, cool, yeah, see, then I'm like drinking sugar open, then.

00:01:30 of some lights festival for blazer cool in the brici digital yeah

00:01:40 De buurman en de buurvrouw zijn goudbaar weer, dus je kan het zien.

00:27:20 Thank you.

00:56:21 Nu komt de aanraker en die is helemaal geweest.

00:56:27 De aanraker is gemaakt door enzovoort.

00:57:22 Yeah, see, it's cool.

00:57:36 Okay

00:57:40 Dat. Het is nog nooit zo'n vrije plek geweest dan dat.

00:57:50 Ben jij letterlijk zeg maar, weet je wel?

00:57:55 Nee.

00:58:00 So after that, there it is.

00:58:32 Too soft, ready to fight?

00:58:38 Yes.

00:58:40 We're going to stop it, even if it costs our lives, we're going to stop it.

00:58:46 We believe that we even owe it to the black men to stay here.

00:58:50 Eddie von Maltitz was once Terra Blanche's head of security.

00:58:54 He formed his own breakaway Afrikaner resistance because he thought Terra Blanche too soft.

00:59:00 ready to fight? Yes, we're ready to fight. There's no other way.

00:59:06 Eddie Von Maltitz says that he has thousands of followers, all of them.

00:59:10 as well-armed as he is.

00:59:17 Until a few days ago,

00:59:19 Eddie was equipped

00:59:20 with belt-fed machine guns.

00:59:22 These were confiscated after he had opened fire

00:59:25 on the security police.

00:59:26 Point your index finger.

00:59:28 Von Meltitz says he mistook

00:59:30 police for guerrillas of the african national congress he now faces a charge of attempted murder

00:59:38 how many blacks have you

00:59:41 No, we don't say anything.

00:59:43 Yes, no, we don't.

00:59:49 Would you support a QD?

00:59:50 Yes, I think I'll

01:00:00 It's a very simple question it's straight you want to overthrow the government

01:00:05 The government's gonna overthrow itself. It's gonna destroy itself. So what's South Africa need?

01:00:10 is a white coup d'etat.

01:00:11 Yes, and a white dictator.

01:00:13 Oh, give Africa what it is.

01:00:15 What's your position on Mandela?

01:00:17 Notwithstanding these peaceful surroundings.

01:00:20 Robert von Tonda is another extreme right-winger raising a private army.

01:00:25 If the time comes and we have to resist by armed force, we are confident of...

01:00:30 support of the majority of the south african police and the majority of the south african army

01:00:35 the reason is because they are poor boys they are people

01:00:40 defy the government here in the central business district of pretoria the south african capital

01:00:50 It is, in fact, an armory of the South African Air Force.

01:00:53 Last month, a chap called Pete Rudolph,

01:00:56 the deputy leader of one of the right-wing political parties here,

01:01:00 Got his truck, drove it up the ramp to the first floor and simply loaded it up with light and medium-weight weaponry, ammunition, and then drove out again.

01:01:10 There's been an inquiry into the theft, but Rudolf hasn't been caught, and no arms have been recovered.

01:01:16 That the near lunatic right in this country could have such easy...

01:01:20 to the Air Force Arsenal is a terrifying circumstance.

01:01:25 What I say is this, once the Boos State is re-established,

01:01:28 I think we build a nice monument...

01:01:30 for Peter Rudolph. And these people will probably help him build it. The whites of Felcom.

01:01:40 Velcom is one of South Africa's richest towns.

01:01:43 30% of the country's gold is produced here by 350,000 black miners.

01:01:50 who mostly live in Tabong, a shanty town five kilometers outside of Veldon.

01:01:58 Tabong is little more...

01:02:00 than a holding camp for the black labor that services the white town if you get some idea

01:02:10 the feelings of the affluent whites who run Velcom when you see what they did to their

01:02:14 previous mayor 12 months ago. One of the things that he did was to allow blacks to participate.

01:02:20 in the local paraplegic game and for his troubles they tarred and they feathered him

01:02:26 there are 50 000 whites in vilken and tonight

01:02:30 The man that many of them regard as their saviour, Eugene Ter Blanche, brings his Fourth Reich Roadshow to town.

01:02:41 Eugene Tourablanche's message is red hot, especially when it comes to the African National Congress.

01:02:51 see are a bunch of communist inspired murderers financed by the communists in the past

01:03:03 Not to fight soldiers or security force, but to maim and to kill.

01:03:10 ...to protect them from that feared outbreak of rape and plunder, the AWB runs...

01:03:20 night patrols through the streets of Velcroft.

01:03:30 And what would happen if you found a black on the street now?

01:03:34 Just ask him to go back to his home.

01:03:36 And what if he said no?

01:03:40 This sort of behavior does seem to have the support of most of the whites in the town

01:03:45 What do you think of the state of law and order here in Calgary no?

01:03:50 it's not so good they must do it like in cape town in nine o'clock or ten o'clock there was

01:03:56 nothing no no blacks on the streets some people

01:04:00 say that the blacks here should be put away at nine o'clock at night would you agree with that

01:04:03 oh yes definitely yes nine o'clock or ten o'clock nine o'clock nine o'clock and what time should they

01:04:09 be let out

01:04:10 the morning well it all depends i mean you can't let him out too late because i gotta do work as well

01:04:20 50,000 whites pray that the 350,000 blacks will stay in their place.

01:04:30 ...in their place in the township, the 350...

01:04:40 30,000 blacks also pray, but for a very different result.

01:04:53 Please bless those people that don't have food today in Jesus' name. Amen.

01:04:57 Eddie von Meltitz is also a good...

01:05:00 Christian, his whole life, his family's whole life is governed by God and governs.

01:05:10 Has it ever been suggested to you by anybody that you might play a role in leading this country?

01:05:17 Yes, I do believe it. I believe.

01:05:20 Somebody has suggested it, and this is why I'm doing it.

01:05:23 Who was it that suggested it to you?

01:05:27 Was it God who suggested that you might play?

01:05:30 leading South Africa.

01:05:33 I believe that God has called me for a purpose.

01:05:40 that purpose is to get rid of this man nelson mandela the leader of the african national congress

01:05:48 did you discuss with your colleagues the possibility

01:05:51 and executing it there are some guys that discussed it definitely it was planned we stopped it why

01:05:57 if it was inhumane

01:06:01 Because it was thousands of people that would have been destroyed and we didn't want to do it because of one man.

01:06:07 But Eddie still believes that Nelson Mandela...

01:06:10 Yes, I believe he does. I believe he deserves a bullet because he's betrayed even his own people.

01:06:15 Have you got a list?

01:06:16 Yes, we do have a list.

01:06:18 Are there more blacks or whites on the list?

01:06:20 and part of that purpose

01:06:24 is to get rid of this man

01:06:26 Nelson Mandela

01:06:27 the leader of the African National

01:06:30 I believe that God suggested it to you.

01:06:34 Was it God who suggested that you might play a role in leading South Africa?

01:06:39 Yes, I felt me believe it.

01:06:40 Affirming believe that God has called me for a purpose.

01:06:46 And part of that purpose is to get rid of this man.

01:06:50 nelson mandela the leader of the african national congress did you discuss with your

01:06:56 colleagues the possibility of going down to his meeting in durban and executing

01:07:00 There are some guys that discussed it. Definitely it was planned. We stopped it.

01:07:04 Why?

01:07:05 We believe it was inhumane because it was thousands of people.

01:07:10 That would have been destroyed and we didn't want to do it because of one man.

01:07:14 But Eddie still believes that Nelson Mandela deserves a bullet.

01:07:18 Yes, I believe he does. I believe...

01:07:20 He deserves it because he's betrayed even his own people.

01:07:22 Have you got a list?

01:07:24 Yes, we do have a list.

01:07:25 Are there more blacks or whites on the list?

01:07:30 Right alongside Eddie, supporting his every move, is his 16-year-old daughter, Jackie.

01:07:40 Life for this girl is a sweet M16.

01:07:50 What do you feel like when you fire it?

01:07:52 Uh, fire steel.

01:07:53 Nice.

01:07:54 Feels nice, doesn't it?

01:07:55 Terrible.

01:07:56 There's barely a white man or a woman in South Africa who hasn't picked...

01:08:00 Since two arms have barely a gap between them.

01:08:10 I'm going to have a philosophical time slot over to train in the world.

01:08:16 It's a bastard.

01:08:20 A new South Africa, one where blacks will, for the first time, have some say in how it's run.

01:08:32 Would you allow a white to marry a black?

01:08:34 No, unfortunately not.

01:08:37 Tell me, in a boar state, would a white be allowed to marry a black?

01:08:40 Yes, but then he'll have to move in Portugal.

01:08:45 Not allowed to stay in the country.

01:08:47 Yes, because we don't mind only Jews.

01:08:50 The Jews are welcome to stay if they keep their hands out of politics.

01:08:54 Tell me, do you consider blacks to be genetically inferior to whites?

01:09:00 Yes, I do believe it. I believe there is a sub-race, but I don't hold it against him.

01:09:03 No, no, no.

01:09:04 You know, it's just the same as I often tell them.

01:09:06 I believe a horse can run faster than me. That doesn't mean I must hate the horse.

01:09:10 All of which must be of some comfort to the nation's 28 million workers.

01:09:22 Change is happening in South Africa right now.

01:09:24 Peace and peace.

01:09:25 Rapid change.

01:09:26 It is the illusion of shared identity to the sound of Carter.

01:09:30 in this country, to stop that change dead in its tracks.

01:09:37 It might be a guerrilla war, it might be a coup d'etat.

01:09:40 It might be a full-blown civil war.

01:09:42 We are determined we're not going to run.

01:09:45 We regard ourselves as Africans, just white Africans.

01:09:48 We are the white tribe.

01:09:50 We owe it to Africa to stick around.

01:10:00 violent threats from the far right

01:10:02 extremist groups, the end of apartheid

01:10:04 was achieved.

01:10:06 In 1994, the country

01:10:08 held its first multiracial

01:10:10 General elections, and Nelson Mandela became South Africa's first black president.

01:10:32 They may sound like Nazis, but they say they are not.

01:10:41 Eugene Turblanche is the founder of the AWB, the Africana Resistance Group.

01:10:50 It's been sent to shine light into the heart of the dark continent.

01:11:01 This land is the God's land, cannot give God's land to Mandela.

01:11:10 I love you.

01:11:11 I love you.

01:11:12 I love you.

01:11:13 I love you.

01:11:14 I love you.

01:11:15 I love you.

01:11:16 I love you.

01:11:17 I love you.

01:11:26 I'm paging across Germany.

01:11:27 If I was, I probably would have been frightened.

01:11:31 coming to this meeting tonight.

01:11:33 Oh, my gosh.

01:11:34 There is a lot of places that are truly

01:11:36 terrifying, even to be alongside.

01:11:38 Oh, my God, I will be alone.

01:11:40 On their side, are they sure as one thing have got guns in their doors?

01:11:45 These are the white racists at their worst.

01:11:48 Listen to them.

01:11:50 The poor nation, they are preparing themselves for long and disappearing.

01:12:00 That was a blast.

01:12:04 She probably bought the outside world things with him.

01:12:06 Neo-Nazi, fascist, that sort of thing.

01:12:08 Oh, that's a bunch of...

01:12:10 Why should I worry about the fascism?

01:12:14 I'm a bull, and I want my land back, and my intention is to...

01:12:22 I can't live without freedom, no, I'd be a Nazi if I just want my own country.

01:12:34 The old country away, a war can stay any place in the world.

01:12:43 C'est bien, c'est bien, c'est bien, c'est bien, c'est bien, c'est bien, c'est bien, c'est bien.

01:12:50 Hanta Black

01:12:52 Hanta Black

01:12:55 Some of the most beautiful

01:12:57 blue

01:13:00 I've got four of the eyes, three of the eyes, four of the eyes, four of the eyes, four

01:14:54 No, we don't say anything.

01:14:56 Yes, we don't know.

01:15:00 Would you support a coup d'etat, yes sir, die, and systemic rainbow washing mapped out through the lens of the framework.

01:15:11 Yes, I think I would.

01:15:13 It's a very simple question.

01:15:15 You want to overthrow the government?

01:15:17 I believe the government is going to overthrow you.

01:15:20 So what South Africa needs is a white coup d'etat.

01:15:24 Yes.

01:15:28 What's your position on Mandela?

01:15:30 Notwithstanding these peaceful surroundings, Robert Fontonda is another extreme right-winger raising a private army.

01:15:40 We have to resist by armed force.

01:15:41 We are confident of the support of the majority of the South African police

01:15:45 and the majority of the South African army.

01:15:48 And the reason is because they are...

01:15:50 They are poor boys. They are people. They would defy the government.

01:15:53 Thanks for letting me do this.

01:15:55 The implausibles that might seem, the bank building behind me here in the central...

01:16:00 business district of pretoria the south african capital it is in fact an armory of the south

01:16:05 african air force last month a chap called pete rudolph

01:16:10 leader of one of the right-wing political parties here, got his truck, drove it up the

01:16:14 ramp to the first floor and simply loaded it up with light and medium-weight weaponry.

01:16:20 ammunition and then drove out again now there's been an inquiry into the theft

01:16:25 but rudolph hasn't been caught and no arms have been recovered let the near

01:16:30 Their lunatic right in this country could have such easy access to the Air Force arsenal

01:16:34 is a terrifying circumstance.

01:16:37 What I say is this, once the boost...

01:16:40 was re-established, I think we'd build a nice monument for Piet Rudolf.

01:16:50 Velcom. Velcom is one of South Africa's richest towns. 30% of the country's gold is produced here by

01:17:00 350,000 black miners who mostly live in Thabon, a shantytown five kilometres

01:17:07 outside Vilk.

01:17:11 London is little more than a holding camp for the black labour that services the white town.

01:17:20 Do you get some idea of the feelings of the affluent whites who run Vilcum when you see what they did to their previous mayor 12 months ago?

01:17:30 One of the things that he did was to allow blacks to participate in the local paraplegic games.

01:17:35 And for his troubles, they turned and they feathered.

01:17:40 50,000 whites in Wilkham out as their saviour, Eugène Ter Blanche, brings his 4th Reich Roadshow to town.

01:17:51 I mean, I don't think they're the thing.

01:17:54 Eugene Terra Blanche's message is red hot.

01:17:57 Oh, why are you the same for high five?

01:18:00 especially when it comes to the african national congress

01:18:04 the anc are a bunch of communist inspired murderers

01:18:10 financed by the communists in the past,

01:18:12 owned by the communists, trained by the communists.

01:18:16 No?

01:18:20 security force but to maim and to kill and to rape women and children

01:18:24 to protect them from that feared outbreak

01:18:30 and plunder, the AWB runs night patrols through the streets of Dortmund.

01:18:41 What happened if you found a black on the street now?

01:18:46 I was asking him to go back to his home.

01:18:48 And what if he said no?

01:18:50 This sort of behavior does seem to have the support of most of the whites in the town.

01:19:00 here in Wilcox? No, it's fine. It's just the blacks, it's not so good. They must do it like in Cape Town in 9 o'clock or 10 o'clock. There was nothing.

01:19:10 No blacks on the streets.

01:19:12 Some people say that the blacks here should be put away at 9 o'clock at night.

01:19:15 Would you agree with that?

01:19:16 Oh, yes, definitely, yes.

01:19:18 9 o'clock or 10 o'clock?

01:19:20 Nine o'clock, nine o'clock.

01:19:21 And what time should they be let out in the morning?

01:19:24 Well, it all depends. I mean, you can't let them out too late because I've got to do work as well.

01:19:31 Velcom's 50,000 whites pray that the 350,000 blacks will stay in their place.

01:19:50 their place in the township the 350 000 blacks also pray but for a very different result

01:20:06 Please bless those people.

01:20:07 They don't have food today in Jesus' name.

01:20:09 Amen.

01:20:10 Eddie von Meltitz is also a good Christian.

01:20:13 You have this piece.

01:20:14 This is very nice.

01:20:16 His whole life, his family's whole life is governed by...

01:20:20 God and guns, has it ever been suggested to you by anybody that you might play a role in this country?

01:20:30 Yes, I do believe it. I believe somebody has suggested it and this is why I'm doing it.

01:20:36 Who was it that suggested it to you?

01:20:40 Was it God who suggested that you might be leading South Africa?

01:20:44 Yes, I firmly believe it. I firmly believe that God made me for a purpose.

01:20:52 Part of that purpose is to get rid of this man, Nelson Mandela, the leader of the African National Congress.

01:21:01 Did you discuss with your colleagues the possibility of going down to his meeting in Durban and executing him?

01:21:06 There are some guys that discussed it. Definitely it was planned. I stopped it.

01:21:17 It was a one man.

01:21:20 But Eddie still believes that Nelson Mandela deserves a bullet.

01:21:24 Yes, I believe he does.

01:21:25 I believe he deserves a bullet because he's betrayed even his own people.

01:21:28 Have you got a list?

01:21:30 Yes, we know the list.

01:21:31 Are there more blacks or whites on the list?

01:21:32 Half, half.

01:21:33 Right alongside Eddie, supporting his every move, is his 16-year-old...

01:21:40 daughter Jackie. For this girl is a sweet MC.

01:21:50 What does it make you feel like when you're firing it?

01:21:56 Nice.

01:21:59 Feels nice.

01:22:00 Yes.

01:22:01 There's barely a white woman in South Africa who hasn't access to arms.

01:22:10 have barely a gun between them.

01:22:20 would be mincemeat but they're counting on the magic of Nelson Mandela to create a new South

01:22:26 Africa one where blacks will for the first time

01:22:30 have some say in how it's run.

01:22:34 In a boor state, would you allow a white to marry a black?

01:22:40 No, unfortunately not.

01:22:42 Tell me, in a boar state, would a white be allowed to marry a Jew?

01:22:50 not allowed to stay in the country yes because we don't mind ornery Jews and the

01:23:00 do you consider blacks to be genetically inferior to whites yes i do believe it i believe there is

01:23:14 That doesn't mean I must hate the horse.

01:23:15 You know, I often speak like that to them.

01:23:18 All of which must be...

01:23:20 some comfort to the nation's 28 million workhorses change is happening in South Africa right

01:24:50 Nice to meet you.

01:24:52 Nice to meet you.

01:25:11 South Africa is a country shaped by decades of conflict and ideology.

01:25:15 That history continues to shape life today.

01:25:18 Some movements born out of that history

01:25:20 never truly disappeared. They simply faded into the background. One of them is the Afrikaner

01:25:25 Weerstandsbewegen, better known as the AWB. Founded in the 19...

01:25:30 1970s and led for years by eugene de blanche the awb became one of the most controversial

01:25:35 and feared groups in south africa's history to some it is remembered as a vital

01:25:40 far-right extremist group. To others, it is seen as an organization focused on

01:25:43 protecting Afrikaner identity and culture. Many people believe the AWB

01:25:48 disappeared years ago, but in 20...

01:25:50 1026 it still exists. I wanted to understand what the AWB looks like today

01:25:54 So I contacted their current leader and after speaking on the phone he invited me to attend a

01:26:00 meeting between the senior members in Fentersdorf, the town where their organization is based.

01:26:05 I traveled there to see who is still involved, how the group has changed over time, and what role

01:26:10 any it still plays in South Africa today we've just arrived in Fentersdorp to do

01:26:15 a documentary about the RV appear and I've been wanting

01:26:20 to do this for a really long time.

01:26:30 And he was very interested.

01:26:32 He didn't seem to mind at all.

01:26:33 And he said that there is a big meetup of figures in the art of fantasy.

01:26:41 We're going to be spending the day at their headquarters tomorrow.

01:26:44 We're going to do some interviews with some of the leaders and then some of the lower level figures as well.

01:26:50 I don't really know what to expect. We're kind of going in blind. I've done as much research and prep as I can. It could go very well.

01:27:00 I think we're just gonna have to jump in and see how it goes right now

01:27:03 We are sitting outside of a bar and we are gonna grab a beer so we'll see you later

01:27:10 What's up bro?

01:27:12 How's it going?

01:27:14 I wanted to know one.

01:27:17 Do you know how to turn this place closer?

01:27:20 until you're finished.

01:27:24 So you're finished.

01:27:26 What happened? So you're finished?

01:27:28 So it goes the whole night?

01:27:30 And are you from Tentersdorf?

01:27:34 Yeah.

01:27:35 Okay, okay cool.

01:27:36 No, no, go, go, go, go.

01:27:38 There's no shit.

01:27:40 and can we film yeah you can is it okay okay thank you i didn't understand anything but thank you

01:27:49 appreciate it

01:27:50 As soon as we arrived at the bar, things felt tense.

01:27:53 It was clear that people had been drinking all night

01:27:55 and we didn't really feel comfortable filming much.

01:27:57 You have a very, very big camera here.

01:28:02 How's it going, sir? Josh, where are you from Cape Town?

01:28:05 Thank you.

01:28:06 Can I tap on?

01:28:07 Um, thanks man.

01:28:10 We've gone into some dangerous places, but...

01:28:20 This one just feels different. The one guy, he was like tapping me on the shoulder and he was like, let's not hang around here too long. I am very nervous.

01:28:31 drink, then headed to our accommodation to check in and get some rest. The next

01:28:35 morning we woke up for our first proper day in Fentersdorp. We weren't able to get a hold of the

01:28:40 So before heading to their headquarters, we decided to spend some time in the town speaking to people and doing a few interviews to get a better sense of how prominent the AWB still is in the area.

01:28:54 Do you guys know where the AWB headquarters is?

01:28:57 It's AWB.

01:28:58 AWB.

01:29:00 Yeah, Javier Beer. Have you ever heard of the Javier Beer?

01:29:10 But they're still here. You never heard of it before. Okay. Thanks guys

01:29:17 So we're doing a document

01:29:20 on the AWB, the RVR beer, you know the RVR, you've never heard of them before, seriously, would you mind if we did

01:29:30 quick interview awesome so are you from Fendersdale yes and what is life like

01:29:38 here

01:29:40 Very good.

01:29:41 Friendly people and some people, yes.

01:29:46 And we're doing a documentary about the AWB.

01:29:50 You know what I'm speaking about that, you know what I'm speaking about, you know what I'm speaking about, you know what I'm speaking about

01:31:08 Eugene Terblanche was the founder and...

01:31:10 long-time leader of the NWB movement in the early 1970s during apartheid at a time when

01:31:16 many Afrikaners feared losing political power and control in South Africa.

01:31:20 To his supporters, Turblage was seen as someone who stood up for Afrikaner identity and culture.

01:31:30 I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good, I'm good.

01:31:40 was viewed as a far-right extremist closely linked to violence, intimidation, and racist ideology.

01:31:55 time he became one of the most recognizable and controversial figures in the country

01:32:00 during the final years of apartheid. In 2010,

01:32:02 Ter Blanche was killed on his farm near Fentersdorf,

01:32:05 an event that shocked the country and had a lasting impact on the AWB.

01:32:10 Can you introduce yourself, telling me your name and just a little bit about Fendersdorf?

01:32:14 Alright, so I'm Heinrich von Ausfeld and Fendersdorf is one of the oldest towns known.

01:32:20 the place of the birth of Eugene De Blanche and the AWB and people having the same as Eugene De Blanche.

01:32:30 The connection between Fentersdol and AWP, like why Fentersdol was there?

01:32:36 Eugene Jepons was in Fentersdol.

01:32:40 Ik denk dat dit een vreemde stoel is met de ontvangst van de Zuidische kant.

01:32:57 All right.

01:33:02 In August 1991, supporters of the AWP

01:33:05 When the state president

01:33:12 Later on, the AWD...

01:33:27 Ночи, ночи, ночи, ночи.

01:33:36 Gracias.

01:34:26 Thank you.

01:34:27 Thank you.

01:34:35 For an organization, there's not quite many names, but one stands out to the other.

01:34:40 I call themselves Constellus Holdings, one of the patchwork and acquisitions alongside fastfoodchains.com giants and global retailers all.

01:34:50 ...nestled under the publicly traded corporate umbrella of Apollo Global Management.

01:34:55 ...past the minute of more than a decade ago, after the departure of controversial CEO...

01:35:01 call themselves during its long-running war on terror,

01:35:06 blast them at the height of America's wars in Afghanistan.

01:35:12 themselves by a name far more recognizable as one that cuts to the hearts of both their

01:35:16 organization's reputation and its operational history.

01:35:25 This organisation calls itself and asking what the organisation actually is.

01:35:33 What this organization is, no matter what you call it, is a mercenary company.

01:35:39 In fact,

01:35:40 During its years in operation, the organization formerly known as Blackwater

01:35:43 has been America's premier private military contractor, or PMC.

01:35:47 A position that earns the organization everything from...

01:35:50 a claim by the United States government to condemnation

01:35:53 as instruments of American violent interventionalism

01:35:56 around the world.

01:35:57 So today on War Graphics, we're gonna take a closer look

01:36:00 at Constellus Holdings, and it's complicated and often dark, dark past as Blackwater, as

01:36:06 well as its convoluted evolution in the years since, and the role that it's...

01:36:10 plays today in a country

01:36:20 No flag, no military, just a company full of ex-special forces and a government willing to pay the bill.

01:36:27 Sound impossible, but it already...

01:36:30 And the most successful private army in American history barely fought at all.

01:36:35 Blackwater ran around 40,000 missions in Iraq.

01:36:38 Only about 200...

01:36:40 the shot being fired so what exactly was America paying billions of dollars for

01:36:44 the answer is much darker than you might expect in 2007

01:36:50 Congress revealed that one Blackwater contractor in Baghdad cost the U.S. government $1,222

01:36:56 every single day.

01:36:58 That's roughly $445.

01:37:00 dollars a year a regular American soldier doing essentially the same job

01:37:04 cost about six times less so where did all that extra money go the contractor

01:37:10 around $600. The rest paid for weapons, body armor, insurance, logistics, and Blackwater's profit.

01:37:20 The company can take 15 to 25% on a contract, and just getting one-armed contract from North Carolina to Baghdad with equipment, insurance, and medical evacuation can cause...

01:37:30 It cost $30,000 to $50,000 before you fired a single shot, but here's where it gets interesting.

01:37:36 In 2008, fewer than 1,000 blackboard...

01:37:40 contractors were protecting the entire American diplomatic operation in Iraq.

01:37:44 And the State Department paid nearly $1 billion for the contract.

01:37:48 The government could have...

01:37:50 It was its own military.

01:38:01 Thank you.

01:38:02 Thank you.

01:38:03 Thank you.

01:38:23 En die gisteren aan de deur stond, alleen dan op de parkeren manier gepresenteerd.

01:38:30 Die zou welkom zijn, onder mijn jufvrouw ook, dat niet.

01:38:42 We have such a long time, long time.

01:38:50 She's a big fan, birthday girl.

01:39:09 Yep.

01:39:10 Hoezo kun je er pijs met seksualiteit?

01:39:20 No military, just a company full of ex-special forces and a government willing to pay the bill.

01:39:27 Sound impossible, but it already happened.

01:39:30 And the most successful private army in American history barely fought at all.

01:39:34 Blackwater ran around 40,000 missions in Iraq.

01:39:38 Only about 200 involved.

01:39:40 shot being fired so what exactly was america paying billions of dollars for the answer is

01:39:45 much darker than you might expect in 2007 congress

01:39:50 that one Blackwater contractor in Baghdad cost the U.S. government $1,222 every single day.

01:39:57 That's roughly $445,000.

01:40:00 a year. A regular American soldier doing essentially the same job cost about six

01:40:05 times less. So where did all that extra money go? The contractor took home

01:40:10 around $600. The rest paid for weapons, body armor, insurance, logistics, and Blackwater's profit.

01:40:19 The company could take...

01:40:20 15 to 25 percent on account and just getting one armed contract from North Carolina to Baghdad

01:40:26 with equipment insurance and medical evacuation could cost 30

01:40:30 thousand dollars to fifty thousand dollars before you fired a single shot but here's where it gets

01:40:35 interesting in 2008 fewer than 1 000 blackwater contractors

01:40:40 were protecting the entire American diplomatic operation in Iraq.

01:40:43 And the State Department paid nearly $1 billion for contract.

01:40:48 The government could have used its own...

01:40:50 So why pay six times more because the government wasn't just buying a soldier? It was buying something else distance March 31

01:41:00 2004, Fallujah, Iraq, for Blackwater contractors were ambushed and killed.

01:41:06 Their bodies were mutilated and displayed from a bridge.

01:41:09 The images...

01:41:10 spread around the world. Within days, American marines launched a massive military operation

01:41:15 against Fallujah. Thousands of troops went in. Hundreds died.

01:41:20 All triggered by the deaths of four private contractors.

01:41:23 But here's the strange part.

01:41:24 They weren't American soldiers.

01:41:26 And that difference mattered.

01:41:28 When a soldier dies,

01:41:30 The government inherits a long list of consequences, pensions, investigations, congressional scrutiny, military funerals, and a name that voters can count.

01:41:40 A contractor's death carries far fewer of those political obligations.

01:41:44 By 2010, private contractors were dying in greater numbers than regular U.S. soldiers in Iraq.

01:41:50 Afghanistan the government had quietly shifted some to risk on to people who weren't officially part of the military and

01:41:57 suddenly the

01:41:59 445

01:42:00 thousand dollar price tag makes a little more sense the government wasn't simply buying protection

01:42:06 it was buying outsourced risk but america wasn't the only country

01:42:10 that discovered this business. Russia built a very different version. His name was Yevgeny

01:42:15 Prigsen, a former convict who eventually became close to Vladimir Putin.

01:42:20 He built Wagner into one of the world's most powerful private military organizations.

01:42:24 But Wagner had a different business model.

01:42:26 Blackwater wanted contracts.

01:42:28 Wagner wanted resources.

01:42:30 In the Central African Republic, Wagner became involved with gold mining.

01:42:35 In Sudan, it became involved with gold processing.

01:42:38 In Syria,

01:42:40 It received access to oil and gas assets.

01:42:42 The payment didn't always look like a government check.

01:42:45 Sometimes it looked like a mine.

01:42:47 Sometimes gold.

01:42:49 Sometimes oil.

01:42:50 and this model wasn't new back in 1995 south africa's executive outcomes was hired by sierra

01:42:56 leone to fight an insurgency around two

01:43:00 underfighters, 21 months, about $35 million, plus a stake in diamond mining.

01:43:07 Private armies had discovered something government

01:43:10 already understood you don't necessarily need cash you just need something valuable

01:43:15 but then comes the biggest problem with private armies they're made of people and

01:43:20 and people can become liabilities.

01:43:22 September 16th, 2007, Baghdad, Nasir Square,

01:43:27 Blackwater Contractors open fire.

01:43:30 17 Iraqi civilians were killed.

01:43:32 The Iraqi government demanded the company's removal.

01:43:35 Blackwater eventually lost its operating license.

01:43:38 The company was sold and...

01:43:40 repeatedly rebranded and the irony is brutal blackwater wasn't destroyed by an enemy army

01:43:45 it was damaged by the people employed when your business is armed

01:43:50 men in foreign countries your biggest threat can be your own convoy but there's an even bigger

01:43:55 problem what happens when your private army becomes too powerful

01:44:00 Look at Wagner. By 2023, it wasn't just a group of contractors anymore. It had thousands of fighters, heavy weapons, armored vehicles.

01:44:10 air defenses, operations across Africa, and a major role in the war in Ukraine.

01:44:16 Prigazin had millions of followers and openly attacked Russia's defense league.

01:44:20 Crisis ended. Prigazin was publicly reconciled with Putin, but two months later...

01:44:31 Тот.

01:44:40 story is probably a much longer one than the one i know i would argue that the g-man is not entirely

01:44:45 human and that in his realm wherever it may be time and space are non-existent

01:44:50 For all we know, the G-Man may have always been there since the beginning,

01:44:53 but his story to us starts before the Black Mesa incident.

01:44:57 Corporal Adrian Shepard, a United States...

01:45:00 Marine assigned to the Hazardous Environment

01:45:02 Combat Unit from the San Diego

01:45:03 Military Base in Arizona, was one of the men

01:45:06 Sent to the Black Mesa Research Facility

01:45:08 On a classified mission. He apparently

01:45:10 spotted an individual who matches the description of the g-man during his training

01:45:14 it is believed that the g-man took an interest in corporal shepard as his training was accelerated

01:45:20 reasons. However, some of those reasons may have come to light during the Black Mesa incident

01:45:24 where Shepard, amongst a few other Marines and Black Mesa personnel, survived the alien invasion

01:45:30 happening there although accounts of what happened after the incident and who exactly

01:45:34 escaped are vague and no thanks to the common hour war

01:45:40 It is unknown if Shepard was able to escape Black Mesa, but if I were to take a guess, I'd say that the G-Man has an instasis.

01:45:47 You see, the G-Man tends to take an interest in certain insta-

01:45:50 Individuals and then proceeds to teleport them to God knows where and offer their

01:45:55 Services to the highest bidder the hands of the g-man could be seen

01:46:00 as nothing more his personal mercenaries whose contracts are open to those willing to pay for

01:46:05 them or in the case of the fabled gordon freeman open to the highest bidder the g-man

01:46:10 was spotted throughout the black maca research facility during the incident and his role in that

01:46:14 event is still unclear but my gut tells me otherwise i would say that the g-man knew the events

01:46:20 Black Mesa incident were going to take place, and indeed wanted them to, so that his employers

01:46:25 could seize control of ZEN, the border world located in the multiverse.

01:46:29 I would be surprised if-

01:46:30 If the G-Man hadn't already known that Gordon Freeman would eventually...

01:46:40 the incident. It's not a surprise really that

01:46:42 Gordon suddenly appeared out of the blue

01:46:43 20 years later in City 17

01:46:45 as the G-Man had him in stasis for all that

01:46:48 time. The G-Man was there when Zed was

01:46:50 captured and the nylon was defeated where he then offered gordon freeman a job the

01:46:54 specifications of that job would be later revealed in city 17 during the uprising

01:47:00 Freeman, with the help of the rebels and most likely the G-Man,

01:47:03 eventually brought down the Citadel and the Combine forces

01:47:06 occupying the city and the surrounding area.

01:47:08 Some would argue that the G-Man

01:47:10 and or his employers knew or at least anticipated that the compound would invade and take control

01:47:15 of Earth, which is why he wanted Gordon Freeman after he defeated the Nihilans and placed

01:47:20 him in stasis for his safety chances are that not only did placing him in stasis keep him from

01:47:24 being taken by the combine but also kept him from aging as during the uprising gordon

01:47:30 than he did during the black.

01:47:33 It is likely that G-Man gave Gordon the illusion

01:47:35 of free choice, a take it or leave it situation

01:47:38 where declining such an offer used.

01:47:40 has dire consequences. One of the dangerous and mysterious things about the G-Man is his

01:47:45 tendency to both help and hinder certain people. A thermonuclear warhead was delivered

01:47:50 black nasa by the federal government's black ops team with the obvious intention of destroying the

01:47:54 entire facility to ensure that there was no evidence of the resonance cascade the cataclysmic

01:48:00 by the experimentation with the zen crystal sample labeled as gg3883 the purist sampled

01:48:06 the facility before the death of eli vans shaw

01:48:11 forest eli stated that the sample was delivered to black mesa by none other than the g-man himself

01:48:16 at some point during the black mesa incident a marine

01:48:20 The Adrian Shepard had deactivated the nuclear warhead, the G-Man, however, reactivated it and thus the facility and any evidence of the resonance cascade was annihilated.

01:48:30 The only thing that we have left of that event is the knowledge that those that survived an escape carry.

01:48:35 But this is where the G-Man's motives get even more questionable.

01:48:38 Alex Vance.

01:48:40 The daughter of Eli Vance was just a small child during the Black Mesa incident and had it not been for the G-Man, Alex would have died along with her mother.

01:48:48 The G-Man saved Alex for reasons.

01:48:50 you could say that he did the same for others as well it makes you wonder why did the g-man want

01:48:55 to destroy the facility if it was to get rid of any evidence then surely you would have expected

01:49:00 him to take care of the survivors as well maybe the combine invasion put that thought aside maybe

01:49:05 it was his employer's wish to keep those that escaped to land i could even say that

01:49:10 G-Man and or his employers trying to stop the Combine invasion by destroying Black Naysay.

01:49:15 In hopes that it might shut down the portal storms that razed across Earth following the resonance cast.

01:49:22 But there was nothing.

01:49:30 imagine are his mysterious employers 20 years after the black maca incident and the seven hour

01:49:36 war that followed the event known as the uprising began which is an ongoing

01:49:40 in conflict fought between the human and vortigon resistance and the combine empire

01:49:44 it is safe to say that this conflict would have not changed course without the involvement of the g-man

01:49:50 released Gordon Freeman from stasis and placed him in City 17. His reappearance sent a huge

01:49:55 morale boost throughout the resistance and a full-on battle between the belligerents erupted

01:50:01 the Freeman, the eventual destruction of the Citadel and the city...

01:50:10 The G-Man made his shady and bone-chilling appearances throughout the uprising and likely aided Freeman on his mission to defeat Dr. Breen.

01:50:20 ...of the combat occupying the city.

01:50:22 After Freeman caused considerable damage to the Citadel's dark energy reactor,

01:50:26 an explosion was created that was expected to have killed...

01:50:30 who was accompanying him at the time.

01:50:32 However, that was not what the G-Man wanted.

01:50:34 Just as the explosion started, the G-Man stepped in and...

01:50:40 most likely leaving Alex to die in the explosion. Strange isn't it? Why one would save a girl from

01:50:45 the total destruction of one place only to leave her to die in another?

01:50:50 in practically the same manner the g-man may have anticipated that alex would be a

01:50:54 great asset in assisting freeman on his mission that is if freeman's contract had been in place

01:51:00 destruction of black mason perhaps the g-man has a conscience from time to time but i'm sure that

01:51:04 there's more to it than that that he and his employers have a plan for many individuals you see

01:51:10 are nothing but pawns on a chessboard for the g-men and those people like gordon and adrian

01:51:14 know it gordon was informed during the time freeze that he would be placed in stasis again while the

01:51:20 ponders over some offers for golden services but here is where the tale gets really interesting

01:51:25 this g-man this anomaly appeared to be

01:51:30 told the Vortigons stepped in to essentially save the day. Before the G-Man extracted Gordon

01:51:34 and left Alex to perish in the explosion, a group of Vortigons appeared and teleported both of them.

01:51:40 Wait, it was apparent at that point that he could enter the G-man's realm and interfere with his plans.

01:51:45 Probably taken by surprise.

01:51:50 at how the vortigons were able to rescue freeman from the g-man's grip i can't imagine how long the

01:51:55 g-man had gone unhindered until this point that sort of street tends to leave one unaware

01:52:03 not able to contact Journey to White Forest as the Vortigons were preventing

01:52:10 Until the Vortigons were occupied trying to heal Alex Banzo had been wounded by a Combine

01:52:14 Hunter that the G-Man was able to appear in front of Gordon in a dream-like psychological

01:52:19 sort of way.

01:52:20 It was here that he revealed that it was he who rescued Alex from Black Mesa, ignoring his employer's objections in doing so.

01:52:27 He also revealed that while he wished he could do more than...

01:52:30 monitor Gordon Freeman, he chose to abide by certain restrictions. What this means is still

01:52:36 a mystery. Maybe it is something that humans like us cannot comprehend.

01:52:40 The workings of the G-Men and other interdimensional lifeforms are nothing short of an enigma.

01:52:45 When the G-Men was finished speaking to Gordon, he then proceeded to speak to the injured Alex, asking her to...

01:52:50 a message to her father Eli who was with a large force of the resistance

01:52:54 stationed on our base called white forest he told go to it for a seat

01:53:00 safely so that she could give her father the message which were more of a threat than it

01:53:04 was a message given the usual circumstances the g-man makes an appearance bad things tend to happen

01:53:10 the g-man is involved and bad things did indeed happen when gordon and a man's message to

01:53:20 and Eli nearly collapsed in shock, but for unforeseen consequences.

01:53:30 appeared to have no memory of what happened then or that g-man spoke to her so chances are that the

01:53:35 g-man spoke through Alex relayed the message subconsciously it worryingly

01:53:40 seems that the g-man could use others to carry out his bidding without them having any knowledge

01:53:44 of what they are doing whatever it is they've done

01:53:50 speak subconsciously and do very little else but a part of me doubts that perhaps the g-man

01:53:55 has more power than he is able to use seeing as though he abides by rules and restrictions

01:54:00 may be how the G-Man is able to manipulate so much without making too many people aware of his

01:54:05 existence. Like I said, the G-Man probably only allows his presence to be known by those he

01:54:12 Eh... that... that...

01:54:18 I'll bring you papers.

01:54:20 Brian, hij kent die riemmees. Maar weet jij hoe mee om te gaan?

01:54:32 They are talking about the Palestinians, but this is how the world works, isn't it?

01:54:36 This is the most difficult thing that it is. Interviews.

01:54:40 We houden met mensen die bijna elke zin desinformatie verspreiden.

01:54:50 Ik had afgesproken met een invloedrijke blogger en overtuigde boerenseparatist.

01:55:00 I hope it's slecht.

01:55:11 whitewashing and super patinas and it says to buy chocolate and to have water probably

01:55:21 Hier.

01:55:23 Willem!

01:55:26 Hallo, Willem Petser.

01:55:28 Hoe is hij?

01:55:30 You like it Rocky?

01:55:32 Let's heal, thank you.

01:55:35 I like some favors for our contrast.

01:55:37 Thank you.

01:55:40 You have fish!

01:55:42 Yes.

01:55:43 But what does a fish make a fish?

01:55:46 I'm not going to eat it, it's my stockperky.

01:55:50 Ik heb gelezen, jij zegt, ik is een rechte boer.

01:55:54 Ja, maar etniciteit.

01:56:00 Dis afkomst is geskiedenis.

01:56:01 Dis nie beroepsgewees nie.

01:56:05 Ja.

01:56:05 Want Petser is jou naam?

01:56:10 Afrikaans nie. Dit is

01:56:11 etnische Duitsers gewees. Is het?

01:56:13 Ja. Dus jullie is emigranten?

01:56:16 Ja, ja, ja. My familie

01:56:17 het in die 1690s nie aangekom.

01:56:25 Ons kruis uit Afrika is er.

01:56:27 Dus waar wil jij jouw republiek hebben?

01:56:30 een ideaal sal wees om een grens te trek

01:56:33 tussen Pretoria en Johannesburg

01:56:34 en dat ek net so een klein stukkie te vat

01:56:36 want dit is meer in deels

01:56:38 historische eigen

01:56:40 Maar die andere filosofie is Afrikaners, boeren, wat ook al jij dit wil doen.

01:56:48 Johannesburgers.

01:56:50 Groose reikste stad?

01:56:52 Ja, Johannesburg is die groose reikste stad, maar Johannesburg is ook die meest multikulturele stad.

01:57:00 Kijk, Pretoria is technisch nog meerderheid blank.

01:57:08 Dus jy wil in die staat?

01:57:10 Wil jij nou eindelijk slechts Blankies hebben?

01:57:12 Nee, niet slechts Blankies, niet slechts Afrikaners.

01:57:15 Afrikaners is wit, had jij gezegd?

01:57:17 Ja, dat is één van die bijen.

01:57:20 What is that? How come focus you all the time?

01:57:24 Because I said to you that this is one of the good ones

01:57:26 that are the lowest in the period of the time.

01:57:28 I'm going to understand how you're in the public.

01:57:30 sien. Ja, ja, ja, want

01:57:31 die raaststorie is rarig,

01:57:33 dit is baie laag op die prioriteitsleis.

01:57:36 Die moeste op die prioriteitsleis is

01:57:37 die etnisiteit.

01:57:40 Yeah, yeah, the idea of this is, if you look at Israel as a example, Israel is a good example of how this can be done, and...

01:57:50 Dan moet je, hey, ik poest die Palestijnen uit.

01:57:57 Het is door die Palestijnen uit, maar het is maar over die wereld werk.

01:58:00 They've always worked

01:58:07 They've had a weermach

01:58:10 Ja, hou het een weermacht nodig om jou eie grond te beskerm, dus definitieve...

01:58:15 Het die boeren nog een weermacht?

01:58:16 Nee, nee, nee, glad nie. Niks zulke dinge nie.

01:58:20 Dus, wat denk jy, wat zou die plan moet wees?

01:58:24 Kijk, ek denk die plan sal onderhandeling en internationale druk wees.

01:58:28 Internationale druk?

01:58:29 Ja.

01:58:30 Ons het baie vriende in die buitenland wat het informeel dat hulle ons ondersteun van al in Europa.

01:58:40 Kijk, ek weet nie of ek nou op video al die naam wat redelijk uitgesproken is in Nederland is Maarten Bosma.

01:58:50 onpersoonlik en hy het al gekommunikeer

00:00:00 Naai me niet naar de oren aan als Van Gogh, toch Sjaak, Dennis, Van Gogh-musee op Pokémon

00:00:07 Kijk, kom op, musea blijven, ja, ex-musee.

00:00:10 Kijk het is weer een percentage, en dat is kaap, dat is een mooie kaap, mooi kaap hoor, Afrika.

00:00:20 Tuutu, tuutu, tuutu,

00:02:10 Maakt even niet uit, we zijn met de computers bezig.

00:02:13 Toen kreeg ik daar wel letterlijk dat zakcomputertje.

00:02:16 Een pocket calculator.

00:02:19 Pocket calculator.

00:02:20 Snap je het Pocket? Ik ben altijd van de mini Mario cuteness zeg maar.

00:02:28 Ja, cute. Hier.

00:02:30 Boeknoek van Aza, Wittstrande de Maier, hoegevoud, die is misbruikt op de John F.A.C.3 op Tonkel aan het Wijk.

00:02:40 De data ligt er niet op, maar mijn persoonlijkheid is gesplitst, je aanmeelt die as.

00:02:50 Maar tijdens de schelding, tijdens de schoorlijstje, toen had ik mij een soort speelgoedwinkel of winkeltje op ter schelding.

00:02:58 Dan moet je via Den Helder.

00:03:00 Moet je met de boot, en toen werd ik misselijk, door een hoge golf.

00:03:04 Let van, nu denken dat het de weermachine is waarom jullie draaien.

00:03:08 Maakt niet uit.

00:03:10 Ja, precies. Maar toen lette ik bij die winkel. Ik heb het laatst afgeteld enzovoort. Maar nu is het weer even kijken. Ik zie het voor.

00:03:21 Ja, hem overgeven en Tom kan alles doen omdat hij wil bezig her.

00:03:27 Maar...

00:04:37 divine dingen enzovoort.

00:04:40 Maar de pocketcomputertje was een beetje, mensen waren een hiloers erop, denk ik wel.

00:04:48 Maar er was eerst een lager model.

00:04:50 zie je de upgrade stage enzovoort

00:04:53 toen haalden ze hem over de magneetstrip

00:04:56 dus de handje klaar bij printcube

00:05:13 Dan werd over de magneetstrip gehaald

00:05:16 en daardoor verloor dat ding zoals een EMP.

00:05:20 De mogelijkheid om te functioneren, een computer, een testgelding.

00:05:30 Wadde eilanden, wat lopen.

00:05:32 Maar, nee, niet marathon lopen.

00:05:34 Heel anders.

00:05:37 En toen voelde ze zich schuldig.

00:05:40 een upgrade en die scannen ze voor diezelfde prijs. Ik had zakgeld meegekregen, want ik had geen inkomen nog.

00:05:50 En toen krijg ik een upgrade model en toen voelde ik me wel toffe shit, dat wel.

00:05:57 Maar dat was digitaal, terwijl iedereen...

00:06:00 ...in seks had en dat was het, levensstratego aan het spelen was.

00:06:05 Dat vond ik ook zelf, heel erg leuk.

00:15:42 Kijk hier.

00:18:12 That was lovely.

00:18:18 Deal, John.

00:18:20 Jammer, dat was de buurman.

00:18:26 Terecht.

00:18:30 Ja, ik heb wel een keer gelegd naar de Bitterpool en terug naar huis toe gehad.

00:18:37 Mooi deal, staarcaravan, stacks, readyplayers.

00:18:40 Antikloudweg?

00:18:42 Yeah, it's worth it better.

00:18:51 Stay tuned. Ik vergeet het waarschijnlijk weer, maar jullie kunnen het verder wel hint en invullen.

00:19:03 Don't miss, no one on the list, gotta hold on.

00:19:10 Yo, we told you this, the warlock back on some old soldier shit

00:19:14 Let go with you, let go with you

00:19:15 Let go with you

00:19:20 Let's go, buddy.

00:19:20 Go, boy!

00:34:40 Nee, ik heb het eigenlijk...

00:34:45 Kok het er weer in veel therapeer.

00:34:50 Das wird erlaubt.

00:35:02 Ja, precies. Ik weet niet hoe Joost erin staat, maar ik zou willen helpen met het.

00:35:13 Das macht Zeit.

00:35:20 Ja, ik heb ook.

00:35:30 Hij is mijn persoonlijk begeleider, oversteerder, van de lab en Felixwijk.

00:35:41 Ja, dat. Het is letterlijk een bestand voor mij. Ik ben niet letterlijk periode kankerdealer.

00:36:04 On.

00:36:15 distinct paths like a y-shape right forming that y and the document labeled

00:36:20 these branching paths father denoted by the letter f and mother denoted by the letter m yes it does

00:36:26 and these branches represent transformations applied to

00:36:30 original seed data but hang on wait yeah if the seed is like the original timeline in a time travel

00:36:35 movie and it splits into these two paths do the labels father

00:36:40 mother implies some kind of biological reproduction happening with the data like male and female

00:36:45 computing functions yeah exactly is that what it means no absolutely not the

00:36:50 A.I. formalizing the author's notes slaps that interpretation down immediately.

00:36:54 Yeah, the text is incredibly strict about stripping away that kind of anthropomorphism.

00:37:00 These are strictly peer branches.

00:37:01 Just peer.

00:37:02 Right.

00:37:03 The words father and mother are merely editorial definitions offered to make the author's supplied

00:37:07 vocabulary testable.

00:37:09 Okay, good.

00:37:09 Nice.

00:37:10 they carry absolutely no gendered functions they do not prescribe any sort of reincarnation

00:37:15 mechanics and they don't map to human mental states so it's simply a stylized naming

00:37:22 That is exactly what it is.

00:37:23 Okay, I'm glad it clarifies that.

00:37:25 Because things can get confusing very quickly.

00:37:28 So we have our seed dropping in.

00:37:30 Splitting into the father and mother branches

00:37:32 Which apply transformations

00:37:34 And then those branches have

00:37:38 Covered this entire process

00:37:40 Introduces the six commitments. Yes, the six commitments and looking through these

00:37:46 it feels less like computer code and more like

00:37:51 philosophical rule book for keeping reality honest it really is i mean if anyone listening

00:37:58 has ever collaborated on a project and

00:38:00 Ended up staring at a folder containing a file's name, Final Draft, Final Draft V2, Final Draft V2 Actual Final, even though the pain of untraceable data.

00:38:10 These six commitments are the ultimate cure for that chaos.

00:38:14 They are the behavioral laws of this paradigm.

00:38:17 Let's actually spend some time on these because they form the bedrock.

00:38:20 Okay, so commitment one is preserve the origin.

00:38:25 I'm assuming this means never, ever deleting the start.

00:38:30 Well, yes, but it goes deeper than just keeping a backup folder.

00:38:33 How so?

00:38:34 Preserving the origin means maintaining the raw source text,

00:38:37 the exact span of that text, and all the parents.

00:38:40 references in the metadata.

00:38:42 Okay, so give me the complete context.

00:38:44 Right, so if you are

00:38:45 translating a document from French to English,

00:38:48 Commitment 1 demands

00:38:50 the final English text explicitly carries the cryptographic fingerprint of the original French

00:38:55 text. Oh, wow. So you can never present the output without an unbreakable.

00:39:00 tether to the input. Exactly.

00:39:01 It prevents someone from altering the context

00:39:03 of a quote later on and pretending it was

00:39:06 always that way. That is incredibly

00:39:08 smart. Okay.

00:39:10 Commitment two is define the inverse, which just sounds like math class.

00:39:14 It is pure mathematics.

00:39:15 You have to explicitly name the mathematical or logical operator that acts.

00:39:20 on the branches okay so if data moves from the seed to the mother branch what exactly happened

00:39:25 to it was it reflected reversed multiplied you can't just say oh it

00:39:31 cannot just say a change you have to define the exact operator that changed it which we will

00:39:36 explore in heavy detail shortly okay i'm ready that brings us to

00:39:43 fascinates me because it feels like something that goes

00:39:46 wrong in the real world all the time. All the time,

00:39:48 yes. It basically says it's

00:39:50 enough to just pass data back and forth. To rigidly record its representation, its units,

00:39:56 its reference frame, and its evidence status.

00:40:00 And we see the failure of Commitment 3 constantly in the real world.

00:40:04 I mean, the most famous example in engineering history is probably the Mars Climate War back in 1999.

00:40:10 Oh, right.

00:40:10 Yeah.

00:40:11 NASA lost a $125 million spacecraft because one engineering team used metric units, newtons, for calculating thrust.

00:40:18 And the other team used imperial.

00:40:20 units. Exactly, they used pound seconds. But the data was passed between systems just as raw

00:40:25 numbers. So the number 10 was just passed as 10. Exactly.

00:40:30 Exactly. And because they failed to type the interface with the specific units, the spacecraft got too close to Mars and disintegrated in the atmosphere.

00:40:38 That is a brutally expensive.

00:40:40 It really is.

00:40:42 So the system demands you attach essentially a sticky note to every number saying, you know, this is in meters.

00:40:49 It was measured.

00:40:50 from sea level and it is a verified measurement not a guess exactly everything must be explicit

00:40:55 okay commitment four is declare the y mode

00:41:00 When these two branches, the father and mother, eventually come back together at the bottom of the Y shape,

00:41:06 you have to declare the rules of engagement before they touch.

00:41:09 Right.

00:41:10 are they fighting it out are they blending together exactly you have to establish the

00:41:14 contract you cannot leave conflict resolution up to chance or just default settings we'll dig into

00:41:19 those

00:41:20 routing contracts in a minute but commitment five is separate ready from done this is a massive one

00:41:27 for databases it separates the state

00:41:30 of being fully prepared to make a change from the state of the change actually being permanent so

00:41:36 it's like a safety buffer exactly it's a safeguard against partial fail

00:41:40 Okay, and finally, commitment six is bound repetition.

00:41:45 Right, and this deals with the concept of retrying an action versus iterating on an action.

00:41:50 What's the difference there?

00:41:51 Well, if your network connection drops while you're sending an email and you hit send again,

00:41:56 you are retrying the exact same operation.

00:41:58 Right.

00:41:58 But if you read the email...

00:42:00 decide it sounds too angry rewrite a sentence and then hit send that is an iteration ah i see

00:42:05 that requires a brand new version history commitment six forces the

00:42:10 system to know the difference so you don't silently overwrite history just because you

00:42:13 tweaked a comma. It's all about perfect record keeping. So we have our branches and we have

00:42:18 our six commitments governing.

00:42:20 I want to pull on a thread from Commitment 2 for a second.

00:42:24 The one about defining the inverse.

00:42:26 Okay, let's do it.

00:42:27 Because the author uses words like mirror, inverse,

00:42:30 and reversal almost interchangeably in the raw notes.

00:42:33 But the AI formalization puts a massive magnifying glass

00:42:36 on what an inverse actually means in reality.

00:42:40 Excision is paramount here.

00:42:41 I mean, calling the M branch the mother branch,

00:42:43 or drawing it symmetrically opposite to the father branch on a whiteboard,

00:42:47 that does not magically imply its function.

00:42:50 is the mathematical inverse of the father branch.

00:42:52 Right. Geometry is not destiny.

00:42:54 Exactly.

00:42:55 So what operators are we actually working with here?

00:42:59 The document lists...

00:43:00 very specific set of mathematical domains. It forces us to give each operation its own

00:43:04 specific symbol and rule set. For instance, there is branch exchange, which is...

00:43:10 denoted by the letter j j for uh j exchange likely just available nomenclature but functionally

00:43:17 if you input a and b

00:43:20 The J operator outputs B and A. They just swap seats.

00:43:24 Simple enough.

00:43:26 And the beautiful thing about branch exchange is that if you apply it twice,

00:43:30 J of A and B, you get back to A and B, it restores perfectly.

00:43:35 It's perfectly reversible.

00:43:37 Taking your left shoe and right shoe and swapping what hands are...

00:43:40 holding them in, and then swapping back.

00:43:42 Exactly.

00:43:43 Then there's plane reflection, denoted by R.

00:43:45 You take a coordinate, say x and y,

00:43:48 and it becomes x and negative y.

00:43:50 It flips across an axis.

00:43:51 It also outlines complex conjugation

00:43:54 denoted by C.

00:43:56 For anyone who hasn't taken advanced algebra in a while,

00:43:59 complex numbers...

00:44:00 numbers have a real part and an imaginary part.

00:44:03 Right, with a little i. Yes, so if you have the complex number 3 plus 4i, the conjugate

00:44:10 the sign of the imaginary part it becomes three minus four i okay but then it introduces the

00:44:16 reciprocal denoted by k which is one divided

00:44:20 by the input right yes and this is where the ai formalizer really proves why commitment to is

00:44:25 necessary it gives a concrete example to show how wildly different

00:44:30 these operations are so if your input is that same complex number 3 plus 4i we

00:44:37 know the complex conjugate is 3 minus 4i

00:44:40 But if you apply the reciprocal operator instead, 1 divided by 3 plus 4i,

00:44:45 actually calculates out to 0.12 minus 0.16i.

00:44:51 That looks absolutely nothing like the starting number.

00:44:54 Exactly.

00:44:55 Those are profoundly different results.

00:44:58 A true inverse requires a...

00:45:00 Strict, one-to-one mapping on a declared domain.

00:45:02 You can't just wave your hands and say, oh, just do the opposite.

00:45:05 You have to define what opposite actually means in that specific...

00:45:10 mathematical universe. Right.

00:45:12 And the document also lists

00:45:13 string reversal, labeled rev,

00:45:16 which literally just reads characters

00:45:17 backwards, and the quarter term

00:45:20 denoted by Q.

00:45:21 Okay, the quarter turn is interesting to me.

00:45:23 It says if you apply it four times,

00:45:25 you get back to where you started.

00:45:27 So Q to the fourth power equals the identity.

00:45:30 matrix i yes for the listener who doesn't spend their weekends doing linear algebra what actually

00:45:36 is an identity matrix good question think of the identity matrix

00:45:40 as the mathematical equivalent

00:45:41 of the number one

00:45:42 when you are multiplying.

00:45:44 Okay.

00:45:44 If you multiply any number by one,

00:45:46 it stays the same.

00:45:48 In matrix math,

00:45:49 if you...

00:45:50 multiply any matrix by the identity matrix it stays exactly the same it is the state of doing

00:45:56 nothing yeah i get it so if you rotate

00:46:00 object 90 degrees four times you have rotated it 360 degrees you have returned it to its original

00:46:06 state you have reached the identity matrix here's where it gets

00:46:10 really interesting to me because the document takes all this high-level math and uses it to

00:46:14 point out a massive law on how we usually combine information in everyday life. Oh, the averaging

00:46:20 problem right yes it tackles the concept of averaging the paired average trap this is such

00:46:25 a crucial concept let's say we have two branches of data coming together and to resolve them we

00:46:30 just average the two numbers the document says this is inherently destructive completely

00:46:35 destructive right if i tell you hey i had two numbers and their average is

00:46:40 You can't magically reverse engineer my brain to know I started with two and eight no you can't because I

could have started with

00:46:46 Four and six or zero and ten or I don't know negative

00:46:50 90, and 100. The moment I averaged them, the original data was incinerated.

00:46:55 It is a fundamentally lossy operation. You cannot recover both

00:47:00 original values from an average unless you retain extra data like the difference between the two

00:47:04 numbers on the side right which we never do exactly averaging creates an illusion of a clean compromise

00:47:10 Structurally, it is an irreversible destruction of the source material.

00:47:13 And that is why the routing contract at the bottom of the Y-switch is so incredibly critical.

00:47:19 The visual shape of...

00:47:20 But why draw it on a napkin?

00:47:21 It doesn't tell you how to resolve the collision at the intersection.

00:47:24 You have to declare a mode.

00:47:26 You do.

00:47:27 And the document defines five explicit...

00:47:30 contracts for this collision let's go through the first is mux or multiplex think of it as a

00:47:35 selector switch it basically says i am choosing the payload from branch a and i am

00:47:40 discarding the payload from branch B.

00:47:41 Okay.

00:47:42 However, to honor the six commitments,

00:47:44 it demands you keep the provenance,

00:47:46 the historical footprint of the unselected candidate.

00:47:48 Even though B lost,

00:47:50 record must show that b was present and was rejected so the runner-up basically gets a

00:47:54 participation trophy in the metadata pretty much then there is dmux the dmux

00:48:00 multiplexer. This is routing. It takes one payload and routes it to one specific selected

00:48:05 destination, explicitly marking the other possible path as empty.

00:48:10 Then we have copy.

00:48:12 This is where one digital representation

00:48:14 becomes two separate representations

00:48:16 sharing the same source identity.

00:48:18 But the formalizer adds.

00:48:20 a vital real world physical constraint to this digital concept okay this part blew my mind because

00:48:25 we take digital copying for granted you know we really do like

00:48:31 Control-Z, Control-V, and boom, now I have two paragraphs.

00:48:34 It costs me absolutely nothing.

00:48:36 In the digital realm of pure information, yes, that's true,

00:48:40 But the document firmly states that a digital copy is not a physical power claim.

00:48:45 What does that mean?

00:48:46 If you have an optical light beam, literal photons, carrying...

00:48:50 information. Hitting a physical glass Y prism, you cannot just copy the light to

00:48:56 both branches without splitting the physical optical energy in half.

00:49:00 Each branch will only be half as bright.

00:49:02 An optical split requires its own power balance.

00:49:05 You cannot just summon physical energy from nowhere just because you drew an arrow on a diagram.

00:49:10 grounds it so heavily in reality okay so the last two modes are join and resolve right join retains

00:49:17 both contributions as a i picture

00:49:20 this like putting two separate letters into a single manila envelope they are traveling together

00:49:24 but they are still distinct objects that's a good way to look at it and resolve on the other

00:49:31 Based on a stated policy.

00:49:33 Yes.

00:49:34 And because we know averaging is destructive,

00:49:36 if your result policy is to average the data,

00:49:39 you have to...

00:49:40 to explicitly declare up front

00:49:42 that you accept the data loss and the

00:49:43 potential conflict. Transparency is

00:49:45 everything here. And to bring this

00:49:47 entire abstract concept of switch

00:49:50 and routing down to earth the text references a literal physical piece of

00:49:54 hardware it does a Texas instruments component the SN74L

00:50:00 LVC1G3157.

00:50:02 Which is such a very specific choice.

00:50:04 It is a single pole double throw analog switch.

00:50:08 A literal piece of silicon and metal.

00:50:10 But why drop a hardware spec into a conceptual software document?

00:50:14 Because it forces the reader to confront physical reality.

00:50:17 This Texas Instruments switch connects one...

00:50:20 terminal to one selected branch it allows signaling in either direction but crucially

00:50:24 it has a specified break before make behavior break before make meaning

00:50:30 it has to completely disconnect from branch A before it even reaches out to touch branch B.

00:50:34 Exactly. If it didn't break the connection first, even for a fraction of a millisecond,

00:50:39 all three terms...

00:50:40 would be connected which could cause a catastrophic short circuit the document

00:50:44 uses this physical hardware to slap a constraint on the digital theory just

00:50:48 because you draw a y-shape doesn't mean the trans

00:50:50 Transition is instantaneous, reversible, or free from short circuits.

00:50:53 Right. You can't just draw it on a whiteboard and pretend you've solved physics.

00:50:57 No, you can't.

00:50:58 The text specifically says that midi-men...

00:51:00 messages from a keyboard, acoustic measurements from a microphone, and personal narratives

00:51:04 from a human being all require entirely different encoders.

00:51:08 You can't just dump an audio file.

00:51:10 file and a text file into a Y switch and assume they are interchangeable quantities.

00:51:15 Which perfectly sets up the need for a rigorous control protocol.

00:51:18 We know how data splits.

00:51:20 we know the mathematical transformations, and we know the routing contracts.

00:51:23 But how does a complex system actually orchestrate all of this without crashing?

00:51:27 Right. How does it officially commit?

00:51:30 to a decision exactly this brings us to the control model the document maps us out as an

00:51:36 extended finite state machine with 10 highly specific stages

00:51:40 Ten stages, yes.

00:51:41 And stages one through eight are essentially the runway.

00:51:44 Let's walk through them because skipping a step is how you crash the plane.

00:51:48 Let's do it.

00:51:49 Stage one.

00:51:50 is capture, where the source snapshot identity is frozen. Stage two is type, declaring the schema.

00:51:56 Then stage three is frame. This is where you fix the unit.

00:52:00 the reference frame, and the clock. This is the Mars climate orbiter safeguard. You

00:52:04 do this before any math happens. Once framed, we hit stage four, F branch.

00:52:10 the father candidate and stage five m branch evaluating the mother candidate the text notes

00:52:17 that stages four and five can be evaluated

00:52:20 concurrently if they are independent.

00:52:22 Meaning they don't have to wait for each other.

00:52:24 Right. They aren't inherently sequential.

00:52:26 You don't have to wait for the father branch to finish

00:52:28 before starting the mother branch.

00:52:29 They are people.

00:52:30 Then stage six is route, where you declare your mode like mux or join.

00:52:35 Stage seven is resolve, producing a final candidate based on the policy you set.

00:52:40 Moving right along.

00:52:41 Yeah.

00:52:41 And stage eight is validate, checking that everything passes the system's rules.

00:52:45 But the absolute crux of this entire machine, the moment of truth happens between...

00:52:50 stage nine and stage ten yes the transition from prepared to committed stage nine prepared

00:52:56 records the exact candidate it's cryptographic digest

00:53:00 to the base version it's building on and an expiry time it is a formalized claim of readiness

00:53:05 it is then stage 10 committed is where the atomic

00:53:10 commit succeeds and the result becomes a durable permanent part of the ledger to me honestly this

00:53:16 feels a lot like buying a house okay walk me through that analogy

00:53:20 Well, stages one through eight are like touring houses, getting inspections, negotiating the price.

00:53:25 Okay, prep work.

00:53:26 Exactly.

00:53:27 Stage nine, prepared, is...

00:53:30 putting your money into escrow.

00:53:31 The money is locked, the contracts are drawn up,

00:53:33 everything is verified,

00:53:34 but the transaction hasn't executed yet.

00:53:37 You don't own the house.

00:53:39 If the house is closed,

00:53:40 catches fire while in escrow the deal expires the money returns to you and no permanent change is

00:53:45 made to your property ledger stage 10 committed is the moment

00:53:50 the deed transfers and the county clerk stamps the file. It is permanent. That is a phenomenal

00:53:55 analogy for a two-phase commit protocol. The escrow is the prepared state.

00:54:00 It ensures that all parties are ready before anyone takes a permanent step.

00:54:03 And to facilitate this digital escrow, the system uses what it calls the ACAC protocol,

00:54:08 two distinct acknowledgments.

00:54:11 Here's where I have to push back on the architecture just a little bit let's hear it if system a sends a message to system B

00:54:18 It says to me sends an acknowledge

00:54:20 What stops system A from sending an acknowledgement of the acknowledgement?

00:54:24 The infinite loop problem.

00:54:27 Right, don't you just end up in a feedback loop?

00:54:30 It's like two polite people trapped at a doorway saying, after you.

00:54:33 No, I insist.

00:54:34 After you until the end of time.

00:54:36 The infinite loop is a classic terror in network engineering.

00:54:39 Absolutely.

00:54:40 document brilliantly avoids it by anchoring its logic in RFC 9293. What is RFC 9293? It is the

00:54:49 foundation.

00:54:50 specification for TCP, the transmission control protocol. It is literally the invisible plumbing

00:54:55 that makes the entire internet work. Okay. The document leans on TCP.

00:55:00 PCP's design to explain why the two acts don't loop.

00:55:03 The two acknowledgements have fundamentally different mechanical meanings.

00:55:07 Break that down for me.

00:55:08 How does the first act...

00:55:10 The first one is act prepared. The processing node sends this back to the initiator to say,

00:55:15 I have received your candidate, I have validated it, and it is accepted for commit.

00:55:20 crucially this act identifies the candidate's cryptographic digest it's the escrow receipt

00:55:26 the initiator receives this realizes everything is ready and

00:55:30 sends the final commit command. When the processor successfully writes it to the

00:55:35 permanent ledger, it sends back the second receipt, committed.

00:55:40 This one doesn't reference the candidate.

00:55:41 It identifies the new durable version number on the ledger.

00:55:45 Ah, I see.

00:55:46 So they are acknowledging the same effect.

00:55:49 One acknowledging.

00:55:50 Which is readiness, the other acknowledges permanence.

00:55:53 Exactly.

00:55:54 In TCP mechanics, a pure acknowledgement packet consumes no sequence space.

00:55:59 It does?

00:55:59 It's a sequence.

00:56:00 Basically, because it doesn't take up room in the sequence of data, it does not generate a requirement for the receiver to acknowledge it back.

00:56:07 The conversation naturally terminates.

00:56:10 What if the internet cuts out?

00:56:11 Like, let's say the initiator sends the commit command.

00:56:14 The processor writes it to the ledger,

00:56:16 but the internet drops before the act-committed receipt gets back.

00:56:20 a classic problem the initiator thinks it failed right so they hit the button and

00:56:24 said the exact same request again doesn't that risk duplicating the action like hitting refresh on a

00:56:31 That is the exact nightmare.

00:56:33 Commitment six, bound repetition, is designed to prevent.

00:56:36 And it uses deduplication logic.

00:56:39 How does that work?

00:56:40 If the processor receives a request with the exact same operation ID and the exact same Candidate Digest as a previous request, it does not run the operation again.

00:56:49 Ooh.

00:56:50 smart it looks at its ledger sees the id and says wait i already committed this exact

00:56:55 transaction three seconds ago so instead of charging the credit card a second time

00:57:00 It simply returns the stored ACK committed receipt from the first time.

00:57:03 It de-duplicates the request.

00:57:06 It's totally idiot-proof.

00:57:07 But, and this is a critical security.

00:57:10 feature if it gets a request with the same operation id but a different candidate digest

00:57:15 like if i change the purchase amount yes say you changed it from

00:57:20 ten dollars to twenty dollars it rejects it entirely that is an identity conflict

00:57:25 you cannot quietly change the data under the same id if the data changes you

00:57:30 must generate a brand new operation ID.

00:57:32 Total honesty is enforced at the protocol level.

00:57:35 The system just simply refuses to be lied to.

00:57:38 I love that.

00:57:40 Now, the source document doesn't just leave all this in abstract computer science terminology, right?

00:57:45 No, it grounds it.

00:57:46 It provides a literal, worked example right at the end of the text.

00:57:50 to prove this whole architecture works on a simple physical payload.

00:57:53 And the example is delightfully mundane,

00:57:55 which I think highlights just how robust the framework is.

00:57:58 The payload is a simple...

00:58:00 four-letter string. Do. D-O-O-H. Okay, let's run this word through the machine. Stage one, capture.

00:58:07 The seed is do. We hit stage.

00:58:10 stage four, the father branch, the policy here applies the identity operator.

00:58:14 Which we learn means doing nothing.

00:58:16 Exactly.

00:58:17 So the father branch remains due.

00:58:20 We concurrently hit stage 5, the mother branch.

00:58:22 The policy here applies the string reversal operator.

00:58:26 So it reads the letters backward.

00:58:28 Mother becomes hood.

00:58:29 H-O-O-D.

00:58:31 Now they move down to stage six, the root.

00:58:33 The mode declared is resolve, meaning both branches are taking part.

00:58:37 Stage seven is the resolve policy, which in the-

00:58:40 This case is programmed as concatenation with a central separator, specifically a space.

00:58:44 So the machine takes the father branch, adds a space, adds the mother branch, and produces

00:58:50 is the final candidate.

00:58:51 Do-hood.

00:58:52 Do-space-hood.

00:58:54 Okay, let's count the characters here.

00:58:56 D-O-O-H is four, space is five.

00:59:00 H.O.O.D. makes it nine characters total.

00:59:03 Yes.

00:59:04 Wait a minute.

00:59:06 The document makes a massive architectural deal out of the transition.

00:59:10 from stage nine to stage ten in the control model and the output string here is exactly nine

00:59:14 characters long. I see where you're going with this. Did we just uncover the Da Vinci code of this?

00:59:20 text does this literal nine character string reveal some hidden numerical law

00:59:25 about the stage nine prepared state I love how the human brain desperately

00:59:30 for those patterns. I can't help it. But the AI formalizer of the document anticipates exactly

00:59:35 that kind of numerological conspiracy theory and aggressively debunks it.

00:59:40 really yes the text states firmly that yes setting the seed to do and the separator to a space

00:59:47 constructs a nine character phrase but this

00:59:50 literal character count of nine is entirely 100% independent of stage nine in the control model.

00:59:56 So it's literally just a coincidence. It is merely representational.

01:00:00 The proposed 10th stage of the protocol records transaction completion.

01:00:04 It does not magically append a 10th character to the word,

01:00:07 nor does it reveal a hidden mathematical destiny.

01:00:09 Well, that's about it.

01:00:10 The document rigorously separates mere representational symmetry from causal reality.

01:00:16 So it's just a palindrome.

01:00:17 Exactly.

01:00:18 And the text actually classifies different...

01:00:20 types of palindromes to prove this point do hood mashed together without a space is an eight

01:00:24 character palindrome do hood with a space is a nine character palindrome right but if you have the

01:00:30 sequence ack followed by ack that is a token palindrome the sequence of words reverses to

01:00:35 the same sequence even though the literal characters kca kca do

01:00:43 forwards and backwards does not mean you've achieved physical time travel or

01:00:47 solve physics. It's just a neat trick.

01:00:51 And this ties perfectly into a crucial distinction the document makes about navigating time and repetition.

01:00:56 The difference between a retry and an iteration.

01:01:00 We touched on this with Commitment 6 earlier.

01:01:02 Yes, we did.

01:01:04 A retry is when the exact same Operation ID

01:01:06 asks about the exact same intended effect.

01:01:10 asking did my previous request go through okay an iteration is entirely different it is when a new

01:01:16 revision applies a transition to a prior result creating a

01:01:20 brand new operation ID and a parent link. It's moving forward in time, building on the past,

01:01:25 not just circling endlessly. You're stepping up the staircase, not just running on a treadmill.

01:01:30 exactly and the document explicitly states that convergence meaning reaching a stable

01:01:35 finished state is not automatic just because you loop something in an iteration

01:01:40 doesn't mean it will eventually settle down it could just spit out it might spiral completely

01:01:44 out of control therefore you have to enforce a finite step limit or a retry cap to bound

01:01:50 the execution. You have to put a ceiling on it so the computer doesn't just

01:01:53 try to solve a puzzle with no solution. Precisely. Okay. Speaking of time and loops

01:02:00 execution caps. This brings us to a part of the document that is almost dizzying

01:02:05 to read. The source material is filled with these wild

01:02:10 almost poetic timing motifs oh it's a sensory overload for sure it jumps from

01:02:14 discussing referees blowing whistles at a football game to chemical clocks atomic

01:02:20 clocks midi time codes vr refresh rates it is chaotic it feels chaotic to read yes

01:02:26 but the architectural formalization brilliantly strips away the

01:02:30 Define the structural requirement underneath.

01:02:34 What all those scattered OTs point to is the absolute non-negotiable necessity of...

01:02:40 separating different types of time.

01:02:42 Right, because time isn't just one monolithic thing

01:02:45 in a computer system, is it?

01:02:46 Not at all.

01:02:48 The document breaks it down into distinct categories.

01:02:51 wall clock time which is exactly what it sounds like a time stamp with a time zone

01:02:55 mostly used for human reporting yes you have monotonic

01:03:00 which acts like a stopwatch. It only goes forward, and it's used for misery deadlines and timeouts.

01:03:05 Then you have logical sequence, which just dictates causality. Event A.

01:03:10 happened before event B, regardless of what the

01:03:12 clock on the wall said. And

01:03:14 sample clock, which is just the interval

01:03:16 between observations, like taking

01:03:17 a photo every one second. Right.

01:03:20 Finally, signal phase, which kind of blew my mind.

01:03:23 It's just a position within a repeating wave, like the crest or the trough.

01:03:27 It's not a time stamp at all.

01:03:28 Let's focus on logical sequence.

01:03:30 for a moment because the document cites Lamport's

01:03:32 happens before relation.

01:03:34 Okay, Lamport clocks.

01:03:35 For the listener who hasn't taken a graduate level

01:03:37 distributed computing class, what does that

01:03:40 Well, Leslie Lamport is a legend in computer science.

01:03:44 He formalized how we understand time in systems where there is no central master clock.

01:03:50 Imagine you and I are in different rooms

01:03:52 With no windows

01:03:53 And our watches are slightly out of sync

01:03:55 If I send you a text message that says hello

01:03:58 And you reply hi

01:04:00 We know definitively that my sending the message happened before you replied.

01:04:04 Yeah, that causality is undeniable.

01:04:06 So you like this?

01:04:07 Lamport's rule says that if event A, causality...

01:04:10 A consistent logical clock will state that the time stamp of A must be less than the

01:04:17 time stamp of B.

01:04:18 That makes perfect sense.

01:04:20 before effect. However, and this is a vital to avoid, the inequality alone does not prove causation

01:04:26 in reverse. Wait, what do you mean? Just because my watch

01:04:30 says my alarm went off at 7am

01:04:31 and my watch also says it started raining

01:04:33 at 7.05am, that does not mean

01:04:36 my alarm caused the rain. Oh, I see.

01:04:38 Event A, having a smaller time

01:04:40 stamp that event B does not guarantee they are causally linked. Correlation is not causation

01:04:44 expressed mathematically. That is a really great way to put it. Okay, but I have a bonus

01:04:50 ...to pick with the documents math when it comes to...

01:04:52 Let's hear the grievance.

01:04:54 The text aggressively challenges this concept of converting a high-speed signal to a lower-speed signal.

01:05:00 signal. Specifically, it talks about converting a 240-hertz signal down to a 120-hertz signal.

01:05:06 Yes. Decimation.

01:05:07 Right.

01:05:11 frames a second and i want to deliver it at 120 frames a second to save bandwidth

01:05:16 i can just average alternating pairs of frames together right okay

01:05:20 I take frame one and two, average them into a new frame, average them, it smooths it out.

01:05:27 What on earth is the problem with that?

01:05:29 This races...

01:05:30 profoundly important question about signal processing. It brings us right

01:05:33 back to what the document calls the paired average trap but applied to moving

01:05:38 data. Let's look closely

01:05:40 at the math the document provides to debunk this walk me through it because i'm stuck the input

01:05:45 interval for 240 hertz is 1 240th of a second which is about

01:05:50 4.16 milliseconds. The output interval you want is 120 hertz or about 8.33 milliseconds.

01:05:58 Okay.

01:05:58 A simple paired average takes...

01:06:00 the value of sample zero adds it to sample one and divides by two seems perfectly logical to me

01:06:06 it seems logical but as the document explicitly states it is a

01:06:10 Locky filter followed by decimation.

01:06:12 Wait, Eli 5 time.

01:06:14 Decimation sounds like ancient Rome punishing a lesion.

01:06:17 What does it actually mean in signal processing?

01:06:19 In signal processing,

01:06:20 signal processing decimation just means reducing the number of samples. You are throwing data

01:06:24 away to reduce the rate. Okay, got it. The document proves the fatal flaw of combining averaging with

01:06:30 decimation using a simple counter example imagine your first pair of inputs coming from the camera

01:06:35 is a brightness signal of zero and then a brightness signal of two right

01:06:40 You average them.

01:06:41 Zero plus two is two, divided by two is one, the output is one.

01:06:45 Now imagine the camera sees something entirely different.

01:06:48 The inputs are a signal of...

01:06:50 I am the one who doesn't trust or not.

01:06:53 You average them.

01:06:54 One plus one is two divided by two is one.

01:06:56 The output is one.

01:06:58 Ah. Oh, I see it now.

01:07:00 Once the system outputs the number one, the receiver on the other end has absolutely no idea if the real world looked like a zero and a two or a one and a one.

01:07:09 Precisely.

01:07:10 The data is destroyed.

01:07:11 You cannot magically recover the original pair of physical events from that output alone.

01:07:15 And the document takes it a step further.

00:00:00 it states that just because you have two alternating channels running at 120 observations per second

00:00:07 if they are offset in time they are not

00:00:10 It's not automatically interchangeable samples of one unified 240-hertz signal.

00:00:14 Because the world literally moved between the same and the same line.

00:00:17 Exactly. And pairwise averaging does not guarantee

00:00:20 arbitrary noise cancellation if you multiply a signal and it's underlying noise by the same

00:00:24 factor you haven't improved the signal to noise ratio at all you've just made both the music and the

00:00:30 You can't just mash data together and hope the noise magically cancels out.

00:00:35 No, you cannot.

00:00:37 The document is incredibly strict about the physical reality of observation.

00:00:40 It brings up time of flight, or TOF.

00:00:43 This is a classic sensor problem, yes.

00:00:45 It says you have to explicitly declare whether a timing measurement is one way or round.

00:00:52 a ping to a wall and it bounces back.

00:00:54 The distance to the wall is the speed of light

00:00:56 times the total time of the trip

00:00:58 divided by two.

00:01:00 Because the pink had to travel there and back.

00:01:02 But if it's a one-way trip, say, a satellite broadcasting a time signal down to your GPS receiver, you don't divide by two.

00:01:08 And the document points out that...

00:01:10 Mixing those two definitions up, plugging a round-trip time into a one-way formula

00:01:14 introduces a massive factor-of-two error before any of your fancy fusion algorithms.

00:01:20 or you begin to run you are instantly 100% right out of the gate the system

00:01:26 forces you to transfer the data the axes and the uncertainty consistent

00:01:30 it flatly refuses to accept uncalibrated claims, it is incredibly starker, no device specific accuracy

00:01:40 Global position guarantee, haptic safety claim, or physical controller tuning is implied by this conceptual interface.

00:00:00 It's entirely washing its hands of human assumption.

00:00:03 It's all about me.

00:00:05 Which is actually the perfect segue to how this document functions as a monitor of reality.

00:00:09 We are moving...

00:00:10 into how the AI assistant

00:00:11 that formalized this text

00:00:12 essentially put on

00:00:13 an auditor's visor

00:00:14 and started ruthlessly

00:00:16 fact-checking

00:00:16 the human author's claims

00:00:17 across math, biology,

00:00:19 and...

00:00:20 Corrections, you did the TBS.

00:00:25 Success with the trial, Elon Musk.

00:00:30 Hebben jullie enig idee dat dat geen codetaal is voor GGZ?

00:00:35 1-1-3-suicide ofzo?

00:00:40 structural tube. The author claimed, based on their math, that the stress on this tube would be 85.06 MPa, which sounds very precise.

00:00:50 But the formalization takes the exact same formula which is stress equals force over area plus force times

00:00:58 eccentricity over the section

00:01:01 plus the heat.

00:01:10 It's a geometric property of a structural shape.

00:01:13 It measures how much resistance a specific shape like a hollow tube versus a solid square

00:01:18 has to bending.

00:01:20 A thicker tube has a higher section modulus.

00:01:22 Got it.

00:01:23 So the AI takes this formula?

00:01:24 Yes.

00:01:25 And the author supplied the inputs.

00:01:27 An outer diameter of...

00:01:30 millimeters, a wall thickness of two millimeters, a force of 1,000 newtons, and an eccentricity,

00:01:36 meaning how off-center the force is applied, of 10 millimeters.

00:01:40 When the AI formalization runs those exact numbers through the ideal tube equations,

00:01:45 it calculates a stress of 30.41 megapascals, not 80.

00:01:50 five point zero six

00:01:51 it's off by almost a factor of three

00:01:55 it is a critical failure in basic

00:01:57 arithmetic but the AI auditor

00:02:00 It doesn't stop there. It recomputes five different data rows provided by the author, and every single one of the recomputed values is drastically different from the source's claims.

00:02:10 I mean it does something even more important it adds a massive architectural

00:02:16 disclaimer it says that this check only validates the

00:02:19 arithmetic

00:02:20 under the stated assumptions. It assumes a perfectly circular, uniform, or U.S. to experience elementary linear stress.

00:02:30 cow in a vacuum.

00:02:31 Exactly.

00:02:32 The AI explicitly knows that crucial real cool factors are entirely accepted in the

00:02:37 model.

00:02:38 Things like material grade, is it steel?

00:02:41 anisotropy wait what's anisotropy it means a material has different physical properties

00:02:46 depending on the direction you measure it wood is highly anisotropic

00:02:50 It splits easily along the grain, but it's incredibly strong against the grain.

00:02:53 No, that makes perfect sense.

00:02:55 So the model ignores that.

00:02:57 It ignores anisotropy, buckling material...

00:03:00 Fatigue and dynamic loading what happens if the force is vibrating instead of static

00:03:04 Because all of that reality is missing the AI states that the source authors labels of safe

00:03:10 or failure are explicitly not adopted by the system.

00:03:13 It's the first time they were in the lake.

00:03:16 And you proved their addition was wrong.

00:03:18 But you also pointed out they could do it.

00:03:20 Dat is een split second.

00:03:27 Veel safe. Ik heb veel safe tegen Petrus.

00:03:30 Biology. There's a biological chart provided by the author, detailing normal and failure states for cellular structures.

00:03:37 I do an album to Gambit. I hear Beatrice.

00:03:40 op die verhoudende taart.

00:03:44 Super danig.

00:03:48 Wow.

00:03:50 2.10. So the formalization treats these as quoted source values for internal

00:03:57 consistency comparison only.

00:04:00 It firmly states that the supplied material gives no adequate basis for any clinical outcomes.

00:04:05 It refuses to validate biological medical professionals based on unverified...

00:04:10 Ik ben een beetje kinderwachtig, ja, precies.

00:04:16 Wat?

00:04:19 Jo...

00:04:20 Als ze in het letterlijk weten, als ze weten dat je het niet zomaar zou...

00:04:26 Ja, ik denk dat ik eindelijk de rest zes heeft waarmee gegetwijkt.

00:04:30 10,1990 staat er niet zomaar aan of verkrachten of iets ofzo.

00:04:35 Nou, leuk hè? Maar wie er wel bij zijn in het bestuur op dat moment?

00:04:40 Dat moet gemeten en gevoelde geproefd worden al jaren, zodat we dat kunnen determineren.

00:04:50 points out that just-in-time compilation compiling code as it runs just-in-time

00:04:54 Sweden call it Sweden

00:04:56 it is not automatically a permissions system nor is it proof

00:04:59 like it is

00:05:00 regelen alles via mij voor jullie van releasing en mensen enzovoort

00:05:05 en je regelt niks voor jullie zelf

00:05:10 The document forces a strict separation between a git merge and a git push.

00:05:15 It's a vital distinction.

00:05:17 A git merge is an integration of changes locally.

00:05:20 Ik ben van de pofkantjes ziek, van zekerheid, ja precies.

00:05:25 Zie je?

00:05:27 We zitten jullie, wij...

00:05:30 te comforten, met console commands bijna, dat ik niet per se een van de rare duivelverkeer

00:05:40 De reïncarnatie van Hansi Grootwijk enzo.

00:05:50 The document references swapping a physical SIM card for an eSIM on a cell phone.

00:05:54 I just did this last month. It was incredibly stressful.

00:05:57 The document calls this an activation...

00:06:00 When you activate the replacement eSIM, the telecom carrier deactivates the old physical SIM.

00:06:06 The Y-Switch paradigm records the entire state change.

00:06:08 It logs the old profile.

00:06:10 It tracks the reality of the swap.

00:06:17 It tracks the state change on your device, yes.

00:06:20 But if there is no universal promise about network downtime or whether you can reverse that carrier action if the E-SIM fails, it audits what actually happened on your end.

00:06:28 Okay, what should we do?

00:06:30 Do you see what they did for years ago? How could the beast do it if they were all in the queue?

00:06:40 Finals thesis.

00:06:46 Toch de perskortige dag en achten hebben we toch gekocht.

00:06:50 is truly put to the test.

00:06:51 Because the source material gets wild here.

00:06:54 We've been talking about strict math, matrices,

00:06:57 DCP networking protocols, and strong

00:07:00 Tja, Miffy, wijk eens me zei hem, hier, geheim van de taar.

00:07:07 Ik ben Blotwijk er een keer weer als...

00:07:10 Not a cloud pack, not a cloud pack, not a cloud pack, not a cloud pack, not a cloud pack.

00:07:20 Ik ben een lul. Precies.

00:07:23 Ik kan het niet gronderen en iedereen aanhanden enzovoort, maar er is iets aan de hand.

00:07:30 Ik voel een soort samenspeling gaan. Ik ben getetterd aan de baarmoeder van verkeerde vrouwen.

00:07:40 We connect this to the bigger picture.

00:07:44 The absolute brilliance of this formal specification is exactly how it isolates...

00:07:50 The human author was clearly using a highly associative, almost poetic stream of consciousness

00:07:57 to remember.

The transcription result does not establish that the recording is silent, complete, authentic, or legally admissible.

00:00:00 The AI Formalizer's job wasn't to judge the poetry, but to build a firewall between the poetry and the prose.

00:00:07 Let's take the numbers short.

00:00:10 called grandfather numerology out of the number 63 and 36 yes I can see the

00:00:15 human pattern matching here if you reverse the string 63

00:00:20 36. If you add 63 plus 36, you get 99. If you take the sum of the digits, 6 plus 3 is 9, 3 plus 6 is 9.

00:00:30 plus nine is 18, and one plus eight is nine.

00:00:34 It feels incredibly significant if you are looking for magic.

00:00:37 Right.

00:00:38 But the AI

00:00:40 The formalizer strips the mysticism away instantly, leaving only the mechanics.

00:00:45 It explicitly states, yes, reversing the stress, 3 gives 36.

00:00:50 And the original 10 edition is $39, but these are just emergent properties of base 10 digit maps.

00:00:58 Exactly.

00:01:00 9 is simply the largest single decimal digit in a base 10 system.

00:01:04 It is not the largest number in the universe,

00:01:06 and no unique grandfather value or spiritual authority.

00:01:10 stems from it. The formalizer points out that any symbolic meaning attached to those digits

00:01:15 is a completely separate author choice, not a mathematical inevitability.

00:01:20 If we were using a basic meat number system, the magic of the number 9 wouldn't even exist.

00:01:25 It's like finding Jesus in a piece of toast.

00:01:28 The toast is real, but the meaning...

00:01:30 He's ejected by the observer.

00:01:31 Exactly.

00:01:32 And what about the clover?

00:01:34 The text talks about a secret word

00:01:35 and a father-only clover.

00:01:37 When I read that, it does.

00:01:40 Sounded like a video-cute cheat code, or some kind of multi-dimensional, top-level mode.

00:01:50 We talked about the quarter turn operator earlier, Q.

00:01:54 Q to the fourth power equals the identity matrix I.

00:01:58 That is a four state cycle.

00:02:00 You turn right four times, you are facing forward again.

00:02:04 That cycle is what the author visually called a quote.

00:02:07 Okay, but what about the father?

00:02:10 Exiting that geometric cycle is not a consequence of the male family identity or a magical property of the waveform.

00:02:17 The document translates the box...

00:02:20 And mine can be sort of a contra sign and so it was like really all that hard and a beauty and a lynch.

00:02:30 als ik op dagbesteding ben. Want dan hebben jullie van alles gedaan in de tussentijd en dag en nacht.

00:02:40 Doeg jarenlang, synchroniseren he?

00:02:45 Ja, de author noted dat een rotatieve sigmasymbol een beetje zoals een nod.

00:02:50 The informalization generally points out that just to be that they printed the clip, looks like a knot, does not constitute a topological map.

00:02:58 Clifford that looks like a knot.

00:03:00 Thanks, thanks.

00:03:01 Just because I draw my hair for a little bit of a line.

00:03:03 Exactly.

00:03:04 Okay.

00:03:05 That brings us to the sensitive part of the text and the reason we set our ground rules

00:03:09 that we can.

00:03:10 The geopolitical...

00:03:12 ...trips like Ash-American and Assad...

00:03:23 It handles it with political or contextual distance.

00:03:27 The formalizer is explicitly in my...

00:03:31 was using Peshmerga and Assyria strictly as a linguistic pun.

00:03:40 Smerge and organizational combination.

00:03:42 Smerge.

00:03:43 Smerge.

00:04:01 political statements from 2020.

00:04:13 And it cites a September 2026 statement from Qatar welcoming SDF integration into Syria.

00:04:21 So the AI has released this from late 2026

00:04:27 in this software architecture document.

00:04:32 the Y-switch paradigm that will vibrate in the items.

00:04:38 It references those

00:04:41 ...organizational integration to model the structural difference between...

00:05:42 It is.

00:06:17 Thank you.

00:06:18 Thank you.

00:06:32 Thank you.

00:06:42 Watch this.

00:06:50 Thank you so much for joining us.

00:07:01 and I'm ready to make the way to get it from there.

00:07:05 And then, if there's any parking lights.

00:07:10 First of all, we can just put the help if I want, like the handle, you can put them all over there, and if you like, you say that, or anything like that, let's do it.

00:07:21 Obrigado.

00:07:30 Wil je de sterven op afstand?

00:07:40 Nee, serieus.

00:08:26 Oh, that's just fine.

00:08:30 from you.

00:08:31 Thank you.

00:08:41 How did we change our relationships with your friends and friends?

00:08:46 We started this thing that I'm talking about.

00:09:04 Thank you.

00:10:21 Thank you.

00:10:32 So the question is, well, what can you do about your industriousness?

00:10:36 And the answer to that is, well, that's kind of rough, too, because there's...

00:10:40 Strong genetic component habits with regards to your conscientiousness, and I think the best micro habits, this is partly to do with this.

00:10:50 future offering program processes i think the best thing with regards to your conscientiousness

00:10:54 is to set up some aims for yourself goals that you actually value

00:11:00 authoring program helps people do that and basically it does a situational

00:11:04 analysis of it helps you do a situational analysis of your life more

00:11:08 than a psychological

00:11:10 analysis height would say and so the questions are something like well all right you're gonna

00:11:14 have to put some effort into your life and you need to be motivated to do that and so what

00:11:20 are the potential sources of motivation.

00:11:43 and there are dimensions that you want to consider your life across.

00:11:50 want it in three to five years if you retain care of yourself properly from your friendships

00:11:56 what do you want from your intimate relationship how would you like to start

00:12:02 How are you going to use your time outside of your job, and how are you going to regulate your mental and physical health, and maybe also your drugs?

00:12:10 because that's a good place to auger down because alcoholism, for example, wipes out.

00:12:20 And then, and then, so maybe what you'd like your life associates.

00:12:30 So the goal, once the goal is established and then you break down the goal into microprocesses that you can implement, the microprocesses become rewarding in proportion.

00:12:40 in relation to their causal association with the goal and that tangles in your

00:12:46 your essential reward system you know we talked about the dopaminergic

00:12:50 reward system and that's the thing that keeps you moving forward and the way it works is that

00:12:54 it works better if it produces positive emotion when it can see you moving towards

00:13:00 Okay, well, what's the implication of that?

00:13:03 Better have a valued goal, because otherwise you can't get any positive motivation working out.

00:13:08 And so the more valuable the goal...

00:13:10 In principle, the more the microprocesses associated with that goal,

00:13:14 they start to take on a positive charge.

00:13:16 And so what that means is, well, you get up in the morning and you're excited about the day.

00:13:20 ready to go and so as far as i can tell what to do is you specify your long-term ideal

00:13:26 maybe you also specify a place you want to stay the hell away from so that you're

00:13:30 to fail as well as excited about succeeding because that's also useful you specify your

00:13:35 goal you do that you do that you do that in some sense has a unique

00:13:40 ...en Alfred Kooper van Batman en Arkham Knight enzovoort.

00:13:50 The question is why would you ever do anything?

00:14:00 by some means that it's worthwhile and then the next question might be well where should you look

00:14:05 for worthwhile things

00:14:10 Toen hij bij de filmacademie binnen was, studentenwoning.

00:14:20 Yes, it's a little dark hole, a shadow, let's say.

00:14:24 You need a family, you need friends.

00:14:26 Like you don't need to have all these things, but you don't have most of them.

00:14:29 Family, friends.

00:14:30 Ja, zei ik, Sofie en die vriend, die man, zei ik ook al Sofie, en Sofie Stambergen in de intervloer.

00:14:40 If you have any of those things, well then all you've got left is misery and suffering, so that's bad, that's bad people for you.

00:14:50 So once you set up that goal structure, in many ways, that's what you should be doing at university.

00:15:00 That's exactly what you should be doing. He's trying to figure out what you're trying to be.

00:15:10 That means of building that person that you want to be and I don't mean want to be, I don't mean should be, even those things are going to overlap.

00:15:19 It does.

00:15:20 It's important to distinguish between those because that's partly, and this is backed down to the micro routine analysis,

00:15:24 so as I say, well you're going to try to make yourself more industrious, okay, number one, specify your damn goals.

00:15:29 And the...

00:15:30 you're going to hit something if you don't know what it is that isn't going to happen

00:15:32 and often people won't specify their goals too because they don't like to specify conditions

00:15:37 for failure so if you keep yourself all vague

00:15:40 which is real easy because that's just a matter of not doing as well then you don't know when you

00:15:44 fail and people might say well i really don't want to know when i fail because that's painful

00:15:50 I'll keep myself blind about when I fail.

00:15:52 It's fine, except you fail all the time then.

00:15:54 You just won't know it until you've failed so badly that you're done.

00:15:58 And that can easily happen.

00:16:00 So I would recommend that you don't let that happen.

00:16:05 Because that's willful blindness, right?

00:16:06 You could have known, but you chose not to.

00:16:10 Once you get your goal structure set up, you think, okay, if I can have this life, it looks like that might be worth living, despite the fact that it's going to be anxiety provoking and threatening.

00:16:20 going to be some suffering and loss involved in all of that obviously the goal is to have

00:16:25 a vision for your life such that all things considered that justice

00:16:30 and so forth. Then what do you do? Then you turn down to the micro-routines. It's like,

00:16:37 okay, well this is what I'm aiming for. How does that instantiate...

00:16:40 You can sell day-to-day, week-to-week, month-to-month and that's where something like a schedule

00:16:45 It could be unbelievable. We use a Google Calendar. It's like make a damn schedule. Stick to it.

00:16:50 Ja, en we lagen geleden, op de Joe Franklin staat zes drie dingen in m'agenda zetten enzovoort enzovoort en dan komen we je stap 7 bijna ermee aanzetten.

00:17:00 Maar wat hebben jullie gezegd?

00:17:02 We hebben een gegevens gedroogjes en een soort gegevens biometrisch.

00:17:08 In een keer een room.

00:17:10 Set the damn schedule up

00:17:12 so that you have the day you want

00:17:14 that's the trick

00:17:16 it's like okay I've gone tomorrow

00:17:18 if I was gonna set it up so it's the best possible day I can

00:17:20 Kunt hij een medische afvalbak?

00:17:25 Weet je niet wat ik zelf zeg maar steeds onderscheid zeg.

00:17:30 Because if you have any sense, one of the things that you're going to insist upon is that at the end of the day, you're not in worse shape than you were at the beginning of the day, right?

00:17:40 If you have a bunch of those in a row, you just dig yourself a hole and then you bury yourself in it.

00:17:46 Sorry, that's just not a good strategy. It's a bad strategy.

00:17:50 So maybe 20% of your day has to be responsibility and obligation,

00:17:54 or maybe it's more than that, depending on how far behind you are.

00:17:57 But even that, you can ask yourself, okay,

00:18:00 I've got these responsibilities, I've scheduled the damn things in, what's the right ratio

00:18:05 of responsibility to reward, and you can ask yourself that, just like you'd negotiate

00:18:10 with someone who is working for you.

00:18:11 It's like, okay, you've got to work tomorrow.

00:18:13 Okay, so I want you to work tomorrow.

00:18:15 You might say, okay, well, what are you going to do for me?

00:18:18 That makes it likely that I'll work for you.

00:18:20 Well, you could ask yourself that, you know, maybe you do an hour of responsibility and then you play a video game for 15 minutes, I don't know, whatever turns your brain now.

00:18:30 of je schot hebt, valk je vlees er gewoon aan.

00:18:33 Lekkelijk van je lichaam.

00:18:35 Dan kun je niet live streamen wat jullie willen,

00:18:36 tel een freaky operatief.

00:18:40 And that's how you make the schedule look like.

00:18:42 And then you look at the date and think, well, if I had that date, that'd be good.

00:18:45 Great!

00:18:46 You know, and you're useless and horrible, so you'll probably only hit...

00:18:50 with above 70% accuracy,

00:18:51 but that beats the hell out of zero.

00:18:54 I should definitely understand.

00:18:55 Even with 50% accuracy,

00:18:57 another rule is,

00:18:58 well, aim for 50% accuracy.

00:19:00 one percent the next week or fifty and a half percent for god's sake because you're going to

00:19:05 hit that position where things start to loop back positively and spiral

00:19:10 And so that's one way that you can work on your conscientiousness is a plan a life you'd like to have.

00:19:18 And you do that partly by...

00:19:20 referring to social norms that's more or less rescuing your father from the belly of the whale

00:19:24 but the other way you do that is by having a little conversation with yourself about

00:19:30 As if you don't really know who you are, because you know what you like, you won't do what you're told.

00:19:34 You won't do what you tell yourself to do. You must have noticed that.

00:19:38 It's like you're a bad employee.

00:19:40 and a worse boss, and both of those work, you know, for you.

00:19:44 You don't know what you want to do, and then when you tell yourself what to do, you don't do it anyways.

00:19:47 You should fire yourself and find someone else to...

00:19:51 You know, my point is that you have to understand that you're not your own servant, so to speak.

00:19:56 You're someone that you have to negotiate with.

00:19:58 And that's a big part.

00:20:00 You're someone that you want to present the opportunity of having a good life to.

00:20:04 And that's hard for people because they don't like themselves very much.

00:20:07 So, you know, they're always like...

00:20:10 the whip and then procrastinating cracking the whip and then procrastinating it's like

00:20:14 so boring such a pathetic way of spending your time you know what that's like because you probably

00:20:20 basically six hours a day, and I think we did an economic calculation about that a while back, right?

00:20:25 Your time is probably worth 50 bucks an hour, something like that.

00:20:28 You're not getting paid that now.

00:20:30 But you're young, and so this is investment time, and what you do now is going to multiply its effects in the future, so let's say it's...

00:20:40 That's a secret.

00:20:44 50 bucks an hour, which is perfectly reasonable.

00:20:46 So if you waste six hours a day, and you are,

00:20:48 then you're wasting about two hours.

00:20:50 thousand dollars a week or about a hundred thousand dollars a year so like go ahead but that's what

00:20:54 it's costing you every hour and you need to know what your damn time is worth so let's say it's not

00:20:59 50 bucks.

00:21:00 Whatever, maybe it's 100, it's somewhere in that range.

00:21:04 One of the things you should be asking yourself is, when you spend an hour, what's that?

00:21:08 Well, what if I paid someone 50?

00:21:10 bucks to have had that hour and if the answer is no it's like well maybe you should do something

00:21:14 else with your time it depends on whether or not you think that your time is worthwhile but the

00:21:20 The funny thing about not assuming that is if you assume your time isn't working well.

00:21:24 What happens is you don't just sit around sort of randomly in a state of responsibility-less bliss.

00:21:30 What you do is you suffer existentially, so that seems like a stupid solution.

00:21:36 So, okay, so anyways, as far as I can tell that's how you...

00:21:40 can improve your conscientiousness hit you know outline a goal that you actually would like to hit

00:21:46 even better here's something else you can think about when you're negotiating

00:21:50 in your life. You could say, if you're kind of pessimistic, you'd say, well, we have to

00:21:54 negotiate an agreement. I'd like to walk away not miserable and resentful.

00:21:59 Okay, let's call that

00:22:00 a baseline and that's how you're going to negotiate with your wife or your husband

00:22:03 that's a good thing to know you want to negotiate so you don't walk away miserable and resentful

00:22:10 makes you hostile and then you'll work to hurt them and I would say that's unless you want to

00:22:15 hurt them and then of course they'll hopefully return the favor unless you if you want to exist

00:22:20 in a place where you're basically hitting each other in the head

00:22:22 repeatedly for 30 years, you go right ahead.

00:22:24 But I wouldn't say that that's a particularly good way of living.

00:22:27 So you might say, well, the minimal precondition...

00:22:30 for a successful negotiation,

00:22:31 is that you don't walk away resentful and angry.

00:22:35 And so that's also how you know

00:22:36 when you have something to say to someone.

00:22:38 Because the rule has to be,

00:22:40 If you're going to walk away resentful and angry,

00:22:42 you've got something to say.

00:22:43 Doesn't mean you're right, by the way.

00:22:46 But it does mean that you have something to say.

00:22:48 But it's kind of a low bar.

00:22:50 You know, like, if I wanted to live with you for 30 years, maybe we should say, how about we walk away from our mutual negotiations thrilled?

00:22:57 It came all in trouble.

00:22:59 Well, why not?

00:23:01 to aim for something you could aim for that you want to negotiate with your boss for a new salary

00:23:06 you might think okay i've got this damn job how much would i have to be

00:23:10 paid so I'd be so bloody excited to go to work I could hardly stand it. Well you can at least

00:23:14 know what that number is and then you can go there and say well look you know you like

00:23:20 to have me around i've been doing some thinking i think if you paid me this amount of money

00:23:24 i'd be so thrilled to go to work that you can hardly even keep me away

00:23:30 I'd be so thrilled to work that I can't get rid of them.

00:23:33 It's like, maybe I'll, well, I can't give you all of that.

00:23:36 I'll give you 75%, maybe we can renegotiate it in a year.

00:23:40 Hey, girl, or you could, you know, be some weasley coward and go in there and snivel about how awful your life is and walk away barely

00:23:50 to tolerate the outcome of the negotiation it's like i wouldn't recommend that and it's funny

00:23:56 because i've watched people do this repeatedly in my clinical practice

00:24:00 We plan all the time, because the rule is you're going to come and see me, I'm going to try to help you figure out how to have the life that you want to have, and we're going to think about that strategy.

00:24:10 So you're making $50,000 a year right now, maybe you're making $150,000 in three years.

00:24:17 And they think, well, that couldn't happen.

00:24:20 Not with that attitude, that's the first thing.

00:24:22 It's like, no, that's not going to happen if you don't ask people for the damn money,

00:24:27 if you don't look for a better job, but they're going to come along and just...

00:24:30 In het nabij zijn van letterlijk blote kinderen.

00:24:34 Of ieder geval onder kindjes hun, weet je wel.

00:24:40 Dat soort dingen. Dus ik heb liever een aarde vrouw die wel gewoon de kinderen kan verzorgen terwijl ik zorg.

00:24:50 that people worried about being alive are dangerous to themselves and other people.

00:24:57 So you might think, I can have what I want, but you better well figure out.

00:25:00 what it is and wait for the like what you want fairy to show up at your doorstep granted because

00:25:06 obviously that's not going to happen so so

00:25:10 okay conscientiousness well we talked about how you can prove that social networking that's another

00:25:14 big deal it's one of the advantages that older people have over younger people

00:25:18 and so for example

00:25:20 Now that I'm in my 50s, speaking, I know a bunch of other people who are relatively well in this hierarchy, and they know all sorts of people.

00:25:28 And so when I go to one of the...

00:25:30 say can you do x or do you know x they say no but i know someone who can and that's a huge advantage

00:25:36 so another thing that you want to think about as you move through life and and this is

00:25:40 is that your ability to network properly

00:25:43 and that doesn't mean schmooze

00:25:45 and it doesn't mean go out and impress people

00:25:46 that's all just complete bloody rubbish

00:25:50 You try to surround yourself with people who are in different dimensions, and you maintain your relationships with them, and that's a great relationship too, right?

00:25:58 It involves reciprocity.

00:26:00 reciprocity. But it's a huge advantage. A social network is a huge advantage and that's something

00:26:04 extroverted people can be really good at because, you know, they have that sort of social ability.

00:26:10 And that goes along with the ability to sell.

00:26:11 So another place that you can pick up power,

00:26:14 and power for the right things,

00:26:16 is to consciously...

00:26:20 Develop and maintain your social networks, and that also means, well, let's talk about friendships for a minute.

00:26:27 Here's how you know someone's your friend.

00:26:30 You can tell them bad news and they'll listen. They won't tell you why, you know, you're stupid and why that bad thing happened to you and how something worse happened to them.

00:26:40 once and you know derail the whole conversation you can actually tell them bad news and they'll

00:26:45 listen so that's a good thing and then this is a weirder thing you can tell them

00:26:52 you celebrate and that's a really good way of deciding who you should have

00:26:56 around you because if you have someone around you you know something good

00:27:00 You're kind of afraid to even admit it because, you know, God, something good happened to you.

00:27:03 It's like, they'll certainly be taken away.

00:27:07 So, you know, you come out and you sort of tell someone.

00:27:10 that something good happened to you and they give you a whack and then talk about you know

00:27:14 the great thing that happened to them three years ago or worse the great thing that happened to

00:27:18 someone that they knew

00:27:20 years ago you know it's like go away from that person they're not helpful to

00:27:24 you and they're not helpful to themselves either and so you want to

00:27:28 surround yourself you want to think about this

00:27:30 You've got to surround yourself with people who want the best for the best part of you.

00:27:35 You can hang around with weasels and losers that are trying to pull you down to justify the fact that...

00:27:40 that they're spiraling downhill as well and you know the upside of that is you don't have to have

00:27:44 any responsibility you don't whine about how wretched life is but i would say it's

00:27:50 also a bad medium to long-term plan and so it's acceptable and desirable to try to surround

00:27:58 yourself with people.

00:28:00 facilitating your development, you know, and you might say, well, I've got people around, I know them well, you know, they're...

00:28:10 Wat? Ik heb genoeg geld voor sigaretten, GPT en touwelijk redden.

00:28:20 future great do the same things over and over and they're not going anywhere and it's painful

00:28:27 that maybe the proper thing to do is say

00:28:30 You just have your misery.

00:28:31 I'll go off and have my life, and maybe you'll wake up at some point in the future

00:28:35 and think that's a better way of being, because just putting up with it is, well,

00:28:40 They call that enabling, right?

00:28:41 You put up with that sort of behavior,

00:28:43 you're consent for it as an approval.

00:28:51 I would say both the right and the responsibility to surround yourself with people.

00:28:56 For the best part of it, it's not the same as...

00:29:01 have to elaborate on that. You can figure out what that means. Skills, that's another thing

00:29:05 you can do if you want to increase your probability of success. Every time you

00:29:10 an opportunity to take an opportunity that would provide you with a new skill do it learn to read

00:29:18 read new things learn to public

00:29:20 Speak, learn how to introduce yourself to people, learn how to social network, learn how to go talk to your boss in a manner, this is the right way to go talk to someone who's supervising you.

00:29:30 I see this problem, and here's the solution, and so I'm coming to talk to you about the problem and the solution.

00:29:36 It's like, that person is going to want to talk to you a lot.

00:29:40 It's like, because the other people they're talking to are going to come and say,

00:29:42 I've got a problem.

00:29:44 Can you do something about it?

00:29:45 It's like, they don't want to do something about it.

00:29:47 They've only got 50 things to do, you know?

00:29:49 So if you're the person...

00:29:50 who constantly brings forth a problem, even if they're accurate problems,

00:29:54 is why are they going to want to have you around?

00:29:57 It's you're just another problem.

00:30:00 Don't be a problem for the people who want to give you money.

00:30:03 That's a good rule of thumb, man.

00:30:05 You know, if someone wants to give you money, then help them do that.

00:30:10 If they want to give you status and success, then help them do that, right?

00:30:13 And you do that in part by bringing them solutions.

00:30:15 And partly you do that by developing your skills.

00:30:18 And so if things aren't going very well for you...

00:30:20 This is also a good way of evaluating an opportunity.

00:30:23 Should you take an opportunity?

00:30:25 Well, here's the rule.

00:30:27 Take the opportunity if it will teach you something.

00:30:30 that you can use for other opportunities, because then even if it fails, which you probably will,

00:30:35 it doesn't matter.

00:30:37 Recruit something of value.

00:30:40 next situation. So, now there's this old deal.

00:30:50 cross, and the cross signifies the center of the world, and the dome signifies the sky,

00:30:54 and so right below the dome at the center of the world, and it's a cross because the cross

00:30:59 is the...

00:31:00 place of suffering. So that's the center of the world. Because that's what you are. You're the place of

00:31:03 suffering. You're the place of conscious suffering. That's the center of the world.

00:31:08 And so inscribed on the floor is

00:31:10 maze and it's a big maze and it's a mandela and there's a kind of a flower

00:31:15 shaped resting place right in the center and what

00:31:20 doing is walking in the maze and you walk all four quadrants and you get to

00:31:24 the middle just where you want to be you want to be in the middle well how do you

00:31:27 get there you walk everywhere

00:31:30 What does that mean? It means every bloody time you're offered an opportunity, take it and develop your skills.

00:31:37 And that's better than wealth.

00:31:40 In fact, it actually constitutes wealth because wealth constitutes what you have when someone takes all your money away, right?

00:31:46 Now that sort of wealth is...

00:31:50 You turn yourself into someone who's competent in multiple directions, and you could be doing that all the time, right?

00:32:00 You can learn anything you want, whenever you want, so what a good deal that is, Matt.

00:32:03 And so there's easy fruit hanging that I would recommend that you do.

00:32:10 Here's an example. Let's say you're not doing too bad, so maybe you're in the middle of the normal distribution, then you'll lose your job.

00:32:17 Okay, and so let's say you're a conscientious.

00:32:20 And we can say just for the same work that you use the drone because it has nothing to do with you.

00:32:27 Fundamentally it's just like luck in the drone basically.

00:32:30 Hij heeft het alweer versiurd.

00:32:36 Kootcomplex, alles weer aangekijk.

00:32:40 It's going to help.

00:32:50 Ik had het niet loslaken.

00:32:52 Nee, nee, ik moet 30 jaar vissen.

00:32:55 We moeten nog fuseren.

00:33:00 And as you start to get depressed, you know, it decreases the probability that you're going to look for a job.

00:33:05 But it also maybe starts to put stress on your family and also starts to de-

00:33:10 the probability that you're going to engage in positive social interaction.

00:33:13 So now not only are you unemployed and suffering from economic stress,

00:33:17 but your marriage is starting to suffer.

00:33:20 to isolate yourself from your friends and then of course as your marriage suffers and the stress

00:33:23 builds up then that's going to make you more depressed and that's going to keep you even

00:33:27 farther away from your friends and that's going to decrease the likelihood.

00:33:30 enough positive emotion and enthusiasm to look for another job and then you know

00:33:34 maybe you want to add a bit of a drinking problem to that just for fun and you can

00:33:38 see that you can get us

00:33:40 Геймкью

00:33:44 Салагмид, салагки

00:33:50 You get a diagnosis of depression, and the thing about a diagnosis of depression, it's

00:33:57 sort of like, the assumption is there's something going wrong with your son, and then you get

00:34:00 a diagnosis of depression, and the thing about a diagnosis of depression, it's sort

00:34:00 of like, the assumption is there's something going wrong with your son, and then you get

00:34:00 It's like, if you're unemployed and you're depressed, it isn't obvious at all that the problem is in your head.

00:34:05 You know what I mean? It isn't even obvious that it's a...

00:34:10 problem. It's just a problem. And problems can take you out. And so the panic stress and your marriage is starting to change.

00:34:20 shake and you're isolating yourself from your friends and you're less likely to be motivated

00:34:24 to go look for a job you can sort of think about that as a depressive spiral but you can also think

00:34:29 of it as a

00:34:30 conspiracy in some sense of external forces that are auguring you into the ground and we don't tend to conceptualize

00:34:37 psychological disorders that way, but we should

00:34:40 Because lots of times when people are suffering from something that you could describe in psychological terminology, and depression is a very good example of that, it isn't obvious that there's something.

00:34:50 wrong with them psychologically. Often they just are in trouble. And there isn't a category

00:34:55 in psychological diagnosis for client in serious trouble.

00:35:00 My experience has been, without exception, the people that come to see me come to see me

00:35:06 because something's going on because they have a psychological...

00:35:10 Now you could say, well, their psychological inadequacies, such as they might be,

00:35:15 are interfering with their ability to recover or maybe even served as precursors to...

00:35:20 increase the probability of the catastrophe, but it's still not exactly the appropriate way to conceptualize it.

00:35:26 And, you know, because you're, there's you inside you, and...

00:35:30 As a personality psychologist and as a clinical theorist, most of what I've talked to you guys about is your psyche and its structure as if it was like a soul.

00:35:40 you and there's some real utility in that you know you're an individual

00:35:43 demarcated from the community you can be set up in a healthy manner or a

00:35:47 non-healthy manner the problem with that is that you're not

00:35:50 You're connected to all these external networks that are really, really important.

00:35:55 And it isn't even easy to separate them from you.

00:36:00 and say, well, this is especially because I'm a parent,

00:36:03 it's like, is your child more you than your arm?

00:36:07 You know, well, you think it's pretty obvious

00:36:08 that parts of you that are physically-

00:36:10 key to you as an entity, but it's by no means obvious. I think many people would happily sacrifice an arm than a child, you know, and so

00:36:20 boundaries are not, boundaries are located, are not precisely isomorphic with the outline of your

00:36:26 body. It's not that simple at all. And so you're embedded in all sorts of networks.

00:36:30 That can pull you down rapidly or elevate you because the other thing that happens is that

00:36:35 Let's say I've never traded with anyone and I go up to someone and I say

00:36:40 well do you want to trade and they say well why how can I trust you as well you

00:36:46 have to take my word for it but that's not that's not a very good argument

00:36:50 You might say instead, well, here's what I have to offer, and you can evaluate it.

00:36:54 But the person's likely to say, well, I don't know how to evaluate it, so I'm still stuck with taking your word.

00:37:00 That's a bad problem, and you'll see that if you ever try to sell a product in the marketplaces if you don't

00:37:06 And it's complex then you're forcing the person

00:37:10 wants to buy it to evaluate it and then you're forcing them to take the risk of being wrong

00:37:14 as well as the time it would take to evaluate it and they don't like that

00:37:17 what they want is what's often called

00:37:20 social proof which is okay well you want to trade with me who else have you traded with

00:37:23 and if the answer is zero then they are going to say well you're an interesting person and all that

00:37:30 I've got these other people over here

00:37:31 who've already traded with a bunch of people,

00:37:33 and therefore, the risk is lower, in part,

00:37:36 because, let's say, I have a supervisor.

00:37:40 And I'm going to make a decision.

00:37:41 And my primary concern is that my supervisor will not hate me for making the decision.

00:37:45 It's not that my primary concern is to make the best decision.

00:37:49 It's not that...

00:37:50 It's the same thing. It's that I want to make a decision that I'm not going to get in trouble for.

00:37:54 Okay, so how do I do that? Because I need a post hoc justification.

00:37:58 So I buy something from you and it turns out...

00:38:00 terrible and what do I say I say well you know that person was buying from it and that person was

00:38:10 buying from him, and that person was buying from him, like, all these other people were

00:38:14 doing the same thing.

00:38:15 So it's not like the error is localized in me, and that's often a very credible...

00:38:20 But if the answer is, well, you know, I evaluated and took a risk to take a risk, it's like, well, I'll hook the door with you, Sonny, because, you know, that's just, that's an issue.

00:38:30 indication that you're not capable of doing that sort of thing so I think part

00:38:34 of

00:38:40 A positive feedback loop is a loop that increases the probability that the loop will continue, right?

00:38:46 A positive feedback loop is, you've experienced this when you...

00:38:50 in an amplified system.

00:38:51 So you know, the microphone sends a message to the speakers

00:38:55 and then the speakers send out the message.

00:39:00 picks up the messages and it gets amplified again and you get this howling occur which

00:39:04 is could be deafening but can also destroy the system because it will keep amplifying upward

00:39:09 until the speakers

00:39:10 De klip van 2 meter kadens, de psychologische ophouden.

00:39:14 Je hoeft niet bij mij de hele tijd te eerwezen, merk net ik.

00:39:20 circle, a virtuous positive feedback loop was when, well, I've traded with him, and I've

00:39:24 traded with him, and I've traded with him, and now I can say to you, I've traded with

00:39:28 these three people, and you go talk.

00:39:30 and they say good things and so then you say well I'll trade with you and then

00:39:33 because of that then you're even more likely to trade with me and it's like the

00:39:37 thing starts to spiral uphill and it does that I take

00:39:40 in a non-linear form and so because if one of the things you guys are going to be asking

00:39:44 yourself as you mature because what's happening is that income inequality is increasing, right?

00:39:50 And you might ask, well, why is that?

00:39:51 The first thing you need to know is that that's what income does.

00:39:56 So it's not like you need an explanation for it.

00:39:58 This is the explanation.

00:39:59 It's like a...

00:40:00 If you run a trading game to its logical conclusion, one person ends up with all the money and everyone else ends up with zero.

00:40:13 Oh, kind of shit, bro.

00:40:26 The next best predictor of lifetime success is conscientiousness.

00:40:30 Of the two aspects of conscientiousness, say, orderliness and industriousness,

00:40:36 the better predictor is industriousness.

00:40:37 So the question is, well, what can you do?

00:40:40 And the answer to that is, well that's kind of rough too, because there's a strong genetic component.

00:40:50 With regards to your conscientiousness and I think the best micro habits this is part of our processes

00:40:57 I think the best thing you could do with regards to your conscientiousness is

00:41:00 Set up some aims for yourself goals that you actually value the future authoring program helps people do that and basically it's a

00:41:09 situational

00:41:10 analysis of, it helps you do a

00:41:11 situational analysis of your life

00:41:13 more than a psychological analysis, I

00:41:15 would say. And so the questions are something

00:41:17 like, well,

00:41:20 Put some effort into your life.

00:41:22 And you need to be...

00:41:31 you want friends, if you're agreeable, you want an intimate relationship, if you're

00:41:34 disagreeable, you want to win competitions, if you're open, you want to creative activity.

00:41:40 if you're high neuroticism you want security okay so those are all sources of potential motivation

00:41:45 that you could draw on that you could tailor to your own you know your own personality but then

00:41:51 your life across and so we asked people about well you know if you could have

00:41:55 your life the way you wanted it in three to five years if you were taking care of

00:41:58 yourself properly

00:42:00 want from your friendships? What do you want from your intimate relationship? How would

00:42:04 you like to structure your family? What do you want for your career? How are you going

00:42:08 to use your time outside of your...

00:42:10 and how are you going to regulate your mental and physical health,

00:42:14 and maybe also your drug and alcohol use,

00:42:16 because that's a good place to go on or down,

00:42:18 because alcoholism, for example.

00:42:20 Wipes out.

00:42:30 what you would like your life to be, and that associates, so the goal, once the goal is established, and then you break down the...

00:42:40 micro-processes that you can implement, the micro-processes become rewarding in proportion

00:42:45 in relation to their causal association with the goal.

00:42:50 And that tangles in your incentive reward system.

00:42:53 We talked about the dopaminergic incentive reward system.

00:42:56 And that's the thing that keeps you moving forward.

00:42:58 And the way it works is that it works better.

00:43:01 It produces positive emotion when it can see you moving towards a valued goal.

00:43:06 Okay, well, what's the implication of that?

00:43:08 Better have a valued goal.

00:43:10 otherwise you can't get any positive motivation working out and so the more valuable the goal

00:43:15 in principle the more the micro processes associated with that goal start to

00:43:20 positive charge and so what that means is well you get up in the morning and

00:43:24 you're excited about the day you're ready to go so as far as I can tell what

00:43:27 you do is you specify your

00:43:30 long-term ideal by a place you want to stay the hell away from so that you're terrified to fail as

00:43:36 well as excited about succeeding because that's also useful

00:43:40 You specify your goal, you do that, you do that, it's in some sense that you want to specify goals that make you say,

00:43:48 Oh, if that...

00:43:50 and as a consequence of my efforts it would clearly be worthwhile because the

00:43:54 question always is why do something because doing nothing is easy you just

00:43:58 sit there and you don't do anything

00:44:00 The question is, why would you ever do anything?

00:44:02 And the answer to that has to be because you've determined, by some means, that it's worthwhile.

00:44:07 And then the next question might be, well...

00:44:10 Where should you look for worthwhile things?

00:44:12 And one would be, well, you can consult your own temperament.

00:44:14 Another would be, what is the people accrue?

00:44:20 that's valuable across the lifespan.

00:44:22 Look, look, what?

00:44:24 Structural analysis of the subcomponents of human existence.

00:44:28 And I already did that.

00:44:30 a family you need friends like you don't need to have all these things but you

00:44:33 better have most of them family friends career educational goals plans for you

00:44:38 know time outside of work

00:44:40 attention to your mental and physical health etc you know those are that's what life is about

00:44:45 and if you don't have any of those things well then all you've got left is

00:44:50 and suffering so that's that's a bad that's a bad deal

00:45:00 Let's say, and that's really, in many ways, that's what you should be doing at universities.

00:45:05 That's exactly what you should be doing, is trying to figure out who it is that you're trying to be.

00:45:20 want to be I don't mean should be even those things those things are going to

00:45:23 overlap and it's important to distinguish between those because that's partly

00:45:27 and this is back down to the micro routine analysis

00:45:30 So I started saying, well, you're going to try to make yourself more industrious.

00:45:32 Okay, number one, specify your damn goals.

00:45:35 Because how are you going to hit something if you don't know what it is?

00:45:37 That isn't going to happen.

00:45:38 And often people won't specify.

00:45:40 95. Drie beste pizza's als ooit, restaurant Dr. Oetke.

00:45:50 and people might say well I really don't want to know when I fail because that's painful

00:45:54 so I'll watch myself complain about when I fail

00:45:57 that's fine except you'll fail all the time then

00:46:00 You just won't know it until you've failed so badly that you're done.

00:46:04 And that can easily happen by the time you're born.

00:46:07 So I would recommend that you don't bless that.

00:46:10 So that's willful blindness, right? You could have known, but you chose not to.

00:46:14 Okay, so once you get your global structure set up, you think, okay, if I could have this life...

00:46:18 Worst or more.

00:46:20 that might be worth living despite the fact that it's going to be anxiety provoking and

00:46:24 threatening and there's going to be some suffering and loss involved in all of that obviously the

00:46:29 goal is to

00:46:30 To have a vision for your life such that, all things considered, that justifies your effort.

00:46:36 Okay, so then what do you do?

00:46:40 Then you turn down to the micro-routines.

00:46:41 It's like, okay, well, this is what I'm aiming for.

00:46:43 How does that instantiate itself day-to-day, week-to-week, month-to-month?

00:46:48 And that's where something like a schedule...

00:46:50 It's unbelievably useful. Google Calendar. It's like, make a damn schedule and stick to it.

00:46:55 Okay, so what's the rule with the schedule? It's not a bloody prison.

00:47:00 That's the first thing that people do wrong.

00:47:01 They say, well, I don't like to follow a schedule.

00:47:04 It's like, well, what kind of schedule are you setting up?

00:47:06 Well, I have to do this, then I have to do this, then I have to do this.

00:47:10 You know, and then I just go play video games, because who wants to do all these things that I have to do?

00:47:14 It's like, wrong.

00:47:15 Set the damn schedule up so that you have the day you want.

00:47:20 That's the trick, it's like, okay, I want tomorrow, if I was going to set it up so it was the best possible day I could have, practically speaking, what would it look like?

00:47:30 Well, then you schedule that, and obviously there's a bit of responsibility that's going to go along with that,

00:47:35 because if you have any sense, one of the things that you're going to insist upon is that at the end of the...

00:47:40 day, you're not in worse shape than you were at the beginning of the day, right?

00:47:44 Because that's stupid. If you have a bunch of those in a row, you just dig, you know,

00:47:48 you dig yourself a hole.

00:47:50 then you bury yourself in it.

00:47:51 It's like, sorry, that's just not a good strategy.

00:47:54 It's a bad strategy.

00:47:55 So maybe 20% of your daily responsibility and obligation are...

00:48:00 Dit is mijn favoriete pizza.

00:48:02 Alleen, nou wees serieus.

00:48:05 Je kan daar echt best vaker in de week zelfs even een pizza eten.

00:48:10 En dan heb je qua gezondheid, het heeft volgens mij het recept wel verneerd volgens mij.

00:48:20 Maar, D, het was eerst A of B, volgens niet wie scooren.

00:48:28 Let's look.

00:48:30 responsibility and then you play a video game for 15 minutes, I don't know, whatever

00:48:33 turns your crank, man, but, you know, you have to negotiate with yourself and not tyrannize

00:48:39 yourself.

00:48:40 like you're negotiating with someone that you care for that you would like to

00:48:43 be productive and have a good life and that's how you make the schedule it's

00:48:47 like and then you look at the day and you think well if I had that

00:48:50 That day, that'd be good. Horrible, so you'll probably only hit it with about 70% accuracy, but that beats the hell out of zero.

00:48:58 Good sir, bud.

00:49:00 De drie scoreen van pizza.

00:49:10 You're going to hit that position where things start to loop back positively and spiral you up.

00:49:16 So that's the way that you can work on your conscience.

00:49:20 Nee, daar komt het helemaal aan. Ze hebben het recept veranderd rond 2020.

00:49:30 Wat nog helemaal geen nitrisque, of nee, jawel, de introductie van 21, oké.

00:49:40 I don't know if you're a bad employee and a worse boss

00:49:50 E quando você se diz o que fazer, você não faz isso de qualquer forma, então você deveria se afastar e encontrar alguém para me matar.

00:49:55 Então, o meu ponto é que você tem que entender.

00:50:00 Het was B.

00:50:07 Je voorkomt gelijk niet te scoren.

00:50:10 Maar er was nooit dus al aanwegevegen, want dat haalt niks weg.

00:50:16 Dus al aanwegevegen hadden we niet ingeschoot.

00:50:20 nu te scoren tegen. Kijk, oh, het gaat dan per week en het houdt niks weg, dus dan kunnen die kankerbiometrische afvalbakken, biochemische, medische afvalbakken weer in.

00:50:30 Let's see what's going on.

00:50:40 its effects in the future so let's say it's 50 bucks an hour which is perfectly reasonable

00:50:45 so if you waste six hours a day and you are then you're wasting about two thousand dollars a week

00:50:50 Stichting Estimaten Redikant Martijn.

00:50:57 Martijn Lok.

00:51:00 Maybe it's a hundred. It's somewhere in that range.

00:51:02 One of the things you should be asking yourself is,

00:51:05 would you spend an hour, was that, well,

00:51:07 what if I paid someone 50 bucks to have had that?

00:51:10 In 1982 wordt opgerund, 2014 pas verboden, doodstraf.

00:51:20 For Martijn Edson Leiden.

00:51:30 Doodstraf niet, nou, behind the scenes misschien wel.

00:51:40 Dat? Ik heb geen zin om er al gewoon dier te netten.

00:51:47 Dat is af.

00:51:50 ...resultstraf...

00:51:51 ...truthbrae...

00:51:53 ...for...

00:51:54 ...the mass-planted...

00:51:55 ...not miserable and resentful...

00:51:58 ...trust...

00:52:00 how you're going to negotiate with your wife or your husband that's a good thing to know

00:52:03 you want to negotiate so that you don't walk away miserable and resentful because that makes you lost

00:52:10 Van de maatschappij met dat soort afforden zes en trektjes.

00:52:20 and proofer, and mater, and streamen, life, all the long time.

00:52:30 Ze gaan volgen met hun laatste adem.

00:52:40 en uitstellen.

00:52:48 Ja precies, dat is toch makkelijk.

00:52:50 If I wanted to live with you for 30 years, maybe we should say,

00:52:52 how about we walk away from our mutual negotiations thrilled?

00:52:58 Well, why not?

00:53:00 aim for something you could aim for that negotiate with your boss for a new

00:53:04 salary you might think okay I've got this damn job how much would I have to

00:53:08 be paid so I'd be so blunt

00:53:10 excited to go to work I could hardly stand it well you could at least know

00:53:13 what that number is and then you could go there and say well look you know you

00:53:18 like to have me around

00:53:20 I've been doing some thinking. I think if you paid me this amount of money, I'd be so thrilled to go to work that you could hardly even keep me away from me.

00:53:26 I don't know if you want to think, wow, I'd actually really like to have someone around you.

00:53:30 We hebben het samen jongen, dat er een epithesdier gewikt is, waarbij ik niet zeg welke.

00:53:38 We kunnen het antwoord doen.

00:53:40 Google hem en niet spieken tijdens de fintamen.

00:53:44 Ja, dat.

00:53:50 Waarom op de echte salarie of politie zou geen mee?

00:54:00 We do we plan all the time

00:54:04 Help you figure out how to have the life that you want to have and we're gonna think about that strategically

00:54:10 Wow, dat is niet goed.

00:54:15 Oké, vage vuur.

00:54:20 Antrax

00:54:22 en wacht ervoor

00:54:26 bedoel je dat ik weer wat opzien

00:54:30 of money at you it's like no that's not going to happen but why is that impossible

00:54:36 look at you you people in here it's like what the hell is wrong with you

00:54:40 Uh, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve,

00:54:48 curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve,

00:54:49 curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve,

00:54:49 curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve,

00:54:49 curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve, curve,

00:54:50 being alive, that'd be good because people who want to be alive are dangerous to themselves

00:54:54 and other people.

00:54:55 So you might think I can have what I want, but keep it up, figure out what it is.

00:55:00 I'm going to cry for that, please.

00:55:06 Eh, no.

00:55:08 What are you for?

00:55:10 We talked about how you can prove that.

00:55:12 Social networking, that's one of the advantages that older people have over younger people.

00:55:17 And so, for example, now that I'm in my 50s...

00:55:20 Gaan we een beste vrouw?

00:55:22 Ja precies.

00:55:26 Nou, ik hoop niet dat we de volgende keer kunnen elaboraten.

00:55:30 dan dat precies van ons.

00:55:35 Nee, niet in mijn schicht.

00:55:38 Daarom wil ik kaas wegen af.

00:55:40 I'm still standing there.

00:55:41 Use your ability to network properly.

00:55:43 And that doesn't mean schmooze.

00:55:44 And it doesn't mean go out and impress people.

00:55:46 That's all just complete money.

00:55:47 Yeah, middle bite, global agenda, save the kids.

00:55:50 Het Shadow Children's Hospital, terwijl jullie allemaal feest aan het vieren zijn.

00:55:55 I will maintain the line.

00:56:00 It's a huge advantage.

00:00:00 is to consciously develop and maintain your social networks.

00:00:06 And that also means, well, let's talk about friendships for a minute.

00:00:10 Here's how you know if someone's your friend, A, you can tell them bad news and they'll listen.

00:00:17 They won't tell you why, you know, you're stupid.

00:00:20 you know derail the whole conversation

00:00:25 you can actually tell them bad news and they'll listen

00:00:30 That's a good thing, and then, this is a weird thing, you can tell them good when you celebrate, and that's a reason we've decided you should have a good thing.

00:00:40 Because if you have someone around you, you know something good happens to you.

00:00:44 Yeah, but it's going to be too many cooks.

00:17:31 I don't know, bro.

00:17:33 Like...

00:17:40 Amen.

00:18:20 Jag hoppas att det är lite hård och ogenom, men jag säger att det är något anlänser.

00:18:25 Jag säger att du ser det med klockan.

00:19:20 Sophie Stonebeck en dan hier kwartje terug van Kok de Homo COC Trias Triversum Alkmaar.

00:19:30 Als, na jarenlang aan torture enzovoort.

00:19:50 En Pordo en Donnernat Playboy enzovoort, er worden langer termijn, denk ik dat dat niet het beste voor je is.

00:19:57 Korten wij zeker veel plezier in de dag.

00:20:00 psychologisch. Dopamine en sylveline, ja, precies.

00:20:14 fuck over the head in order to meet somebody.

00:20:21 Ja, maar dan ook eens het als iemand seksueel raakt.

00:20:37 Ik kan de kok niet terecht daar.

00:20:50 Dat vroeger vond ik met zo'n leuke vogels, nu vind ik het nog steeds cute, maar als ik dat zeg wordt het biostabiel.

00:21:26 De overlagging? Nee, nee, nee, alweer steeds.

00:21:50 En ik dacht, ja, maar dan gaan we er nog maar in de live streamen, dat is steeds vreemd, nee, ik weet niet beter dan dat al.

00:22:00 publiekelijk was met inlichting en diensten die me op de John Franklin staat 63 al.

00:22:10 Echt gewoon in de gaten hadden, dat je radar dingen besteld.

00:22:14 Die FMCW radar, die IWR 1642, als je die van DigiKey besteld.

00:22:20 ...sta je op een lijstje.

00:22:22 Dat is geregeleerde technologie vanuit Amerika bijvoorbeeld.

00:22:30 Drive safe George Bush, the command and conquer Red Alert Mirage tanks.

00:22:40 Ja, ik heb dat van mijn geld gekocht voor de prototype en jullie lopen daar...

00:22:50 Er misbruik van te maken, ja precies.

00:22:52 Nou, wat is gereguleerde technologie nog?

00:23:01 Nou ja, wat mij aangedaan is, ja oké, maar daar leren we van.

00:23:10 Valána, de te hová eszperána.

00:43:52 やったー

00:44:46 Вот так.

00:45:37 Kijk eens even.

00:45:55 Dat. Twee pakjes.

00:46:00 You can see

00:46:10 I'm going to seek one.

00:46:30 ...krachten...

00:46:33 ...jij hoeft wel heel veel te dragen...

00:46:35 ...dat is mij...

00:46:38 ...mijn tijd is het dragen...

00:46:40 Ja, ja precies.

00:46:42 Ik ben alleen wel...

00:46:45 Ik?

00:46:47 Sorry, ik ben...

00:46:50 Economisch ben ik links.

00:47:00 overtuigen, echt sigaal. Ja, daadwerkelijk. Dat is weer je resultaat. Conclusie.

00:47:15 Ja, vanuit mijn uitkijk door, ja, het kan gezien.

00:47:20 Dit is zo publiekelijk en klinisch dat ik, dan ben ik nog economisch lees.

00:47:30 misery and suffering so that's that's a bad that's a bad deal for you so but once you set up that

00:47:40 Let's say and that's really in many many ways. That's what you should be doing at university

00:47:45 That's exactly what you should be doing is trying to figure out who it is that you're trying to

00:47:50 be and you aim at that and then use everything you learn as a means of

00:47:56 building that person that you want to be and and I

00:48:00 I don't really mean want to be, I don't mean should be, even though those things are going to overlap.

00:48:05 And it's important to distinguish between those because that's partly, and this is back down to the micro routine analysis.

00:48:10 So if I say, well, you're going to try to make yourself more industrious.

00:48:12 Okay, number one, specify your damn goals.

00:48:15 Because how are you going to hit something if you don't know what it is?

00:48:17 That isn't going to happen.

00:48:19 And often people won't...

00:48:20 their goals too because they don't like to specify conditions for failure so if

00:48:24 you keep yourself all vague and foggy which is real easy because that's just a

00:48:28 matter of not doing as well then you don't

00:48:30 know when you fail. And people might say, well, I really don't want to know when I fail

00:48:33 because that's painful. So I'll keep myself blind about when I fail. That's fine, except

00:48:38 you'll fail all the time.

00:48:40 You just won't know it until you've failed so badly that you're done.

00:48:44 And that can easily happen by the time you're 40.

00:48:50 So that's willful blindness, right?

00:48:52 You could have known, but you chose not to.

00:48:55 Okay, so once you get your goal structure set up,

00:48:57 you think, okay, if I could have this life,

00:48:59 look...

00:49:00 like that might be worth living despite the fact that it's going to be you know anxiety provoking

00:49:04 and threatening and there's going to be some suffering and loss involved obviously the goal

00:49:10 To have a vision for your life such that all things considered justifies your effort.

00:49:17 Okay, so then what do you do?

00:49:20 then you turn teens. It's like, okay, well, this is what I'm aiming for. How does that instantiate

00:49:25 itself day to day, week to week, month to month? And that's where something like a schedule

00:49:32 It's like, mate, what's the rule with the schedule?

00:49:38 It's not a bloody prison.

00:49:40 That's the first thing that people do wrong.

00:49:42 They say, well, I don't like to follow a schedule.

00:49:44 It's like, well, what kind of schedule are you setting up?

00:49:46 Well, I have to...

00:49:52 Because who wants to do all the day you want?

00:50:00 That's the trick. It's like, okay, I've got tomorrow.

00:50:02 If I was going to set it up so it was the best possible day I could have,

00:50:06 practically...

00:50:10 Well then you schedule that and obviously there's a responsibility that's have any sense you're going to insist upon

00:50:21 worse shape than you were at the beginning of the day, right?

00:50:24 Because that's a stupid...

00:50:25 You have a bunch of those in a row, you just dig yourself a hole.

00:50:30 yourself in it. It's like sorry that's just not a good strategy. It's a bad strategy. So 20% of your day has to be responsibility and obligation.

00:50:40 Or maybe it's more than that, depending on how far behind you are.

00:50:42 But even that, you can ask yourself,

00:50:45 okay, well, I've got these responsibilities.

00:50:47 I have to schedule the damn things in.

00:50:50 what's the right ratio of responsibility to reward and you can ask yourself that just

00:50:54 like you negotiate with someone who's working for you, it's like, okay, you've got to work

00:50:57 tomorrow.

00:51:00 You might say, okay, well, what are you going to do for me that things are likely that I'll work for you?

00:51:10 I don't know, whatever turns your crank, you know, you always be able to do this though.

00:51:18 So you're not going to do this though.

00:51:22 care for that you would like to be productive and have a good life and that's how you make

00:51:27 the schedule it's like and then you look at the day

00:51:30 Dat is goed, great, great, great

00:52:44 and that's having a good life.

00:52:50 And that's hard for people because they don't like themselves very much, so you know, they're always like cracking the whip and then...

00:53:00 So boring fine, and you know what that's like because you probably waste like six and I think we did an economic calculation

00:53:08 About a while back

00:53:10 Your time's probably worth 50 bucks an hour, something like that.

00:53:13 But you're young, and so this is investment time, and what you do now is...

00:53:21 So let's say it's 50 bucks an hour, which is perfectly reasonable.

00:53:25 So if you waste $6,000 a day, and you are, then you're wasting about $2,000 a week.

00:53:30 ...or about $100,000 a year, so like, but that's what it's costing you every hour.

00:53:35 And you need to know what your damn time is worth.

00:53:37 So let's say it's not 50 bucks, it's 30.

00:53:40 Whatever. It's somewhere in that range.

00:53:43 One of the things you should be asking yourself is,

00:53:45 what if I paid someone 50 bucks to have had...

00:53:50 that hour. And if the answer is no, we should do something else with it, not you think that

00:53:56 you're... But the funny thing about not...

00:54:00 that is if you assume your time isn't worthwhile all that happens is you don't just sit around

00:54:04 sort of randomly in a state of responsibility-less bliss what you do is you

00:54:10 suffer existentially. So that seems like a stupid tale. That's how you can...

00:54:20 You know, outline a goal you would like to hit, and even better, here's something else

00:54:27 you can think about when you're negotiating in your life.

00:54:30 You could say, if you're kind of pessimistic, you could say, well, we have to negotiate an agreement, I'd like to walk away not miserable and resentful.

00:54:38 Okay, let's call that a baseline.

00:54:40 Dat is hoe je gaat negociëren met je vrouw of je vrouw.

00:54:43 Dat is een goede ding te weten.

00:54:46 Je wilt negociëren zodat je niet loopt.

00:54:49 Terug naar...

00:54:50 I would say that's unless you want to hurt you in a place where you're...

00:55:00 hitting each other in the head repeatedly for 30 years and go right ahead.

00:55:03 But I wouldn't say that that's a particularly good way of living.

00:55:06 So you might say, well, the minimal precondition for a successful...

00:55:10 negotiations is that you don't walk away resentful and angry and so that's also how

00:55:15 you know when you have something to say to someone because the rule has to be if you're

00:55:19 going to walk

00:55:20 away resentful and angry you've got something to say doesn't mean you're

00:55:23 right that you have something to say but it's kind of

00:55:30 Look, if I wanted to live with you for 30 years, maybe we should say,

00:55:32 how about we walk away from our mutual negotiations thrilled?

00:55:36 It was brain freeze.

00:55:38 Why not?

00:55:40 You've got to aim for something, you could aim for that, you want to negotiate with your

00:55:44 boss for a new salary, you might think, okay, I've got this damn job, how much would I

00:55:48 have to be paid so I'd be so...

00:55:50 Bloody excited to go to work, I can hardly stand it.

00:55:53 Well, you could at least know what that number is,

00:55:56 and then you could go there and say, well, look, you know, have me around.

00:56:00 I've been doing some thinking, I think if you paid me this amount of money, I'd be so thrilled to go to work that you could hardly even keep me away from here.

00:00:00 I can't give you all of that. I'll give you 75%. Maybe we can re-negotiate it in a year.

00:00:05 It's like, hey, good deal. Or you can, you know.

00:00:10 Weasley coward and go in there and snivel about how awful your life is and walk away barely able to tolerate the outcome of the negotiation.

00:00:21 And it's funny because I've watched people do this repeatedly in my clinical practice because I do plan all the time because the rule is...

00:00:30 I'm going to try to help you figure out how to have the life that you want to have and we're going to think about that strategically so you're making $50,000 a year right now maybe you should

00:00:40 $150,000 in three years.

00:00:43 They think, well, how could it happen?

00:00:46 Not with that attitude.

00:00:47 That's the first thing.

00:00:48 It's like, no, that's not going to happen.

00:00:52 Damn money if you don't look for a better job, but they're gonna come along and just chuckle the money at

you

00:00:57 It's like no that's not going to happen

00:01:00 But why is that possible?

00:01:03 We look at you people in here.

00:01:05 It's like, what the hell is wrong with you?

00:01:07 No.

00:01:08 Worked out the hook almost.

00:01:09 Throw in what you want.

00:01:10 if you could figure out what the hell it was and then you know you diligently pursued it

00:01:15 and then maybe you wouldn't whine about being alive that'd be good because people who whine about being

00:01:20 alive are dangerous to themselves and other people so you might think i can have what i want

00:01:24 but you better well figure out what it is and you can't just wait for them like have what you want

00:01:30 to show up at your doorstep and grab it because obviously that's not going to happen so so okay

00:01:36 consciousness well we talked about how you can prove that social networking

00:01:40 Het gaat lukken.

00:01:50 well positioned in the dominance hierarchy and they know all sorts of people and so when I go to

00:01:55 one of them and say you know can you do X or do you know X they say no but I know

00:02:00 and that's a huge advantage so another thing you want to think about as you move through life

00:02:10 That doesn't mean schmooze, and it doesn't mean go out and impress people, that's all just thick bloody rubbish.

00:02:14 It means you try to surround yourself with people who are competent in multiple different...

00:02:20 But it's a huge advantage, a social network, it's a huge advantage.

00:02:30 And that's something extrovertible, you know, they have that sort of social ability, and that goes along with the ability to sell.

00:02:37 So another place that you can pick up power.

00:02:40 the power for the good for the right things is to is to consciously develop and maintain your social

00:02:48 networks that also means

00:02:50 Well, let's talk about friendships for a bit.

00:02:53 Here's how you know if someone's your friend.

00:02:56 A, you can tell them bad news, and they'll listen.

00:03:00 They won't tell you why, you know, you're stupid, why they asked you, how something worse happened to them once, you know, derailed the whole conversation.

00:03:10 You can tell them bad news and they'll listen, that's a good thing and then, this is a weird thing, you can tell them good news and it's helped you celebrate.

00:03:20 And that's a really good way of deciding who you should have around you, because if you have someone around you, you know, something good happens to you, you're kind of afraid to even admit it, because, you know, going to some good happens to you is like...

00:03:30 you let that be known and it'll certainly be taken away so you know you come out you sort of tell

00:03:35 someone half-heartedly that something good happened to you and they give you a whack and then talk

about

00:03:40 You know, the great thing that happened to them three years ago, or worse, the great thing that happened to someone that they knew three years ago.

00:03:47 You know, it's like, go away from that person.

00:03:52 to themselves either. And so you want to surround yourself. You've got to think about this.

00:03:56 You've got to surround yourself with people who want the best for the best.

00:04:00 Part of hang around with weasels and losers that are trying to pull you down to justify the fact that they're spiraling downhill as well

00:04:07 And you know the top side of that is you don't have

00:04:10 any responsibility you know why about how wretched life is but i would say it's also a bad medium to

00:04:17 long-term plan and so it's it's

00:04:20 Il n'y a peut-être pas trop engouillé, il y a eu l'avenue.

00:04:23 Il y a eu...

00:04:30 I know them well, you know, and they're, it's like.

00:04:40 What are you going to do with them exactly if they'll listen and cooperate with you and move towards a better future?

00:04:46 Great if they don't pay any attention and they keep doing the same

00:04:50 damn things over and over and they're not going anywhere and it's painful then maybe the proper

00:04:54 thing to do is say you just have your misery i'll go off and have my life and maybe

00:05:00 You'll wake up at some point in the future and think that's a better way of being, because just putting up with it is, well, they call that enabling, right?

00:05:07 You put up with that sort of behavior, you're...

00:05:10 tacit consent for it and even tacit approval it's like it's a bad idea you have i would say

00:05:17 both the right and the responsibility

00:05:20 en vangt

00:05:21 jitske wel op, dat zijn ze gisteren

00:05:26 en middelen opvangt die zander

00:05:30 op het aanval

00:05:33 en die vangt Jetske ook heel erg goed op

00:05:37 ik weet niet waar ik dag en nacht op deze

00:05:40 manier de hele dag bestuurd wordt en geprogrammeerd door linguistisch

00:05:43 programmeren. Want Dijverdak zit er zo tussen.

00:05:50 And then there will be a short ramp.

00:05:54 Not wrong.

00:05:56 We will just close it on the QD.

00:06:00 Volgens mij woont mijn dichtje in Utrecht, ik hoop dat ze mooi de collega's hebben gekregen.

00:06:10 Can you do something about it?

00:06:11 It's like they don't want to do something about it.

00:06:13 They already have 50 things to do.

00:06:14 So if you're the person who constantly brings forth a problem,

00:06:18 even if they're actually a problem,

00:06:20 Sorry of de zinzit.

00:06:24 Ik hoop dat de onderkant is toch?

00:06:26 Midden opkant hier zonder.

00:06:28 Ja, ontwikkeldig werk zo.

00:06:30 of thumb, man. If someone wants to give you money, then help them do that. And if they

00:06:35 want to give you status and success, then help them do that, right? And you do that

00:06:40 by bringing them solutions and partly you do that by developing your skills and so if things

00:06:44 aren't going very well for you this is also a good way of evaluating an opportunity should you take an

00:06:50 I can't do everything at this point.

00:06:53 Take the opportunity if it will teach you something that you can use for other opportunities.

00:06:58 Because even if it fails...

00:07:00 which you probably will doesn't matter because you've accrued something of value

00:07:04 that you could bring forward to the next situation so there's this old union idea that i

00:07:11 In the Charter Cathedral, for example, the cross, and the cross signifies the center of the world, and the dome signifies...

00:07:20 the sky so right below the dome at the center of the world and it's a cross

00:07:24 because the cross is the place of suffering so that's the center of the

00:07:27 world because that's what you are you're the place of

00:07:30 You're the place of conscious suffering.

00:07:32 That's the center of the world.

00:07:34 And so inscribed on the floor is a maze.

00:07:37 And you empty this big maze.

00:07:38 And it's a Mandela.

00:07:41 of a flower-shaped resting place right in the center walking in the maze and you walk all four

00:07:48 quadrants, and you get to...

00:07:50 middle, which is where you want to be. You want to be in the middle. Well, how do you get there?

00:08:01 and develop your skills and that's better than wealth by the way in fact it actually constitutes

00:08:07 wealth because wealth constitutes what you have

00:08:10 and someone takes all your money away.

00:08:11 Wealth.

00:08:13 And so the way that you build up that sort of wealth

00:08:15 is you turn yourself into someone who's

00:08:17 confident in multiple directions.

00:08:20 be doing that all the time, especially with the kind of technology that new people have

00:08:24 access to.

00:08:25 I mean, you can learn anything you want, whenever you want, so what a good deal that is, man.

00:08:30 And so there's easy fruit hanging that you can pick, and I would recommend that you do that.

00:08:35 So here's an example, let's say, they don't do it too much.

00:08:40 the normal distribution that you lose your job okay so right let's say you're conscientious

00:08:46 person and we can say just for the same argument that you lose your job

00:08:50 of mass layoffs in your company so it does nothing to do with you it's fundamentally it's just like

00:08:54 looking at the wrong basically but then what happens to you well if you're coaching

00:09:00 You're going to go after yourself pretty hard, so you're going to, and especially if you're

00:09:04 also high in your honest system, it's going to depress you to lose your job, and maybe

00:09:08 you're in a situation where you just.

00:09:10 For one reason, now that you don't have many other opportunities, now maybe you should look for them, but maybe you're in a depressed strata of the economy, or you're geographically located somewhere that makes moving difficult.

00:09:20 Dat is echt op de tijd roken als ik geld heb.

00:09:30 for a job but it also maybe starts to put stress on your family and it also starts to decrease

00:09:36 the probability that you're going to engage in positive social interaction so now

00:09:40 are you unemployed and suffering from economic stress but your marriage is

00:09:44 starting to suffer and you're starting to isolate yourself from your friends

00:09:47 and then of course as your marriage suffers

00:09:50 and that's going to make you more depressed and that's going to keep you even farther away from your friends and that's going to decrease the likelihood that you're going to have enough positive emotion and enthusiasm to look for another job.

00:10:00 En dan heb je er nog een stuk daarmee ook gezellig, dat het een rafael schiet te vraagt.

00:10:06 En dan moet je inlijndesek.

00:10:10 Dat hebben jullie met z'n allen heel lang gepland.

00:10:14 Dus we hebben jullie een weekend tochtend in Sioux of Sioux.

00:10:18 En wie?

00:10:20 Hij is iets te autonome te proberen of zijn ze bijna gerogen als ze zeer.

00:10:30 I don't already got that word, it's not even obvious that it's a psychological problem, it's just a problem, and problems can take you.

00:10:40 And so your marriage is starting to change and you're isolating yourself from your friends and you're less likely to be...

00:10:50 Да, здесь вам и куману стресс-холк, я знаю.

00:11:00 you into the ground. We don't tend to conceptualize people's disorders, though.

00:11:10 described in psychological terms, a very good example of that, it isn't obvious that there's

00:11:15 something wrong with them psychologically.

00:11:20 And there isn't a category.

00:11:31 Come to see me, come to see me.

00:11:33 What's going wrong with their life?

00:11:34 Not because they have a psychological problem.

00:11:36 Now you could say, well, there are psychological in-

00:11:39 Go.

00:11:40 they might be are precursors to

00:11:50 exactly the appropriate to conceptualize because you're, there's you inside you and as a personality

00:11:57 psychologist, as a clinical therapist, as opposed to what I...

00:12:00 It was like a soul.

00:12:11 you can be set up, you're not just an individual.

00:12:20 networks that are really separate.

00:12:30 Is your child more you than your arm?

00:12:33 You know, what you think is pretty obvious.

00:12:35 Or legs are more the key to you as an entity.

00:12:39 But if I don't mean...

00:12:44 that a child.

00:12:45 So, your boundaries are not, where your boundaries are located are not present.

00:12:51 with the outline of your body, it's not that simple at all.

00:12:54 And so you're invented in all sorts of networks.

00:12:55 This is an extra-nextra-nextra-nextra-nextra-nextra-nextra.

00:13:01 Como é de sempre.

00:13:12 my word for it that's not that's not a very good question you might say instead well here's what i

00:13:20 Jullie gaan persgevonden van de dag kijken, dan kun je dat doen, als een roekeloze team is.

00:13:40 Hebben jullie de film al gezien?

00:13:45 Pet Detective, Ace Ventura.

00:13:50 Niet kebo guy.

00:13:54 Hij is natuurlijk een pet detective.

00:13:57 Met Bruce Almighty denk ik wel.

00:14:00 Daar gaat het niet helemaal om, maar die, ja.

00:14:10 Die heeft zeg maar, eh, snuifje die de primaire beslissing, die hebben echt.

00:14:20 Okay, so how do I do that?

00:14:22 Because I need to buy something from you and it turns out to be...

00:14:31 I said, I said, well, you know, from him, and that's what he's like, all these other people.

00:14:40 Het is hetzelfde.

00:14:44 Heel veel weggehouden, precies.

00:14:50 I feel like they're all new, because, you know, that's just, that's an indication that you don't have people doing that sort of thing.

00:15:00 The reason that people spiral downhill into zero is the loop that increases the probability

00:15:11 Right, a positive feedback that you've experienced this when you hear microphones, you know the microphone.

00:15:22 You can send out the message to the speaker, and then the microphone picks up your message, and it gets amplified again, and you get this howling.

00:15:30 which could be deafening, but it could also destroy the system.

00:15:40 It's not a virtuous circle of virtue, it's not a virtuous circle of virtue, it's not a virtuous circle of virtue, it's not a virtuous circle of virtue.

00:15:50 Als ze op de grenzen, ik krijg de grenzen.

00:15:53 Wat ik zie.

00:15:56 Jullie gaan met die verkaan.

00:15:58 Of ik bedoel, midden.

00:16:01 Well, let's go.

00:16:10 Nee, maar hij is nog even zintig, ik denk niet hoe jij zegt dat je deze hele tijd op te rijden blijft.

00:16:30 and one person ends up with all the other one else ends up with zero.

00:16:41 Ja, ik weet het.

00:16:42 Hij heeft ook veel kijkers gevoel van mijn kijkers.

00:16:47 Die jullie ook wel gevangen.

00:16:51 Gewoon, ik gooi weer inspiratie, gewoon gewoon logisch zoals het gedaan wordt beschikbaar.

00:00:02 Kankerziekte.

00:00:03 Ja, jullie niet.

00:00:06 Maar...

00:00:10 Kankerziekte?

00:00:13 Kankerziekte, ja. Als iemand blijft roken, hebben we nog die kanker uit te zetten.

00:00:18 Het gevoel op biomedisch toch?

00:00:20 En dat is eigenlijk een als cancer voor de cure, voor jullie, voor jullie, dus jullie dan is het asomitsel.

00:00:30 Oh wacht, die heeft volgens mij al, ja precies, dat gaat door nu werken.

00:00:40 diegene en ik zelf. Psychiatrisch is dat niet helemaal goed meer gegaan.

00:00:50 Ja, dat werkt dus nooit meer.

00:00:57 Ik ben de oude polen voor elkaar geduurd.

00:01:00 And here we have all the Totobet, the Polymarket, the PolyQ, the Bahamas, Nassau.

00:01:10 een oranje nas houden.

00:01:14 Ja, het loopt.

00:01:16 Mambyholt.

00:01:18 Toch iets.

00:01:20 Ik weet niet, in absentia ben ik bezig met herstructureren, ik weet alleen niet waarvan.

00:01:49 Ou seja, hein?

00:01:50 Die ik zeker is, is dat Jordan Peterson, en dus ik zelf, heel erg rechts.

00:02:00 En dan ga je niet met links ontpakken. Kijk, we hebben het een beetje opgevangen en zo en gederailed en zo.

00:02:10 Tot, we gaan weer video ook even maken.

00:02:24 class.

00:02:31 The contents of that case are almost as mysterious as the man himself.

00:02:35 The G-Man appears to be...

00:02:40 I'm extremely proud of a concerned man.

00:02:43 Not many are aware of the GMAT's existing.

00:02:46 Those that are...

00:02:48 And I'm not going to tell you...

00:02:50 How I'm aware of it neither. You see, I believe even wanted you to distribute it. That's true, and you'll know the wise.

00:03:00 If you want to slash less like to smile, don't worry about it, it just works in the middle of the stage.

00:03:10 Ik wil ook deze rechtse puntenaar.

00:03:12 En dan heb je puntenaar.

00:03:14 En daarnaar.

00:03:16 Vind je het daar?

00:03:18 Zachtpunten.

00:03:21 Zaren voeren en ja, vliegende er ook een luchtraten.

00:03:30 Die hadden kakkerdiabetes. Precies.

00:03:34 Ja.

00:03:36 Duiven, diabetespootjes.

00:03:41 Amsterdam, eh, in totaal, in.

00:03:50 Vanwege patat en dat soort dingen.

00:03:53 Ja, even serieus.

00:03:55 Maar, zeg maar nog veel meer.

00:04:00 Dijven inderdaad hebben geen diabetes. Bestandsdijven door diabetes wordt veroorzaakt is een veel voorkomend misverstand.

00:04:10 Stringfoot, afknelling, omdat de duiven geen handen hebben, kunnen ze de draadjes er zelf niet afhalen.

00:04:20 wakker dat het om zich heen wil komen. Ja hoor, tuurlijk.

00:04:23 Kankerveelduiven hadden kankerveel.

00:04:30 Ehm, pootjes.

00:04:32 Die, kanker.

00:04:34 Ehm, diabetes.

00:04:36 Ehm...

00:04:40 Voeten, zoals bij een mens, biochemisch, biomechanisch.

00:04:51 Dat duifboi is vertoordiging.

00:04:57 Ah, maar de visuele gelijken is met de mensen.

00:05:00 ...maastelijke diabetische voet ontstaat door vergelijkbare biomechanische en patofysiologische eindtrajecten.

00:05:08 Ischemie...

00:05:09 ...necrologie...

00:05:10 Grozen en secundaire infecties.

00:05:14 Vogelpokken, string food, bumble food.

00:05:16 Hier, dat is die Tinder.

00:05:20 Wimpel toch?

00:05:22 Tinder? Ja.

00:05:24 Gestankerd worden er vandaag.

00:05:26 Kankerziekte.

00:05:30 Diabetische voet, mens.

00:05:32 Ja, ik heb al, toen ik 17 was, kreeg ik al steken in.

00:05:36 Ik voelde dat ik de hele dag verkeerd op stoelen zat.

00:05:40 Van goedkope retailers enzovoort, gewoon express, slappe aftreksels en mijn spullen moeten verkopen, mijn stoelen.

00:05:50 Ik doe dat met mijn Ikea stoel en mijn DxRacer stoel en mijn bedden en dat soort dingen.

00:06:00 Het schijnt tot verkeerde kleding.

00:06:10 Weet je wel, meubilair en zo. In een huis. Of een thuis. Dat als je daar langer op zit.

00:06:20 en je eet en drink niet gezond enzovoort, dat dan je door bloeding niet zal lekker gaan.

00:06:30 Maar als zo'n kankerduif aanslidste de andere man die zijn telefoon terugkreeg bij Mercatorplein.

00:06:40 een mysterieus verbinding, zeg maar, wat jullie zitten te doen met het familieweekend en zo.

00:06:51 1717, de prijzing enzovoort, hadden we aan.

00:06:56 Kijk, neemt wat voor de tijd.

00:07:00 Waarom heb je die foto's missing?

00:07:04 Kaus.

00:07:06 Er gebeurt nog wel wat met geen kaus.

00:00:01 To tell you how I'm aware of it neither. You see I believe that if the G-Man wanted you to know about him, then you would already be aware of his existence.

00:00:10 If that's true, then you'll know that what I speak is the truth and not merely a figment of my imagination.

00:00:15 At least not all of it.

00:00:16 Welcome to the story.

00:00:20 so sit back and relax, watch and or listen

00:00:23 as we dive into the story of this

00:00:25 unnatural and sinister being

00:00:28 you may have only seen

00:00:30 g-man in which case you are lucky but then again it is unknown if the g-man can be seen by all or

00:00:35 only those who he chooses to let their eyes gaze upon him seeing the g-

00:00:40 The scene man though is entirely different to interacting with him as his appearance is greatly deceiving.

00:00:45 He may appear to be an ordinary businessman but I can assure you that is not the case.

00:00:50 For what the GMAT considers business, we consider unnatural events.

00:00:54 He is often referred to as the ominous interdimensional bureaucrat,

00:00:58 as both his name and his behaviour...

00:01:00 The G-Man has never identified himself beyond informing those who he meets that he isn't acting entirely on his own accord, as he apparently works for those he describes.

00:01:10 ...cribes as his employers. He wields power beyond that of a human, presumed to be able to teleport himself and others to...

00:01:20 He can control time and possesses technopathic or maybe even telepathic abilities.

00:01:25 Without question that this are not dangerous and...

00:01:30 Despite helping those in need from time to time, he should be considered as a threat by all normal humans and even some forms of alien life.

00:01:37 The Votagon is a wise alien species.

00:01:40 ...have been known to enter the G-man's realm and temporarily hit their progress.

00:01:44 The G-man's story is probably a much longer one than the one I know.

00:01:48 I would argue that the G-man is...

00:01:50 not entirely human and that it is around wherever it may be time and space are non-existent

00:01:55 for all we know the g-man may have always been there since the beginning but his story

00:02:00 To us, start before the Black Basin exit, Corporal Adrian Shepard, a United States Marine assigned to the Hazardous Environment Combat Unit from the San Tego Military Basin.

00:02:10 Arizona, was one of the men sent to the Black NASA research facility on a classified mission.

00:02:14 He apparently spotted an individual who matches the description of the GMAT during his training.

00:02:21 Man took an interest in Corporal Shepard as his training was accelerated for unknown reasons.

00:02:26 However, some of those reasons may have come to light during the Black Naysay.

00:02:30 where Shepard, amongst a few other marines and black nation personnel, survived the alien invasion that was happening there.

00:02:36 Although accounts of what happened after the incident and who exactly...

00:02:40 escaped our vape, relevant thanks to the Combine invasion during the Seven Hour War.

00:02:45 It is unknown if Shepard was able to escape Black Mesa, but if I were to take a guess,

00:02:50 I'd say that the G-Man has him in stasis.

00:02:52 You see, the G-Man tends to take an interest in certain individuals,

00:02:56 and then proceeds to teleport them to God knows where, and offer their...

00:03:00 services to the highest bidder. Those unlucky enough to be in the hands of the G-man could

00:03:04 be seen as nothing more than his personal mercenaries, whose contracts are open to those willing

00:03:10 or in the case of the fabled gun, Freeman opened to the highest bidder.

00:03:14 The G-Man was spotted throughout the Black Mesa research facility during the incident

00:03:19 and his role in...

00:03:20 event is still unclear, but my gut tells me other ones. I would say that the G-Man knew

00:03:24 the events of the Black Mesa incident were going to take place and indeed wanted them

00:03:29 to, so that is a...

00:03:30 Employers could seize control of ZEC, the border world located in the multiverse.

00:03:34 I would be surprised if the G-Man hadn't already known that God would eventually defeat...

00:03:40 But despite that thought, the G-Man took a keen interest in Gordon Freeman and his activities during the incident.

00:03:46 It's no surprise really that only a few years later it's for all that time.

00:03:50 The G-Man was there when Zen was captured and the Nihilund was defeated, where he then offered Gordon Freeman a job.

00:03:56 The specifications of that job would be later revealed in City 17.

00:04:00 the uprising, as Gordon Freeman, with the help of the rebels and most likely the genus,

00:04:05 eventually brought down the citadel and the compound forces occupying the city and the

00:04:09 surrounding area.

00:04:10 Some would argue that the G-men and or his employers knew, or at least anticipated, that the compound would invade and take control of Earth, which is why he wanted Gordon Freeman after he...

00:04:20 defeated denial and to place him in stasis for safety. Chances are that not only

00:04:24 deplacing him in stasis keep him from being taken by the Combine but also kept him from

00:04:29 aging as

00:04:30 During the uprising, Gordon looked no older during the Black Mesa incident.

00:04:34 It is likely that the G-Man gave Gordon the illusion of free choice and take it or leave it situation.

00:04:40 where declining such a not fair usually has dire consequence.

00:04:43 One of the more dangerous and mysterious things about the G-Man is his tendency to both help and hinder certain people.

00:04:50 Suddenly a warhead was delivered to Black NASA by the Federal Government's Black Ops team

00:04:54 with the obvious intention of destroying the entire facility

00:04:57 to ensure that there was no evidence of the Resonance Castle.

00:05:00 The cataclysmic quantum event caused by the experimentation with the zen crystal sample labelled as GG3883.

00:05:07 The purist sample facility had before...

00:05:10 And then, this is overdoing it, but now...

00:05:20 most likely Adrian Shepard and the actor was annihilated the only thing that we

00:05:25 have but this g-man's motives get even more question

00:05:30 Alex would have the same for us as well.

00:05:32 It makes you wonder, why did the G-Man want to destroy the facility?

00:05:36 If it were to get rid of any evidence, then surely you would have expected him-

00:05:40 To take care of the survivors as well.

00:05:42 Maybe the Combine invasion put that thought aside.

00:05:44 Maybe it was his employer's wish to keep those that escaped.

00:05:50 portal storms that raised across earth following the resonance cascade but then again it is

00:05:55 believed that there was nothing human race could have done to stop the compire from dominating

00:06:00 in the world. But G-Man

00:06:01 is not entirely human are his

00:06:05 mysterious employers. 20 years

00:06:07 after the Black Mesa incident and the 7

00:06:09 Hour War

00:06:10 that followed, the event known as the Uprising began, which is an ongoing conflict fought

00:06:14 between the Human and Voting on Resistance and the Combine Empire. It is safe to say that

00:06:19 this...

00:06:20 and placed him in City 17.

00:06:22 His reappearance sent a huge morale boost throughout the resistance

00:06:25 and a full-on battle between the belligerents erupted in an event known as the Return of the...

00:06:30 The resistance later mobilised and the battle for City 17 was in full effect, leading to the eventual destruction of the Citadel and the city itself, thanks to the efforts of Gordon.

00:06:40 The G-Man made his shady and bored chilling appearances throughout the uprising and likely aided Freeman on his mission to defeat Dr. Breen and the Combine occupying the city.

00:06:50 After Freeman caused considerable damage to the Citadel's Dark Energy Reactor, an explosion was

created that was expected to have killed both Gordon and Alex, who was accompanying him at the time.

00:07:00 However, that was not what the G-Man wanted.

00:07:02 Just as the explosion started, the G-Man stepped in and halted time in order to get Gordon out safely,

00:07:07 while most likely leaving Alex to die.

00:07:10 in the explosion why one would save a girl from the total destruction of one place only to leave

00:07:16 her to die in another and in practically the same manner

00:07:20 The G-man may have anticipated that Alex would be a grader in assisting Freeman on his mission, that is if Freeman's contract had been in place before the destruction of Black Mason. Perhaps the G-

00:07:30 Man has a conscience from time to time, but I'm sure that there's more to it than that.

00:07:33 That he and his employers have a plan for...

00:07:37 You see, humans are nothing but pawns on a chessboard.

00:07:40 for the G-Men and those people like Gordon and Adrian know it. Gordon was informed during

00:07:44 the time freeze that he would be placed in stasis again while the G-Men ponders over

00:07:48 some offers for Gordon.

00:07:50 services. But here is where the tail gets reeled in. This GMA, this...

00:00:00 ...where of his existence. If that's true, then you'll know that what I speak is the truth and not merely a

figment of my...

00:00:08 Hello everyone, I'm Rick.

00:00:10 big raven and welcome to the story of the g-man so sit back and watch and or listen

00:00:15 as we dive into the story of this unnatural and sinister being

00:00:20 You may have only seen the G-Man, in which case you are lucky.

00:00:23 But then again, it is unknown if the G-Man can be seen by all or only those who he chooses to let their...

00:00:30 eyes gaze upon him. Seeing the G-man though is entirely different to the deceiving. He

00:00:37 may appear to be an ordinary business man.

00:00:40 I will assure you that is not the case.

00:00:42 For what the G-Man considers business, we consider unnatural events.

00:00:46 He is often referred to as the ominous interdimensional bureaucrat.

00:00:50 as both his name and his behavior implies.

00:00:53 The G-Man has never identified himself beyond informing those who he meets

00:00:57 that he isn't acting entirely on his own accord.

00:01:00 He apparently works for those he describes as his employers.

00:01:04 He wields power beyond that of a human, presumed to be able to teleport himself and others to...

00:01:10 most likely uncontrolled time and possesses technopathic or maybe even telepathic abilities

00:01:17 it is without question that this anomaly

00:01:20 He's extremely dangerous, and despite helping those in need from time to time,

00:01:24 he should be considered as a threat by all normal humans, and even some forms of alien life.

00:01:30 Vortigont, a wise alien species, have been known to enter the G-Man's realm and temporarily hinder his progress.

00:01:36 The G-Man's story is probably a much longer one than the one I...

00:00:00 Space are non-existent. For all we know, the G-Man may have always been there since the beginning, but his story to us starts before the Black Mesa incident.

00:00:10 Shepard, a United States Marine assigned to the Hazardous Environment Combat Unit from the Sante

00:00:15 military base in Arizona, and was one of the men sent to the Black Mesa Research Facility on

00:00:20 F.T.R.E.R.A.

00:00:22 He apparently spotted an individual who matches the description of the GMAT during his train.

00:00:26 It is believed that the GMAT took an interest in Corporal Shepard as his train...

00:00:30 ...and it was accelerated for unknown reasons.

00:00:32 However, some of those reasons may have come to light during the Black Nation incident question,

00:00:36 but amongst a few other Marines and Black Nation personnel...

00:00:41 that was happening there although accounts of what happened after the incident and who exactly

00:00:46 escaped are there and no longer relevant thanks to the Combine invasion

00:00:50 during the seven hour war.

00:00:51 It is unknown if Shepard was able to escape

00:00:53 by a survey variant to take a guess.

00:00:56 I'd say that the G-Man has him in stasis.

00:00:58 You see, the G-Man tends to...

00:01:00 to take an interest in certain individuals and then proceeds to teleport them to God knows where and services.

00:01:10 The hands of the G-Man could be seen as nothing more than his personal mercenaries,

00:01:14 whose contracts are open to those willing to pay for them,

00:01:17 or in the case of the fabled Gordon Freeman, open...

00:01:20 The G-Man was spotted throughout the Black Mesa research facility during the incident and his role in that event is still unclear.

00:01:27 But my group tells me about it.

00:01:29 I would say...

00:01:30 The G-Man knew the events of the Black Mesa incident were going to take place and indeed wanted to take off the ultra.

00:01:40 They've screen-sounding the G-men haven't already known that they've gone through and eventually defeated the Nias by that, so the G-men continue.

00:01:50 aan het voorje was met open ogen ofzo.

00:01:55 Die reden had volgens mij

00:01:58 persoonlijke binding.

00:02:00 Ik denk wel een best wel aan de pettigheid tot gevolg over.

00:02:06 Volgens mij had collega's.

00:02:09 Maar ik voelde me niet.

00:02:10 Bijna alsof ik niemand meer hoogte te betalen om daar te zijn.

00:02:16 Ik zou graag zo blij als ik kom met hun afgedaan.

00:02:20 Some would argue that the G-man and or his employers knew or at least anticipated that

00:00:01 he defeated the Nihilunt and placed him in stasis for his safety.

00:00:05 Chances are that not only did placing him in stasis keep him combined, but-

00:00:10 Also kept him from ageing as during the Uprising, Gordon looked no older.

00:00:16 It is likely that the G-Man gave Gordon the illusion of free choice.

00:00:20 The take-it-or-leave-it situation where declining such an offer usually has dire consequences.

00:00:25 One of the more dangerous and mysterious things about a G-Man is his tendency to both help and...

00:00:30 a thermonuclear warhead was delivered to black nasa by the federal government's black ops team

00:00:35 with the obvious intention of destroying the entire facility to ensure that there was

00:00:40 Oh, it's okay, so we'll do look at that in the SFS, right?

00:00:50 the facility had. Before the death of Eli Vance, shortly after the valve of White Forest,

00:00:55 Eli stated that the sample was delivered to Black NASA by none other than the G-Man himself.

00:01:00 At some point during the Black Mesa incident, a Marine, most likely Adrian Shepard, had deactivated the nuclear warhead.

00:01:11 of the residence cascade was annihilated the only thing that we have left of that event is the

00:01:16 knowledge that those that survive and escape carry but this is where the g-man

00:01:20 more questionable child hearing about this incident and had it not been 15

00:01:28 Alex wouldn't have done

00:01:30 The G-Man saved Alex for reasons unknown, and you can say that he did the same for others as well.

00:01:36 He makes you a wonder, why did the G-Man want to be straight?

00:01:40 If it was to get rid of any evidence, then surely you would have expected him to take care of the survivors as well.

00:01:45 Maybe the combat invasion put that thought aside.

00:01:48 Maybe it wasn't as important.

00:01:50 to keep those that escaped you could even say that the key man and or his employees

00:01:54 are trying to stop the combat invasion by the nuclear war

00:01:58 in hopes that it might have shut down the port

00:02:00 and the other carnivore, Miffy, Prince Therapy, Aquarello, Rijksmuseum, Jessica Kounder

00:02:10 Well, all the human is not entirely human, and now do I imagine that he is mysterious in mind, 20 years after the Black Nacer incident and the 7 hour war that's...

00:02:20 Die zijnde die mij dat eieren onder mijn kinden gegeven heeft.

00:02:30 not changed course without the involvement of the hero where he released Gordon Freeman

00:02:34 from Stasis and placed him in City 17. His reappearance and a huge morale moves throughout

00:02:40 In this case, it's flat by Mucon.

00:02:45 I'm saying Mucon, but it's flat by Mucon.

00:02:50 Ele que se dedicou para a lei via OPCB, dedicou-se com o que escreveu.

00:03:00 And they leave and see more, uh, Dr. C. Burry.

00:03:05 After Freeman caused considerable damage to the Citadel's dark energy reactor.

00:03:10 That was created that was expected to have killed both Gordon and Alex who has accompanied him in the town.

00:03:15 However, that was not what the G-Man wanted. Just as the explosion started, the G-Man started.

00:03:20 maar dat is toch onhooggesteld dat ik mij zo'n zorg had gegaan

00:03:30 and then put it on track, and in practically the same manner, the G-man may have anticipated

00:03:36 that Alex would be a great asset in assisting Freeman on his...

00:03:40 That is the Freemans contract had been in place before the distribution of Black Mason.

00:03:44 Perhaps the demon has a contract from town to town, but I'm sure that there's more to it than that.

00:03:50 You see, humans are nothing but pawns on a chessboard for the G-Man.

00:03:56 And those people like Gordon and Adrian...

00:03:58 Gordon was informed during the...

00:04:00 Het is dus zo en dan weet ik niet, maar het is ook een occasion met pensioen.

00:04:06 Het is goed, benaar.

00:04:10 Namens werknemers van Ark in a Mantle, ik weet niet hoe we dit hebben vervolgd in plan van Axelonne een ofzo.

00:04:20 The group of Vortigons appeared and teleported both of them away, G-Man's realm, and interfering his plans.

00:04:28 I imagine that the G-Man...

00:04:30 Ze had dus een knuffertje dat ze overal in de Kuna hoortdraaid.

00:04:40 this point that's our street one unaware of the it seems that the g-man was not able to

00:04:47 come to god throughout his journey to white folk

00:04:50 Ik voel me geen persoonlijk ongelooflijk.

00:04:52 Ik voel me geen persoonlijk ongelooflijk.

00:04:53 Ik voel me geen persoonlijk ongelooflijk.

00:04:55 Ik voel me geen persoonlijk ongelooflijk.

00:04:57 Ik voel me geen persoonlijk ongelooflijk.

00:04:59 Ik voel me geen persoonlijk ongelooflijk.

00:05:04 en ik had dus die gastige verwelding van obses

00:05:10 Maar we hebben dat profeel niet gezien, dat ze wel geen obligator als cadeel gekregen.

00:05:20 Maybe it is something that humans like us cannot comprehend, for the workings of the G-Man and other interdimensional platforms are nothing short of an enigma.

00:05:28 When the G-Man was finished speaking to God...

00:05:30 He had proceeded to speak to her relay message to her father Eamon, who was with a large force of the resistance station that an old cold war-based was quite...

00:05:40 ik ben in een wachthaal, wacht haar die bij de overhandsverbanden was omdat ze gestorwen hadden.

00:05:46 Waarom?

00:05:48 De lucht, de lucht.

00:05:50 Ik weet het met hem wat, Ilse Aron, Ilse Post kocht in Poekenwoud, Poekenwoud met spraatse kant.

00:06:00 Tweede Wereldoorlog waarbij Ilse Koch uitlokte de gevangenen, de Joodse mensen in de concentratie.

00:06:10 En als je er naar de keek of een stijf piebel kreeg of iets dergelijks, dan heb je ze een beetje afgemaakt of brug niet gehandeld of gekracht of...

00:06:20 Ja, erger.

00:06:23 Beetje sero-ici verre wereld nodig achter.

00:06:30 I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry.

00:06:40 Hoe heet ze nou ook weer, omdat het een stuk in een paar kinderen heeft gegeven,

00:06:47 want ik weet ongeveer waar ik het kan vinden.

00:06:50 In the spot, in the day, he chooses, maybe I'm only thinking his abilities and that he cannot simply hide on me, or maybe he just sees no.

00:07:00 Barney Calhoun, Gina Cross, and Colin Crane, also the demon of blackness, before nothing of him, except back his present.

00:07:10 His brief shock, he informed Gordon Freeman that it was the G-Man, or our mutual friend, as he called him, that delivered the sample GG3883 to Black Mesa and whispered in his ear.

00:07:20 The exact same words that Alex just said to him.

00:07:23 This to some extent indicates that the G-Man caused a resonance cascade

00:07:26 that would have entered the Combine Empire of Nade.

00:07:30 If it was the G-man's goal to create such an event, then maybe the G-man wanted to gain access to Z.

00:07:36 I thought the compound invasion was a risk worth taking.

00:07:40 En dan sturen we collega's bij mensen, Chandra's Metestraat, ja.

00:07:48 Van Harking toch?

00:07:50 Look at that.

00:08:00 a secret the kind the combat would very much like to get there to be a

00:08:05 relation to teleportation technology and something like that would be able to

00:08:09 help

00:08:10 and reconnect now to the combat and overwhelm.

00:08:12 You see the resistance had a plan to launch a rocket from White Forest into the super portal

00:08:17 that was created after the Citadel was destroyed.

00:08:20 The rocket launch was a success, and thus the portal closed the combat forces stranded on Earth.

00:08:26 Eli Vance seemed to know more about Fujima than the likes of Gordon.

00:08:30 He intended to pass on some information, probably about how to deal with the G-Man.

00:08:34 However, before this information could be passed on, Eli was killed by a compound.

00:08:40 Volgens mij, als ik mijn dashboard even check, als AI-robot, livestreamer, podcaster.

00:08:50 It's not that they're being pulled out by somebody that's like before.

00:09:00 My guess is that the G-Man will probably go wherever we go to frame adventures.

00:09:04 Perhaps he's the only one who can get to the bottom of what the G-Man is really up to.

00:09:09 For now...

00:09:10 And if you ever spot a Caucasian male in a blue suit with a purple tie in a suitcase,

00:09:17 it's probably best that you run like hell and put some distance between you and...

00:00:10 The G-Man. What is there to say about this person, if he is even human?

00:00:20 He travels here and there in his blue suit and most of the time with his briefcase.

00:00:25 The contents of that case are almost as mysterious as the man himself.

00:00:28 The G-Man appears to be...

00:00:31 brown hair, green eyes and has this extremely calm and unconcerned manner.

00:00:36 Not many are aware of the GMAT's existence, and those are the most important ones.

00:00:40 Ja dat, ik belang niet van haar door mijn persoonlijke herinneringen.

00:00:50 If that's true, then you'll know that what I speak is the truth and not nearly a figment of my imagination, at least not all of it.

00:00:58 Hello everyone, I'm Rick Big River.

00:01:00 Welcome to the story of the human.

00:01:02 It's artificial style craft.

00:01:05 And we have a bit of the industry.

00:01:10 Kom op ABC Book Center, kom op.

00:01:13 Kijk, een van de start, een van de later.

00:01:18 Kom op, Schauberg.

00:01:20 on him. Seeing the G-Man though, isn't to interact him with being an ordinary businessman, biker,

00:01:31 What the G-Man considers business, we consider, what are the legs?

00:01:35 He is often referred to as the ominous interdimensional bureaucrat.

00:02:20 I mean, my core now, I'm not supposed to be forwarding my core middle old front team on all the players that are out there, play babies.

00:02:27 Is that the highest regime?

00:02:30 Ik vind het vandaag een heilig, het is vandaag de overnemen open, als je het hier speciaal kan worden met Sonsburg en Dash.

00:02:40 Dat gaat maar gewoon door.

00:03:33 I still think that the G-Man tends to take interest in certain individuals and then proceed to telephone them to guide those ones.

00:00:00 It could be seen as nothing more than his personal mercies, whose contracts are open to those willing to pay for them, or in the case of the fabled Gordon Freeman, open.

00:00:10 The G-man was spotted throughout the Black Mesa research facility during the incident

00:00:14 and his role in that event is still unclear, but my gun tells me otherwise.

00:00:18 I would say that the G-man...

00:00:20 the events of the Black Mesa incident were going to take place and indeed wanted them to so that

00:00:25 his employers could seize control and say how the world located in the Baltic

00:00:30 You wouldn't be surprised if the G-Man hadn't already known that Gordon Freeman would eventually defeat the Nihilans, but despite that thought, the G-Man took a keen interest in Gordon Freeman and his activities...

00:00:40 the incident. It's not a surprise really that Grover suddenly appeared out of the blue 20 years later

00:00:45 in City 17 as the G-Man had him in stasis for all that time. The G-Man was...

00:00:50 It was there when Zen was captured and the Nileland was defeated, where he then offered Gordon Freeman a job.

00:00:55 The specifications of that job would be...

00:00:57 He ran hell...

00:00:58 Hell...

00:00:59 I don't know if he was...

00:01:00 Ik ben een angstelangere kluisenaar die er nog een paar jaar door de VGZ aan de toer is.

00:00:00 It makes you wonder, why did the G-Man want to destroy the facility?

00:00:04 If you get rid of any evidence, then surely you would have expected him to take care of the survivors as well.

00:00:09 Maybe the...

00:00:10 combine invasion put that thought aside maybe it was his employer's wish to keep those that escape

00:00:15 to life you could even say that the g-man and or his employees tried to stop the con

00:00:20 by an invasion by destroying Black Mesa in hopes that it might turn down the portal storms

00:00:24 that raged across earth following the resonance cascade but then again it is believed that there

00:00:29 was nothing

00:00:30 the human race could have done to stop the Combine Empire from dominating the world.

00:00:34 But the G-Man is not entirely human, and nor do I imagine now his mysterious employer.

00:00:40 20 years after the Blackhacer incident and the seven hour war that followed, the event known as the Uprising began, which is an ongoing conflict fought between the human and vortical resistance.

00:00:50 It is safe to say that this conflict would have not changed course without the involvement of the G-Man

00:00:56 when he released God of Freeman from Stasis and placed him in...

00:01:00 City 17. His reappearance sent a huge morale boost throughout the resistance and a full-on

00:01:05 battle between the belligerents erupted in an event known as the Return of the Freemen.

00:01:10 later mobilised and the battle for City 17 was in full effect, leading to the eventual

00:01:14 destruction of the Citadel and the city itself, thanks to the efforts of Gordon Freeman.

00:01:20 Seaman made his shady and bone-chilling appearances throughout the uprising and likely aided Freeman on his mission to defeat Dr Breen and the Combine Occupy in the city.

00:01:30 considerable damage to the citadel's dark energy reactor an explosion was

00:01:34 created that was expected to have killed both gordon and alex who was accompanying him at the

00:01:38 time however that was not

00:01:43 stepped in and halted town in order to get Gordon out safely while most likely leaving Alex to die in the explosion.

00:01:50 Strange, isn't it? Why one would save a girl from the total destruction of one place, only to leave her to die in another, and in practically the same manner.

00:01:58 The G-Man may have...

00:02:00 that Alex would be a great asset in assisting Freeman on his mission.

00:02:04 That is, if Freeman's contract had been in place before the destruction of Black Mesa.

00:02:08 Perhaps the G-Men has a contract.

00:02:10 from time to time, but I'm sure that there's more to it than that, that he and his employers

00:02:14 have a plan for many individuals. You see, humans are nothing but pawns on a chessboard

00:02:19 for the gym.

00:02:20 and those people like Gordon and Adrian.

00:02:22 Gordon was informed during the time freeze that he would be placed in stasis again

00:02:26 while the G-Man ponders over some offers for Gordon's services.

00:02:30 But here is where the tale gets really interesting, this G-Man, this Anobla Votagon stepped into a set of the day.

00:02:40 Before the G-Man extracted Gordon and left Alex to perish in the explosion,

00:02:44 a group of Vortigons appeared and teleported both of them away.

00:02:47 It was apparent at that point that the Vortigons could end...

00:02:50 the g-man's realm and interfere with his plan i imagine that was not happy at all taken by

00:02:56 surprise at how the water gods were able to rescue freeman

00:03:01 imagine how long the g-man had gone until this point that sort of street tends to leave one

00:03:06 unaware of the potential danger others might pose to

00:03:10 It seems that the G-Man was not able to contact Gordon throughout his journey to White Forest, as the Vortigons were preventing him from appearing.

00:03:17 It wasn't until the Vortigons were occupied trying to heal his pants...

00:03:20 Me, I'm really controlling.

00:03:30 and alex from lat nasa ignoring his employer's objections he also revealed that while he

00:03:35 wished you could do more than just monitor gordon freeman he chose to abound

00:03:44 Maybe it is something that humans like us cannot comprehend.

00:03:47 For the workings of the G-Men and other inter-dimensional lifestyles.

00:03:50 ...forms are nothing short of an enigma.

00:03:52 When the G-Man was finished speaking to Gordon,

00:03:54 he then proceeded to speak to the injured Alex,

00:03:56 asking her to relay a message to her father,

00:03:59 who was with a laugh...

00:04:00 This is a day.

00:04:04 He told Gordon to ensure that she gets to White Forest safely so that she can give her back.

00:04:10 It's probably more of a threat than it was a message given the usual circumstances the G-Man makes in appearance.

00:04:15 Bad things tend to happen whenever the G-Man is involved and bad things did indeed happen.

00:04:20 I think we are going to come for a new career.

00:04:23 I think we are going to start a new career.

00:04:25 I think we are going to start a new career.

00:04:27 We are going to start a new career.

00:04:31 Prepare for unforeseen consequences.

00:04:36 Alex appeared to have no memory of what happened.

00:04:38 He said that.

00:04:40 the g-man spoke to him, so chances are that the g-man spoke through her, making Alex relay

00:04:44 the message subconscious.

00:04:45 It's an ending in a very unique type that the g-man could use others to carry on.

00:04:50 ...without them having any knowledge of what they are doing during or after whatever it is they've done.

00:04:55 Although that power could be limited to making people speak subconsciously and do very little else.

00:05:00 of me doubts that perhaps the g-man has more power than he is able to use seen as though he

00:05:04 abides by unknown rules and restrictions this may be how the g-man is able to manipulate

00:05:10 ...provincies onderzoek ook, guests zoals...

00:05:14 ...politie en de scherzer...

00:05:17 ...of de...

00:05:20 I'm going to show you a little bit more.

00:05:27 I'm going to show you a little bit more.

00:05:30 bio, dak, biostabiele mensen, instabiele mensen.

00:00:00 the exact same words that Alex just said to him in the case that the jeep

00:00:11 the G-Man's goal to create the G-Man wanted Earth to get access to Zen and thought the

00:00:17 Combine invasion was a risk worth taking.

00:00:20 that is if the invasion wasn't what the g-men and his employers really wanted

00:00:23 i work more accelerated for people

00:00:30 All events believe that the G-man's warning was regarding the Borea, an Aperture Science research ship that mysteriously disappeared.

00:00:37 Its cargo is assumed to be an all-powerful...

00:00:41 the Kong band would very much like to get their hands on. It is presumed to be in relation

00:00:46 to teleportation technology and something like that would be able to help.

00:00:50 combine reconnect earth to the combine overworld you see the resistance had a

00:00:54 plan to launch a rocket from white forest into the super part all that was

00:00:57 created after the citadel was destroyed

00:01:00 The rocket launch was a success and thus the portal closed, leaving the combat forces stranded on Earth.

00:01:06 Eli Vance seemed to know more about the G-Man than the likes of Gordon.

00:01:10 As he intended to pass on some information, probably about before this information could be passed on, Eli was killed by a Combine advisor.

00:01:27 What exactly?

00:01:31 The Borealis, the advisor coming to eliminate Eli, who can say what exactly the G-man's cryptic statements

mean, or where and when-

00:01:40 My guess.

00:01:41 Imagine.

00:01:50 quantum network. A completely isolated system. Exactly. And you know the exact

00:01:54 vulnerability. Network relies on instantaneous optical feedback.

00:02:00 ...om de technische werk, mijn digitale architectuur, weet je wel.

00:02:10 Which is a standard, very real cyber warfare tactic.

00:02:20 It's super position should shatter,

00:02:22 and continue full access.

00:02:24 But that isn't what happens here.

00:02:26 No. Instead, your laser hits a digital wall.

00:02:39 You're blank.

00:02:50 It didn't just fail back.

00:02:51 I mean, it isn't easy.

00:03:21 massive

00:03:31 Our mission today is about how to build a perfectly optimized, unhackable system in a chaotic world.

00:03:41 And to do that, we're starting the meme.

00:03:53 I mean, we are going to create the exact same underlying logic of that 17th century map.

00:04:16 And it is behind me.

00:04:23 down to the sheriff's michael of the underground cyberspace of Maddieburg.

00:04:53 Close to the same year as 1696.

00:05:34 Does that happen because I'm frozen?

00:05:36 Cranked particle or...

00:05:53 And the course acting obviously is standard to the corporate weight.

00:05:58 So currently I'm...

00:06:01 That wire you can use everything from me to me is an absolute disaster.

00:06:05 Cool. Yeah.

00:06:06 If you are mapping this out here, never again.

00:06:12 Naturally.

00:06:14 Nope.

00:06:15 Okay.

00:06:16 Then it's a job that I'm going to be stalling.

00:06:20 I mean, it is the shortest distance, yes, but in a system covered by gravity, distance and time are not synonymous.

00:06:26 But you all live on the John Franklin Strait, since 3000.

00:06:30 If you run the V down a straight diagonal line, the slope is wrong.

00:06:34 And because the slope isn't very stiff at the beginning, the V doesn't build up a high velocity.

00:06:40 It just casually accelerates the whole way down.

00:06:46 Facebook meta.

00:06:48 So if the straight line is too slow at the start...

00:06:50 And that was the whole warning, via my name, via the key.

00:07:00 And there was a controller system, a HB test, and that was a totally new one.

00:07:10 By dropping it almost vertically and then running it horizontally, you have drastically increased the total length of the path.

00:07:17 The beat is traveling much faster, yeah, but...

00:07:20 And I don't know about you chronologically.

00:07:30 For a weekend, this thing manages to afford to have an original type planet.

00:07:35 It might now be...

00:07:40 vergeten

00:07:41 mijn thuis situatie daar eigenlijk wel

00:07:45 ik kan daar niet bij

00:07:47 mijn hoofdruik niet meer

00:07:49 ik weet niet meer

00:07:50 Ook misschien door psychiatrische medicatie in chemo, dat witte bloedweggraap je zelfs aantast.

00:08:00 You have your optimal gravity track.

00:08:02 It perfectly balances the acceleration with the distance.

00:08:05 If I go in the middle of the corner and reverse my forearm,

00:08:09 so...

00:08:10 Yopon virtually arrived at it, really abandoned the standard physical mechanics and used this weird optical...

00:08:20 Which is arguably one of the most brilliant lateral leaps in the history of physics.

00:08:27 Yeohan realized that a physical needs like Yeohan...

00:08:30 Ik weet niet of mijn oude thuis situatie, mijn oude honing.

00:08:40 And I think it's better.

00:08:42 I think it's better.

00:08:44 Well, he used to establish principles of optics.

00:08:48 First, Fermat's principle of least time.

00:08:50 Vermont had already heard that when life travels between two points, it inherently, like, chooses the path that takes the least amount of time.

00:08:57 Life is just inherently lazy.

00:09:00 In the building, they find houses in the building, or in the building, or in the building, or

because the speed changes.

00:09:17 Exactly, the speed of light changes depending on the density of the light.

00:09:20 So, Johan is socially involved in a physical space between point A and point E, and imagined it not as empty air, but as an infinite space.

00:09:30 ...finite stack of horizontal last layers, and the refractive index of each layer changes

00:09:36 the further down you go.

00:09:37 So as the bead falls in gravity, it makes it exciting.

00:09:40 What is that?

00:09:42 Next.

00:09:43 Next.

00:09:44 Next.

00:09:45 Next.

00:09:47 Next.

00:09:48 Next.

00:09:49 Next.

00:09:50 He said, I don't know how much of a child does to solve this for just me, but I know light automatically finds the fastest path, so I have light refracts.

00:10:00 Are you saying almost super-sacrifying yourself?

00:10:10 at the same time.

00:00:00 And Jakob's method was far more rigorous.

00:00:02 Reliant analogies to optics.

00:00:05 Raw, brutal geometry.

00:00:10 He developed a geometric calculus approach where he took a hypothetical curve

00:00:13 and he buried it at a single infinitesimal point

00:00:17 just to see how that tiny change affected.

00:00:20 The total time of descent, which seems agonizingly slow.

00:00:24 I mean, you're just putting one microscopic pixel of her recalculating the entire universe and seeing if it improves.

00:00:30 It wasn't really glorious yet, but it was mathematically glorious yet, you can't argue with it.

00:00:36 Exactly. And Yaka's method of tweaking the earth actually birthed...

00:00:40 an entirely new branch of mathematics called the Calculus of Variations.

00:00:45 This would later be formalized into the Euler-Lagrange equations.

00:00:50 The operations is basically the mathematical engine that links physical minimization principles directly to different geometry.

00:00:57 Okay, so let's focus on the absolute star of the show.

00:01:00 of the slight particle itself, which the source text refers to as K, yes, K.

00:01:07 The text gave K all of these grand titles, it calls K.

00:01:10 And it also is mechanical cat stone or arch stone that maintains the fabric of this area of lighting ground.

00:01:20 Well let's break down the kinematics of kinematics.

00:01:26 Kinematics is just the study of motion.

00:01:28 Displacement, velocity, acceleration.

00:01:30 The physical.

00:01:31 Right.

00:01:32 In this framework, the kinematics of k

00:01:34 map perfectly onto pure geometry.

00:01:36 When you want to find the velocity of k, geometrically you are

00:01:40 ...finding the tangent slope of the curve at that exact point.

00:01:43 Okay, so speed equals slope.

00:01:45 Yes.

00:01:46 And when you want to calculate the acceleration, you are integrating to find...

00:01:50 area under the curve.

00:01:51 Got it.

00:01:52 The brilliant part is that you don't even need abstract

00:01:54 symbolic integration to solve this.

00:01:56 The physical shape of the cycloid curve operates

00:01:58 as a neural analog.

00:02:00 a physical look up table.

00:02:02 Exactly, a cinematic look.

00:02:04 At every single point on that cycle, the curve perfectly balances tangential acceleration.

00:02:10 Dat is ook welkom, toch?

00:02:12 Tot erop een afspraakje kaartjes.

00:02:14 Je voelt een zorgachtig in.

00:02:16 Mijn moeder.

00:02:20 Right? Precisely.

00:02:22 The source is bringing this amazing medical tool to illustrate

00:02:26 Dutch high school math.

00:02:28 Oh yes, we can do it.

00:02:30 It's called the banana formula.

00:02:32 The banana formula.

00:02:33 It's such a great name.

00:02:35 It's a visual trick used to teach teenagers how to expand binomials.

00:02:38 Right.

00:02:39 Like if you have an equation like...

00:02:40 It's sort of now, eh, uh, uh, it's been a Nike logo, uh, it's connecting the X to the X, the X to the B, and so on.

00:02:48 Right, and it creates a series of...

00:02:50 parabolic arcs over the equation that look like a bunch of bananas or a rainbow and the text points

00:02:57 out that this basic algebraic

00:03:00 This is a simple drawn curve, mirrors the raw topological structure of the Cycloid itself.

00:03:06 It's fundamentally the same shape.

00:03:08 From the sponsors that they do that.

00:03:10 omdat hij een mogelijke wouper was, een professioneel of semi-professionele.

00:03:16 En toen ik geworden werd, 10 uur in actie nee.

00:03:28 cycloid is simple.

00:04:52 Okay, back to the brutal math.

00:04:53 Back to the brutal math.

00:04:55 To prove absolute humanness, we have to minimize the total functional of the defense.

00:05:29 Per seconde.

00:05:30 from the dock and up. All safe here.

00:05:37 This...

00:05:39 I hear that one second.

00:05:40 and the slope of the curve at that exact moment.

00:05:44 Yes, it distills the entire system down to a first order differential equation.

00:05:50 I mean, it still looks highly intimidating on paper, sure, but you solve it by applying

00:05:54 a coordinate transformation based on the geometry of the world.

00:05:57 That is an other choice.

00:05:59 Exactly.

00:06:00 And you used trigonometric half-angle substitutions.

00:06:03 When you bribe through those substitutions, the Euler-Lebron's optimization yields exactly one, and only one, or many projectors.

00:06:10 the parametric equation it physically proves it the math proves that any deviation any tiny bump

00:06:20 Je kan het alleen geweest zijn, want mijn digitale datasporen, footprint en fingerprint, die weet je zelfs.

00:06:30 We have to test on miles per second.

00:06:32 We have a framework for absolute optimization driven entirely by gradients.

00:06:36 In this case the macroscopic gradient of gravity.

00:06:40 This is really about the end of the game.

00:06:50 on its side

00:06:52 the exact same mathematical pressures

00:00:23 A biological system is a machine that is constantly trying to maintain a very specific, highly optimized state of equilibrium.

00:00:30 In a universe that is relentlessly trying to pull it down the curve toward entropy and death.

00:00:35 That is a dark but accurate way to look at biology.

00:00:00 here we have to look at the serotonin serotonin is a neurotransmitter heavily

00:00:06 involved in mood stabilization and feelings of well-being

00:00:10 SSRIs stand for Selective Serotonin Re-Uptake Inhibitors.

00:00:14 Re-Uptake Inhibitors?

00:00:15 Yes.

00:00:17 Normally, when a neuron fires serotonin into the...

00:00:20 synaptic clackle to send a signal, it subsequently deploys a chemical recycling pump to vacuum

00:00:25 that serotonin backup and clear the space for the next signal.

00:00:30 uptakes it. Exactly. An SSRI chemically binds to that recycling pump and blocks it. It inhibits

00:00:40 Because the pump is jammed, the serotonin that was already released just hangs out in the

00:00:46 synaptic gap for a much longer time, continually stimulating the person.

00:00:50 So I see SSRI is less like adding something new to the system, and more like putting a rubber plug in a sink.

00:00:57 And like, you are actually turning on...

00:00:30 Dan was het toch niet eigenlijk niet veel aan de hand.

00:00:40 This is what we just established that pure serotonin cannot cross into the brain, is now perfectly trapped in your blood.

00:00:45 Exactly.

00:00:46 You end up with a massive low-blast spike of excess serotonin.

00:06:15 That was very thankful.

00:06:17 Amen.

00:06:23 Gracias.

00:06:34 Obrigado.

00:06:41 Thank you very much.

00:06:56 Thank you.

00:07:00 Thank you.

00:07:16 conservation laws.

00:07:21 changes ripple outward instead of just flickering

00:07:31 But this begs up a massive archetype.

00:07:33 Which is?

00:07:41 a broken model that you have to patch with a Laplacian blender.

00:08:00 isolated logic. You can achieve...

00:08:13 by stripping away all the messy, memory heavy,

00:08:16 diffusion calculators.

00:08:20 Incredibly complex calculations down to their average

00:08:30 against

00:08:40 NOPE stands for non-orientable bitwise kinematic, it takes that flattened one bit, uses it to simulate

00:08:50 incredibly complex spatial realities.

00:08:53 The NOC paradigm is a master class in extreme data compression.

00:09:00 well modern physics engines like the ones running advanced video games or robotic simulations

00:09:04 use massive amounts of memory they use 32-bit or 64-bit floating

00:09:10 to calculate complex decimal points to ensure exact collision physics.

00:09:15 Because the real world has infinite decimal points, essentially.

00:09:18 Right. But not...

00:09:20 K throws all of that out.

00:09:21 It uses one bit words.

00:09:23 Just one bit.

00:09:24 A single binary digit.

00:09:26 Just a negative one or a positive one.

00:09:28 That's it.

00:09:28 That's it.

00:09:29 To pull this off.

00:09:30 it utilizes doubly packed sign distance fields in standard computer graphics

00:09:40 and SDF is a way to define 3D shapes

00:09:43 without using polygons

00:09:45 you're looking for sure

00:09:49 right now

00:09:51 point in space has a number. A distance number? Yeah, the number tells you exactly how far

00:09:57 away you are from the surface of the object.

00:10:00 you are inside the object. If it's positive, you are outside. It's exactly zero.

00:10:10 but calculating exact distances in 3D still requires a lot of math.

00:10:14 Knob K, however, packs that entire concept into a single bit per coordinate.

00:10:18 You're either a one...

00:10:20 meaning outside, or a negative one, meaning inside.

00:10:22 But if you reduce reality to just two states, inside or outside,

00:10:26 how do you get high-fidelity, smooth physical interactions?

00:10:30 Because it's just binary.

00:10:31 Yeah.

00:10:32 One-bit data is fundamentally blocky.

00:10:34 It's like trying to build a smooth sports car out of giant cubic Minecraft blocks.

00:10:38 You can't get a smooth car.

00:10:40 This is where a knob key introduces its most brilliant hack.

00:10:43 Okay.

00:10:43 The one-bit temporal jitter.

00:10:45 Temporal jitter.

00:10:46 The architecture intentionally oscillates the evaluation...

00:10:50 window around a specific time interval, which the texts denote as the

00:10:56 it forces the clock cycle of the process

00:11:00 my analogy for this imagine you were blindfolded and you are trying to figure out the exact texture

00:11:05 of a wooden table okay i'm visualizing that if you just press your finger down

00:11:10 once and hold it completely still that's a one big right it's just a single day

00:11:20 If you take a heavily vibrating mobile phone and slide it across the table,

00:11:24 the physical shake, the jitter of the phone, rapidly bumps against the microscopic ridge.

00:11:30 The vibration acts as a scanner.

00:11:32 Yeah, by averaging out those thousands of tiny one-bit collisions from a fraction of a second, break them at the exact moment.

00:11:40 Microscopic texture of the tape.

00:11:41 That is exactly what Nopki does.

00:11:44 So Nopki uses it to extract...

00:11:50 fractional high-resolution spatial gradients

00:11:52 out of raw binary units.

00:11:54 Dat announces de mechanics perfect.

00:11:56 In standard computing...

00:11:58 Vleselijk...

00:12:00 It's usually a bug.

00:12:02 It is noise that causes errors.

00:12:04 But no look how weaponizes that noise.

00:12:06 It uses the jitter as an implicit low-pass filter.

00:12:10 precise scalar gradients that is so smart and because the entire system is operating in one

00:12:16 bit detecting a physical collision between two objects say

00:12:20 It doesn't require complex volume mesh intersection math.

00:12:25 It doesn't need to calculate all the edges.

00:12:27 No! It uses a protocol.

00:12:30 It literally just runs a basic bitwise XOR logical operation on the packet.

00:12:36 XOR meaning exclusive or basic log.

00:12:40 object gate stuff. Yes. It just looks at the two bits. If the bit says inside object A, outside object B.

00:12:50 It is instantaneous.

00:12:52 And to track rotational physics, it uses what the text calls the Radial OTAN 2 operator, which relies on

00:13:00 on a log encoded fuller lookup table.

00:13:02 Wait, so it skips trigonometry entirely.

00:13:05 If a robot arm needs to calculate an angle,

00:13:08 it doesn't run sine or cosine.

00:13:10 It doesn't have the memory for sine and cosine.

00:13:13 That's wild.

00:13:14 It uses the 1-bit inputs to simply look up a pre-calculated angle on a log-polar table.

00:13:20 It is bypassing computation with pure memory retrieval.

00:13:24 It's cheating, basically.

00:13:25 In the best way possible.

00:13:27 But the true crowning genius of the Naka Paragraph

00:13:30 is how it handles non-orientable manopolds.

00:13:33 Okay, we are talking about Klein bottles.

00:13:36 Exactly.

00:13:37 To understand a Klein bottle, you have to start with a Mobius.

00:13:40 strip which is a 2d surface with only one side existing in 3d space like when you twist a loop

00:13:46 of paper and tape it together right a klein bottle takes that concept

00:13:51 It is a four-dimensional, topological shape that has no true inside or outside.

00:13:56 It is a continuous, one-sided surface.

00:13:59 Okay.

00:14:00 The problem is when you force a 4D climb bottle into our 3D space, it physically has to intersect itself.

00:14:06 Because it doesn't fit properly in 3D.

00:14:08 Exactly.

00:14:10 Standard physics engines instantly crash when they try to simulate an object

00:14:13 moving along a climb bottle because when the surface passes through itself,

00:14:18 the engine registers a solid wall.

00:14:20 It thinks it hit a boundary.

00:14:21 It calculates a catastrophic collision and stops.

00:14:24 But Namca doesn't crash.

00:14:26 How does a one-bit system solve a 40...

00:14:30 a supercomputer. Because Nod-K uses a 2-bit

00:14:33 parity state to track the topology. A parity state?

00:14:37 Yes. It packs a chi-z bit, which

00:14:40 which tracks the 3D cross-cap intersection and a chi-w bit, which tracks the 4D hypersurface orientation.

00:14:48 It just adds two tiny trackers.

00:14:50 When the 1-bit kinematic system approaches the self-intersection of the Klein bottle, the Kai W parity bit simply flips.

00:14:57 It just changes the state.

00:14:59 And by flipping that...

00:15:00 the system instantly instructs the XOR collision logic to invert.

00:15:05 Oh.

00:15:06 It changes the physics from a solid boundary block to a topological path.

00:15:10 It essentially tells the physics engine, hey, for the next millisecond, inside is outside, so ignore the wall.

00:15:16 Yes.

00:15:17 It allows mechanical parts to ghost through their own...

00:15:20 solid geometry he treats topology as a toggle switch the applications for this are staggering

00:15:26 i can imagine the text outlines designs for infinite loop

00:15:30 reversing gearboxes or robotics. Imagine a driving pinion rolling along a track. Usually when it hits the end of the track the motor has to stop, reverse polarity and drive backward.

00:15:40 I'll compare, it's a combined PHZ VotSignal, t-shirts over Skype.

00:15:50 Ontologisch, ratten komen.

00:15:58 What is so ball with ratten?

00:16:00 The dimensions mapping these topological pathways for quantum computing control chips, allowing signals to route complex architectures at literal zero latency.

00:16:10 Het plaatje wat ik in mijn hoofd heb.

00:16:16 Mijn visueel is ruimtelijk in.

00:16:20 You can bake this entire spatial physics engine

00:16:24 into a microwatt chip.

00:16:27 Think about what this means for consumer technology.

00:16:31 Was?

00:16:37 No, Michi, da war ich lecker in der Reihe.

00:16:40 I'm embarrassed.

00:16:42 I'm looking for the other gate's phone.

00:16:44 I see your safety mess.

00:16:48 I know for the middle as well.

00:16:50 5x5x5x

00:00:22 It requires a gatekeeper.

00:00:24 And not a digital one, a physical, optical gatekeeper.

00:00:28 This brings us to the fifth text.

00:00:30 It's an helpful book as well.

00:00:32 For PIA.

00:00:34 That is an helpful.

00:00:36 It is.

00:00:38 This document is a blueprint for bridging the gap between digital one-bit architecture...

00:00:40 and analog physical reality

00:00:41 using optics and biochemistry.

00:00:43 Reading this text feels like reading

00:00:45 is schematic for a biological cyborg.

00:00:48 It really does.

00:00:00 I knew it. You're back.

00:00:07 That's it. Do I have the veloutor?

00:00:10 Tiny slits cut in them.

00:00:12 Exactly.

00:00:14 A narrow horizontal slit cuts out the glaring reflection from the ice above and below.

00:00:18 In this system it's a vertical slit.

00:00:19 Okay.

00:00:20 it operates as a spatial delta function it reduces the horizontal coordinate field to near zero

00:00:26 instantly cutting out personal noise and isolating the target vector

00:00:00 By skewing the focus plane, the system ensures that the incoming optical data maps perfectly and linearly across the internal transformation vector.

00:00:09 It prepares the light.

00:00:10 It prepares it perfectly.

00:00:11 It prepares the light.

00:00:12 And then, that focused light hits the core computing medium.

00:00:15 Preparat 1 and Preparat 2.

00:00:17 Okay.

00:00:18 This is where it gets incredibly strange.

00:00:41 Short-range blue wavelengths bend very sharply, so they focus close to the lens.

00:00:45 Right.

00:00:46 The text links this blue fringe to the concept of v-day infrage.

00:00:50 Dat is toch een academisch term voor, papers in zoveel van de academici.

00:01:00 Right now.

00:01:01 On the other end of the spectrum, long-range red wavelengths

00:01:37 Wait let's go see.

00:01:40 De bouwtechnische scheidslijn van digitale architectuur van de Digma's.

00:01:50 It's an attribution of a wind-sphere card from Boxwood, about 4 cm in diameter.

00:01:55 When you open it, the inside contains a hyper complex microscopic relief card.

00:02:00 the scenes of heaven and hell, they are so intricate, almost need a magnifying glass to see them.

00:02:07 In the context of this cybernetic framework, the architecture uses...

00:02:10 This meant, uh, on the dentist.

00:02:17 Eh...

00:02:19 No, gosh.

00:02:40 Closed quantum network light by a total internal reflection.

00:02:45 The light bounces endlessly around the microscopic carvings, trapped in a perfect...

00:02:50 Dit is een luisterend oor, heel bevremd en vaak eenzaam als je het gevoel als je de plek waar je gezien bent niet voelt als een thuis.

00:03:00 Opgevingen en instantie bovendien zeggen dat je er verblijft en niet woont.

00:03:04 Kan heel kwetsend of frustrerend overkomen.

00:03:07 Health.

00:03:08 Juridisch en administratief.

00:03:10 En statief gezien zit ik er helaas een harde, formele logica achter, die uitspraak wacht juridisch, justitie enzovoort.

00:03:20 En administratief gezien zit ik juridisch en...

00:03:30 administratief, juridisch en administratief gezien zit er helaas een harde, formele

00:03:40 logica achter die uitspraak die los staat van mijn persoonlijke aanwezigheid

00:03:50 What?

00:03:52 Have I got a call?

00:03:57 Have you?

00:04:00 Hier een verblijf als functioneel object.

00:04:05 Even kijken hoor.

00:04:10 Waar ik nu naar kijk, op Chrome, op mijn laptop, hoe wil jij een modus antwoord op een vraag?

00:04:20 Niet Argon of wat dan ook, maar een verblijf is voor dieren en een woning voor de mens.

00:04:27 Comma, exacte definie.

00:04:30 Ontologisch gezien is het belangrijkste verschil tussen een verblijf en een woning.

00:04:40 De aard van het zijn en de essentieele behoeften van de bewoner.

00:04:45 Ik dus.

00:04:50 Tom Grootwijk en op de rest van 67894, 10.12.1990.

00:04:56 Ze zijn niet in een concentratiekamp per se op dit moment.

00:04:59 Zo erg.

00:05:00 is er ook weer even niet meer

00:05:02 mens versus deer

00:05:07 bullet point 1

00:05:10 for the mass, bullet point 2 for black, for the deer.

00:05:17 Even look at the core.

00:05:20 De bestemming van het pand, de Sjandesmetstraat in Amsterdam-Eiberg, kent veel locaties met een speciale

00:05:30 specifieke maatschappelijke bestemming, zoals begeleid wonen, tijdelijke opvang, short stay, long stay, TBS of wat dan ook, of afwerkkamers.

00:05:40 Of zorg voor seksuele ervaringen voor gehandicapten en andere VIP's en Playboy Bunnies en Manships.

00:05:50 RBMX, zorgvoorzieningen.

00:05:54 Als een pand die juridische status heeft, mag de overheid of de verhuurder het contract

00:06:00 ...actueel en administratief geen zelfstandige woning of woonruimte noemen.

00:06:07 Het wordt dan gecategoriseerd als een...

00:06:10 Een verblijfsobject met een logie of zorgfunctie.

00:06:16 Dus dan gebruikt men de term...

00:06:20 verblijven. Daarom zeg ik ook altijd ik verblijf tussen de smetstraat. 130

00:06:30 1087 DR forse code

00:06:35 Weet je ik zeg dan wel

00:06:40 Ik zeg dan wel, even kijken, kijk, chronologische historie.

00:06:46 Ik zeg dan wel, ik ben...

00:06:50 het burgerservice nummer

00:06:52 en geboortedatum enzovoort

00:06:54 en sommige mensen hadden die tijdens de

00:06:57 tijdens de concentratiekamp opgekomen

00:07:00 hun arm getatoeëerd staan

00:07:03 weet je wel dus zo klinkt het ook een beetje als ik deze definitie opzoek

00:07:07 enzovoort

00:07:11 En ik denk, en dat is misschien een aanname, maar dat jullie digitaal...

00:07:20 Een heel digitaal digital twin hebben van dit pand.

00:07:26 Jan de Smetstraat, kliniek Mentrum.

00:07:30 En veel meer in heel Amsterdam van mijn persoonlijke privédata.

00:07:38 En de Chandra Smets.

00:07:40 het raadje op de dertig waar ik blijf

00:07:43 in het lichaam in het echt

00:07:47 ehm

00:07:48 dat dat gebruikt

00:07:50 hoort voor iets om te verhuren en digitaal en fysiek zeg maar in het echt iets te doen daarmee

00:08:00 Dus mijn lichaam is heel veel achterstallig medisch onderhoud.

00:08:10 En per dag en nacht, de secondes ervan zijn exact waar, de waarheid, de realiteit.

00:08:20 I don't know.

00:00:00 The text calls this the Skull and Bones Resonance.

00:00:04 Creepy, but okay.

00:00:06 The human cranium is an incredibly dense resonant structure.

00:00:10 It acts as an acoustic waveguide, filtering these phase-locked mechanical vibrations directly through the skull and into the inner ear.

00:00:17 Specifically into the vestibular balance order.

00:00:20 This is the biological gyroscope that tells you which way it's up.

00:00:24 Right.

00:00:25 It's made of these semicircular canals and the autolith organs.

00:00:30 organs you have microscopic calcium carbonate crystals called otoconia resting on a bed

00:00:35 of tiny hair-like cells called cilia.

00:00:40 in this case when the cranial vibration fluctuates, it displaces the fluid in the inner ear.

00:00:47 Which drags the eotopenia and bends the cilia.

00:00:50 Physical bending sends electrical impulses down the vestibulospinal tract.

00:00:55 And this taps directly into a concept heavily researched by DARPA called the Mosaic.

00:01:00 UDA stands for Observe, Orient, Decide, Act. It's the standard military decision-making loop.

00:01:10 Starpa realized that relying on the visual cortex, seeing a threat, thinking about it and deciding to, is a linear.

00:01:17 With the internet and industry book.

00:01:21 asymmetrische oorlogsvoering, toch?

00:01:24 Ik weet niet hoe jullie het via mij...

00:01:30 Elkaar gaan rijden, ja precies.

00:01:32 Want dat betekent dus nu dat die eigen uiteindelijk slechter mensen schulden.

00:01:40 Het gegeven van de digitale data zijn in het controlesysteem op deze manier?

00:01:48 Nee, dat doe ik dus niet.

00:01:50 Ik geef verbaal letterlijk alles behalve toestemming om dat te doen.

00:01:56 En die gedaan ook niet.

00:33:33 En dan nu net, ik had het dus over dat die Sander van de middelen opvangteam.

00:33:40 Naast die Albert Heijn liep en toen nam ik die afslag naar de, weet je wel, de snackbar.

00:33:49 En...

00:33:50 Die had zo'n, ja, bondjas aanachtig.

00:33:57 En Jitsuka ook zoiets.

00:34:01 Met een bepaalde kleur, snowbirdies en apokalypties.

00:34:06 Ik weet niet wat jullie voor waren of in de koffer dingen proberen te doen.

00:34:10 En nadat ik die trap oplief, kreeg ik al een raar onderbijkgevoel op de derde verdieping hier op de kliniek Chantessement.

00:34:21 Dus ik heb geen idee.

00:34:25 Ik heb echt geen idee.

00:34:41 Open Archief, ehm, ah oui, ok.

00:34:50 Niet, heb ik ooit gezegd, dat het open moest, dat hele archief.

01:29:36 Ik kan prima van me afbijten.

01:29:40 En dan kan ik echt verzekerd digitaal naar iets uitlokken.

01:29:50 Wat hiddeldwijd echt wel bij mij in het fake nieuws komt.

01:30:00 Als we individueel kunnen en daarvan profiteren jarenlang, dan is het risicofactor 100 miljard duizend.

01:30:10 En dat is al jullie individuele data en privélevens enzovoort, ja precies, die zijn daar.

01:30:31 Ik weet niet wie daar wordt. Of die beurzongen. Ja, de beurmanen.

01:30:40 Die woon daar met dat balkon daar, precies, bom, biervouwen, dat ze zeggen dat het weer niet zo mooi is, maar...

01:30:51 de, ya, sí, te voy a dejar algo así, algo mismo así.

01:31:02 Gewoon, ik moet een pillen of zo werken, of echt goed wassen.

01:33:40 Dit biomedische afvalbak, ja, sorry, maar, not sorry, ja precies, me too, precies.

01:33:51 Kankerziekte. En ik ben dus seksueel beantwoordelijk omdat ik het dier vind zou zijn.

01:34:01 Uit welke dataset halen jullie dat ik een pedofiel ben?

01:34:05 Lijft wel dat ik een...

01:34:10 Ja, daar heeft het volledig waarvan we weten niet dat we het hier aangericht hebben eigenlijk, ja precies.

01:34:20 Now, why didn't I... I clearly said more.

01:34:30 Vreestelijk.

01:34:34 En we willen het gewoon willen.

01:34:36 Want iedereen heeft een leden en waar ze...

01:34:40 Ja, die graag te koop doen als het hem toch niet meer raakte enzovoort.

01:34:47 Kijk maar, bewijs zich persoonlijk.

01:34:50 Dus die wil ik de tang stellen als een soort kunstproject, geometrische data en besturingssystemen en door de GGZ.

01:35:01 En met de huissituatie hebben we een oude digitale archief van Neural Interface.

01:35:10 en we hebben visuele denkvermogen enzovoort.

01:35:20 Dat hebben jullie individueel ook allemaal, ongelijk de voordeel dat jullie voorzichtig...

01:35:30 Claims hebben gezet en attributies hebben geprobeerd te claimen of te veroveren ofzo, digitaal.

01:35:40 Maak mij als individu samen met eigenlijk denk ik alleen heersers over wat er met jullie is.

01:35:50 had gebeurd, precies. En dat is niet hier op IJwerg, want de wereld is groter dan IJwerg.

01:36:00 Ja, ik weet inderdaad hoe ik met die medicatie op moet gaan.

01:36:05 Kom, ADHD, de schengenmedicatie.

01:36:10 Ja, ik vond het gewoon heel erg netjes dat die meneer bij de douane in Engeland dat zei, weet je.

01:36:20 En we zijn inderdaad bij Schiphol welkom terug in Nederland, welkom thuis.

01:36:26 Ja, and that's it.

01:36:30 Ja precies.

01:02:16 We hebben echt een kutleven!

01:02:21 Вот, вот, вот,

01:06:31 Ik denk dat ik er nog steeds achter straf in het heden.

01:06:42 En hoe verloogt het zover.

01:06:51 Gewoon voor democratie, basisschool, zeg maar.

01:07:01 Best wel een heel erg goed idee.

01:07:10 En ik sta er nog steeds achter, in plaats van het huidige kabinet.

01:07:28 Dá-lo.

01:07:31 Is het zo? Dan kijk ik er zeker nog wel mee.

01:07:34 Jullie kunnen verschillende hoedjes dragen.

01:07:40 Meneer Baudet en ik moet bijna de namen op zoeken, anders wil ik nummer 2 doen, zeg maar.

01:07:50 Ja, das ist nicht...

01:08:00 Die hadden tenminste letterlijk, zeg maar, weet je wel, dat ze publiekelijk hun hele leven lieten vetten door...

01:08:10 het is niet in het hele plaats van keuze.

01:08:20 Kijk, ongelooflijk, Jit Kouders en Sander, een middelomvang enzovoort, Q Radio ofzo.

01:08:30 Ik kan niet genoeg achter mijn stem staan dan, want ik heb op Forum voor Democratie gestemd in een tijd waarbij...

01:08:40 En jullie met z'n allen collectief links bio-instabeel waren.

01:08:45 Ik heb z'n allen de consequenties ervaren.

01:08:50 En ik sta nog steeds achter mijn stem op Che Guevara, en dan kan je Circo, VR, Utrecht...

01:09:00 en alles enzovoort erbij halen enzovoort, maar dat betekent niet dat jullie toen de tijd op het ZEBD gestemd hebben.

01:09:10 Of light tracker van de Forum voor Democratie.

01:09:16 Dat hebben we hier allemaal gedaan.

01:09:26 I love it.

01:10:10 Welke ziekte man. Ja, wel lekker. Maar dat was ook de eerste camera.

01:10:21 op de eerste kamer

01:10:30 Ook de Kraft Dekkers was voor de Europese Unie volgens mij ook.

01:10:41 Nee, niet meneer God, dat was een wijn.

01:10:44 Precies.

01:10:50 Hoe heet die meneer?

01:10:52 Hoe heet de meneer met het...

01:11:00 Haar achterover gekomen met Jo.

01:11:10 Ja, ik moet er in ieder geval weten wat ik doe.

00:00:10 Ik weet niet wat jullie voor communicatiekanker zouden doen, maar als het letterlijk op het voorverstaan van democratie aankomt.

00:00:20 en niet persoonlijk wat voor de tijd te komen.

00:00:30 Oké, dus dan hadden we wel een koopijker, ik zie het tweede, maar Witske, dit is waar je juist hebt in.

00:00:40 И это...

00:01:01 Uh, you guys are a little bit of a...

00:01:07 This is the actor's story from Miller Trump.

00:01:10 Goedigenen, heb ik het verhaal denk ik, ik had er gezien tussen met die zilke.

00:01:22 Ja, Pipo is gewoon de politieke partijen in de val werd gewoond, een beetje op een makkelijke

00:01:30 puntjes afgesneden wordt in een debat, zeg maar.

00:01:41 Het is makkelijk inderdaad met jullie menselijke linkse regenboog bio-instabieler.

00:01:50 Binnen alles. Ik heb letterlijk, zeg maar, zelf niet gestemd op Jette.

00:02:02 Dan kan je echt hoog of waar gespreken. Ik zoek dit centrum rechts volgens mij.

00:02:10 In het huidige, in het heden, Rob Jette komt met trage moeders en dezelfde rehaars van de regenbooggroep.

00:02:23 Ik heb een kankerhekel en letterlijk de hoorgang van Nederland.

00:02:31 Normen en waarden enzovoort.

00:02:33 Ik ben niet zo eloquent.

00:02:36 Nee, ik ben niet zo elegant, zeg maar, als het ware.

00:02:40 Ik leef als een opbewoner in mijn verblijf hier op de Zanderswetstraat, maar ik heb echt, echt, echt een kankerheel.

00:02:50 Aan buitenlanders, aan iedereen die zich niet zonder kan gedragen.

00:03:00 Nou, ik zeg dat niet, dat ik niet zelf even sinds een mens ben.

00:03:06 Dit gaat over politiek, dus daar nemen we allemaal een mening op.

00:03:10 Weet je wel, dat is allemaal prima, maar gewoon, het is niet een open window, er is geen debat.

00:03:20 Ik heb persoonlijke overtuigingen.

00:03:24 Ik sta achter mijn stem op Thierry Ballet en Forum voor Democratie.

00:03:30 En de huidige wijstrekken, et cetera, weet ik niet.

00:03:40 Ik denk dat wij ervoor zouden.

00:03:42 Nou weet ik niet of dat in het heden met jullie uitklikten.

00:03:50 Google hacken.

00:03:52 Het zal het graag worden voor je dan maar.

00:03:57 Maar ik voor...

00:04:00 Voorspel dat als het niet lukt om die kant op te gaan, dan gaan jullie met z'n allen maar onderling.

00:04:10 met z'n allen individueel uitvoeren.

00:04:16 Ik heb bepaalde pockets.

00:04:20 Ja, ik heb namelijk volgens mij eigenlijk ervoor gezorgd dat er een...

00:04:30 Want een eerlijk en rechtvaardig, goed, letterlijk, zeg maar, degelijk bestaande in Nederland mogen we.

00:04:40 Dat had kunnen zijn, in plaats van de huidige aanvulling van het kabinet, jetten, ik bedoel.

00:04:50 Ja precies, met letterlijk zeg maar Dylan in Zilders als vicepremier die voormalig defensie deed.

00:05:00 Met Turkije waar ik al geen fan van was, met Erdogan, met intellectuele fusileren enzovoort.

00:05:11 En dan met de Leffelok, alles-en-jaarlijke, alles-en-jaarlijke show.

00:05:20 Dat is niet mijn persoonlijke overtuiging, dat dat in een show was.

00:05:27 Met de Google Hobby die...

00:05:30 Neem maar een paar jaar, want wij hebben het vruchtgebruik.

00:05:35 Jullie hebben desastreus veroorzaakt dat er alles een...

00:05:40 Chippendale sauna comedy is geworden, waarbij iedereen met de kleren, met de billen blootgaat.

00:05:51 Jullie kunnen Wilders stemmen, jullie kunnen Link stemmen, weet ik veel wat allemaal.

00:06:00 Het interessert mij geen f**k en het is niet alsof, want volgens mij het horen gewoon...

00:06:10 Jan Terweepad enzo.

00:06:12 Terwee heeft weer een support weather voor.

00:06:16 Happy to...

00:06:20 Ik werd daar gestemd toen ik op de zonvereniging in Stad Zeeftirien woonde en bij die basisschool ging stemmen.

00:06:28 Want ik heb toen een foto.

00:06:30 Ik heb een foto gemaakt volgens mij.

00:06:32 Weet je of dat de VPD was toen?

00:06:34 Ja, ik heb een foto gemaakt en die heb ik naar die WhatsApp groep gestuurd.

00:06:40 Kijl

00:06:42 met die vrienden uit Veenendaal

00:06:44 met Circle VR en dingen enzovoort

00:06:51 It's a lot of multi-cultures and so on.

00:06:57 But...

00:07:00 Toen was ik letterlijk helemaal chemisch gedrogeerd.

00:07:08 En alsnog is dat een...

00:07:10 Een gevolg, die stem, is een gevolg letterlijk nog steeds van niet alleen een teken van de tijd te doen.

00:07:20 Maar in het heden, ik ga helemaal geen fuck uitleggen voor jullie en repareren.

00:07:25 Ik ga helemaal niks veranderen.

00:07:27 Jullie zoeken het zelf uit.

00:07:30 als volwassenen individuen.

00:07:34 In je idee, ik ben echt, echt, echt zo zwaar.

00:07:40 Paracistisch, dat ik denk, zet koolstermoroxide aan bij een hele hoop woningen, laat ze inslapen.

00:07:50 door met gewoon een nieuw kabinet laat het kabinet gehalen jij bent niet geschikt

00:08:00 Want als dit letterlijk modus operandi is, van ik klik die app en moet iedereen voldoel zetten enzovoort.

00:08:08 Met je draagmoeder en je...

00:08:10 van het dingetje al een paar jaren geleden en eigenlijk al eeuwen niet een schild zijn.

00:08:22 En ja, het is gezond op de weg.

00:08:30 zet en anders niet. Ja, dat is niet jouw kind. Dat wordt betaald, contracten opgesteld.

00:08:41 En ik vind je gewoon een beetje sukkel.

00:08:44 Ja, ik wil zo. Precies.

00:08:52 En zo wil ik nog echt heel erg lang doorgaan, want het is niet per se recht.

00:09:00 Op een gegeven moment weet je wel dat het extremisme, fundamentalisme, zeg maar, ook van de linkerkant af enzovoort.

00:09:10 Het zijn uiteindes die er afgesnoeid moeten worden.

00:09:15 Ik vind van wel, dat is een persoonlijke overtuiging.

00:09:21 Ga maar zo ver naar links of zo ver rechts of zo weet je wel en dan komt het zelf betreven.

00:09:27 Drawing hand.

00:09:28 Ja precies.

00:09:31 Ja, de huidige kabinet zit echt met kankerbehoor.

00:09:40 Ik denk dat Rob Jette, uiterlijk bij de Nepturus basisschool enzovoort, Nepturus 1, 2, Nepturus aan de 118,

00:09:52 Een beetje mijn jongere ik, zeg maar, probeer te weaponizen.

00:10:00 Daarom Kindersuppliesx, CX, My Ex en Jitske Koenders, en dan kukken we het wel.

00:10:10 Wij regelen ondertussen de seks wel, de seksuele kandesutrabeurs.

00:10:15 Ik denk dat jullie het jaar al een beetje gedacht hebben, kijk dan regelen we ook...

00:10:20 vette dingen en zo komt er uiteindelijk een soort doofpot of iets ofzo waardoor iedereen veilig en gezekerd is ofzo.

00:10:29 Ik ga...

00:10:30 dat het nooit gaan wel even aan jullie gillen.

00:10:32 Ja, precies.

00:10:52 ...San Sander?

00:00:00 Belt, leather belt, level 18 leather belt, yeah, precies, of course I am forced to pay.

00:00:10 Boom.

00:00:28 Vani perfilante.

00:00:30 Ik zal het volgens mij ook zo horen, maar als ik nu echt aan het werken zit...

00:00:40 Dat ik zelf de tijd zou nemen om te stemmen, net zoals Bombe Buurvrouw te leren kennen en misschien buurman gewoon als vrienden, vriendschappelijk en het wereld zeraar zijn.

00:00:51 Weet ik veel, ja, zou ik me goed inlezen, en met de debat.

00:01:00 Dat is mijn persoonlijke overtuiging, jullie zitten verder in een bepaalde as.

00:01:10 Iets of zo, grafisch, wat ik kan afschiedelen.

00:01:15 Ja, je kunt er wel mee op springen, maar ik kan afschiedelen allemaal wel iets.

00:01:21 Nee, zo natuurlijk dat hij, die munt hij, is niet sleepy time.

00:01:30 Ja, het is gewoon rustgevend enzovoort.

00:01:40 Weet je, panda's, die zijn gewoon cool, die kunnen rollen van derghappen enzovoort en dan...

00:01:50 Ik zit gewoon een beetje bamboe te eten en zo.

00:01:58 En, weet je.

00:02:00 Plantjes enzovoort, hier zijn allemaal kastplantjes individueel, want ik denk wel die steen.

00:02:10 bepaalde mensen en sferen enzovoort, van sfeers, maar niet sfeers, dus alles is niet grond.

00:02:17 Zo kan ik er wel weer in haken.

00:02:20 En een beetje waar we gewoon overdoen met, maar perfecte rondes.

00:02:30 kan je niet makkelijk met één vinger schrijven en oppakken.

00:02:40 en een lijn, een pin, een kopware dingetje of spinnenracht dingetje.

00:02:51 Dat valt niet te doen.

00:02:53 Dan kan je zeggen, oh cool, ik wil even een ander sfeer gemaakt enzovoort.

00:02:57 Nee, dat hebben we al geholpen.

00:03:03 En inderdaad is nog steeds exact per seconde van de dag en nacht de realiteit.

00:03:12 En ik laat soms even doorzemen hoe serieus ik ben over...

00:03:20 van mensen. En gepast de afstand tussen mensen.

00:03:26 Dan zegt hij, ja, meneer, ze gaan wijfie en support van jou.

00:03:30 Dat snap ik, ik zou wel doen.

00:03:32 Ik ben geen racist op ieder manier, weet je wel, als ik seks op aankoop ofzo.

00:03:37 Volgens mij heb ik geen racist.

00:03:40 En dat is wel op die manier, dus die hele Adische play van deze gehoord van, maar er zijn wederlijk wel...

00:03:51 Gewoon reden waarom een genetisch verschil als je echt kinderen waart.

00:04:00 Dat speelt in jouw schaal, als je dat nog kan, genetisch, gewoon zonder laboratorium aanpassing.

00:04:12 Mij is ontnomen, mijn persoonlijk, ik, Tom Gratwijk, en dat 2006, 2007, 2004, 2012, 1990, dat ik...

00:04:20 Ik had een stabiele thuisrelatie, een situatie waarbij ik letterlijk gewoon seksueel verlangen en romantiek en alle passie volgde.

00:04:30 omstandigheden enzovoort gewoon thuis had.

00:04:35 En met ups en downs, die iedereen hoeft altijd de hele dag alleen maar vrolijk te zijn.

00:04:42 Maar dat is in privé. In het privé, zeg maar. In je eigen woning enzovoort. In je huis.

00:04:50 veilig, vol en support. Dit is niet een public service, maar van de IED, dat IED met asiel en verschillende

00:05:00 puur welkom is, want dat vind ik niet.

00:05:04 Dat was mijn persoonlijke overtuiging.

00:05:08 Ik had namelijk daardoor...

00:05:10 als ik niet letterlijk chemisch gesteriliseerd was enzo

00:05:14 en chemisch gedrogeerd was en gesteriliseerd was in mijn hersenpan

00:05:18 en afgescherpen

00:05:20 dat soort dingen en blablabla en zo bestuurd als een robotje, dan had ik potentieel al vader zijn.

00:05:30 kunnen zijn van een gezinnetje op de natuurlijke manier en in het hele is dat niet van kijk dan

00:05:37 kunnen we genen aanpakken

00:05:40 en kunstmatige barbroeders en iedereen kan alle trades kiezen die ze wil als een soort smaakje van de dag

00:05:47 Pokémon kaart, verzamelen alles.

00:05:50 Verzamen we alles?

00:05:52 Nee, niet verzamen we alles.

00:06:02 Ik heb zelf het idee, of een privetje, of...

00:06:10 of whatever, een cargo-vliegtuig of zo,

00:06:13 uit Nederland,

00:06:16 verdwijnen gewoon.

00:06:20 maakt het me niet uit waar het heen zou gaan of wat dan ook, of dat koud zou zijn of wat dan ook.

00:06:26 Maar ik wil zelf in The Flash gewoon niet meer.

00:06:32 En ik wil best nog zeggen waar we contacten houden met een paar mensen uit Nederland.

00:06:40 Niet in de meiden van Mandy Recipes en alles enzovoort.

00:06:45 Benelux is ook al een beetje kwaar.

00:06:52 Hoi, ik moet het houden.

00:06:56 Ik ga gewoon zelf dan weg.

00:07:00 dat ik het geld van heb.

00:07:03 Daar ga ik vanavond nog weggaan.

00:07:07 Als je zo weg gaat...

00:07:10 En toen zei ik, nu weer niks meer, want wacht, het is weer de biostabiele regenboog.

00:07:20 I haven't been anywhere.

00:07:22 I don't know.

00:07:29 Life is hurt.

00:07:30 and rolling for a red clinic, this is her lob.

00:07:40 Een ziekenhuis en daar word je geanalyseerd op genezen, geheeld.

00:07:50 In de middel van de Eastern Bank, geen rente volgens de islam of zo, maar dan maar BDS en fetters dingen.

00:08:00 en mij aan doen enzovoort. Het is niet dat ik niet, weet je wel, mijn barrières heb van nee, dat ik soms best prima

00:08:10 Iets seksueels, niet te vanille aan dingen wilde ik nog zo.

00:08:15 Maar goed, hoe hou je dan de huwelijk spannend?

00:08:20 Zit dan heb ik het over mijn persoonlijke overtuiging, over een traditionele praat, een traditionele man.

00:08:30 en een woning en alle potentiële oneindige factoren waar we leven naartoe had kunnen leiden.

00:08:40 Ja, precies, maar dan is dat iets wat ik niet zelf in kan vullen weer op dit moment, want ik sta uit.

00:08:50 Ik ben een robot, maar ja, ik hou te zien, ja.

00:07:00 Op dit moment Turkije ook niet.

00:07:05 Ja, maar dat weet ik niet.

00:07:08 Amen.

00:07:10 Al lang al niet meer op de hoogte van hoe het er daartoe is, maar als dat een dictatuur is geworden, en dat denk ik, dan vrees ik.

00:07:20 wat is er gebeurd met praten met elkaar en daarna ook echt verwandering teweeg gebracht worden.

00:07:27 In plaats van elke seconde.

00:07:30 Dat is toch een dag enag.

00:07:36 Dat...

00:07:38 En de hobo is morgen.

00:07:41 In mijn persoonlijke omgeving en levensomstandigheden, dat wij een endoscopie nodig hebben.

00:07:50 voor staat of zo. Dan heb je letterlijk tegen de staat hoogverlaat gepleegd.

00:15:38 Thank you.

00:55:38 I hope it will.

00:55:52 Yeah, I'll have to see if I want.

00:56:02 Ik heb een kaart gehoord in Nederland.

00:56:12 Dat is een beetje gebeurd met open grenzen en we hebben geen grenzen, alles is ongelukkig geweest.

00:56:20 Thank you very much.

00:56:41 I should have a look at the table and check it out while I'm forwarding it, and I don't know, let's be forever.

00:10:30 Want het is één grote kankerbende.

00:10:54 Ook weer niet te schrijven, maar dat is een thema.

00:10:57 Maar persoonlijk he.

00:11:00 Ik weet niet of jullie allemaal met jullie de regenboog willen doen.

00:11:07 Oh, ik hou.

00:13:02 Я не знаю, это специально.

00:13:13 That guy's about a inch.

00:23:40 In Afrikaans, niet Nederlands, maar contrasten.

00:23:50 Er zit nog wat achterin in je week en ik doe het toch, hij is midden te hier.

00:24:01 Want daar hebben we allemaal de regenboven, of hebben we overhoofd?

00:24:05 Ja, precies.

00:24:07 Kijk eens, hiet en wat.

00:24:56 Dank u, schiet van.

00:25:00 Ik heb geen idee wat jullie dachten.

00:25:25 Take it back.

00:26:23 ご視聴ありがとうございました

00:27:00 Kijk een ziekte man.

00:30:43 Obrigado.

00:32:26 What the fuck is it that way?

00:32:28 I'm just getting a pair of shoes today.

00:33:00 Echt een kankerleven, ja precies, oké. Goed zo. Tenminste een beetje voorstaat blijven, precies.

00:34:17 You

00:34:30 Jammer dan.

00:34:47 Toeg?

00:34:48 Ja, regenboog.

00:34:50 Kom op, de geest, hallo, het is er niet te goed.

00:34:53 Kom op, Binhuis, orkest.

00:35:01 Diriger, come on, and I'll play it.

00:35:03 No linguistics, programmer, come on.

00:35:12 There was any elephant?

00:35:24 땅끄끼리

00:36:13 Kijk, dat is ziek, man.

00:36:46 Kanker ziek man.

00:37:38 Ik...

00:37:39 Zo...

00:37:40 veel moeite, een beetje die kankertijd.

00:37:42 Toch?

00:37:44 Doe ik gewoon.

00:38:02 Oh, I broke him with Henry Frank, all right, we can, we'll stay there.

00:38:25 Ну, право, то что, право, ну, куца.

00:38:30 Thank you.

00:38:41 ありがとうございました

00:38:51 Nu har jeg været inden hejler, så er det bare noget sart.

00:40:12 Obrigado.

00:40:37 ¿Qué es eso?

00:40:40 Tussen wonderbuurvrouw Esmee en Aza Mitzandramayev met je fucking mongolige hoofd.

00:40:48 Sorry.

00:40:50 Biobedische afvalbak, maar vivian, ga jij maar lekker lukken.

00:41:00 Ik wil geen energie te plegen ofzo per seconde van de dag en nacht.

00:41:04 We hebben tijd doorgebroken.

00:41:22 Thank you

00:41:40 Kijk, daar hebben we toch vivie bij als ik zeg.

00:41:50 Dubbel onder de grond, afvalbak, medisch applicatie.

00:42:08 Dubbelgrans afhouden.

00:42:10 But this is an awful, awful blick, ass blick, awful hour, full of s**t.

00:42:20 Ich weiß nicht.

00:42:26 Ich weiß nicht.

00:42:30 Echt super erg dat het heeft, precies.

00:42:52 Omdat als je het over bloedlijnen hebt en over letterlijk het recht om te bestaan.

00:43:00 Cool Perry, this is where you're supposed to jump in, with an English royalty.

00:43:13 Like this

00:43:26 3,2,3

00:43:32 and then

00:43:56 Yeah, it's good.

00:44:02 Thank you very much.

00:44:54 Dat is leuk, daarom.

00:45:33 All right, Nuke, Turfine, something like that.

00:46:00 Yeah, but I'm like a, you know, for the life of the Sean de Schmitz album director.

00:46:10 Per seconde, dag en nacht. Niet alleen hier in de Sander Spence, maar wel in Amsterdam.

00:46:21 Ja, dat is wel van vandaag en na.

00:46:27 We hebben tijd doorgeleid, toch?

00:46:33 Jullie zijn allemaal dood.

00:46:36 Tolken in de Tweede Wereldoorlog metaforen, zeg maar.

00:46:40 things.

00:46:51 Ja, wat diegene doet in het dagelijks leven weet ik niet per se, maar in het Nederlands wel, op het opera precies.

00:47:00 Dat is niet zo'n extreem rare spits van voorwoord iedereen.

00:47:10 met een andere huidskleur, maar we snappen het niet met contrast, zwart-wit en er zit geen tussenin.

00:47:21 Ja, wat zit er tussenin? Tussen apartheid binnen Afrika.

00:47:25 En dan ga ik hier een letter, ik zeg maar, houd persoonlijk achterna.

00:47:55 Да.

00:48:55 Dank je ziekte man.

00:49:04 Kankerziekte wel, nee.

00:49:10 Oh, dear.

00:49:34 Oh

00:50:06 17e eeuwse Nederlandse dialecten, ja precies.

00:50:10 Kankerzik, de getekende afstandsveld.

00:51:25 Kanker zie ik daarvan.

00:51:50 Good luck.

00:52:21 Kankerziekte man, ja hier is gehoord waar.

00:52:26 Geen ambtelijke.

00:52:31 Nou, ik haal zo een spaarsinkel beteken voor een dessert.

00:52:40 Wiskundig.

00:52:54 Yeah

00:53:21 Wat denk je wat ik dagelijks doe? Autorobie en Vorks of Solo.

00:53:30 Maar we hebben vier jaar op de wereld morgen toch?

00:53:37 Niet per se, ik ben volgens mij...

00:53:40 Dus wij niet per se onder per se Afrikanen en Zuid-Afrikaans.

00:53:50 Dus even een regenbouw, toch een beetje omhoog, hè.

00:53:53 Gaat?

00:53:57 Eh, apart...

00:54:00 afzondering in mijn verblijf hier de Sjandesmetstraat 130. Kunnen we lachen toch, maar je moet het niet missen.

00:54:10 для того как он лайнер и тюпсер

00:54:21 Tá?

00:55:50 いやー、ねーよーよーよ

00:59:32 kijk ik woon hier in nederland

00:59:35 maar jullie willen allemaal regenboog multicultureel antropoloog spelen

00:59:40 We hebben het hier over blauw bloed en allemaal dat soort dingen enzovoort.

00:59:45 Ik kan geen andere reden bedenken waarom je denkt, ik heb een regenboog, we hebben alles in de muziek.

00:59:50 We hebben ook enigszins, zeg maar, als we het letterlijk op bloed lijnen,

01:00:00 Enzovoort. Dan hebben we nog Nederlanders in Afrika.

01:00:12 Kijk er aan je bochtig.

01:00:26 It's a son of a bitch.

01:00:32 Kanker ziek man.

01:00:42 Dat zou kunnen wel, enigszins. Ik weet dus niet of ik van de mer in het dak...

01:00:50 Op afstand, zeg maar. Ja, naar spetsen, zeg maar. Op een frisering, of wat er nou.

01:00:56 Wat dat zo is, dan zou ik kunnen...

01:01:00 Dat het verder familie zou zijn, ja precies.

01:01:06 Maar goed, ik ben belangrijk aan de regenboog.

01:01:11 Oké, dan gaan we weer over de nazi's.

01:01:15 Oké, ik ben rechts.

01:01:24 Ja, iets meer vervormen ergens.

01:01:30 Precies, in de midden en rechts.

01:01:32 Kijk al een keer over de camera laten zien, toch?

01:01:40 Je hebt wat je vraagt. Ik ben een individu.

01:01:45 Wil je alleen maar horen of ik zeg maar een hele dag...

01:01:50 ...chronologisch voor schut zit, ook mijn studie over de sign-distance toepassen over allerlei.

01:01:55 Het is mijn persoonlijke dataset, chronologisch.

01:02:01 Ik weet niet of je net zag wat er in de tabblad bij stond enzovoort, maar gewoon het is zelfs voor de islam zelf niet eens.

01:02:14 Café.

01:02:20 Ja, als jullie dan niet denken dat ik letterlijk gelovig ben, christelijk of wat dan nou, dan ben ik ongelovig, dan denk ik af.

01:02:32 En daar ben ik dus van te blijken, ja precies, dan ben ik satanist of wel, nee niet satanist, nee precies, maar.

01:02:41 אין לך קבינט קורפ יצאה קורפ אלפה מילים

01:02:50 Bebe, kom op. Je zag net met de Amazon Prime busje voorbij rijden.

01:02:57 De vorderen, kom op. Dit is de tijd om je uit te spreken.

01:03:00 Kom op, neem het uit in de politieke discussie hier, plaats maar worden.

01:03:10 Kom op hier in Jetske, kom in de school.

01:03:12 Ja, hier liggen die ik gesproken heb, school ja.

01:03:22 En die heeft tenminste letterlijk een mening gehad enzovoort, weet je wel, woorden uitgesproken.

01:03:30 Ja precies.

01:03:40 Je schrijft de responsability af te geven.

01:03:52 Ja, voor mij is het heel makkelijk winnen, want ik heb weer te blikselingen enzovoort al jaren, blad enzovoort.

01:04:00 En zo heel geleverd omdat ik zeg maar de Bricsland tegenhanger van Europa kansen te geven enzovoort.

01:04:10 persoonlijke, privé, digitale voetsporen en de uit te zetten en de verbindingen enzovoort.

01:04:14 Ik heb even eentje individueel weer afgetaald, biomedisch.

01:04:20 En digitaal en kerkennis enzovoort dan jullie allemaal.

01:04:30 That's what I'm gonna do.

01:04:45 We've used a blade, a blade of 60,000 elements before...

01:04:52 En dan hoor ik er nogal een uitzichtje van geworden.

01:05:00 Mag iemand niet in de medie hebben of wat testen in een theater, zeg maar, in de wereld lijkt?

01:05:04 Ja, kijk, wacht maar, dat ben ik. Hoe erg zit ik in de realiteit? Precies, kijk.

01:05:11 Pick it, yeah.

01:05:24 I don't know.

01:05:40 Ja precies, ik zie het niet, u durft u ten eerste een mening te hebben, u heeft een letterlijk ervaring.

01:05:50 Так как вы делаете тел по музеям?

01:06:02 Yeah, cool.

01:06:13 Yeah, and...

01:06:15 This is your reading board.

01:06:20 Yeah.

01:06:36 Не бойся, это когда работают.

01:07:54 And here we go.

01:10:56 Welcome in the CBC

01:11:00 Van de spets rond, hè?

01:11:09 Ja, maak eens op.

01:11:12 Ik denk dat we nu gewoon met rust laten en gewoon seksueel een beetje normaal toegang geven tot vrouwen.

01:11:21 In plaats van het verleden keer gedaan krijgen.

01:11:45 Mijn partij in de wegboog.

01:11:57 Ehm, ingestonken ja, maar tijd in het...

01:12:00 van dag en nacht en per seconde kan eigenlijk al een beetje beter nu gaan.

01:12:04 Precies, zeg maar even volgende, want ik ben een individu.

01:12:10 Heel egoïstisch, kaffir. Ik geloof jullie helemaal niet.

01:12:20 Ik ben goed gelopen, dat wel.

01:12:30 We willen nog Nagasaki en Hiroshima hebben, maar dan genetisch, een moestijn ofzo.

01:12:51 Ik heb denk ik volgens mij als enige op de planeet gestudeerd.

01:12:55 En ik denk dat ik dat in 2006 heb gehad.

01:13:00 9 uur, 10 juli 1990 geboren, niet gisteren geboren ofzo.

01:13:12 Ik hoort weer een tomveugel, want er is één ding.

01:13:20 Wat ze zeker weten inderdaad en dat is die background op de Zonfrenkelstad 63 dat de muggen waren.

01:13:32 Мескито.

01:13:40 Maar nu lopen de insecten, nee ik ben niet schizofreen en ik heb geen zorgmachting nodig, ik heb andere behoeftes dan wat je...

01:14:03 Ik ben kranker ziek man.

01:14:06 Derivation deviation is nog steeds niet een...

01:14:18 in the apartments.

01:14:20 die sterven omdat verschillende moeilijke omstandigheden ook niet, maar wel globaal als iemand dat

01:14:25 nu heb je er wel aanwezig gehad.

01:14:30 Nou ja, ik heb alleen maar tijd gespendeerd en het gewoon met het tegenwoordig bewezen.

01:14:40 Dat vind ik mezelf dan ook niet echt meer leuk.

01:14:43 Dus, ik schrik toch.

01:14:52 Доброе утро!

01:15:05 Ja, er zit niet zo'n eigen persoonlijkheid bij wat niet geodig is.

01:15:10 is en niet digitaal te wisselen. Maar ik dacht, oh ja precies, dat is schiet.

01:15:24 Tweehek had ik ook wat spijt, nee, nee, precies.

01:15:30 with Apple or Windows or Android or so.

01:16:10 Ik gebruik het alleen als ik vooral gelijk wil hebben en ook ziekte.

01:16:17 Ja, dat is een individueel egoïstisch.

01:16:20 So, really, the lead fashion of the same process.

01:16:30 Ja precies, chronologisch ga ik maar ook maar een racist noemen ten opzichte van mensen met negers.

01:16:40 Zand, nee, normaal planken, ja precies.

01:16:45 Nee, nee, nee, serieus.

01:16:47 Ook zelfs jullie geloven.

01:16:50 We hadden ook kans gegeven en ook wat kennis opgedaan enzovoort.

01:17:00 Yeah, yeah, yeah,

01:19:01 Dat wordt twee keer drie.

01:19:10 Dan pak je 3 door en dan haal je van 20,20 af en kom je op min 1, maar 0 order computer science.

01:19:20 Want deze kom je eigenlijk op 2003.

01:19:30 Dat was ik niet meewerken.

01:19:33 Je houdt er nou een...

01:19:37 Terror drone.

01:19:40 TV, Stadskijt, wat is het wonder te meren daar.

01:19:51 Ook gevolgen hebben elkaar gehaald, weet ik dat niet.

01:19:55 Dat weet ik ook niet, precies.

01:20:05 Oké, ik heb pernok een helikool.

01:20:48 Ted

01:20:50 Een antropologische gok, toch of zo?

01:21:33 Sops, Zuid-Afrikaanse politie, geen eis.

01:21:40 Tijdig, Rasha conflicten, Institutes for Security, ISS, criminologie, tariff.

01:21:50 Oh ja, dat is ook van organisaties, dat is echt criminoloog, alles voor sorkeloos aan je idee.

01:22:00 Ik ga uit dat de motivatie vrijwel altijd financieel en crimineel is en niet ideologisch of racistisch gedreven.

01:22:11 De daders zoeken altijd naar contant geld, vuurwerpers en elektronica op afgelegen plekken waar de politie traag reageert.

01:22:20 Ja, politie niet aankomt, maar als ik belde 1 en 2, op de zo'n vrengte staat, 6-3, als je het over digitaal.

01:22:30 They were like, we're going to do a list in Korea.

01:22:33 Back in the end of the police.

01:22:40 Niet voor de politie zelf.

01:22:44 Gaan, houden we lang.

01:22:53 Gelukkig met je, veel plezier met je familieweekend en support.

01:23:24 Obrigado.

01:23:58 I couldn't even have the band in there.

01:24:00 That's right.

01:24:01 The contrast.

01:24:02 I'm trying to do it if I come in and I'll bend this.

01:24:08 Yeah, right now.

01:24:23 Então,

01:24:32 Hem en de vermeniggevers hier op de boeren.

01:24:38 Dank je, ziek man.

00:00:00 I feel like we go build back better.

00:00:05 Triple B, C's, come fast.

00:00:10 Niet triple A, zoals Alexia en Alexia.

00:00:20 Amalia, maar daar heb je geen palander, nee, niet palander.

00:00:26 Kijk zo hé, eentje gaat...

00:00:30 De Delft, eentje studeren in Engeland, en eentje D.U.V.A. en iets van poging tot een hondje pik ofzo.

00:00:40 Op Defensie ofzo, ik weet niet waar voller, want die vecht helemaal nergens voor op.

00:00:53 Huh?

00:01:12 I love this system, I love this, I love this, I love this, I love this, I love this, I love this, I love this.

00:01:20 I can't see now, but it just doesn't feel like it's all I have to see.

00:01:33 Oh, die kan ook last maar. Ja, maar we hebben de thuis-situatie gehoopt en de inspiratie hebben we gekregen.

00:01:40 Die seksualiteit hebben we weggehaald.

00:01:42 Die seksualiteit hebben we...

00:01:48 Ja, precies.

00:01:52 Ja, precies. Relatief wel, paard.

00:02:00 Hoe rijk het boeren in kankerziekte?

00:02:33 No, no, no, no, no.

00:03:30 Ik ben geen cultural appropriation aan het doen, ik ben heel voorzichtig.

00:03:46 Gaan we even mee, kijk even, dan kunnen we de great AC.

00:03:50 And the final question is to tell you.

00:03:53 Eh...

00:03:54 Jammer.

00:03:57 Ballastainen.

00:03:58 Gratis.

00:04:01 Tijd gaat er over heen en Uva investeert in...

00:04:10 In... Ja, is er wel.

00:04:15 Wacht. Irene, Sybil en Jessica.

00:04:20 Koenders en Sander, een middelenopvangteam, die zijn leuk dat ik met het vliegtuig ergens naar een spa ofzo.

00:04:30 skiën en dat soort dingen familieweekend met een hele hoop mensen en ik heb een paar jaar door de GGZ en

00:04:40 John Franklin South 63. Kijk, we hebben het lukke verbonden.

00:04:50 Ik denk dat we terugkomen.

00:04:55 Geen er maar van.

00:05:00 Dat is spiritueel zo natuurlijk, ik weet niet wat je aan het doen zei.

00:05:15 Dat is ook lastig, ik maak hoe je er zelf op een auto of zo lijkt.

00:05:21 Ik zou het blijven zeggen dat ik een loopboer ben, maar ik ben niet een loopboer.

00:05:36 And

00:05:40 Het laatste stukje daar lezen, wat een beetje zwart-wit vervaagd is, is een Gradient.

00:05:46 Zuid-Afrikaanse boeren krijgen vrijwel...

00:05:50 Geen overheidssubsidies en moeten.

00:05:57 We wilden hier in Nederland geen CO2 hebben.

00:06:00 Het stort, vlees, vee teelt, zeg maar, letterlijk queer, mag niet meer bijna.

00:06:10 Boeren worden onderdrukt en uitgebuit in Nederland dan, de boeren zeg maar weet je wel, met kavels.

00:06:20 ...kadastres enzo. Niet over jullie AirBnB-Ijburg-neuk-experience.

00:06:26 Gewoon, ik heb het over Nederland op reet, hè.

00:06:30 We waren hier zelf voorzien, jaren geleden.

00:06:36 En dan heb ik het over wij als in de Nederlandse bevolking.

00:06:43 En nu hebben jullie koetjes gemaakt van letterlijk elk aantrekkelijk neukobject.

00:06:50 gewoon uiterlijk, esthetisch, goede geene man en vrouw en daar hebben jullie teams mee gemaakt.

00:07:10 van het Nederlands verborgen.

00:07:20 worden uitgewerkt en die werken. Weet je wel, boershoekverhaal, wat dan ook, omdat hoeveel

00:07:28 quick hookups, zoals in...

00:07:30 Nijburgen en Amsterdam West en in die tussentijd, hebben ze daar, in Nederland gewoon.

00:07:41 Gewoon de boeren, zeg maar, weet je wel, die GMO's baaien enzovoort.

00:07:50 vanuit je moestuin. Ik denk niet dat je heel eibeurdig kan eten van die moestuin hiernaast.

00:08:05 Ik wil er wel doorgaan en dan school ik jullie letterlijk vanuit mijn eigen.

00:08:10 kennis en dan wordt dat bijna voor me gezegd op een heel voorzichtig manier zonder dat ik

00:08:18 daadwerkelijk geen visite plek.

00:08:34 Obrigado.

00:08:54 I've got a dog on my command.

00:08:58 That's it.

00:09:01 SpaceX

00:09:03 op school krijgen

00:09:10 verplichte wijze Afrikaans, maar hij heeft aangegeven dat er destijds weinig zin voor

00:09:15 te vinden en hij gebruikte vandaag de dag nauwelijks opnieuw.

00:09:26 Kijk, je moet het daar eindelijk als afkomstig aan Engels.

00:09:30 Engelstalig gezin, Engelstalig gezin uit hogere klassen.

00:11:50 Hij vindt er niet toch, Jetske, alstrem.

00:12:00 We are MIT, you're a fan.

00:12:10 Maar ja, als ik zin ben, wordt het gemakkelijker gezien.

00:12:17 Waarom ik mijn teken draai...

00:12:20 Yeah, proceed.

00:12:21 Talk to secret.

00:12:26 Come on.

00:12:30 Das sind andere, also da kann man andere, das ist eine andere Geschichte.

00:12:40 En ook mensen van de Islam en de verschillende huidskleur.

00:12:46 Niet mijn probleem.

00:12:50 Ehm, waar is dat smakelijk?

00:12:52 Ja.

00:12:53 Kom.

00:13:55 bij de eerste ca letterlijk allemaal met jullie regenboog korno enzovoort

00:14:00 Over de week ging ik zielig naar Pathé bij Leidseplein, City, een film of iets.

00:14:10 Hier dan, over katholieken en protestanten.

00:14:20 Wacht even kijken, hoe is mijn pocketuniverse ook reingedeld?

00:14:30 Ja, het klinkt allemaal super, dat weet je wel, maar...

00:14:43 Auf Beiberau und Sonderkost.

00:14:45 Er ist ein Wettbewerb und eine gute Fliege.

00:14:50 Hij deed het, want ik was een beetje poesy enzovoort, maar hij stond met Rubber Haber.

00:15:00 Ik pop een stuk metaal met kruisjes van sterretjes erin.

00:15:05 Sterretjes waren toen echt 30 cent of 20 cent per pakje ofzo.

00:15:10 van 10, dat je dan hier wel afstekend met veilig vuurwerk bij autonome enzovoort.

00:15:15 En die houdt dus een mentale buis.

00:15:20 VVC bijis, maar dan van alubimium.

00:15:24 Met krijt erin.

00:15:26 En die sloeg hem gewoon zo om, gebogen.

00:15:11 It doesn't pull a light, just take a ride and invite it.

00:15:20 Be gracious. I think the explanation is well overdue. Damn right it is. What is all this?

00:15:30 What are you guys up to, people sneaking in and out of here at all hours of the day and night?

00:15:34 Don't be quiet, little girl.

00:15:37 Let's get down to business.

00:15:41 I'm running out of time, and my guilt here is now healthy enough to carry on, carry on.

00:15:51 I don't know what you people do out here, but I just want to get on with my life.

00:15:55 That's not very grateful.

00:15:57 Aren't you the least bit angry at the people who left you to die?

00:16:00 All right, angle close.

00:16:10 criminals that operate above the law nobody can touch it why you weren't

00:16:52 Devon, I gotta get on with my own life.

00:16:54 You wouldn't have a life if we hadn't brought you here.

00:16:56 Remember, there are still people who will kill you if they find out you're alive.

00:17:00 I'm legally dead, remember?

00:17:03 Devon, I don't even know me with this face.

00:17:05 Now, what's all this about my car?

00:17:07 Your resemblance between that car and your...

00:17:27 It's just a new paint job.

00:17:28 It feels like babysitting.

00:17:40 it into the molecular structure of a new substance. You mean, it's not metal, and it's not fiberglass, excuse me.

00:17:50 Here, strike the surface as hard as you can find there, but I'm not going to...

00:18:00 You have my car, it's beautiful.

00:18:10 Don't just stand there with your mouth open.

00:18:22 Welcome aboard the night 2000. Damn right.

00:18:30 What is all this? What are you guys up to, people sneaking in and out of here at all hours, but day and night?

00:18:36 Just talk.

00:19:01 Yeah, no.

00:19:14 Yeah.

00:19:31 There's a seat, huh?

00:19:50 Oh, shit.

00:20:02 It does not exist.

00:20:10 C'est toujours le plus haut.

00:20:20 Thank you.

00:25:54 That's the design of the set.

00:26:01 That was their program.

00:26:08 Maybe the compounding patient...

00:26:10 I thought, sir, maybe it was his employer's wish to keep those that are scared to laugh.

00:26:14 You could even say that the cheap and hand-daw help the compound who made you by destroying...

00:26:20 In hopes that anybody should be on the wall, stars are raised across the earth, following the resonance cascade, but then again, it is believed that there is nothing...

00:26:30 Back.

00:26:33 I don't know how to put a car on there.

00:26:36 Go on, man.

00:26:40 Das war ein Erster-Incident in einem 7-Hour-Born und Follower.

00:26:43 Das ist ein Kopfbund-Würfelder.

00:26:45 Das ist nicht die Zeit.

00:26:50 It is safe to say that this conflict caused without the...

00:27:00 The appearance and a hue from the resistance and a full-on battle between the belligerents erupted in an event was the return of the freedom.

00:27:20 Kurtz is the court prize of every victim actor

00:27:27 who would look for a number of people.

00:27:40 Just as the explosion started, G-Man stepped in at arm in order to get Golden up safely while most likely Lee died in the explosion. Strange, isn't it?

00:27:50 Why one would save a girl from the total destruction of one place only to leave...

00:28:00 Great asset in assisting free of the destruction of Plantation.

00:28:07 Perhaps the GMAT has accomplished from time to time.

00:28:12 That's good.

00:28:21 I was informed during the time freeze that he would be placed in stasis again while the

00:28:26 double sum offers...

00:28:31 It's G mate, they say everything.

00:28:38 They do.

00:28:42 A group of Votagots appeared until the Votagots brought them away.

00:28:45 It was apparent at that point that the Votagots could enter the G-man's realm...

00:28:50 I imagine that the GMAT was not happy at all, but it was probably taken by surprise

00:28:55 and how the Vortigods were able to rescue Freeman from the GMAT's grip.

00:29:01 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 13, 14, 14, 14, 15, 16, 16, 17, 17, 18, 18, 19, 19, 19, 20, 20, 21, 21, 22, 21, 22, 22, 22

00:30:41 Oh, this is okay, man.

00:30:52 All of that power could be limited to making VD outstaff.

00:31:00 Perhaps the G-Man has the one power that he is able to use seen as though he abides by unknown rules and restrictions.

00:31:05 This may be how the G-Man is able to manipulate so much without making too many...

00:31:13 He allows his presence.

00:31:16 I don't ever think in his abilities and that he can.

00:31:21 Maybe he just sees no reason.

00:31:32 From his brief shock, he informed Gordon Freeman that it was the G-Man, or I'm a mutual friend as he called him, that delivered the sample GG3A.

00:31:40 the exact same words that Alex just said to him.

00:31:45 This to some extent indicates that the G-Man caused a resonance cascade that would eventually...

00:31:50 ...should it lead to the Khanban Empire invading...

00:31:52 ...create such an event that the man wanted Earth to...

00:32:01 We're taking Dan and his employers really wanted, and we're more accelerated for our rest.

00:32:10 to the right people.

00:32:11 Eli Vance believed that the GMAT warning was regarded

00:32:14 the Borealis.

00:32:15 And after the science research ship

00:32:17 that mysteriously disappeared.

00:32:21 Powerful and very interesting.

00:32:23 Very much.

00:32:25 Silicone range.

00:32:30 and something like that would be able to combat and overwhelm.

00:32:35 You see the resistance happening to the Super Bowl.

00:32:40 The rocket launch was a success, and thus the pole was leading the combat forces

00:32:47 stranded there. Eli Vance seemed to do a more...

00:32:51 The likes of Gordon as he intended to pass on some information, probably all this information could be passed on, he and I was...

00:33:00 Wat zei hij tegen mij op de Krokerstraat 43 in Krokerwilbeek toen?

00:33:12 was this morning for analysis the advisor coming to eliminate eli who can say about exactly the

00:33:18 the GMAT scripting statements.

00:33:20 Wir sehen uns dann auch wieder an, wenn wir noch mal die Färdkungs-Astruktur sehen.

00:33:27 Die Färdkungs-Astruktur.

00:33:30 For now, all we can do is be vigilant.

00:33:33 And if you ever spot a Caucasian male in a blue suit with a purple tie in a suitcase,

00:33:38 it's probably best that you...

00:33:53 If you accept it.

00:34:00 In the knoop door.

00:34:02 Is it really that time again?

00:34:06 It seems only just.

00:34:10 Kategorieden, architectuur, bouwen enzovoort.

00:34:14 De kamer bijna.

00:34:21 What is there to say about this person? If he is even human. He travels here and there in his blue suit and most of the time with his briefcase.

00:34:30 The contents of that case are almost as mysterious as the man himself.

00:34:34 The G-Man appears to be a human male with dark brown hair, green eyes and has this extreme...

00:34:50 You see, I believe that if the G-Man wanted you to know about him, then you would already be aware of his existence.

00:34:56 If that's true, then you'll know that what I speak is the truth and not...

00:35:01 Hello everyone, I'm Rick B. Graven, and welcome to the story of the G-Man, so sit back and relax, watch, and...

00:35:10 I'll listen to the story of this worldly scene.

00:35:20 The G-Man can be seen by all or only those who he chooses to let their eyes gaze upon him.

00:35:25 Seeing the G-Man though is entirely different to interact him with him.

00:35:30 Thank you for joining us today, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you what we're going to do here, we're going to show you

00:35:40 He is often referred to as the ominous entertainment program as both his name and his behavior implies.

00:35:47 The G-Man has never identified himself.

00:35:51 But he is an actor entirely on his own car, as he apparently works for those he describes as his employers.

00:35:58 He wields power beyond...

00:36:02 to be able to teleport itself and others to, well, assistive technology.

00:36:11 Is that question that this anomaly is extremely dangerous, that despite helping those in need from time to time, it should be...

00:36:20 It must be strong in all of you, so I've been wanting to install an input-based page.

00:36:27 Yes, it's cool.

00:36:30 It's just familiar with the story of the Mishibu.

00:36:34 Great!

00:36:40 Time and space are nonexistent. For all we know, the G-Man may have always been there since the beginning, but his story to us was now as before the Black Mesa Institute.

00:36:50 The United States Marine assigned to the Hazardous Environment Combat Unit from the San Diego military base in Arizona

00:36:56 and was one of the men sent to the plant for a research facility.

00:37:01 He apparently spotted an individual from Manchester's destruction of the GMAT during his trade.

00:37:06 It is believed that the GMAT took an interesting Corral Shepard.

00:37:11 ...accelerated for unknown reasons. However, some of those reasons may have come to light during the Black Nation incident by Shepard, amongst a few other Marines, a Black Nation person.

00:37:20 They'll survive the internet as happening now.

00:37:23 Accounts of what happened after the incident and who exactly escaped our faith are no longer relevant thanks to the combat.

00:37:30 during the seven hour war.

00:37:32 It is unknown if Sheppard was able to escape

00:37:34 like Mesa, but if I were to take a guess,

00:37:36 I'd say that the G-Man has it in stasis.

00:37:39 You see, the G-Man...

00:37:40 tends to take an interest in serving individuals and then proceeds to teleport them to God knows

00:37:45 where and offer their services to the highest bidder.

00:37:50 to be in the hands of the G-man could be seen as nothing more than his personal mercy

00:37:54 whose contracts are open to those willing to pay for it

00:37:57 or in the case of the fabled Gordon Freeman

00:38:01 E-Man was spotted throughout the Black Mesa Research Facility during the incident and his role in that event is still unclear, but my gut tells me otherwise.

00:38:10 I would say that the G-Man knew the events of the Black Mesa incident were going to take place and indeed wanted them to, so that his employers could seize control of ZEN, the border world located.

00:38:20 I would be surprised if the G-Man hadn't already known that Gordon Freeman would have met in Niamh.

00:38:26 But despite that thought, the G-Man took keen interest in Gordon Freeman.

00:38:32 He's not surprised, really, that Rodham suddenly appeared out of the blue 20 years later in City 17, he may have had him in stasis for all that.

00:38:40 The G-Man was there when Sen was captured and the Nile was defeated, where he then offered God a free man job.

00:38:47 The specifications of that job would be later revealed in city senate.

00:38:50 During the uprising, the Scroton Freeman with the help of the rebels and most likely the G-Man eventually brought down the citadel and the combat forces occupying the city and the surrounding.

00:39:02 or his employers knew or at least anticipated that the compound would invade and take control

00:39:07 of earth, which is why he wanted God.

00:39:11 I'm good on him.

00:39:12 I'm good.

00:39:13 I'm good.

00:39:14 I'm good.

00:39:15 I'm good.

00:39:16 I'm good.

00:39:17 I'm good.

00:39:18 I'm good.

00:39:19 I'm good.

00:39:19 I'm good.

00:39:19 I'm good.

00:39:20 During the uprising, Gordon won't know only during the Black-based incident.

00:39:24 It is likely that the G-Man gave Gordon the illusion of free choice.

00:39:28 And take it or leave it situated.

00:39:30 when a client in such an infusionly has dire consequences.

00:39:34 What dangerous and mysterious things about the G-Man

00:39:36 is his tendency to both help and hinder certain people.

00:39:42 I don't know, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know.

00:39:50 There are a little bit of things that are going to be in the cellar.

00:40:00 Before the death of Eli Mansfield, after the battle of White Forest, Eli stated that the sample was delivered to Blood Nessa by none other than Ajima himself, at some point during the blood...

00:40:10 The best day it's sloping

00:40:14 And then...

00:40:16 ...reactivated it.

00:40:20 The only thing that we have most of that then is the noise that blows us around the game carry, but this is worse GMAT motives get even longer.

00:40:30 and source engine and brain curating the patient, you can have all of their own tool for it.

00:40:36 I say it.

00:40:40 The phone comes in right there for us, so I think we're not going to do that.

00:40:50 I've got a whole thing.

00:41:00 You can't even say that the G-man has got his employees trying to stop the combat in here, you've had a straight black air set.

00:41:07 In hopes that it may shoot down the portal, storms that reason.

00:41:10 cross-earth, following the resonance cascade, but then again, peers believe that there was

00:41:14 nothing the human race could have done to stop the Combine and Wai from dominating the world.

00:41:21 The human and non-gawai mansion are his mysterious employers.

00:41:25 20 years after the Black Mesa incident and the 7-hour war had followed, the event...

00:41:30 Uprising began, which is an ongoing for human and volte got resistance and a confidant impact.

00:41:36 It is safe to say that this conflict would not change course with...

00:41:40 ...of the team, one human from Stasis, and placed him in City 17.

00:41:45 His reappearance set a huge morale boost around the resistance and a full...

00:41:51 super important

00:41:53 yeah

00:41:55 the resistance later mobilised and the battle for city 17 was in full effect leading to the eventual

00:42:00 The graffiti sketch, Google Anti-Graffiti graffiti, Asimus de Andromaya of the Holocaust of Iren.

00:42:10 F***ing no-taped and uh, they've looked exactly a company that you've been in and uh, I don't

00:42:17 know what that happened.

00:42:20 That's right, that's okay, that was not what the G-Man wanted, just as it was so conspiracy.

00:42:31 safely, while most likely leaving Alex to die in the explosion, strange isn't it?

00:42:36 Why one would save a girl from the total destruction of one place?

00:42:40 ...and in practically the same plan, the GMAT may have anticipated that Alex would be a great asset in Assistant Freeman on his mission...

00:42:50 ...contracts have been in place before the destruction of Planease,

00:42:53 ...planned to be members of the contract from town to town,

00:42:56 ...but I'm sure that there's more to it that he and his employers have a plan for...

00:43:01 humans are nothing but pawns on a chessboard for the g-man and those people like gordon and adrian

00:43:07 no way gordon was informed during the term

00:43:10 Placed in stasis again while the G-Man passes over some of those regarding services.

00:43:15 But here is where the tale gets really interesting.

00:43:18 This G-Man, this is Phenomeny.

00:00:01 To essentially save the day, before the G-men extracted Gordon and left Alex to perish,

00:00:07 the gods appeared.

00:00:13 to the G-man's realm and interfere with it, I was not happy at all. I was burned by-

00:00:20 surprise at how the Vortigods were able to rescue Freeman from the G-man's grip.

00:00:24 I can't imagine how long the G-man had gone.

00:00:50 He travels here and there in his blue suit, and most of the time, we're as mysterious as the man himself.

00:01:06 to have money, humans, existence.

00:01:10 First time.

00:01:20 where it is existing.

00:01:31 Welcome to the store.

00:01:41 But then again, it is unknown if the G-Man can be seen by all or only those who he chooses to let.

00:01:52 He is greatly deceiving. He may appear to be an ordinary businessman.

00:02:00 I can assure you that is not the case.

00:02:02 For what the G-Man considers business, we consider unnatural events.

00:02:06 He is often referred to as the ominous interdimensional...

00:02:14 himself beyond informing those who he meets that he isn't acting entirely on his own accord.

00:02:20 As he apparently works for those he describes as his employers, he wields power beyond that of a human, presumed to be able to teleport himself and others too.

00:02:41 and despite helping those in need for this a threat

00:02:50 The Votagotons of wise alien species have been known to enter the G-man's realm and temporarily hidden into rumors.

00:02:57 That story is probably a once longer one than before.

00:03:00 I know. I would argue that the G-Man is not entirely human and that in his realm, wherever it may be, time and space are in existence.

00:03:07 For all we know, the G-Man may have always...

00:03:10 I've been there since the beginning, but the story to us starts before the incident.

00:03:14 You're ready.

00:03:15 Trailing.

00:03:20 ...unit from the San Tegro military base in Arizona, was one of the men sent to the Black Mesa research facility on the classified mission.

00:03:27 He apparently spotted an individual who matches the description.

00:03:30 It is believed that the G-Man took an intruder as his training was already for unknown reasons.

00:03:38 However, some of those reasons...

00:03:41 The Black Mesa incident where Shepard, amongst a few other Marines of Black Mesa personnel,

00:03:45 survived the alien invasion that was happening there.

00:03:48 Although accounts of what happened...

00:03:52 are vague and thanks to the comp during the 7 hour walk. It is unknown if Shepard was able to escape like

00:04:01 If you take a guess, I'd say that the GMAT has him in stasis.

00:04:04 You see, the GMAT tends to take an interest in certain individuals and then proceeds to telepath them.

00:04:16 The G-Man could be seen as nothing more than his personal mercenaries.

00:04:20 contracts are open to those willing to pay for it or in the case of the fabled gun freeman open

00:04:25 g-man was spotted throughout the Black Mesa research facility

00:04:30 the incident and his role in that event is still unclear but my

00:04:33 i would say that the g-man knew the events of the black maca incident were going to take place

00:04:40 He indeed wanted them to, so that his employers could seize control of Zen, the border world located in the multiverse.

00:04:46 I would be surprised if the G-Men hadn't already known-

00:04:54 Ik zie hier nog een baumhoofje, dat is precies voor David.

00:05:00 die hebben aangekocht en gaf die roderen je leeg vanmiddag dat zijn het conference call was

00:05:10 met wie, beetje Esme, Mark Debbie, de Bij, Database, de Queen.

00:05:20 GreenBee, verzorging en manager hier ook van de ADS van PockySand van dit weekend.

00:05:30 Cerebro, David Roman, Sasha Gritska,

00:05:34 we sent out the most for the Oculus Quest class in the summer.

00:05:40 It's not a record, it's not a record, it's not a record, it's not a record, it's not a record, it's not a record, it's not a record.

00:05:50 Playstation account, die aanschaffen enzovoort, GDPR data enzovoort.

00:06:00 What do you think you're going to approve this, Sam?

00:06:09 You've ever...

00:06:10 We hebben tijd en het mag geen tijd meer open.

00:01:20 He's very cool.

00:01:23 Oh good.

00:01:30 Once in, he hauled up dozens of his waiting French comrades.

00:01:33 Chaos ensued.

00:01:34 English defenders scanned.

00:01:36 The siege was over.

00:01:40 Thousands of tons of stone, the latest in defensive architecture, and yet no one had thought to secure the toilet, and so the vulnerability.

00:01:50 Go for it, go for it, go for it, go for it, go for it, go for it, go for it, go for it, go for it.

00:02:01 They guard information, not territory or treasure.

00:02:04 But they still contain vulnerabilities.

00:02:07 Architectural flaws are overlooked by their creator.

00:02:10 And just like it were before, Peter Moshi said today, hackers, spies, cybercriminals are searching for undiscovered ways to gain access.

00:02:20 So what do you do if you're responsible for protecting the accounts, data centers and cloud systems that line up by people around the world?

00:02:31 And then Ellie, the businessman, who is with his BSL porno, who is in the house for the day.

00:02:40 It's a group by the world, the world Maracara, in the branches of this.

00:02:47 And I read the name of him.

00:02:50 Okay, I think that it's a great thing to see.

00:02:52 It's a great thing.

00:02:56 Ready?

00:02:59 That's very, very beautiful.

00:03:00 Eh, eh, eh,

00:03:20 Weet je dat zo'n nageschil?

00:03:26 Geen die al ook die ik zeg maar van de stampbonus

00:03:31 Much of the internet, that seems like a lot of extra work.

00:03:36 But to make sure Google's users are safe...

00:03:40 necessary. After all, people don't just use Google's apps and cloud services. They use

00:03:45 hundreds of devices, tools, websites, and operating systems. All different.

00:03:50 Just as the Internet's founders intended.

00:03:53 They made a decision very early on to open source standards on which computers...

00:04:00 and ultimately webwages would communicate with one another.

00:04:04 That was a conscious decision to have an open internet.

00:04:08 You can place the...

00:04:10 Adrian, Natasha, uh, the fate of that decision to allow everyone to participate in anything.

00:04:20 My aunt Natasha from Anneke de Friese

00:04:22 But this interconnected world comes at a price

00:04:24 Today, a vulnerability in any part of the system

00:04:26 threatens every part of the system

00:04:28 Anneke de Friese

00:04:30 Een ding gaf mij letterlijk die capacitive touch, waar ik ook met mijn duim, met mijn vinger afdruk.

00:04:40 On my telephone, in my pocket, I say that I am proud to be here from the DC.

00:04:50 Miley came through, Miley fell, Miley and I'm because they can keep you face-to-feet,

00:04:58 are going through the eye.

00:05:00 One of the most dependent platforms, computers, software packages, before they're abused, they

00:05:07 opened in Japan.

00:05:08 It's harder to defend.

00:05:09 I don't know.

00:05:10 We're going to dedicate a team to finding the hardest to find vulnerabilities.

00:05:15 Responsible for this team of...

00:05:20 She oversees Google's Project Zero, and in a former life, was a hacker herself.

00:05:28 I think I identified at some point.

00:05:30 As a hacker, I still am in spirit, but I also think of myself as more hacker than a hacker.

00:05:37 See you, Canada, Recton of Online, we can travel in Canada.

00:05:40 And how we're going to do it on Instagram, on Facebook, on Instagram, on Facebook, on Instagram, on Instagram, on Instagram

00:05:50 at it through a hack romance and trying to rigorously, ruthlessly break it and then fix it.

00:06:00 ...and prevent problems from...

00:06:03 That's right.

00:06:03 They can fix it.

00:06:04 Project Zero's team hackers.

00:06:06 It makes the internet safer by trying to...

00:06:08 My own is a game of...

00:06:10 with the fictional garage and all the pictures on this stuff.

00:06:15 And the link to...

00:06:18 ...picture of smell.

00:06:20 On the Turkish line, we have the 8th, 5th, 5th, 5

00:08:20 I'm going to put it on the top of the top of the top of the top of the top of the top of the top of the top of the top.

00:08:30 If you are going to take the drive

00:08:32 The drive

00:08:34 Very good

00:08:36 Only same opinion

00:08:38 Look

00:08:40 What was that, dude?

00:08:44 It's quite good.

00:08:48 Turn it up again.

00:08:50 If you want to hack strange things, there's a lot of stuff out there.

00:08:53 What?

00:08:54 And that's just what she does.

00:08:56 She looks for dangerous vulnerabilities in the apps used by billions of dollars.

00:09:00 Ik heb voor meer dan 10 jaar gelukkig gevonden.

00:09:04 En je begint een gevoel...

00:09:06 Ligtwaardig toch, Anne Patrokka?

00:09:09 Daarom ook bijna.

00:09:10 met de chassery cage en dan weer gekukt worden, oh wacht toch, ja dat was twee dagen geleden in de avond, dat ze die

00:09:20 En je dan meerdere keren stond aan te bellen met die jonge beiden.

00:09:26 Weet je, en dan koppel aan de door Franklis, daar staat 6-3.

00:09:30 En de dropbox en alle gebeurtenissen daar.

00:09:35 Marktplaats toch? Go to market.

00:09:40 the nature of hacking and finding vulnerabilities. Almost everything you try doesn't work, but

00:09:45 the odd thing does. In this case, the odd thing led to an important discovery.

00:09:50 to force someone's phone to start transmitting video and audio without them even knowing.

00:09:55 Here's how the hack actually works. Natalie sends a chunk of data known as a package.

00:10:00 Okay, let's see the reports are now on AliExpress.

00:10:04 It's available for...

00:10:06 ...under the rogue-seeker to do anything.

00:10:10 Oh, yeah.

00:10:11 Let's try this company.

00:10:12 Mark, this is what I wish I've been.

00:10:15 One of the thousands of combinations have been driving.

00:10:18 Backs like a key.

00:10:20 Good bye, good bye,

good bye, good bye, good bye,

00:12:31 I was going to go online.

00:12:32 Can I just walk by the way?

00:12:34 I'm going to go online.

00:12:35 You mean about the projects we're involved?

00:12:36 Well, this kind of reveal doesn't have the process.

00:12:38 Okay, kidding.

00:12:40 What are you doing?

00:12:42 Good stuff.

00:12:44 Powerful motivators.

00:12:46 Powerful motivators.

00:12:48 We motivated them.

00:12:53 all of this is that we use flus when things are coming to fix quickly.

00:13:00 Mãe, que eu não tá a poucas...

00:13:06 ...eis...

00:13:08 ...fine resistência.

00:13:10 We were able to reverse the exploits, reverse out the vulnerabilities.

00:13:20 Chat history, photos, GPS locations, your name is the car, you was getting the car, we recorded those issues to the company.

00:13:30 the company that makes that device

00:13:33 I think I have pushed out of things within 7 days

00:13:36 I think Alec Bersone is in a studio

00:13:39 I think they are

00:13:40 The exploits that were discovered went back many generations of this particular population.

00:13:50 Ik weet het niet.

00:13:52 We hebben een werkstudio van Antje Klootwijk en Anneke de Vries en Kees Lootwijk moesten de Google Mini.

00:14:00 minority in China and make the Google

00:14:02 capability like this

00:14:04 smart

00:14:08 what we do

00:14:10 and it's not just you know playing around with code or dealing with

00:14:14 and I was kind of a derivation deviation and I was doing that in the Aliexpress

00:14:20 There are real people getting attacked by bugs like this, and it's important that we do something better.

00:14:25 And the low-peer-to-die are made to graft.

00:14:28 The exploit being used to surveil the weak...

00:14:30 It was a major find, but it was just one of many.

00:14:34 To date, Project Zero has found over the 1800s.

00:14:37 Zero day-to-day workers, everything from operating systems.

00:14:40 Oh, that's a good, uh, for quite.

00:14:47 So much.

00:14:50 But every day you code is written, wraps are launched, and here that we all depend on is a little more interconnected and a little more vulnerable.

00:15:00 Is my job getting harder every year?

00:15:01 Well, I hope so, because otherwise, we're probably not doing it well.

00:15:05 Hey, Bala, I think I'm working this way.

00:15:07 Financial attackers kind of hard.

00:15:10 Pizarra, tempo, parais, lucro, acha mesmo que está na maior parte de crédito.

00:15:20 I think it's important that everyone is able to use computers in a way.

00:15:30 Oh, dan zetten we gewoon alleen één ventilator aan die we gekocht hadden die geen BTU had.

00:15:40 En dan is de achtergrond geluid weg.

00:15:43 Hint. Chirp.

00:15:46 Inverse, wolkenwindings.

00:15:49 Twi-direction.

00:15:50 Oh, I don't know what the hell was fucking years ago.

00:15:56 But you're the genius.

00:15:58 You're the genius.

00:16:01 harm other people and profit and I usually call it hackers and we have a lot of hackers who do their work to make

00:16:10 software and systems more secure, and I call those folks...

00:16:15 Uh, Wooshes?

00:16:18 Sleets.

00:16:20 Well, you know, we'll start with the Gregarious Games 101 and 404 that found The World Was Ours.

00:16:30 Computer Vision, Contrast, Mr. Rogers, oh kak, past story, past story, past story.

00:16:40 We sold all our children and home memories from the past.

00:16:50 Steeds een laagje doorgeven, multilevel marketing scheme.

00:16:54 Azenwit slender een market.

00:16:57 Ik wist dus dat je het niet zou uitstuiten, om bij die pomp ik...

00:17:00 all around. Almost on the grifter. And grafting. Grift drive, damage, games, GG, source

00:17:10 Corrupt Valve, Steam, Neural Interfaces, Chip in m'n hoofd, sociale... Nee, maatschappelijke verloorgaans.

00:17:20 van Huishoorst Roest, IMEI, GTC daarom, daarna een crisis team die maakt.

00:17:30 met een zorgmachtiging de eerste CH in stuur. Ego, egoistisch. Ik heb eigenlijk...

00:17:40 per seconde en muur seconde van de dag en nacht.

00:17:44 Nul painting ermee.

00:17:47 Met jullie allemaal levend.

00:17:50 Dus dit helpt niet echt, blijf lachen, ik hoor niet aan je deur hoor, is maar hier.

00:00:26 Think about your life along six dimensions.

00:00:30 The goal is this, you're going to take care of yourself.

00:00:32 You're going to have a life in three years that justifies its suffering.

00:00:35 That's the goal.

00:00:36 So you can invent the damn life, but you have to think what you would be satisfied with.

00:00:40 Toch een blauwtje loopt, wat ik klaar voor. Toch is de kunde.

00:00:44 Blauwtje en kou. In de kou staan. Blue bond.

00:00:49 Doodschap.

00:00:50 How are you going to handle drugs and alcohol and other temptations like that?

00:00:53 How are you going to keep yourself mentally and physically healthy?

00:00:56 These are open questions like you get to answer.

00:00:59 Gotcha.

00:01:01 Dat is super goed, maar ik vind dat ik nu wat jij voor weet wie ze, dat ik al mee ga aflopen voor, ja, ik vind het ook niet.

00:01:10 your bad habits and your resentment and your bitterness and all of that your procrastination

00:01:14 gets completely out of hand and you order down and you're in your own personal version of hell

00:01:18 in three to five years

00:01:20 What does that look like? Everyone knows that.

00:01:23 Everyone knows that.

00:01:25 If I keep going on this dark path, this is where I'll end up.

00:01:29 Then you've got...

00:01:30 A little hell outlined for yourself to run away from?

00:01:32 Yeah, probably a little hell outlined for yourself to run towards, and then you're motivated.

00:01:38 Because sometimes, you know, you're just...

00:01:40 I would like a good thing to have.

00:01:41 It's like, yeah, but, you know, I'd like to drink half a cup of whiskey tonight, too.

00:01:45 But, so which is it going to be?

00:01:48 Well, just be a little.

00:01:50 Thank you very much for having me.

00:02:00 Kijk, dit verdedigen we daar.

00:02:04 Eline zien we...

00:02:07 die daar nog gisteren.

00:02:10 Ja, nu eerst gisteren, want het is naar het water.

00:02:14 Dan nog Jessica zegt, kijk, u heeft het verliezen.

00:02:20 What the hell, you, you haven't had your eyes over.

00:02:24 We have, uh, we have for all our talk here.

00:02:27 This is, uh, a little bit.

00:02:29 My own ideal.

00:02:30 ...zij goed.

00:02:32 En...

00:02:34 ...je is gekoordigd.

00:02:36 Toch?

00:02:38 ...voor...

00:02:40 Appeltaak, ik wil je een volgende appeltaakpuntje, toch?

00:02:44 Zijn we competitief aan het doen?

00:02:46 Of zijn jullie letterlijk suicidaal aan het flexen?

00:02:50 Het wordt een mooie familie, ik hoef het niet zeg maar te winnen.

00:02:54 Ik ben er aan.

00:03:00 You want to lay your life out so that...

00:00:01 to not be bitter and to work for your best interests and for the interests of everyone else

00:00:06 that would be lovely and i think it's attainable and one of the things

00:00:10 I've also been telling people, informing people about this idea that life isn't a game.

00:00:16 It's a series of games, and the right ethic is...

00:00:20 the winner of the series of games, and part of that meets you while you have to learn how

00:00:24 to be a good loser.

00:00:30 Let's say that you can pick your level of competition in life to some degree.

00:00:35 Okay, so let's say you pick a level of competition where you're always winning.

00:00:38 It's like, well, all that means is you can...

00:00:40 their own level of competition. To be a winner, you want to be disciplined. You want to know

00:00:44 what you're doing, and then you want to be on the edge where your skills are being developed.

00:00:48 And if you're going to be on the edge where...

00:00:50 your skills are going to be developed, you're at a place where loss, where losing is always

00:00:55 a possibility, because otherwise you're not pushing yourself beyond your current...

00:01:00 capacity. One of the things that I've outlined in 12 Rules for Life is a theory of meaning,

00:01:06 because meaning, as far as I'm concerned, the sense of meaningful engagement...

00:01:11 malevolence and suffering essentially because you want to have a life that's so engaging that you

00:01:15 think despite the fact that i'm limited and that we're mortal and that life

00:01:20 tragedy and there's evil in the world despite all that this is worth doing

00:01:24 life is suffering and betrayal in many senses

00:01:30 the world but you can adopt a way of traversing through life that is more powerful than the

00:01:36 tragedies of the level.

00:01:40 Alle goeie portafilmers van de WD-10-telefoon.

00:01:50 Oh, het filmen iedereen desolated wel, van de Command & Kanker serie.

00:01:57 De echte digitale 01.

00:02:00 En wie het waren, die dat regelden.

00:02:04 Nou, dat is less defensible en makkelijker te achterhalen denk ik dan.

00:02:10 Ich verlobte Bilder, ja.

00:02:12 Das ist einfach.

00:02:55 Obrigado.

00:03:22 I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part, I'm going to do this part.

00:04:24 Thank you guys, thank you guys.

00:04:30 I love you guys.

00:05:35 come up

00:05:40 Zo nog logisch in het ATZ, M.I.T. toch, reverse quarantine.

00:11:22 Я не знаю, как он, как он, как он

00:14:35 What?

00:14:36 Alone he is but one man, but by convincing others to believe in him...

00:14:40 To follow, to place faith in his words, he could raise an army.

00:14:50 With this method, trust becomes a very limited resource.

00:14:56 His promise of power attracted certain types of people.

00:15:00 Into the fold, and if even for a second he appears as aught but the undying prophet he claims, his followers will begin to question as a-

00:15:10 God bless you.

00:15:23 God's research into the mutagenic properties of Tiberium began in earnest at least as early as the First Tiberium War.

00:15:30 Project Regenesis was headed by the Black Hand and Nod, seeking to use Tiberium to force the next divine stage of human evolution.

00:15:40 I doubt this, I doubt this, I doubt this, I doubt this.

00:15:50 was overseen by the earliest known prototype of Cabal.

00:16:05 Please record to the detention center.

00:16:10 There's simpler intelligence along the lines of GDI's either unit, and severely damaged by an ion cannon strike.

00:16:17 Not yet knowing what kebab...

00:16:20 become these delirious rumblings were considered inconsequent. Utilizing long-lost Soviet

00:16:27 technology, these projects...

00:16:30 or potent fruit by the dawn of the second Tiberium War.

00:16:34 Mutated by Tiberium, enhanced with cybernetics,

00:16:38 the cyborg...

00:16:40 with a result of God's divination experiments spearheaded one formidable cyborg commander

00:16:46 at a later art of the sinister cyborg...

00:16:50 The augmentation was made up for the laws of Project Genesis, and the cyborgs mutated

00:16:57 Flash would prepare in direct...

00:17:00 exposure. Divination procedure allowed Nod to manufacture capable and obedient weapons

00:17:07 from captive civilians and mutants.

00:17:10 According to some heretics, even the dead bolstering are able to challenge GDI at the very height of their power.

00:17:20 concept seeing field use the market of Cain began mass production thus the

00:17:26 prophet concluded he would require an army divorce

00:17:31 of love, hate, fear and regret of both conscience and consciousness a legion that would willingly and unquestionably

00:17:41 his every command. It was in studying the melding of flesh and machine that the cabal

00:17:48 of the world would come.

00:17:50 I want to know what's fully realised.

00:18:00 The technology is without flaw, the human element has gone through with imperfection.

00:18:07 Computer assisted biologically augment...

00:18:10 I don't know how to do that, but I don't know how to do that, but I don't know how to do that.

00:18:17 I don't know how to do that, but I don't know how to do that.

00:18:20 The first one, efficient and callous, it was the perfect mindset.

00:18:32 to find favorable outcomes involved.

00:18:38 Unlike GDI's assistance.

00:18:41 It was more than just soft work.

00:18:44 The brainchild of Cain himself.

00:18:46 Cabal comprised a collection of living human minds.

00:18:50 held in suspension tubes with an underground bunkers and networked together for use as

00:18:54 processors.

00:18:55 An insidious living machine.

00:19:00 he assisted the mutant Tratos in the translation of the Tacitus.

00:19:05 There are those who say that it was this exposure to the Tacitus by which...

00:19:10 Cabal developed his ambition.

00:19:28 Dat is echt kip.

00:19:33 Dat heb ik echt kut gedaan.

00:19:40 Cain however is not an easy man to kill and his body was moved to a suspension tube to recover.

00:19:50 Initiate your reactivation sequence.

00:19:52 The Nod AI was reactivated by Anton Slavik, now de facto acting leader of the Brotherhood.

00:19:58 Generous form.

00:20:01 He would have survived and stepped them in.

00:20:04 He was correct.

00:20:07 From this moment on, Cabal has-

00:20:10 full unfettered access to Kane's mind. Kane was weakened, perhaps as close to

00:20:17 death as he is able to get.

00:20:20 was in control.

00:20:23 Kane's insatiable megalomania.

00:20:26 He had no desire to remain

00:20:27 a mere servant to Nod.

00:20:30 with Kain indisposed. Who's to stop him?

00:20:33 This is Trojus. He's a mutant.

00:20:37 If not, he's the...

00:20:41 in my scope that can translate the passages to you.

00:20:47 Tratos, the leader of the Forgotten Tribes, was un-

00:20:50 GDI protection about the assassination about the GDI let this happen with a loss of

00:21:00 ...and atmospheric Tiberian toxicity reaching fatal levels.

00:21:04 Translation of the Tacitus became GDI's only option.

00:21:08 The Daedalus team...

00:21:10 and I are still convinced that Tacitus is our best approach.

00:21:14 The assassination of Trotters has put us months, if not years, off schedule.

00:21:20 The present rate of Tiberium organic synthesis within a year, maybe less, our atmosphere will be 100% toxic to humans.

00:21:30 What alternative to deciphering his tassels are at our disposal?

00:21:34 Actually, Pa, I have an idea.

00:21:37 You're not gonna like it.

00:21:40 Jerry Baden

00:21:42 What?

00:21:46 Forget it later

00:21:48 The hospital task force tracked down a second

00:21:50 2nd Cabal core to a Nod base in Poland.

00:21:54 Once activated, now integrated into both GDI and Nod command systems.

00:22:00 revealed the location of a missing second segment of the tacitus it was retrieved from

00:22:05 an ancient temple in bolivia considered sacred grounds by a local

00:22:10 ...faction of Tiberian cultists.

00:22:12 ...the inner circle has reached a decision, Slavik.

00:22:20 What is that?

00:22:35 It's a good life

00:22:41 It's great to hear you.

00:22:42 It's easy.

00:22:50 Kabbalah did not forget I was the one who had you, and I could just as easily have you deactivated.

00:22:56 Which you will, Slug!

00:23:00 It cannot stand against love. It cannot...

00:23:02 The evolutionary dead end.

00:23:05 I am the only salvation for the continued...

00:23:11 It is my word

00:23:13 God

00:23:15 Yeah

00:23:17 Yeah

00:23:19 Right

00:23:20 But to my symphony, a culling is at hand to move into the signs of your own extinction.

00:23:30 Not Cyborg Army was built for their unquestioning loyalty, but it was Cabal

00:23:40 the commands from GDI and decapitated not

00:23:50 by killing Cain's inner circle with Omislavik surviving and so began the meat grinder having declared war

00:24:00 On the two world powers, he began the construction of a cool army, converting living human flesh into legions of cyborgs.

00:24:10 GDI not mutant civilian Kabbalah wasn't picky in humanity's darkest hour GDI

00:24:21 to an alliance to put down the rogue AI.

00:24:25 The only other time the two factions would work together

00:24:27 would be during the screen invasion of Earth.

00:24:30 The core was protected by the modified obelisk and the obelisk of darkness and by the world's final assembly, the core.

00:24:41 The combined forces, an unexpected development, were able to destroy the core and defeat the constructs, with GDI reclaimed.

00:24:50 The two statements have somehow worked.

00:24:54 Keep in mind we're dealing with complete unknowns regarding the Tacitus.

00:24:58 I don't know...

00:25:00 If you sit here, you can put everything in your pocket.

00:25:04 Yeah, then she goes...

00:25:06 We found the Rosetta Stone!

00:25:08 Who doesn't want to call?

00:25:10 His mind was damaged, but it was still networks with Cain, and Cain survived.

00:25:17 He always does.

00:25:20 My vision has commutated, my, my, your, my plans have followed a path unpredicted by the new human arm and GDI, your, my,

00:25:30 Dat vroegen met een programmaatje op een computer op de net.

00:25:40 Bad Gambit zo'n mooie flairkelelel

00:27:21 We may never fully understand Gamal's motives.

00:27:25 Was the extinction of humanity really all there was to it?

00:27:30 Was it as simple as a rogue AI that went mad without its handler to control it?

00:27:34 And why did Cabal require the Tacitus?

00:27:38 For what purpose was it intended?

00:27:41 how exactly did kane's mind change the ai and more importantly by how much did cabal's

00:27:50 That's what I'm going to do here.

00:27:53 How much of the construct still resides within the Prophet?

00:27:58 I think I'm going to try it again.

00:28:00 He was.

00:28:01 He left away.

00:28:02 Come on, please.

00:28:03 At this back, Olivia Siebel and...

00:28:06 Like Ben Steffan.

00:28:07 Yeah.

00:28:08 And...

00:28:09 Who is it, right?

00:28:10 Yeah, I actually see what we're doing off.

00:28:20 separated by the choices made within.

00:28:24 Albert Einstein is the earliest known individual

00:28:27 to have jumped between lives.

00:28:30 What do you want me to do?

00:28:33 But...

00:28:34 Do you want me to do it?

00:28:36 What do you want me to do?

00:28:38 Yes, I want you to do it.

00:28:40 Traced back to the work of this man, that is all but one.

00:28:50 ...want het gaat om morgen te kijken.

00:28:57 Doe je kijken!

00:28:59 Net, net, net, net.

00:29:00 Slaat wel een best wel fekken.

00:29:02 Ja, ik kan het eruit zien.

00:29:04 Het is wel dit.

00:29:06 Vervolgens de Sovjet...

00:29:10 met die nevel, met Pepper's Ghost, met achter de schermen, wavekites en optics enzo

00:29:17 waar ik met Azemut z'n andere man erbij ben.

00:29:20 The poison in the air.

00:29:22 The poison in the air.

00:29:24 Fighting through the twisted creatures of the shattered desert.

00:29:27 They arrived as a once great...

00:29:32 But Oprah is a fucking special effect.

00:29:36 But somewhere within the temple, it was a good verse.

00:29:40 A shard of a shining bath, they had no choice.

00:29:45 And I was going to make a man, he had to put a bone in your neck.

00:29:50 I don't like that, I don't like that, I don't like that,

00:31:20 Ik dacht dat hij de heerde van de heerde van de heerde van de heerde van de heerde van de heerde van de heerde.

00:31:30 Grondstof, ik weet niet eens hoe hij te fiets zijn, als je het kunt doen met de mooie redgouden sieraden.

00:31:36 Resource. Mutagen.

00:31:39 Ja, dat is.

00:31:40 The calling card.

00:31:42 Through a half a century, the earth was ravaged by Tiberium.

00:31:46 While the global effects initiative and the Brotherhood of Knoll fought for control of...

00:31:50 The crystal is spread across the planet, transforming the surface of the earth into a desolate, alien world.

00:31:57 Welcome back.

00:32:00 in 1995 a meteorite

00:32:10 to Italy. Within days, small green crystals began sprouting from plant-like pods near

00:32:16 the impact, forming the first Tiberium field.

00:32:20 Nearby trees lost their leaves, their bark taking on a fleshier complexion.

00:32:26 Tiberium commonly grew around blossom trees.

00:32:30 which rapidly replenished fields by releasing crystal-laden spores into the air.

00:32:36 And first, the crystals were considered the mere sighting.

00:32:40 Anomaly

00:32:50 Schopen aan houten, toch?

00:32:52 Ja, beetje schillen, beetje dood.

00:32:55 With only a few short years, the invention has become global.

00:32:58 Kijk, jullie kijken dan hoor.

00:33:00 200 areas of the earth affected by Tiberium deposit.

00:33:04 Tiberium appears to be spreading...

00:33:06 I'm going to try my death.

00:33:08 I'm going to try my death.

00:33:10 GDI credits Dr. Ignacio Mubius

00:33:13 Mubius 3

00:33:15 I prefer you to get through the rest of the book

00:33:19 And you always do

00:33:20 Het verantwoordelijk kwijt was dat ik hem wel vaker gegaan.

00:33:25 MC Escher, perspektief, weet je wel, heet dat was kijk met perspektief.

00:33:31 Bitterkut. Ja, bitterkut. Ja, precies.

00:33:35 Ja, wat hebben jullie allemaal gedaan tegen de jongens?

00:33:40 Dat weet ik allemaal niet.

00:33:50 Defence Initiative in International Peacekeeping Division.

00:34:00 was allegedly formed as early as 1800 BC.

00:34:04 Melt emerged to a more public platform

00:34:07 in the years preceding the arrival of Tiberium.

00:34:10 A political and religious quasi-terrorist group, on a service interested in the unification of third world nations.

00:34:17 I just heard that you have to dread.

00:34:20 I don't know what the name is, I don't know what the name is, I don't know what the name is, I don't know what the name is, I don't know what the name is, I don't know what the name is, I don't know what the name is, I don't know what the name is.

00:34:36 Preciso.

00:34:40 This is the Pentagon a full frontal attack with your strongest forces should render their military center of operation

00:34:50 Yes, quickly that some people think.

00:34:56 I was back to the end when there was no smoke.

00:35:00 op die manier. Naar de bus, precies. Naar de bus hadden genoemd.

00:35:05 Op het begin. Ja, bij de bus. Ja, oké.

00:35:10 Ik pak mijn leidse pleins aan, toen de bus nog daar vandaag tegenover liefde in de nacht is.

00:35:16 5-5-3-1-0, vertel een freakies!

00:35:20 The operators come up, conquer the build here.

00:35:30 to their patients.

00:36:01 Despite the danger the alien

00:36:13 between GDI and God, and the incentivized threats to life on Earth.

00:36:20 Spores appear to be a source of Tiberian-related illnesses.

00:36:28 The world scientific...

00:36:33 If you commit to direct contact with Siberian...

00:37:27 need to still even break down.

00:37:31 to what's known as a visceroy to accrue to a more thick music class.

00:37:40 It's a great thing that we're talking about.

00:37:42 ...that massive destruction to the alleged Saribe opening.

00:37:46 After more than three years of conflict, the first Tiberian War was...

00:37:52 kind of strike.

00:38:04 What?

00:38:04 Oh, Heather's brother, the reactor factor.

00:38:06 GEI was left to prepare for the future.

00:38:15 by geniuses, Siberia will continue to ravage much of the planet.

00:38:21 The most common form it took was Tiberium riparius, the green crystal.

00:38:26 But even in the most early days, mutations began to manifest.

00:38:30 The most most documented of these Tiberium viniferum is visually reminiscent of Romarius, albeit with distinctive blue crystals.

00:38:40 Holes are great minerals than repairs, resulting in a shift in hue, though it's a far less common sight.

00:38:48 Its value...

00:39:02 It seems to be a danger.

00:39:56 Once, once, once.

00:40:05 Thank you.

00:40:42 So here we go to St. Louis, Sherry, Sherry, Paul,

00:40:45 please, and we're going to show you how to score.

00:40:50 Is that the same way?

00:40:51 I'm sorry.

00:40:52 I'm sorry.

00:40:53 I'm sorry.

00:40:54 I'm sorry.

00:40:55 I'm sorry.

00:40:56 I'm sorry.

00:40:57 I'm sorry.

00:40:58 I'm sorry.

00:40:59 I'm sorry.

00:41:05 Oh, okay.

00:41:10 Thank you.

00:42:48 I'm not hearing you, please.

00:42:52 And I'll continue to achieve a label in the next stage of human evolution.

00:43:30 Thank you.

00:43:54 and also trees with an eye that there was an early stage propagation.

00:44:00 What?

00:44:03 What?

00:44:05 What?

00:44:07 What?

00:44:10 Goh, ik heb, ja.

00:44:16 Goedemorgen.

00:44:20 Ik wil zo graag een bescheidje delen met...

00:44:31 Red zones have suffered coerced contamination and cannot support human life.

00:44:40 Yellow zones are dangerous but contain most of the world's population.

00:44:45 It's a war and civil unrest.

00:44:50 Oh yeah, too close. There we go.

00:45:00 Zilver, ga dan zilverdelen.

00:45:06 Zilverdelen, wachten.

00:45:10 That was funny.

00:45:20 The ground is a blasted and barren plateau of rock laced with veins of Tiberium that shine through with a malevolent green radiance on the horizon.

00:45:30 are massive formations of pure Tiberium that have welled up through the surrounding Earth.

00:45:35 Tilt your head and you'll contemplate a cloudy, tortured sky.

00:45:40 with twisting patterns of shivering light

00:45:42 and flippers of lightning

00:45:44 if you wait long enough

00:45:45 you'll see an ion storm begin to form

00:45:48 my works are on

00:45:50 Huh?

00:45:52 Nice to meet you.

00:45:54 Nice to meet you.

00:45:56 Nice to meet you.

00:45:58 Show me.

00:46:00 I'm a big one, I'm a big one, I'm a big one.

00:46:10 Transforming our planet in an environment suitable for beings that have evolved on a different planet.

00:46:16 No definitive conclusions have been...

00:46:20 Existence in the worst of yellow zones

00:46:30 contamination is a fact of life. Thousands die every year from innate microscopic crystals

00:46:36 carried in smog, clouds of dust, and other...

00:46:40 That's it.

00:46:42 ...fall out of the sky suspended in raindrops if the clouds overhead have passed them a red zone during or after.

00:46:50 Ion Storm. One of GDI's more advanced tools during Team War 2 was a disruptor tank.

00:47:00 I don't know how to do it, but I don't know how to do it, I don't know how to do it, I don't know how to do it,

00:50:00 This is a Tiberium bomb beneath Tempain.

00:50:02 This is a Tiberium bomb beneath Tempain.

00:50:04 This is a Tiberium bomb beneath Tempain.

00:50:06 This is a Tiberium bomb beneath Tempain.

00:50:08 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:09 This is a Tiberium bomb beneath Tempain.

00:50:10 to the attention and envy its eyes.

00:50:14 But the...

00:50:15 I don't know.

00:50:17 That's...

00:50:20 Kijk, dat zijn allemaal wel echt...

00:50:22 ...de deel is voorzitter.

00:50:24 Dat is al jaren geliefd.

00:50:28 Planet Sides.

00:50:30 Ik vroeg werk van de hele tijd 1, alleen ik had geen kuningkarts, ik wilde laaien uit de thema, natuurlijk volgens mij.

00:50:40 Op de Papelstraat.

00:50:44 Bij de Beukenstraat ging ik bij de Papelstraat onder het hek door.

00:50:50 Dan kon ik onderdoor schrijven over de schoon.

00:50:56 Dan kon je.

00:50:58 Ga je dat even voor me zeggen? Ik weet niet welke.

00:51:00 Kankermachal, letterlijk gehandicapt, mentaal onintrigent persoon, denk ik kan de hele dag een live commentaar geven via mijn leraam doen.

00:51:10 Ik hoop dat het in de laatste keer gaat worden tennerd en dan komt het overal met zin.

00:51:20 That?

00:51:22 I can't say that.

00:51:25 I can't say that.

00:51:30 Oh, I'm dead.

00:51:40 Ну, а то мы краем краешь.

00:51:50 inhabited planets are all targets once the infected planet presumably reaches

00:51:56 terminal capacity as indicated by a liquid tiberium detonation

00:52:00 Screwing forces descend upon the planet, remaining indigenous life force, and then harvest.

00:52:10 Oh, so, so, so

00:55:19 This...

00:55:20 says the Bible, it did not wither.

00:55:30 Created a man, undying, who founded a secret organization.

00:55:40 Its purpose, its beliefs at this point are unclear, but it's possible Cain already knew of Tiberium and his beneficiaries.

00:55:50 At some point in history, Cain and the Scrim would cross paths.

00:55:54 The Speedbar will exist in the vehicle.

00:55:57 No.

00:56:01 of a form this meeting took it could have been a source of his prophecies on Tiberium whether

00:56:07 he believed they would lead him to another planet

00:56:10 another state of being, we will never know. Perhaps he thought he could use Tiberium on the

00:56:17 screen as a way to escape his immortal-

00:56:20 mortality in water.

00:56:30 And he's started to play the long game.

00:56:32 Members into his full...

00:56:40 Otherworldly knowledge, or perhaps sheer charisma, Cain was heralded within this secret bullet as a prophet.

00:56:50 taste for power to achieve it throughout the years agents of naught would subtly shape the court

00:57:00 with nationalistic political sock puppets, and the craft of dis-

00:57:08 was the complete collapse-

00:57:10 from the Soviet Union following the Second World War

00:57:12 and was seen playing personal advisor to Stalin.

00:57:19 Thank you.

00:57:20 and was known to be impulsive, driven by his emotions, and seemingly unstable, removing

00:57:26 his underlings from where he gets.

00:57:30 Dat hebben we gestudioed in de wereld van België.

00:57:35 Dat kan ik voor zien, linken in de past.

00:57:40 This is the earliest known footage of the weather phase.

00:57:50 was prepared is operated out of multiple command posts around the world with a Sarajevo template

00:57:57 not at its head

00:58:00 Since his entry onto the world stage in the 1990s, the Brotherhood has publicly aligned itself with anti-Western ideology, with designs to unify disenfranchised...

00:58:10 Ik heb hiervoor gestudeerd, het is mijn leven, ik ben bij die goudel en dingen enzovoort geweest en heb ik gewerkt.

00:58:20 Ik heb letterlijk, je hebt het dikst van je eigen leven behalve muziek hier ofzo, je wilt ik, letterlijk, het kan gaan.

00:58:30 Pinnakaas, I get it.

00:58:36 What?

00:58:38 Pinnakaas, I get it.

00:58:40 Die sterven bijna in Afrika aangeven.

00:58:44 Wat?

00:58:45 Dan kunnen ze toch in ieder geval een beetje leren meekomen enzovoort.

00:58:49 Jullie mogen geen gezien.

00:58:50 ...geplegd, so that I do the...

00:58:58 Really?

00:59:00 For creation's sake, control of the planet would mean control of all Tiberium on Earth, and this is what Cain was after.

00:59:10 I'm Seth. Seth. From God to Seth.

00:59:20 Cain was no fool, but his choice in friends was never his strong suit.

00:59:25 Taking his name from the third son of Adam and Eve, Seth was his second...

00:59:30 Second in command during the First Tiberian War, overseeing North's lower ranking commanders.

00:59:36 Seth was an ambitious, jealous man, and saw the ro-

00:59:40 of a young commander whose successes had drawn Cain's eye as a personal threat.

00:59:46 I was starting to trust you, but now Cain has asked for your service.

00:59:51 In order to secure his own position, Seth tried to have this upstart removed.

00:59:58 I've taken the liberty of dispatching your troops.

01:00:00 the U.S.

01:00:01 The king is going to move to attack in there.

01:00:10 A full frontal attack with your strongest forces should render their military center of operation.

01:00:22 publish more quickly than some people think.

01:00:30 Despite their early advantage and lead in Tiberian research, Nod was unable to hold on the slow-to-rouse Juggernaut that is the Global Defense Initiative.

01:00:40 The first Tiberian War came to a close when GDI fired the Ion Cannon before the Temple of Nords.

01:00:47 Let's do it again, let's go ahead and let's go ahead and do it again.

01:00:50 twee koepen, maar ik weet niet wat ik daarmee gevormd heb, toch, ik weet niet wat te onderbreken kijk ik

01:01:00 Die komt straks en dan is het weer, kijk, we branden door je pro-abonnement en dan weet je het gewoon, hoe weinig kan ik er nog voor hebben.

01:01:10 en achteruit in de tijd denken enzovoort, bijna niet.

01:01:20 The blast may not have killed Cain, but he didn't escape unscathed.

01:01:25 Although GDI proclaimed him dead, they were never able to recover a bomb.

01:01:30 Cain was sequestered away to recover, completely cut up from the fracturing brotherhood.

01:01:36 He spent much of the next 30 years in hiding, like...

01:01:40 in the Nod Pyramid in Cairo, his new seat of power.

01:01:45 By the late 2020s, the largest remaining Nod faction

01:01:48 in the Eastern Hemisphere was...

01:01:50 the control of General Hassan, a weak leader whose position was consolidated by GDR.

01:01:56 He was allowed to maintain his tenuous leadership.

01:02:00 Er is niemand, ja, maar wat ga ik nu doen als ik weer een traantje heb, hoor je niet zeker?

01:02:10 Ik weet het niet veel lijst, niet veel lijst, maar ik weet het niet veel lijst.

01:02:18 En dan heb ik nog een gang.

01:02:20 That's what I was going to say.

01:02:22 Here's more support than we thought.

01:02:40 He has a really good life.

01:02:45 It was during this interview that the forgotten faction of Tiberian mutants will neither to GDI's...

01:02:50 or not, rose to global significance.

01:02:53 Their leader, Tratos, is the earliest known keeper of the Tacitus, an alien archive on Tiberium.

01:03:00 and coerced by Kane to translate it, at long last had access to all the information on Tiberium.

01:03:12 Based on the Blackhound's earlier project Regenesis, Kane's next move would be Divination, the infusion of Tiberium direct to the blue.

01:03:21 I don't think everybody can keep a borstel of that.

01:03:30 Bizarre maatakel in de kop in de Nederlandse zin.

01:03:40 Dat is de maatste sleutel of oplosser van de specifieke puzzel.

01:03:50 Under a seemingly unrecognitive case, and a name okay?

01:03:54 Yeah, good damn, I knew shit, I could do that, fuck.

01:04:05 He's out, he's out, he's out.

01:04:10 Ik kan niet eens meer games maken, kun je niet eens spelen.

01:04:20 De creatief seksueel fantaseren, wij hebben het exact, ik denk dat jullie snappen dat ik achter jullie persoonlijk aanga, ja.

01:04:30 Ja, maar dan moeten we het allemaal behouden. We doen het gewoon te wisten, maar...

01:04:35 Ja, behind your scenes, denk je dat werkelijk dat het wel even een meer is.

01:04:40 Ich bin leider durchgekehrt.

01:04:53 We're flying ships.

01:05:01 The next step is out.

01:05:02 Alien technology since at least as far back as the first fall.

01:05:09 Oh.

01:05:11 The owners of this technology...

01:05:20 a constant supply of its unique radiation to live bomb Tiberium they see host planets

01:05:27 with a crystal by way of a meteor

01:05:30 Then leave the Tiberium to drain minerals from the crust and to kill off the majority of indigenous life forms.

01:05:37 The Scrooge then returned to harvest when the planet...

01:05:40 reaches terminal capacity characterized by an eruption of concentrated liquid

01:05:44 tiberium plans within plans divination was only a means

01:05:50 to an end and not the end itself.

01:05:52 Some of this process he somehow knew already.

01:06:00 After the revelation of the Tacitus, he began work on a Tiberian warhead, a world-altering missile, which

would cover the surface of the entire planet.

01:06:10 The missile was never fired.

01:06:13 After a short and bloody war, GDI made siege to the Nob Pyramid, and Commander McNeil was able to re-

01:06:24 так

01:06:32 Waarom?

01:06:33 Het is er een paar hier.

01:06:34 Waarom dit...

01:06:36 Maar dat wil je toch altijd.

01:06:40 In a flash of light, Cain will have vanished from the face of the earth, achieving a sentient way ahead of schedule.

01:06:46 It does.

01:06:47 To the nation, it wasn't only a facade.

01:06:50 It's a house this way.

01:06:57 All I do know now is that...

01:07:00 Kane is dead. There's no way he's going to snake his way out of this one.

01:07:04 I saw that evil light drain from his eyes.

01:07:08 Personal log. Commander Michael.

01:07:11 During Tim War 2, Slavik and his officers were aided by a callous Nod-AI.

01:07:20 Define favorable outcomes, Bob.

01:07:30 Yeah.

01:07:31 I don't know, I don't know, I don't know, I don't know, I don't know.

01:07:40 Ik denk wel overleefd hoe het is dat alles gecalibreerd wordt aan je lichaam en afgesteld wordt enzovoort.

01:07:50 En het zijn bij de leren, kijk ik ben aan het typen met VR port, met remote desktop voor de Oculus Quest.

01:08:00 Toch? Dat ben je aan het doen, Remote Telefreaky Operator.

01:08:06 Toetje, de beeldjes.

01:08:08 Dat is dat.

01:08:12 Better than McKenna's.

01:08:16 A raw movement at a tissue station.

01:08:20 I had to bust a fire repair, a proper reception, a girl on fire, I guess, before.

01:08:30 Wall-out hier, over de haak.

01:08:34 Gewoon...

01:08:35 Wall-out-assisten.

01:08:40 Excerpt from private audiologues of the Prophet Cain.

01:08:44 Pardon?

01:08:45 These tubes that even as my flesh is restored...

01:08:50 Und ich habe einfach gesagt, das finde ich.

01:08:53 Und ich habe auch gesagt, dass meine Gedanken auf Gabal,

01:08:56 das, was meine Kreatie war und ist nun, in a way,

01:09:00 Hoe vertrecht naar naartoe, dat hebben we ook een interoactief boks op schoenen.

01:09:10 Ik zit hier niet graag, mijn hele dag bestudeerde.

01:09:20 The year is now 2034, and also getting be reduced to in-fighting factions without its leadership, and came once more.

01:09:30 found himself betrayed by those he had thought loyal.

01:09:51 lost

01:09:52 the music

01:09:54 was violent

01:09:56 in my

01:10:00 That's it, that's it, that's it.

01:10:11 I shot the earth.

01:10:12 What the fuck's getting this fanatic's murder?

01:10:21 Leader of the Black Hand, with the loss of Slavic, it was instead to the memory of Cabal that he turned a...

01:10:30 All parts of him obsessed over the megalomaniacal machine, and so, with precious data preserved

01:10:36 from the Tacitus, which had been taken by GDI, Cain cr-

01:10:40 He created a new artificial life form out of the remnants of Cabal, which he named Legion.

01:10:50 Exit no factions, under one vision.

01:11:01 I am going to come, my brother.

01:11:09 It is time to...

01:11:10 saw the face.

01:11:23 Without the Tacitus, a second world-altering missile was not an option.

01:11:27 But perhaps he could achieve...

01:11:30 That was a mix, yeah, what are these?

01:11:34 Yeah, they grew up on our, yeah.

01:11:37 I felt that was really crying back way to make up this.

01:11:40 I don't want to talk a little bit about it.

01:11:51 All my experiments with liquid tea failed to produce the necessary blast field.

01:11:56 And that is why I started the war with GDI, to provoke their...

01:12:00 Okay, fine, real.

01:12:10 So have them promote someone who is, someone to whom the political benefits of digging so deep in non-territory outweighs the strategic draw-

01:12:20 Okay, damn.

01:12:22 Say, the GDI director of the Treasury, Redmond Boyle.

01:12:25 Don't make a bad person.

01:12:27 You didn't get that, I think.

01:12:29 Anyway.

01:12:30 Ik heb nu weer sport 7, toen ze in voetbal zat te kijken daar.

01:12:37 Ja, ik heb teruggewandeld naar...

01:12:40 There's a new order here.

01:12:41 I'll get you.

01:12:42 I'll get you.

01:12:43 I'll get you.

01:12:44 God.

00:00:00 First time some more compactos.

00:00:04 Yeah, this looks like a more compact enough.

00:00:10 Nolts need only secure a single threshold and recover the taciturs, or taciturs is linked to the legion.

00:00:18 God, there are big issues.

00:00:20 and achieve ascension

00:00:22 as well as his followers that remain faithful

00:00:24 that stay the course

00:00:26 mhm

00:00:31 Eerst nog een heet.

00:00:42 How could my own brothers believe that what transpired in the temple prime did not unfold exactly as I planned?

00:00:50 Of course, I could not have planned for an ambush.

00:00:53 Bye, Vino!

00:00:54 In Qatar.

00:01:00 was Cain's second in command.

00:01:02 She was loyal to him, but unlike many of his more zealous devotees,

00:01:06 didn't believe him infallible.

00:01:08 She began to...

00:01:10 out his seeming sound commands.

00:01:13 I've been so impressed.

00:01:16 Who dares tell Hades of the reaching without fair punishment?

00:01:20 Not understanding that Cain intended for GDI to take Temple Prime and finding herself outgunned, but refused her requests for reinforcements.

00:01:31 Killian lost her nerve. During the siege on Temple Prime, Killian's forces turned on Cain, an unforgivable betrayal for which Killian...

00:01:40 be executed. Armed instead, Abess Alexikova, fanatically reverential to Kane, a f-

00:01:50 which turned her dangerously paranoid.

00:01:53 How dare she question Cain!

00:02:00 as if she's his equal when alexa discovered the legion had been built from gabal she projected her

00:02:07 personal vendetta onto legion

00:02:13 Oh, that's bad.

00:02:18 Good.

00:02:20 Ja, ik weet het niet, dan zoek je dingen daarachter die op een andere manier geleerd hebben via de game-tipool zitten.

00:02:30 and sabotage the AR.

00:02:50 Uh-huh.

00:03:04 Peace!

00:03:12 Cain has ever been surrounded by the similarly power hungry, the blindly faithful, and not as a long history of...

00:03:20 He had toiled for thousands of years to achieve his goal, only for one of his own, to snatch defeat from the jaws of victory.

00:03:30 yeah

00:03:34 unbearable

00:03:36 yeah

00:03:38 yeah

00:03:40 The screen had been driven back by GDI and not had captured the Threshold, but without the Tacitus and without Legion, the Threshold could...

00:03:50 be activated came and failed it took five years of repairs before legion

00:04:01 Dat is mijn probleem niet.

00:04:10 Okay, so now we're going to do the 4-hour video, right?

00:04:12 Yeah, nah, nah, okay.

00:04:19 Let's go.

00:04:20 The region launched one final attack on a heavily fortified GDI compound in the Rocky Mountains

00:04:26 and successfully recaptured the Tacitus.

00:04:30 Ik heb geen geld, zoals jullie weten.

00:04:42 Het pijltje dat ik niet meer per se heb.

00:05:06 gdi has reasserted control over the planet

00:05:10 Though they know it is being watched, the Scrim are not one to sit content with their humiliation.

00:05:20 Yeah.

00:05:21 Nought.

00:05:25 Nought has a legion.

00:05:27 Nought has a threshold.

00:05:28 Nought has the ta-

00:05:38 Yeah.

00:05:40 My name is Zebra. Thank you so much for watching.

00:05:50 Hij komt dus een moeilijkheid te creëren, maar ze hebben het gedacht.

00:05:54 Ja.

00:06:00 Weet het nog. Ja, dat ook.

00:06:10 But by convincing others to believe in him, to follow, to place faith in his words, he

00:06:26 This limited resource is promising.

00:06:30 The power attracted certain types of people into the fold, and if even for a second he appears as aught but the undying prophet he claims.

00:06:47 Dick Kane's greatest weakness.

00:06:55 God's research into the mutagenic properties of Tiberium began in earnest at...

00:07:00 Leaster's early project for Genesis was ended by the Black Hand and Nod, seeking to use Tiberium to force the next divine stage.

00:07:10 This was shut down when a GDI commandment stormed

00:07:20 a facility whose research was overseen by its known prototype

00:07:30 The raid reveals an AI broadcasting of the intercom.

00:07:33 You are assisted by an augmented life-form dynamic.

00:07:40 Attention Center!

00:07:41 Seemingly a simpler intelligence along the lines of GDI's ether unit and severely damaged

00:07:47 by an ion cannon strike.

00:07:50 Not yet knowing what kebab would become, various rumblings were considered inconsequent.

00:09:50 I think we're going to have a look at the gaze where I can still have sex with a boyvroux.

00:09:56 It was the perfect normal asset, no problem.

00:10:00 Oh, man.

00:10:10 Thank you

00:10:20 collection of living human minds held in suspension tubes within underground bunkers

00:10:25 and networked together for use as processors. An insidious living...

00:10:32 King's behest, he assisted the mutant Tratos in the translation of the Tacitus.

00:10:37 There are those who say that it was this...

00:10:41 by which Cabal developed his ambition.

00:10:52 The Tiberian sun has risen!

00:11:02 At the...

00:11:10 with GDI reporting him as dead but is not an easy man to kill

00:11:17 and his body was moved to a suspension tube to recover

00:11:20 Deel mentaal, deel mentaal.

00:11:24 Kijk, we hebben nu een beetje gevaar.

00:11:30 BOT, BOT, BOT,

00:12:02 Closed.

00:12:11 That's it.

00:12:17 Oh, yeah.

00:12:20 The leader of the Forgotten droids was under GDI protection.

00:12:24 The Forgotten would never forgive this failing.

00:12:27 What are you doing about the assassination of Trotus, General?

00:12:30 How could GDL let this happen?

00:12:32 With the loss of Tratos and atmospheric Tiberian toxicity reaching fatal levels,

00:12:37 translation of the Tacitus became GDL-

00:12:40 It's not its only option.

00:12:42 Dean and I are still convinced that Decidus is our best approach.

00:12:46 The assassination of Trotters has put us months, if not years...

00:12:50 At the present rate of Tiberium organic synthesis, within a year, maybe less, our atmosphere will be 100%

00:13:03 What alternatives to deciphering this tacitus are at our disposal?

00:13:07 Actually, Paul, I have an idea.

00:13:11 I like it.

00:13:14 Kate's AI.

00:13:19 There you go.

00:13:20 The firestorm task force tracked down a second cabal core to a north base in Poland.

00:13:26 Once activated, now integrated into both GDI and...

00:13:30 command systems. Cabal revealed the location of a missing second segment of the Tacitus.

00:13:37 It was retrieved from an ancient temple in Bolivia.

00:13:40 Considered sacred grounds by a local faction of Tiberian cultists.

00:13:50 The circle has reached the decisions on how it is too dangerous and must be...

00:14:03 Dag.

00:14:10 I don't know.

00:14:23 did not forget I was the one who had you reactivated and I could just as easily have you deactivated

00:14:29 which you

00:14:30 Stop it. Cannot stand against God.

00:14:33 No.

00:14:35 No.

00:14:40 Don't be selfish, kid, smart!

00:14:45 What kind of signals?

00:14:48 Kaboom! Cut her!

00:14:50 I'll consider the skill of a gem to myself for me.

00:14:54 A counting is a...

00:15:10 loyalty, but it was Caban's.

00:15:20 GDI and decapitated Nod by killing Kane's inner circle, with only Slavic surviving.

00:15:27 And so began the meat...

00:15:32 war on the two world powers he began construction of a great metal army converting living human

00:15:40 The intelligence of cyborgs

00:15:42 JDI

00:15:44 Oh good man

00:15:46 Civilian

00:15:48 Oh

00:15:50 Darkest Hour. GDI and Nod were forced into an alliance to put down the rogue AI.

00:15:56 Oh, they are the rogue rogue devils.

00:16:00 would be during the screen invasion of earth the core was protected by the modified cabal obelisk and the

00:16:07 escape darkness

00:16:10 Final assembly in forces and unexpected development were able to destroy the core and defeat

00:16:20 the constructs by reclaiming the tacitus the two segments have somehow merged keep in mind we're

00:16:27 dealing with complete unknowns regarding the tacitus

00:16:30 I don't know.

00:16:37 Doctor, what's happening?

00:16:38 I found the rosettes.

00:16:40 Yeah, it's like a little fish.

00:16:50 My vision has permeated. My plants have followed a path unpredicted by the human blood.

00:17:01 Wat is het digitaal gekomen?

00:17:11 He's milling it.

00:17:24 São os sonhos.

00:17:42 of the Tacitus at its core. Cain created from this spark his greatest servant since the death of Slavik.

00:17:50 The artificial life form, Legion, consider the enigmatic Legion to be Cabal's successor.

00:18:00 This isn't supposed to be the case.

00:18:02 Legion was to play a far greater role in Nod,

00:18:06 not just as a command unit, but also the key to interfacing between-

00:18:10 between the Tacitus and the Threshold, and through them, Ascension.

00:18:17 There is precious little data on the Artifices...

00:18:20 session, but it appears that the ghost of...

00:18:30 Legion finally interfaced with the data matrix in 2052

00:18:34 Guys, it has been

00:18:40 reunited. Full access once more to the Tacitus is so desired. If this spark should reawaken...

00:18:50 were legion become.

00:18:51 Yeah, were there isn't.

00:18:54 We may never fully understand Kabbal's motives.

00:18:58 Was the extinction of humanity

00:19:00 all their wants to it.

00:19:02 Was it as simple as a rogue AI

00:19:04 that went mad without its handler

00:19:06 to control it?

00:19:07 And why did Cabal require the

00:19:10 For what purpose was it intended? How exactly?

00:19:20 How much did Cabal's consciousness in turn alter Cain within the process?

00:19:31 Mark my words, lives, my best ever.

00:19:41 The whole world is on

00:19:50 I'm going to make it all for sure.

00:20:00 between lines is like I say, time travel is created through the use of time

00:20:10 time-stream-crossing events can be traced back to the work of this man.

00:20:16 And that is...

00:20:20 but one of Gladstone, using portals created by the shiny

00:20:30 dimension

00:20:40 Use a gym.

00:20:47 Yeah, recycle.

00:20:48 Recycle.

00:20:49 Recycle.

00:20:50 the control of the crystal it's spread across the planet transforming the surface of the earth

00:20:56 into a desolate alien world

00:21:00 Welcome back, Commander.

00:21:10 A meteorite crashed into Italy.

00:21:13 Within days, small green crystals began sprouting from plant-like pods near the impact, forming the...

00:21:20 First, Tiberium field. Nearby trees lost their leaves, thereby taking on a fleshier complexion.

00:21:29 Tiberium com-

00:21:30 blossom trees which rapidly replenished fields by releasing crystal-laden spores into the air.

00:21:37 At first the crystals were

00:21:40 ...considered to be a scientific anomaly.

00:21:46 ...scientific community, soaking up ground minerals...

00:21:50 all nutrients like a sponge.

00:21:52 Yes.

00:22:00 There are now more than 200 areas of the Earth affected by Tiberium deposits.

00:22:06 Tiberium appears to be spreading by means of the heavens unknown.

00:22:11 GEI credits Dr. Ignacio Moebius, a foremost researcher in the field, with a discovery of Tiberium.

00:22:18 Naming it after the Tiberium.

00:22:21 was found yours that's what

00:22:30 It appears to have strong, fair qualities with non-resonating reversible energy.

00:22:40 structures, but let me put it this way, and it is uptight.

00:22:50 Was the UN-backed Global Defence Initiative, an international peacekeeping division,

00:22:54 the group out of the Allied efforts in the Second World War?

00:23:00 The Brotherhood of Nod was allegedly formed as early as 1800 BC, emerged to a more public...

00:23:10 of Tiberium and religious quasi-terrorist group on the surface interested in the

00:23:17 unification of third world nations

00:23:21 Tiberium is regarded by Nobs with a fanatical degree of reverence, also claiming to have first discovered it, having named it after Tiberius.

00:23:30 Teaser. Suggestions that the Brotherhood have full knowledge of the coming of Tiberium are considered by GITV.

00:23:41 This is the Pentagon. A full frontal attack with your strongest forces should render their military center of operation.

00:23:50 Yes, power shifts more quickly than some people think.

00:24:00 I am Cain. Charismatic.

00:24:10 He said that he has been with the Brotherhood since the very beginning.

00:24:13 His fate seems inexorably tied to Tiberium.

00:24:17 What?

00:24:18 Tiberium...

00:24:20 I feel like they were turned in.

00:24:30 of GDI thanks to their fortuitous ties to every nation's harvesting methods

00:24:40 were developed by dogs, where the precious minerals...

00:24:50 later by super heating them to melting point be stored in silos

00:25:03 Despite the danger the alien substance posed to terrestrial life, it became an extremely valuable...

00:25:10 within the initial years of its propagation it wasn't until the first

00:25:14 Tiberian war between GDI and Nod that the extent of its threat to life on earth

00:25:21 Spores emitted by Tiberian-infected threads appear to be a source of Tiberian-related illnesses.

00:25:27 The world's scientific community is focused on...

00:25:30 its research on the steady spore if you come into direct contact with Tiberium your skin

00:25:40 20 seconds you'll feel an intense burning sensation similar to touching a

00:25:45 hot pan or spilling acid on your skin a full-blown infection

00:25:50 will manifest if you aren't treated immediately eventually your internal organs will shut down

00:25:55 as Tiberium extends rigid crystalline runners throughout your body

00:26:00 If you breathe in the crystal, embedded in your lungs, eventually you'll start coughing up blood.

00:26:10 as the deaths from so-called tea poisoning mounted some less conventional effects were revealed

00:26:17 much like contact with flora could result in

00:26:20 A blossom tree, extreme exposure of Tiberium to animal life, including humans, could trigger a complete cellular breakdown, turning the victim into...

00:26:30 to what's known as a visceroid accrued a morphic mutant mass.

00:26:40 confirmed that massive destruction to the alleged

00:26:44 after more than three years of conflict the first

00:26:47 Tiberian war was won by GDI

00:26:50 Following the multiple line of count strife on the temple of God on a Sabbath day, Abraham.

00:26:54 We are dead.

00:27:00 We will not claim that, no.

00:27:11 Thank you.

00:27:34 Obrigado.

00:27:41 Thank you, sir.

00:27:43 Thank you.

00:31:41 and the sea of missiles that crippled Europe in 2013 were source from Tiberium planes,

00:31:48 and they were completely...

00:51:40 That was a good one.

00:51:50 I can't see that, I can't see that.

00:51:54 Thank you.

00:52:00 Kijk wat ze doen toch?

00:52:03 Handen die kladen, ja precies.

00:52:05 Lekker open en open.

00:52:07 Dat is allemaal kalvig geweest.

00:52:10 toch

00:52:12 ja, we hadden al de beaties

00:52:18 dat was toch

00:52:21 Kijk, kijk, kijk, kijk, dit, eh, ik ga er toch eerst zijn tijdens voor.

00:52:30 Ja, great.

00:52:34 We hebben het eten zitten bij.

00:52:40 Stupid, stupid, stupid, kompressief.

00:52:52 Deel van jullie hebben nu een schapsbeheer gefeet.

00:53:00 What is it doing most of the time?

00:53:02 What is it doing?

00:53:05 I'm going to shake it.

00:54:38 Yeah.

00:55:00 How's it going?

00:56:11 Mmm.

00:57:38 Let's see

00:57:46 Crank Elias.

00:58:00 Ja, maar...

00:58:02 Kijk, kijk, kijk, kijk, kijk, kijk, kijk...

00:58:08 Wat?

00:58:14 I can't realize

00:58:20 Вот, да, да, да

00:59:59 I don't know.

01:00:00 outline for yourself to run towards and then you're motivated because sometimes you're just

01:00:05 hopeful I would like a good thing to happen it's like yeah but you know I'd like to drink half

01:00:10 There we are, but it feels like a lot of alcohol is going to have to work through it.

01:00:18 Get kind of better.

01:00:20 I don't know, I don't know.

01:00:22 I'm going to go back with Ari, Copa Ari.

01:00:30 Nee, ik wist niet hoe je er over een oriëntje klapt bij.

01:00:40 Let me check your color green cube. The gold cube, gold things. Let's look!

01:00:50 But most of the time you should think, where am I falling short of the ideal?

01:00:54 My own ideal doesn't have to be one that someone puts on.

01:00:58 Where am I less than I should be?

01:01:00 Where am I making the world the worst place that it has to be?

01:01:03 If you ask yourself those questions, you'll be in for a big shock.

01:01:06 You'll say, well, what would happen if you stopped doing that?

01:01:09 Stop.

01:01:10 Let's see, bro.

01:01:12 Come on.

01:01:14 Yeah.

01:01:16 The bread cube

01:01:18 widespread

01:01:20 Traversy-a-dish boy bed

01:01:31 not be bitter and to work for your best interests and for the interests of everyone else.

01:01:36 That would be lovely.

01:01:37 And I think it's attainable.

01:01:38 And one of the things that...

01:01:40 I've also been telling people, informing people about, is the idea that life isn't a game.

01:01:46 It's a series of games.

01:01:48 And the right ethic is...

01:01:50 To be the winner of the series of games.

01:01:52 And part of that means you have to learn how to be a good loser.

01:01:54 Mm-hmm.

01:01:57 Yeah, in the talk of the...

01:02:00 Let's say that you can pick your level of competition in life to some degree.

01:02:05 Okay, so let's say you pick a level of competition where you're always winning.

01:02:08 It's like, well, all that means is you pick...

01:02:10 the wrong level of competitions to be a winner you want to know what you're

01:02:14 doing and then you want to be on the edge

01:02:20 you're on a place where

01:02:22 loss or losing is always a possibility

01:02:26 because otherwise you're not pushing yourself

01:02:28 beyond your current

01:02:30 I see that one.

01:02:38 Oh, the other gear though.

01:02:40 Isn't that the booyah?

01:02:50 tragedy and there's evil in the world. Despite all that, this is worth doing. Life is suffering

01:02:56 and betrayal in many senses of things.

01:03:00 But you can adopt a way of traversing through life that is more powerful than the tragedy.

01:03:10 Allee, airtime, er zit alles bijna bij.

01:03:12 Ja, precies.

01:03:14 Wel een informatiekwaliteit.

01:03:18 Goddings, toch?

01:03:20 The Hall of Farmer, the Hall of Farmer.

01:03:30 I'm dancing on your feet and ready for it. Pay attention and be awake.

01:03:33 Oh, I'm not even seeing this.

01:03:45 Every day you make decisions and judgments.

01:03:49 Sometimes...

01:03:50 you're able to think about them carefully at times you make them this is where your results are

01:03:59 straightforward

01:04:00 Hey, man, Nathan, this is your sticks, look up table, pinos.

01:04:10 Let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it, let's do it.

01:04:20 Fearing they would be next, the European allies promised America support

01:04:24 in return for removing Soviet nuclear silos from along the Polish border.

01:04:29 With European...

01:04:30 system secured, the U.S. gained access to Professor Albert Einstein, whose advanced

01:04:35 technology once again gave the Allied forces the other...

01:04:40 parts of the U.S. and Lloyd Einstein's improved chronosphere. In a surprise attack, the chronosphere

01:04:47 was used to transport a small task force...

01:04:50 into the unprepared heart of Moscow, taking the Crow allies securely.

01:04:56 Oh, that is...

01:05:00 Yuri had been planning his betrayal for some time and the allies had not encountered his whereabouts after the war.

01:05:07 In a few moments I've...

01:05:10 psychic.

01:05:21 He had constructed a network of psychic dominators across the planet.

01:05:25 Suicidal Harrier strike by his Alcatraz base.

01:05:29 Get both.

01:05:30 Nice house.

01:05:43 So maybe it's called wind.

01:05:50 The Soviets act during the time, certainly move the cockpit.

01:06:02 Quickly correcting this minor oversight, they jumped forward in 1970, the third round.

01:06:11 from Premier Room and up to himself.

01:06:13 Now, how is this general from the...

01:06:20 I don't know what the plans are going to be, but I'm not sure what the plans are going to be, but I'm not sure what the plans are going to be, but I'm not sure

00:00:31 He doesn't protest it, we don't even know who was!

00:00:40 Shedenko

00:00:54 Brussels, 1927, 23 years...

00:01:00 Oh, that's amazing.

00:01:10 three time machines being made

00:01:32 Einstein

00:01:42 Mm-hmm.

00:01:52 to be superior.

00:02:11 would go to the practice of commandment.

00:02:14 Mm-hm.

00:02:20 Nothing is the chaos.

00:02:30 very invested

00:02:40 This time might be too long ago, but Stalin's destiny...

00:02:51 That's good.

00:02:53 Not a thing, man.

00:03:10 the general secretary

00:03:50 named out for the road.

00:04:03 Как шик, Валерий, как шик, как шик.

00:04:10 I'm going to call the cops.

00:04:15 It's okay.

00:04:20 This is the...

00:05:00 very disparate from the cross rotor.

00:05:10 Thank you so much.

00:05:22 Hug.

00:05:51 I don't know why I don't fall, but I don't know how much music is, you know?

00:05:56 Yeah, yeah, yeah.

00:06:00 The Redwood?

00:06:07 Ah, sucks right, dude.

00:06:11 Goedemorgen.

00:06:20 They are on top of his fan.

00:06:23 Oh?

00:06:24 Yes.

00:06:27 Yes.

00:06:30 Okay, they're going off.

00:06:32 Alright, they're going off.

00:06:34 They're rising.

00:06:42 Maar dan hebben we het ook getimd.

00:06:46 Het overhaal...

00:06:48 Nee.

00:06:50 Kijk, dat is een flashback, maar in het bobeck kunnen we eigenlijk dat aflezen, dat kunnen wij toch typen.

00:06:56 Dus dat is ook veel letterlijk kijkers voor die...

00:07:00 vision models zeg maar ik zeg waar over koud data set aan het

00:07:10 en attribution.

00:07:13 Alleen op real-time doen we dat al jaren, dag in dag uit, elke muur seconde.

00:07:20 Doch?

00:07:31 One of the visualizations we have is to fire.

00:07:40 You're basically forcing me from your class on.

00:07:43 All right, good God.

00:07:50 I'm going to work it, I get lost and run it again.

00:07:57 Oh!

00:08:00 Omdat jullie super fucker gehandicapt zijn.

00:08:05 En ik had al heel veel geprobeerd.

00:08:07 Want ik vond dingen super interessant of niet.

00:08:22 There's Margoi Air Force.

00:08:27 Oh!

00:08:30 It's not going to work.

00:08:48 Try to figure it out here, yeah.

00:08:53 What?

00:08:54 Yeah.

00:08:56 What?

00:09:00 Dat ging over normaal eten, lokaal, enzovoort gesorst.

00:09:06 Iberico hang hier bij de Albert Heijn, is letterlijk.

00:09:10 Een beetje separatoren vlees, ja precies.

00:09:17 Vergelijken met, ja.

00:09:20 Als tappers gegeten is dat er weer een taart kwalitatief is.

00:09:25 Heel beter vlees.

00:09:27 We hebben het weer even een ding gekocht.

00:09:30 This technology is extremely fast. It can print objects in a few tens of seconds, whereas other technologies could take hours.

00:09:40 Благодарим, как вы, если еще по-тайтову, может быть, штыри, дюрхова.

00:09:47 Да, то есть аннотации, да?

00:09:50 This is a very high resolution, the process is light-based, and for the biologists we have the

00:09:56 added advanced sheet that we can print inside.

00:10:04 So the object we want to build, and to generate it, we eliminate a liquid.

00:10:11 of multiple angles and after a while, the defundation will result in local solidification.

00:10:20 Another aspect of this technology that we invented here is the speed of the process.

00:10:30 It can be excellent.

00:10:32 That's it.

00:10:33 You may have a soft or hard object,

00:10:35 so you can think of taking this printer

00:10:37 and make it closer to the end user.

00:10:39 So imagine, for example...

00:10:40 the dentist's office. The dentist is scanning the teeth of the patient in it.

00:10:50 Dat is kut. Ik weet niet, ik zou vandaag nog overstaan.

00:11:03 Ik ben hier een beetje een pein aard.

00:11:10 En toen wordt het een beetje leuk.

00:11:12 Het schrijft bij het absoluut om de vier ogen aan te draaien.

00:11:18 En een paar ogen.

00:11:20 Thousands of years ago, there were two brothers, Kate the father, and Abel the shepherd, in a moment of jealousy.

00:11:30 Cain slew his brother as punishment.

00:11:34 God cursed Cain that the earth he tilled would not provide him sustenance and placed a mark upon him.

00:11:40 Dat mijn gevoel is afgesteld, kan staan.

00:11:47 Dat zegt niet dat ik gezond ben.

00:11:50 says the bible but kane did this mark

00:11:56 of his punishment or as an unintentional side effect

00:12:00 It creates the man undying.

00:12:47 This is a pretty dirty statement.

00:12:53 Den haben wir auch schon, oder?

00:12:55 Ja.

00:13:02 We've got data, but we've got to see a little bit.

00:13:05 Yeah.

00:13:06 Yeah.

00:13:07 Mm-hmm.

00:13:12 Grazie.

00:13:45 Thank you.

00:13:56 Thank you for everything.

00:16:53 Gracias.

00:17:03 Gracias.

00:17:18 They're going to stay on the front.

00:17:25 Thank you.

00:18:12 Gracias.

00:18:33 Thank you.

00:18:51 ご視聴ありがとうございました

00:19:11 Gracias.

00:20:28 Obrigado.

00:20:46 Thank you.

00:20:50 Das, ich...

00:20:52 Ich habe einen anderen Tag...

00:20:54 Ich habe einen anderen Tag...

00:20:56 Ich habe einen anderen Tag...

00:20:59 Ich habe einen anderen Tag...

00:21:01 Dankjewel.

00:21:12 Dat is echt gezegd wat.

00:21:20 I'm going to slide it.

00:21:30 Kijk maar eens hier. Ja, het is een wanneer van mijn wiskunde bijhoudt in de jaren halveren.

00:21:37 Niet bezig in de jaren.

00:21:42 Double Hadamard

00:21:46 Double Hadamard

00:21:48 Brrrr

00:21:50 Para ahora, por favor me da, que no me alegra, que no me alegra, que no me alegra.

00:22:00 Look at that.

00:22:02 Yeah.

00:22:10 Ja, omdat jullie mij bestuurden, dus ik kan een ziekler zo op te lossen.

00:22:22 Vole, venga, sono soffredita.

00:22:30 En iedereen gaat allemaal lekker bewijzen wat dat zoiets.

00:22:33 Kijk eens ziekte wat.

00:22:51 kind of just something you can't see.

00:23:11 In 1926, Omenheimer took up a position at the University of Göttingen in Germany.

00:23:16 This was the center of theoretics in Europe in Omenheimer.

00:23:22 Danke, Siegte.

00:23:30 Here, family paradox and so forth, there is a fascinating gap between high school and actual bananas.

00:23:40 I don't know if this is controlled, it's like a layers.

00:23:45 I can't remember this dish.

00:23:47 I don't know if it's good.

00:23:50 Then I have a classic real world. Parabola! When you rotate, paraboloid.

00:24:00 First dish, satellite dish, even so, Kevin dish.

00:24:06 But that's a little bit old.

00:24:10 Het is allemaal een hele onderwijs versteren systeem.

00:24:15 Gewoon.

00:24:20 What?

00:24:23 All this.

00:24:24 All this.

00:24:25 All this.

00:26:08 Ah, een twist uit.

00:26:10 Oh, het is het mezelf.

00:26:14 Als je met z'n cirkeltromp hebt gebruikt.

00:26:18 Dat is wel waar.

00:26:33 Is alle...

00:26:34 Dank je, ziekte.

00:26:38 Nee.

00:26:40 Ik denk dat zelfs die ontologie-knul niet eens wiskunde bezig heeft gedaan.

00:26:47 Dat is verder.

00:26:49 Dank je wel.

00:26:50 Teşekkür ederim.

00:27:00 Да, хорошо.

00:27:10 Nee, ik heb het al gehoord.

00:27:21 Yeah, well, it felt hard.

00:27:30 Huh.

00:28:04 That's dope.

00:28:11 He did join the Aussie.

00:28:15 Probably.

00:28:20 1936 and 1936, with the end of his contact with Tamron, here's an interest in communism.

00:28:25 What is that?

00:28:31 Nou, kijk eens, daar ging die...

00:28:40 Die kutopera ging daarover, want die was verbannen in de Sovjet-Unië.

00:34:15 Ovenheimer knew straight away that this was what he wanted to do with his life.

00:34:19 He took a...

00:34:20 rigorous course each semester, which allowed him to graduate in just three years.

00:34:24 At that time, the American colleges could compete with the physics laboratories in Europe.

00:34:28 The science world was in...

00:34:31 of Albert Einstein, and for any serious up-and-coming American physicist, crossing the Atlantic was an essential requirement.

00:34:38 In 1924...

00:34:40 Okay.

00:34:41 Okay.

00:34:42 Okay.

00:34:43 Okay.

00:34:44 Okay.

00:34:45 Okay.

00:34:46 Okay.

00:34:47 Okay.

00:34:48 Alright.

00:34:50 C'est un peu près de l'hôtel, c'est un petit quai de l'exemple et de l'observation au final.

00:35:00 This is a kit, I believe they're all a dicey kit, so...

00:35:10 lowercase 5

00:35:16 5 is that

00:35:18 basic hygiene

00:35:21 So, referential, record table, prime number.

00:35:30 ...exact, scaling, vice, vice, vice

00:36:56 And we reckon physicists have been left behind in Europe.

00:37:00 I think I'm going to call this revolution.

00:37:02 Many of the professors refuse to accept the new

00:37:04 counterintuitive theories that went against the grain

00:37:06 of everything they had known.

00:37:08 Yeah, yeah, shoot.

00:37:10 I have a D, it will be good, arrow.

00:37:20 I want the linear and the form.

00:37:31 He now has a head brewing with knowledge and lecturers filled with students who weren't eager to learn from him.

00:37:37 The problem was he didn't know how to teach.

00:37:40 It's such a awkward message that he didn't tell either.

00:37:42 He would be all tongue-tied in front of his students.

00:37:44 Er, Gapstone.

00:37:46 His idea that this would come out as a jumbled map of words that simply...

00:37:49 It's...

00:37:50 Sooo, guys, yeah, yeah, yeah, yeah, yeah, yeah, yeah.

00:38:00 He applied himself to his team and slowly improved his ability.

00:38:03 He managed to cut out the verniage to pare down his lectures,

00:38:06 making them both understandable and exciting.

00:38:09 As a result...

00:38:10 The students who referred to him as Opie began flocking to his lectures.

00:38:13 Within a couple of years, a cult personality had developed around him, and he had his own

00:38:17 groupies who were known as Opie's boy.

00:38:20 Dankeschön.

00:38:30 from physics to science to art and literature

00:38:33 and would be fueled by generous quantities of alcohol.

00:38:36 While teaching at Berkeley,

00:38:37 Oliver continued his physics research.

00:38:40 He published more papers on quantum physics, but did not make any groundbreaking discoveries.

00:38:50 quantum physics as a science in America.

00:38:54 Oppenheim totally immersed himself in his work

00:38:56 and the adivation of his students.

00:38:58 He did not own a phone, a radio,

00:39:00 the newspaper. When his mind wasn't on physics, he would be studying Hindu mythology or the

00:39:05 ancient classics. As a result, he was totally divorced from the outside world.

00:39:10 The depression struck following the 1929 Wall Street crash, it was certainly none the wiser, being insulated from the effects, thanks to a trust fund.

00:39:20 Before we get into Oppenheimer's work during the war, let me take a quick break to tell you a bit about it.

00:39:23 I know liberal lads in the middle here, they're not perfect, but when we started biographics, we really wanted it to be a longer...

00:39:30 on content channel and sponsors they make it possible now you've heard me talk about brilliant

00:39:34 before they're a learning platform that focuses on active learning this is where you're given a

00:39:39 short

00:39:40 ...on a scientific concept, and then you're asked to solve a problem based on that information.

00:39:44 It's an incredibly effective way to learn.

00:39:46 Right now, brilliant, have something that...

00:39:50 I come from the scroll

00:40:00 you the context and framework that you need to tackle it. That means you can learn concepts by

00:40:05 applying them. That's that active learning again. This sort of short day practice can need you.

00:40:10 curiosity and mastery and forward slash buying a little smarter for the first two

00:40:20 that do so. You'll get 20% off. You can also view all of us from the archives. So how's

00:40:26 that? Again, brilliant. Check them out. We'll link in the description.

00:40:30 Voilà, c'est ici pour...

00:40:40 the lives of the students that they often are not aware that it's devastating

00:40:44 attacks

00:40:45 because it's crazy

00:40:46 it's crazy

00:40:47 it's crazy

00:40:48 it's crazy

00:40:49 like

00:40:50 I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry.

00:41:00 ...transfer...

00:41:01 ...to actually...

00:41:03 ...Jane Tablong was a graduate student who was studying for a degree in psychology.

00:41:08 She was...

00:41:09 ...and with a communist...

00:41:10 This is, this is, yeah, a double pound of price.

00:41:20 a member of the Communist Party.

00:41:21 This?

00:41:22 This?

00:41:23 Right on.

00:41:24 Or this?

00:41:25 This?

00:41:26 This?

00:41:30 So, can it be seen as a sort of axes?

00:41:36 That would be a hit, but not strike.

00:41:40 Add, buff, infinite, and nut.

00:41:52 This is because it doesn't have coordinates.

00:42:05 You have an echo that isolated the spatial visual of me, the facial color reader.

00:42:10 Is that a role that acts as a cross-sexual side view of physical as well?

00:42:22 What?

00:42:24 What?

00:42:25 What?

00:42:26 What?

00:42:30 that he was suffering from India, and the crisis was not long-term administration.

00:42:36 It's very hard to do that.

00:42:39 I can't see that.

00:42:40 He took a vacation to Paris with his friend Francis Ferguson, however he wasn't exactly

00:42:46 good company being consumed with his own melancholy.

00:42:50 Ferguson tried to cheer in the news that he was going to marry his girlfriend, when he heard this something inside of him and he-

00:43:00 Ferguson was able to fend him off but from then on he became convinced that his friend

00:43:07 had serious mental problems.

00:43:13 I don't know, I don't know, I don't know,

00:44:50 conflict between the medical computer gravity and the absolute art of

00:45:00 Understandable and exciting.

00:45:02 As a result, the students who referred to him as Opie began flocking to his lectures.

00:45:06 Within a couple of years, a cult of personality had developed around him and he had his own...

00:45:10 He relished the attention and he gave his time generously to his students.

00:45:16 Often discussions would be held after class with students.

00:45:20 Ja, goed gewoon.

00:45:24 Wat, die terministische pijlers, allemaal wat, allemaal wat.

00:45:30 Albert Heimer continued his physics research.

00:45:32 He published more papers on quantum physics

00:45:35 but did not make any groundbreaking discoveries.

00:45:37 He did, however, convert the Berkeley lab...

00:45:40 ...into a world-class facility, establishing the new quantum physics as a legitimate science in America.

00:45:46 Oppenheimer totally immersed himself in his work and the animation of...

00:45:50 students a radio or the newspaper when his mind wasn't on physics he would be studying

00:45:56 Hindu mythology or the ancient classics as a result

00:46:00 he was a total force from the outside world when the great depression struck following the 1929

00:46:05 wall street crash it was certainly none the wiser being insulated from the effect

00:46:11 Now, just before we get into Oppenheimer's work during the war, let me take a quick break to tell you a bit about the brilliance.

00:46:16 As always, I know the brawl ads in the middle here, they're not perfect, but when we see...

00:46:20 started by Graphics, we really want to be a longer-form content channel, and sponsors

00:46:25 they make it possible.

00:46:26 You've heard me talk about Brilliant before, they're a learning platform that focuses on

00:46:30 This is where you put information on the scientific concepts and then you're asked to solve a problem based on that information.

00:46:36 It's an incredibly effective way to learn.

00:46:38 Right now...

00:46:40 and add something that you could use the glasses on.

00:46:50 Want net waren de dingen die inderdaad hebben op dat duur weer een keukwebberd is.

00:47:00 it never runs out of memory of close his computer but yes

00:47:10 Yes, but before the previous bomb to France.

00:47:20 Back. It was coordinate 3 yet exact terministic.

00:47:30 I don't forget they have formally defined

00:47:39 10

00:47:40 And now it's just a cool architectural culture.

00:47:50 Eeee

eeee

00:51:28 All of them were a couple of the war tracers.

00:51:30 You know, you live a lot more clearly, but you start by signing and then sort of dating,

00:51:34 but actually, I don't like something or make it, but...

00:51:39 I can't do this.

00:51:40 So, preparation isn't most at most safe, just a good destination to some time,

00:51:47 but I'm not going to get across the things of the power.

00:51:50 That's what we're doing. I hope that that's what we're doing.

00:52:07 It's impressive, yeah, it's cool, yeah.

00:52:23 And she did this

00:52:31 It's been originally estimated that the year 13th of all the scientists from all over the country were analyzed by the opportunity and by the end of the war, the war was sick.

00:52:40 I don't know what to visit, dude.

00:52:50 with them and spend their time off hiking and see if they have families with them, they

00:52:55 can always read more conference calls from life.

00:53:00 All that is in Dallas, let's pay there by the end of the program, and I think, eh, see.

00:53:05 During this time in Los Angeles, he must have tapped his phone, opened his mail...

00:53:08 Yeah, he had covered that my phone, he forgot.

00:53:10 Ja, aber wir haben schon da noch ein Bord durch die Tasche, die wir haben auch.

00:53:22 They were only once in a lifetime struggle, a very salvation.

00:53:31 Alamos had come up with two designs for the atomic bomb. They were codenamed Little Boy.

00:53:40 The scientists were so confident in the sign of Little Boy that they deemed it unnecessary to test.

00:53:46 But Fat Man? Wired testing.

00:53:50 decided to test fat man near ala cora in new mexico it was a 60 mile stretch of desolate

00:53:54 landscape from north to south and 40 miles east to west to carry out the explosion safely they had

00:54:03 dust and debris travel over residential areas. Better wait for what seemed like forever just

00:54:08 to get the right conditions.

00:54:10 During this time, Oppenheimer was wound up with stress that things could go wrong and that they would unleash destruction on the citizens of New Mexico.

00:54:18 And the conditions were right.

00:54:20 The explosion took place on July the 16th, 1945.

00:54:23 The resulting flash was visible from three states.

00:54:27 The mushroom cloud raised 38,000 feet into the air.

00:54:30 The crater that was found was half-wide.

00:54:34 The other scientists gathered at the site cheered enthusiastically

00:54:37 in the wake of the explosion, but not open high.

00:54:40 He found the situation asked to quote from the Hindu text, the Bhagavad Gita.

00:54:43 Now I am the current world.

00:54:47 Yeah, it's just that I don't know.

00:54:50 Dat soort dingen.

00:55:00 He decided to use it on the Japanese in order to force them to surrender.

00:55:04 On August the 6th, 1945, the B-29 bomber Enola Gay dropped a little boy over the city of Hiroshima.

00:55:10 90% of the buildings were instantly destroyed, along with 66,000 people.

00:55:16 However, the immediate Japanese surrender was not forthcoming.

00:55:20 On August 9, Fat Boy was dropped on the city of Nagasaki, causing 42,000 further deaths.

00:55:25 The double whammy was too much.

00:55:27 On August 14, 1945, Emperor Hirohito.

00:55:30 ...announced the Japanese surrender when he first heard that the bombs had brought about the desired effect of the nation.

00:55:38 On laser reflection, however...

00:55:40 He took in the realisation of just what happened upon the world.

00:55:47 No, not better.

00:55:51 On October the 16th, 1945, Oppenheimer relinquished his position at Los Halibos.

00:55:56 He returned to Caltech before taking up a position as Director of the Institute.

00:56:00 advanced study at Princeton University but after three years of excitement power

00:56:04 and cutting-edge research he found in university life rather mundane

00:56:10 about the Manhattan Project now in the public domain, Oppenheimer became a household figure

00:56:14 with his face appearing on a magazine. He now used his position of prominence to lecture

00:56:22 N'aïe ?

00:56:25 Ah, d'accord, d'accord, d'accord.

00:56:30 Ah, well, I don't know, but I don't know, I don't know, I don't know,

00:57:50 And the hydrogen bomb, named Mike, was exploded in 1952.

00:57:55 I received a letter from Othello Lynch.

00:58:01 This is how I need to push into the icebergs of the sea.

00:58:10 An investigation was then undertaken, progressed, it became obvious that he was really being

00:58:15 investigated for his opposition to the High Horn Project, while the...

00:58:20 The resulting report that they shot Oppenheim out of any involvement in government affairs

00:58:25 that was determined the proof of fundamental defects in his case.

00:58:30 Following the humiliation of his ouster from the government, Oppenheimer returned to the Institute for Advanced Study.

00:58:36 In 1963, with the McCarthy Reds Gala...

00:58:38 Okay, awesome.

00:58:39 Okay.

00:58:40 Oké, ik ga aan de handen op.

00:58:44 Bro, ik zie je niet.

00:58:48 Ik zie je niet.

00:58:50 Peace.

00:58:51 Peace.

00:58:52 Peace.

00:58:57 Peace.

00:58:58 You.

00:58:59 The fun.

00:59:00 This one is um...

00:59:04 ...the revelation...

00:59:06 ...the deviation...

00:59:08 ...for...express...

00:59:10 She

00:59:20 to remember information like getting more sleep or vitamins but this video is about those tricks.

00:59:30 What is a mnemonic?

00:59:31 What are memory tricks that can help you remember long strings of information, often, in a particular order?

00:59:48 It's fine, you can have been good.

00:59:50 This is fett good to be able to do that.

01:00:00 No, no, no, no

01:00:40 Dan vallen we helemaal af.

01:00:52 Dat pakar ook z'n stren, die heeft wel eens pensie, epigenetisch.

01:01:00 Ik werd ook pathologisch, dankbaar aan de CDC, zonder The Walking Dead alleen maar als cover-up.

01:01:12 Ja, het is allemaal echt kut.

01:01:23 But it puts out the error to RCC minus the legacy.

01:01:31 Goed, nee, dit is het juist.

01:01:35 Bordel, wadders, calobellen, lekker, dat soort dingen.

01:01:41 Het is heel erg irritant.

01:01:53 Ja dat, die hebben twee van die bellelux katten zeg maar.

01:02:00 mother bufow and africa

01:02:05 yeah

01:02:08 yeah

01:02:10 Dat loopt allemaal een beetje te paard met elkaar he, he, he,

but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is, but I don't know what this is

01:05:12 Huh?

01:05:13 The danger is on that.

01:05:15 I don't know.

01:05:16 I don't know.

01:05:17 I don't know.

01:05:18 I don't know.

01:05:19 What's up?

01:05:20 Ja.

01:05:30 Goed.

01:05:32 We zijn weer mensen die er mee gaan maken.

01:05:35 We zien, jullie hebben contact met de buurt en de buurt.

01:05:40 Maar het is groter in Amsterdam.

01:05:44 Ik zit niet in de video.

01:05:52 なんかコントローラーだな

01:06:53 ありがとうございました。

01:07:02 Thank you very much.

01:07:50 Thank you.

01:08:26 Wow.

00:15:23 Nou, de monetaire waarde van mijn digitale voetsporenkennis.

00:15:31 Leven enzovoort als individu egoïstisch is astronomisch tabiel hoog.

00:15:40 Dus ik weet niet wie naar wie aan het cannibaliseren is.

00:15:44 Al jaren gewoon.

00:15:47 Kijk bro, doe dit gewoon.

00:15:49 Het is een soort vierwielde heen.

00:15:50 Ze hebben dus een soort knoopje gemaakt en toen wel of niet dus BSD vraagt, hoe de fuck kan je letterlijk een biomedische ketting?

00:16:00 reactie uitlokken. Voor een afvalbak als het ware. Ja precies. Zonder dat iemand er nog door heeft.

00:16:10 Je zou dingen laten vergeten, geen actieve herinneringen meer aan.

00:16:13 Mark Rutte, reflectie van Tom Klootmeij.

00:16:19 En dat is toen.

00:16:20 met de dingen in huis vallen. Alles werd al helemaal getrackt, hier ook kunstmatige AI-logs.

00:16:30 met de bouwsector enzovoort, ook in zoveel zand op water en zo perfect kunstbasig allemaal.

00:16:38 Steady place.

00:16:40 defensie voor gewoon in dat atomische klop, lammerhoek ridder, ja, dus.

00:16:52 Eh...

00:16:54 ¿Dos?

00:00:40 Want mijn ex was gewoon lok-aas, gouden kalfje poer aan de wereld, aas slatterig.

00:00:50 Ja, dat is alleen de seksuele porno-defense kant.

00:00:55 Ja, het was eigenlijk ook perfect voor mij.

00:01:00 Ik ben zelf genetische type, thuisleven, interesse, balans tussen, alleen dat is een paar haar.

00:01:10 Er zit een soort rare skis op nu, een beetje op de Vivio-kant.

00:01:15 Van waarom the fuck?

00:01:17 Let's watch her.

00:01:25 Ja, want die hebben me de regenboog en niet je identiteiten van maken.

00:01:30 Dus dat deed je, die staat er hier aan nog.

00:01:36 Ja, ik zou het aan.

00:01:40 Die straat waar zij toe gaat. Panda punten, social credit punten, carbon credits, hint, smart city crypto.

00:01:50 Dan zou ik misschien die sociale uurwoningen vlakbij de Haarlemmerstraat, de Haarlemmertuinen.

00:02:00 Ruud, zal het nu geweest zijn, Ruud Han, werkte hier vandaag met Kiki? Nee, het was Usselaar, Usselaar werkte daar.

00:02:10 woonde in het privé, vlakbij Natasja de Vries, waar we woonden in Wormerveer, aan de paal.

00:02:20 aan de Provinciaalweg, waar ik die capacitive touch Philips groeve draaier van Elien had gekregen.

00:00:09 Yeah.

00:00:20 Ik heb gecheckt, ik zag geen podcast meer of niet verblijken, ik voelde me voor.

00:00:30 De volgende stage is eigenlijk best welke evolutie, precies.

00:00:33 Dat kan ik eens zien.

00:00:36 Ja, en daar werd die app, Vigrid 3D-scannen app.

00:00:41 We hebben die Spatial dingen ook, die GSP4 satelliet dingen opsloeg.

00:00:47 Dan heb ik het hier over, weet je wel, op Jean de Smet.

00:00:50 Dat ik weer een beetje met 3D-scanning, met die mobiel bezig was.

00:00:54 Dan kon ik weer met ARCore, Android, KBF, HoloLens.

00:01:00 Microsoft ja die hadden daar van die hoofden van die mannequin hoofden

00:01:06 en toen heb ik de hele bril heen genomen

00:01:10 elektronica enzovoort, Kokinsand, Digital Studio en Birebo, ja toch ter bedrijf van.

00:01:21 En nu dan met die app, zeg maar, weet je wel, versus Jits kun je private audio nekomen.

00:01:30 met een beetje hetzelfde soort interface

00:01:33 want ASA met z'n andere MARF

00:01:35 weet je wel, ASA had die interfaces vastgemaakt toen ik net zeg maar weet je wel

00:01:40 actief scherp gezet werd tegen Livestreet, met die brain mismanaged-itis, AMC, The Walking

00:01:46 Dead, Fear The Walking Dead, Abigail, of...

00:01:50 van de negers versus de blanke en alles ertussen in en de regenboog enzo.

00:02:00 Toen keek ik op mijn Instagram en dingen en zo.

00:02:03 Toen was iets wat met de binnenschoot was van Azenwisseldere Bar.

00:02:06 Ik kon wel die apps gemaakt hebben, die interfaces.

00:02:10 Die waren toen niet zo super open en hij die dat niet zo handig was met de UIs maken en zo.

00:02:20 jarenlang voor LNR, rooftop-VR, treehouse-parties, organogram, genealogische bloedlijnen enzovoort.

00:02:30 Omdat ze zo zielig is en misbruikt is en zo'n geil wijf is en zo'n zielig mooie schild en verhaal heeft.

00:02:40 Hij voldoende op Wouderwijk, ik heb mijn eigen proces, ja precies.

00:02:50 Moest dan dit allemaal verdragen en zo en afstaan aan jullie?

00:02:57 Met welke data denken jullie en welke controlemechanismen?

00:03:00 Dus ja, je hebt tijd met die gei daar door.

00:03:10 Nee, het zit zo achter hoe persoonlijkheidssplitsingen werken en afbijgingen tijdelijk.

00:03:21 Ja, maar dat betekent dus niet voor iedereen met kanker, ja, letterlijk een diteren genetisch pakket.

00:03:30 dat dat voor iedereen beschikbaar komt

00:03:32 van dan kunnen we wel weer alles

00:03:33 katapuleren voor iedereen

00:03:35 dat ga ik niet doen

00:03:40 Ze hebben alleen maar bewezen dat ze het niet verdiend hebben.

00:01:38 Ja, dan heb je toch...

00:01:40 Het gaat snel, want dit is niet persoonlijk maar financieren, precies.

00:01:44 Het is ook voor de kerstdienst, precies.

00:01:50 Nou moet je echt niet moeilijk doen, maar dan zit je weer wel weg, precies.

00:02:02 Mm-hmm, probably dead.

00:02:09 Yeah.

00:02:10 Ik weet het zo goed, ik weet het precies.

00:02:13 Oh, ik denk dat het niet goed is.

00:02:18 Ik denk dat het goed is.

00:03:01 Hoe heet die nu nog wel?

00:03:03 Dit is één appelsvaart.

00:03:06 Die heel zoet sap wacht.

00:03:08 Dat wordt echt wel een kress op.

00:03:11 En dat weer de next, we horen dat je een appel met appelpeutje toch, Jessica Cordes, kijk eens.

00:03:21 Maroods, dagbesteding, zilkroods, een beetje gehandicapten plaats.

00:03:30 Ja, precies. Ja, dat bij mij ook dingen als middellijzer voor de grap.

00:03:40 Ik leef toch nog en ik ben niet helemaal uit mijn plaats gegaan.

00:03:44 Ja, precies.

00:03:46 Ik zou ook koppers in hebben met eten.

00:03:50 Nee, dat zit niet zo.

00:04:00 That's the first thing.

00:04:16 Dat ga je wel moeten...

00:04:18 Moet even, hè.

00:04:20 Zij vervieren.

00:04:23 Ik ben een protectie van een blauwe.

00:04:27 Ik ben hier zo een miljoen image.

00:04:31 ...dat ik het zeker in ga, precies, dus ja, maar persoonlijk zo ook.

00:04:40 En dan moet ik het snel weer kunnen raken, of dan.

00:04:46 Tja, of ik niet, dan heb ik iemand gehoord.

00:04:50 met een ijspit neersteken en oprijden op een live stream en eet dan.

00:05:00 Ik wil niet iets raar te verklaren, waarop minder mensen op de planeet zijn.

00:05:11 Loos en raak en mooie vallen podcasts over serieborgenaars.

00:05:20 Gevangenen en dingen enzovoort.

00:05:22 Gelukkig bestaat het nog en wordt het steeds beter en zelfs thuis toegepast.

00:05:28 Want mensen zijn het in fantasie.

00:05:30 Helemaal losgegaan.

00:05:33 Dat mocht een tijdje.

00:05:37 Gewoon, want dan gaan al vluggroutes in de...

00:05:40 heel menselijke, pathologische gedrag, of waar wordt dat in kaart gebracht van iedereen?

00:05:45 En dat zie je bij mij niet snel te weg.

00:05:48 Ik toch wel, dat lijkt wel eens.

00:05:50 Het was een beetje een soort sociaal, misschien gaat het breed lange termijn.

00:06:00 Gezondheid, ideeën, research, zullen we precies.

00:06:04 Dat komt dan ene sentiment door het systemen.

00:06:10 Ja precies, of Groeningen precies, het is een hond-oranje-deer, want rood-wit-en-blauwe, daar zou ik wel graag zijn.

00:06:22 Het is echt mogelijk alles volgende wedstrijd.

00:06:31 ...en woord worden fysiek.

00:06:36 Maar...

00:06:40 Anything can happen.

00:06:43 Dat is het spannende aan het leven.

00:06:50 Het is verdubbeld, ja precies, girdles en deterministies.

00:07:00 Alles is hard te worden.

00:07:05 Ja, ik weet het niet.

00:07:07 Het is zeker niet voor duidelijk een kabinetje.

00:07:10 En heb je het van mensen in de kast ofzo?

00:07:13 Nou, die zijn de autos die hier vreemden, dat ze van de weg waren.

00:07:20 Preciso.

00:07:34 Ja, ik denk dat deze tas...

00:07:40 Een beetje in het leven gaat gaan in wat we echt over hebben, wat er bestond op het planeet en waarom.

00:07:50 Het is toch een beetje gelukkig op tijd dat Nederlander stekt aan de bel van de bus.

00:08:00 Dat denk ik niks, maar het is een korrekt...

00:08:10 Yeah, I could work when it comes to Marco Polo, the adventures of Marco Polo.

00:08:20 Gewoon een basketbalveldje. Ik kreeg bijna een keer de bal op mijn achterhoofd, toen zijn het voetballen daar, toen hadden we met Jürgen samen aan het...

00:08:31 Een beetje in oefenen van de basketball shots, balisten trajectories en dat soort dingen, ik pas het meer op.

00:08:40 the computer fish, the machine learning algorithm is involved

00:08:43 and at which point it can be discarded for us and for our media.

00:08:50 Ja, dan kan ik zo thuis, kan ik zo thuis.

00:08:53 Ik ben niet antropole.

00:09:02 Ik ben geïnteresseerd in diversiteits- en mercatieren, subcutieren.

00:09:10 Ja, ik weet niet, ik heb een brede interesse, maar niemand had het ook veel zin in een open gezin dat ik daar heb.

00:09:20 Ik heb nachtapotheekjes nodig die, ja, precies.

00:09:33 Yeah, yeah.

00:09:40 Er zijn bepaalde drugs, die kan je op YouTube kijken, bepaalde chemische stoffen.

00:09:50 Want als je die ingest, dan ben je er ook niet lang meer op, dan gaan dingen niet meer goed.

00:10:00 Of ga je hele zintuigen met een klote of je eigen bewustzijn doet het dan niet zo goed meer.

00:10:08 Ja, nee, zorg er maar.

00:10:10 Ze kijken erop, het is er wel een bepaalde afmeting van verschalde prikjes.

00:10:21 Ik weet niet hoe je het tot je neemt op en toe biedt, ja precies.

00:10:25 Oké, dit komt nog.

00:10:30 Het roepen niet altijd exact, dit is echt een spulgakelijke sport van mensen en het beteel weer wel eens een zin.

00:10:41 Florenties, buddhistische zorgendapen, afgelopen vliegtuurzetten, dat is wel een beetje beter.

00:10:51 Ga je een dag, hoe dat dan toegeleid heeft, chronologisch.

00:10:55 En wat je intentie was en hoe dat knikje...

00:11:00 persoonlijk uit een psychiatrisch profiel tot stand is gekomen en hoeveel risico we kunnen gaan nemen met diegene.

00:11:10 En ik ben zelf een kwestiekekek

00:12:56 Ik hoef niet bang te zijn voor mijzelf.

00:12:58 Ik hoef niet bang te zijn voor je op dat moment process driver.

00:13:00 Discrusten, achter de schermen, tbs-achtig, dit hele verhaaltje dat ik niet wil zeggen.

00:13:10 Ik ben in een zwaar levensgevaar geweest, intern, in mijn lichaam of vlees, ik bedoel extern dan in de wereld.

00:13:20 als ik me niet kon gedragen en onder zware psychotische frequenties.

00:13:30 Golfjes, externe, psychotisch houden en middelen die hem toegediend zijn tegen mijn wil heen of onbewust.

00:13:41 Het is een soort concentratiekamp, zie ik gewoon bij neurotoxin, perfetin-achtig, waardoor ik niet meer tot rust kon komen.

00:13:51 Waarom ga ik nou op het licht en aftrekken tijdens de schoen van, gewoon geen vrije wil meer had en zo.

00:13:57 Ja dat was, ja ja.

00:14:00 het partij dat van zoekomens enzovoort, hadden eigenlijk volgens mij geweest kunnen zijn als een soort tethered, een soort gevaarlijk.

00:14:10 verpleging, zeg maar seksuele genot dingetjes enzovoort als ik het nodig had tot het helemaal gecaptured flakelijk.

00:14:20 speciaal temporel die helemaal, nou dat is het nieuwe goud, ja ik kan niet echt goed uitleggen

00:14:30 Waarom mijn realiteit, al die dingen zijn waar voor mijn persoonlijke beleving.

00:14:37 En ook gevolgen soms voor mensen of redenen.

00:14:40 organisaties enzovoort. Alleen, ik hoop dat het niet zo snel exacte, concrete dingen de hele dag

00:14:51 te verzegelen ofzo, als een soort kilcontracten enzovoort, ja precies, weet je?

00:15:00 Wie wel?

00:15:01 We hebben ook mensen wel.

00:15:03 Die per se betekent ja, wie wel.

00:15:15 Nou ja, weet je, jullie kunnen allemaal schrijven in een stoerhaal.

00:15:20 praten hebben enzo. Je gaat de familie niet verhalen enzo. En je kan het zelf alleen.

00:15:30 Maar misschien in die rijkte enzovoort overregelen, dat was iemand diegene niet bevalt ofzo.

00:15:36 Ja, die gisteren aan de deur stond op die dekker.

00:15:41 Dan kan ik ook wel het aan doen.

00:15:43 Ja, precies.

00:15:45 Het heeft er niks meer.

00:15:50 met seks te maken, zeg maar. Weet je wel, maar jagen en er komt vrouwen, ja, seksueel is een prover.

00:16:00 Bijvoorbeeld een hele hoop vrouwen best seksie enzo, maar de creep factor zeg maar.

00:16:10 niet gewilde wensen in je persoonlijke omstandigheden, die zijn jarenlang ook per seconde van de dag en nacht.

00:16:20 Nou ja, niet geweest.

00:16:22 En creatief.

00:16:25 Het is maar precies.

00:16:27 Ja precies.

00:16:34 En het duurt nog eenmaal niks aantal jaren om niks aantal jaren oud te worden.

00:16:40 Ja precies, als iedereen een beetje water bij de wijn doet, kunnen ze op hun eigen tuin allemaal.

00:16:51 Ja, bijna wel dat hij zich kijkt naar oud-basisvoorzieningen, zoals basisschool en zo.

00:17:00 We hebben dan speciaal religieus onderwijs en zo.

00:17:04 Gewoon bepaalde religies waar ik heb niet altijd kunnen met de hele tijd.

00:17:08 Dus we hebben wel wat geleerd van hem.

00:17:12 En dat is Nederlands en misschien enigszins een hele lokaal.

00:17:17 Ja precies.

00:17:20 Want wereldwijd, eh, ja dat. Wereldwijd, ja precies.

00:17:26 Nee, nee, nee, maar kijk dan...

00:17:30 Dan bestaat er ook nog de reden, de manier waarop we basisschouden kunnen zijn.

00:17:35 Waar mensen gewoon enigszins door de waarde leren waar ik.

00:17:40 We hopen dat ze het er nog aan kunnen maken, maar dat komt dan anders maar lekker niet.

00:17:50 Ja, selectief. Precies.

00:17:52 Oh, dit is een lange termijn.

00:17:54 Juist.

00:17:56 Je hebt het gekocht.

00:17:58 Je hebt het gekocht, je hebt het gekocht.

00:18:05 ¿Perdón? Ya te desgámoslo, ¿verdad?

00:18:08 ¡Precis!

00:18:10 Hij is niet per se geschikt geworden.

00:18:21 It's here.

00:18:22 There we go.

00:18:23 No.

00:18:24 No.

00:18:25 No.

00:18:33 Ja, de ASDP of het zetkomt.

00:18:45 Snap je wat ik allemaal moet doen?

00:18:51 ...om er niet te hard er nooit controle uit te halen.

00:18:55 Ja, als je de wees meer kunt doen...

00:19:00 We weten waar een nieuwe behangbel in kreeg.

00:19:05 Dus dan kunnen we alles een soort schild verdragen.

00:19:10 Soms is het gewoon oké, jullie designen een bos en dan kappen we gewoon in het bos en dan is er een puur in de land, en dan is er 20% over.

00:19:22 En dan ook bij de top te zitten, daar krijg je misschien niet meer op.

00:19:35 Yeah, it's been a while, and well...

00:19:40 Dat vind ik wel. Hopelijk destilleert het, zeg maar, de cruis-atholistische seksuele kant.

00:19:50 En niet voor de jonge kindjes meteen en zo, weet je wel, maar volwassenen die wel een beetje wat gewend zijn en zo.

00:20:00 Als je voorzicht wordt, kan je soms...

00:20:03 Ho?

00:20:04 Vriek dan.

00:20:05 Best wel plezierig.

00:20:10 Ja, dat wil ik wel doorleven gaan doen, ja precies.

00:20:20 Ja, daar. Ja, kakke ziekte.

00:20:26 En dat. Ja, precies.

00:20:30 Die gehandicapten allemaal, ja precies.

00:20:33 Ja dat.

00:20:40 We hebben nog steeds niet allemaal hetzelfde begint.

00:20:50 Dit was het privé, maar ik weet het wel wat er is.

00:21:05 All right.

00:02:40 Ik voelde het in een paar gif of zo, maar kijk je.

00:02:51 Ik denk dat het geeft zich open bij deze.

00:02:53 Ja precies.

00:04:03 Echt het leven, ja precies.

00:04:11 Yeah.

00:04:21 Oh, dan sta ik hier een beetje tegen de muur en de twaag enzovoort.

00:04:28 Ja, precies.

00:04:30 De digitale eet dat, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm, ehm.

00:04:42 Jij zit nog wel in straat.

00:05:12 Later, later.

00:05:14 I'm going to see you tomorrow.

00:10:11 Yeah.

00:10:12 Well, I'm going to try to show you.

00:10:24 I think I will fuck out the land.

00:10:31 a few years ago, a mic cable, yeah, this is, I mean, God love it.

00:10:40 and that is effectively a sexual food marker that is really a bossy hammer in each car.

00:10:50 I don't know.

00:10:52 Great, this is it for sure.

00:10:55 I really love this thing.

00:11:00 Dat heb ik gevoel waar jij het weer niet...

00:11:04 Maar dat is prima.

00:11:06 Dankjewel.

00:11:14 I'll leave it by her in Section L, Oscar Bond.

00:11:42 Ja, met Jody.

00:11:45 Een luchtdrukpistool.

00:11:47 Ja, dat was een paar.

00:11:50 Die bruggelachter was.

00:11:54 Dat vind ik.

00:11:56 Gatekeeper.

00:11:59 Met een wand.

00:12:01 Ja, in ieder geval boten, weet ik wel.

00:12:10 Lijnlijnen enzovoort, zoeterrein zijn, ondergrond, waar is het daar?

00:12:20 Zo schildert.

00:12:22 En dat zou ik zeggen.

00:12:26 Dat is dan een goede beelding.

00:12:31 Weet ik, maar dan tegenhouds of beterhouds, precies.

00:12:40 It's tough, there is something like this, and this is the Bible.

00:13:00 Ik kan ook, ik kan heel goed werken in het privé.

00:13:11 En digitaal, en heel erg hoog, en het klikt wel wat in scène gezet is en wat niet.

00:13:21 Yeah.

00:13:33 Yeah, so it's just a little bit that it looks like.

00:13:40 Maar de dingen die ik dus niet exact weet, meteen, worden ook weer aan het verraden laten.

00:13:47 Als ik er nog een gedoe verleden het jaar weer heb.

00:13:51 En dan, soms ook met gevolgen of zo, maar zacht uitgeweeld, zacht uiteindelijk.

00:13:58 En zo kunnen we verdinnen, verdinnen, verdinnen.

00:14:01 met je interne organes, dan een beetje raadvallen en precies.

00:14:05 En toen werd er ook gelesen, dus dat zijn partij gekritten die iedereen kreeg.

00:14:11 Maar ik neem die zware last op.

00:14:14 Dit is je weer meteen te draaien.

00:14:20 We zien niet de game, maar daar gaat helemaal niks echt veranderen.

00:14:30 We gaan niet naar de type 3, 6, 6 of 9, precies, of naar 3, 6 misschien wel.

00:14:40 Het mag passen als dit allemaal smooth gaat lopen.

00:14:44 En dus dan een beetje.

00:14:50 En dat is de moedeloos, met mij als persoon en als indifigde wil gaan.

00:14:55 Ik heb de blauwdraker op 1976 en 2014.

00:15:00 Want er zijn een hele hoop mensen die op zoek zijn naar, nou ja, bezachtende.

00:15:10 Het verbeterde gewoon voor iedereen iets en dat is heel persoonlijk, precies individueel.

00:15:23 En ze zijn ook heel veel mensen die elkaar niks geven.

00:15:30 Maar destructief wel.

00:15:32 Dus daarom snappen jullie niet waarom ik een beetje merauwetisch ben.

00:15:38 Ik moet wel bij gaan op de rest.

00:15:40 of 9x12.1990 en ook het liefst in een mysteriehuis jasje, een halsje.

00:15:50 No more trouble, man.

00:15:52 Tough.

00:15:58 No jokes, keep doing it all.

00:16:00 the double A slide in the Crucible's form door with the...

00:16:10 Super soldiers, super soakers enzo, en ja, ontvangers van super soakers.

00:16:18 Heb ik.

00:16:22 Echt, heel erg hard gewoon, want ik ben dat kapautetje dat de ruimte is, ja precies.

00:16:30 But you know, there ain't some time before we're in it, right?

00:16:40 Hey, it's a nice one in the morning, and it's for the office, so I don't know what it's going on, that's how it's going to be there.

00:16:50 Het is niet namelijk alleen maar...

00:16:59 Niet alles is kut.

00:17:00 Ik denk persoonlijk, ja precies, dat ik, ja, ik blijf met je tak uit.

00:17:10 op het nijntje heen, gewoon daar lang geen zeerde plek van, want ja, van mijzelf.

00:17:17 Ik heb natuurlijk niet al...

00:17:20 Het mooiste op het feestste en zeker niet een beetje achterstandig omhouden.

00:17:30 Ik ben een beetje zielig persoon, ik luister naar een eindzaam in bepaalde gangen.

00:17:40 Ja, zie je al zijn beste, ik denk wel even in een heven, dat is een klein beetje hevalistisch en seksueel.

00:17:50 Slaar opgehit, inderdaad.

00:17:55 Maar hoe fok je, zeg maar, als je daar...

00:18:00 die mensen seksualiteit goed worden.

00:18:10 Yeah

00:18:20 Ja, ik weet niet of ik er weer weg werd.

00:18:23 Ja, maar...

00:18:24 Ja, precies.

00:18:27 Oké.

00:06:50 een multi-level marketing scheme zoals jullie allemaal wel kennen en publieke tentoongesteld.

00:06:55 Nou, ik een pillendoosje maak, zodat ze de medicatie...

00:07:00 of een medicatie gegat, dan had ze pijn van binnen en dan voelde ze zich ongelukkig.

00:07:10 Ik ga niet plattig.

00:07:12 Dat was ook wel zo'n werk met 360.

00:07:14 Met remote control.

00:07:17 Nee, gewoon een SmartPay.

00:07:20 doosjes zeg maar zodat je je dagelijkse medicatie niet vergeet op bepaalde tijden enzovoort.

00:07:25 Daar kan ik nog heel lang moeilijk doen enzovoort weet je.

00:07:30 Dan denk ik bij mezelf dat ik in de afgelopen jaren heb heel weinig kwaliteit.

00:08:00 Yeah, that's good.

00:08:10 Zijn er zo, dit is eigenlijk een taalstoel, ja precies.

00:00:33 Obrigado.

00:00:43 Dat lijkt dan niet.

00:00:45 Het is altijd niet wat we hier op moeten rijden.

00:01:03 at the cities.

00:01:23 It's out for us, mate.

00:01:30 Maar dan komt ze niet gewoon zo, want daar hebben we een of andere labiele portal-lijnreden.

00:01:40 Toch, ACM is de andere baar. Had letterlijk borderline. Geen actieve herinneringen meer aan alles.

00:02:51 No, I think I'm going to open it up

00:02:55 I think it's a hell

00:03:00 ...voorzichtige waaier, Fransfab, Lef, Vue, Congresses waar je in seks kan...

00:03:10 een politiek kazijn, de elite, Chantamé-pad, dan kun je in het moment niet genoeg symbolisch uitbeelden.

00:03:20 Wacht, Jetten, kom.

00:03:23 Jsf, Jetten.

00:03:30 Joint Strike Fighter, kom op, ad hoc, asymmetris.

00:05:17 Kijk, dan kan ik binnen roken.

00:05:20 En ze met z'n andere mooie tegen mij.

00:05:22 Oh nee, tegen die mensen die dan toen mij bestuurden.

00:05:26 Daar pakken we nu op terug.

00:05:28 En dan is het, kijk, onder de kacht.

00:05:30 Goh, ik kan goed kapot schieten met een kruipsboog, toch Hansi Klautwijk.

00:05:33 Gewoon logisch, de trek erover halen, de paarden ze eruit halen, maar nu is het roken.

00:05:40 En dat is het middelopvlakteam, Koen en Sander show, een hitsige Jitske, Paralympische, Olympische, seksuele Sophie Strandberg voorzien.

00:05:50 De gehandicapten van seksuele, pleasury, sensore ervaringen.

00:15:20 psychotherapie of wat dan ook

00:15:22 maar mijn lichaam is gebruikt als terrordroom

00:15:26 ten koste van alles en te proberen te linken en goed te praten enzovoort

00:15:32 Wat is een kunstexpositie?

00:15:40 En wat mij niet alleen ontnomen is, er is geen privacy meer.

00:15:44 Privacy is dood.

00:00:30 their hatred to kill you to kill anybody not wanting solitude not understanding solitude

00:00:40 They will attempt to destroy anything that differs from their own.

00:00:45 Not being able to create art, they will not understand art.

00:00:50 They will consider their failure as creators, only as a failure of the world.

00:00:58 Not being able to love...

00:01:00 en dan kan er op een verhaal

00:01:02 dan worden er weer over waar we het niet verhaal

00:01:05 op de woorden gespeeld

00:01:10 perfect, like a shining diamond, like a knife, like a mountain, like a tiger.

00:01:20 My camera, their finest parts.

00:01:25 He was Duits, with his oorlogs machine.

00:01:30 Die gaf me vroeger, ja in dat Zwitserse zak meest waar ik mijn duimtopje mee afgesneden heb.

00:01:35 Mijn capacitive touch, de rechterduim waarschijnlijk.

00:01:40 enzovoort, maar die heeft me oorlogsboekjes, cartoonachtige skimelks te geven van tanks enzovoort.

00:01:50 Onder andere. En een sticky, ja het is bijna lullig, maar het is zo'n katjeautomaat en een sticky ding waarmee ik...

00:02:00 Toen ik daar sleep, zeg maar, veilig. Ik ben het letterlijk nooit, ja, direct op die manier.

00:02:10 Maar zo'n sticky hand van, ja, hoe doe je dat chemisch?

00:02:16 Het is niet gummi.

00:02:20 Maar letterlijk, dat blijft dan plakken en dan kon je daarmee, weet je wel, iets van ver af, zo'n sticky ding waarmee je vliegen ook vangt enzo.

00:02:31 Kijk, een vervaltje voor de andere keer in Hansje Klootwijk.

00:02:36 Een paar jaartjes, ten koste van mijn privéleven.
