00:30:14 Plan the life you'd like to have.

00:30:17 And if you do that part, be by recurring.

00:30:20 on my own people in the society's data group and support.

00:30:24 But the other way you do that is by

00:30:26 how to go a conversation with yourself.

00:30:28 I'm going to take a help.

00:30:30 But this time, you won't do what you tell yourself to do.

00:30:40 those work for you what you want to do and then when you tell yourself what to

00:30:45 do you don't do it anyways you should fire yourself and find someone else

00:30:51 My point is, is that you have to grow servants, so there's someone that you have to negotiate with, and that's, you're someone.

00:31:00 that you want to present the opportunity of having a good life to.

00:31:03 And that's hard for people, because they don't like themselves very much.

00:31:06 So, you know, they're always, like, cracking the whip, and then...

00:31:10 I'm going to sleep well.

00:31:12 I'm going to sleep well.

00:31:15 I'm going to sleep well.

00:31:17 I'm going to sleep well.

00:31:19 I'm going to sleep well.

00:31:20 I think we had an economic conversation about that a while back, right?

00:31:24 You're trying to probably work with 50 bucks now.

00:31:26 Something like that.

00:31:27 I think you're not getting paid that now, but you're young.

00:31:30 And so this is investment time, and that's the future, so let's say it's 50 bucks an hour, which is perfectly reasonable, so if you waste six hours, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it, you're not going to be able to do it,

00:31:40 hours a day, and even $100,000 a year, so like, oh, it's a damn time.

00:31:50 So let's say it's not 50 months.

00:31:56 One of the things you should do yourself is when you stand it out.

00:32:00 Well, what if I paid someone 50 bucks to have had one?

00:32:04 And if the answer is no, you should do something else with your content.

00:32:10 And then I have some alt-mode crypto for a few makers data.

00:32:20 What you do is you suffer existentially.

00:32:24 That seems like a stupid joke.

00:32:30 Anyways, Cal, that's how you can improve.

00:32:40 Here's something else you can think about when you're negotiating in your life, you can say, if you're going to agree with, I'd like to walk away.

00:32:50 and resentful okay let's call that a that's a good thing to know negotiate so

00:33:00 Alles is trouwens wat gedaan, als je het gratis doet, dan heb je het voorpaksjes gedaan dat je erin staat.

00:33:10 Unless you, if one exists in a place where basically hitting each other in the head repeatedly

00:33:15 30 years you go right ahead, but I wouldn't say that thousands of people are a good way of living.

00:33:20 So you might say, well, the minimal precondition for a successful negotiation is that you don't

00:33:24 walk away resentful and angry.

00:33:26 And so that's also how you know when you have something to say.

00:33:31 Because the rule has to be, if you're going to walk away resentful and angry, you've got something to say.

00:33:36 It doesn't mean you're right.

00:33:40 to say but it's kind of a low bar you know but if i wanted to live with you for 30 years maybe

00:33:45 we should say how about we walk away from our mutual negotiations thrilled

00:33:50 Well, why not?

00:33:52 You've got to aim for something.

00:33:54 You could aim for that.

00:33:56 You want to negotiate with your boss for a new salary,

00:33:58 you might think, okay.

00:34:00 I'm not in this damn job. How much would I have to be so bloody excited to go to work, I can hardly stand it.

00:34:06 You can at least know what that number is.

00:34:10 You could go there and say, well, look, you know, you'd like to have me around?

00:34:13 If you paid me, I'd be so thrilled to go to work.

00:34:20 And your boss might think, wow, I've actually really liked them.

00:34:25 It's like, I can't give you all of that.

00:34:31 in a year. Hey, good deal. Or you could be some weasley coward and go in there and snivel

00:34:38 about how awful.

00:34:40 So exactly, this is barely able to tolerate that come of the negotiation.

00:34:46 I would recommend that.

00:34:48 And it's funny because I've watched people...

00:34:50 We plan all the time because the rule is you're going to come and see me, I'm going to try to hell out of half.

00:35:01 We're going to think about that strategically.

00:35:14 That's the first thing, he's like, no, that's not going to happen, if you don't ask people for the damn money.

00:35:20 Don't look for a better job, but they're gonna come along and just shuffle a boat full of views like no doubt.

00:35:25 Why is that impossible?

00:35:30 you look at you people in here

00:35:31 it's like what would you want

00:35:36 the hell it was

00:35:40 Oh, shit, man, I'm pretty good.

00:36:00 So

00:36:10 And so, for example, now that I'm in my 50s...

00:36:21 And so when I go to one of them and say, you know, can you do, they say, no, but I know someone who can.

00:36:27 And that's a huge advantage.

00:36:30 That doesn't mean schmooze, that doesn't mean going to impress people at all.

00:36:40 He wants to come in front of me, he wants to come in front of me, he wants to come in front of me, he

00:38:30 that are trying to pull you down.

00:38:31 To justify the downside of that is to have any responsibility

00:38:37 that you can all whine about how wretched life is.

00:38:40 so that's pretty attractive, but I would say it's also a bad medium to long-term plan.

00:38:45 And so it's acceptable and desirable.

00:38:50 I hope you see that they're doing this exact thing in the world.

00:38:56 I'm not doing that well, you know.

00:38:58 They're not doing that well.

00:39:00 And they don't fit into that category, it's like, what's your point?

00:39:06 What are you going to do with them? It's out.

00:39:11 Falken.

00:39:13 Ja, mijn voorbeelden enzovoort.

00:39:15 Ik denk dat hij de kamer in.

00:39:19 Vreselijk.

00:39:20 that maybe the proper thing to do is say have your misery and have my life at some point

00:39:30 Because just putting up with it is, oh, well, they call that enabling, right?

00:39:33 With that sort of behavior, you're providing tacit consent for it, and even tacit...

00:39:40 It's like a bad idea.

00:39:50 That's not the same as, you know, that's another thing you can do if you want to hear.

00:40:01 Every time you take an opportunity, I would provide you with a new skill. Do it, right? Learn the program.

00:40:10 to write, learn to read, read new things, learn to public speak, learn how to introduce yourself

00:40:14 to people, learn how to social network, learn how to go talk to your boss.

00:40:21 I see this problem, and here's the solution, and so I'm going to talk to you about the problem and the solution.

00:40:31 Yeah, you have to live. You have to live today. I don't believe there's a lot of support behind.

00:40:41 Waarom ik merk van, oké, op basis van wie de bedoel moet ik dat moment bij versturen, alsjeblieft dat volgende dingetje.

00:40:50 you're just you're just another problem don't be a problem for the people who want to give you

00:40:55 money that's a good rule of thumb dad you know if someone wants to give you money

00:41:00 If they want to give you status and success, then help them do that, right?

00:41:05 And you do that in part by bringing them solutions.

00:41:10 skills so if things aren't going this is also a good way should you take an

00:41:16 opportunity here's of course time of the transaction

00:41:20 En je doet niks mee om weg te gaan en uit je leven te gaan en wat dan ook.

00:41:32 to the next situation.

00:41:34 So there's this old Jungian idea,

00:41:36 like the shark to the girl, for example.

00:41:40 The computer is made in the form of a cross, the cross signifies the centre of the world,

00:41:45 but the dome signifies the sky.

00:41:50 the world in a place of suffering.

00:42:00 And so inscribed on the floor is a maze, and you have to just think it's a Mandela.

00:42:10 Resting plates right in the center, get to the middle.

00:42:20 How do you get there? You walk everywhere.

00:42:22 And what does that mean? It means every bloody time you're offered an opportunity.

00:42:32 In fact, it actually constitutes what you have when someone takes all your money away.

00:42:40 So the way that you build up that sort of wealth, you turn yourself into someone who's

00:42:44 been in multiple directions, all the time, right?

00:42:49 Especially with the kind of...

00:42:51 You can learn anything you want, whatever you want, so what a good deal that is, man.

00:42:57 So there's easy fruit hanging.

00:43:00 Here's an example, let's say, you know, if you do too bad, maybe you're the middle of a normal distribution, then you'll lose your job.

00:43:10 Okay, so, let's say you're a conscientious person, and we can say just for the sake of argument that you lose.

00:43:20 It's just like a draw basically. But then what happens to you? Well, you're conscientious, you're going to go after yourself.

00:43:30 And especially if you're also high in neuroticism, it's going to depress you to lose your job.

00:43:34 But maybe you're in a situation where you just, for one reason or another, you don't have that many other opportunities.

00:43:40 You can look for it would be in a depressed strata.

00:43:50 You lose a job and then you start to get, ah, well then as you start to get depressed,

00:43:55 you know it decreases the probability that you're going to look for a job, but also maybe starts to...

00:44:00 Stress on your family and ability that you're going to engage in positive social interaction.

00:44:06 So now not only are you unemployed and suffering from economic stress.

00:44:10 When your marriage is starting to suffer, you're starting to isolate yourself from your friends.

00:44:14 And then, of course, as your marriage suffers and the stress builds up, then that's going to make you...

00:44:20 away from your friends and that's going to do that you're going to have enough positive

00:44:24 emotion and enthusiasm to look for another job and then you know maybe you want to add

00:44:28 a bit of a drinking problem to that.

00:44:30 for fun and you can see that you get a spiral going just taking you dead because lots of times

00:44:40 Let's say, you know, you're unemployed counselling and you get a diagnosis of depression and the thing about a diagnosis of depression is sort of...

00:44:50 The assumption is there's something going wrong with your psychological structure.

00:44:54 It's like, if you're unemployed and you're in the grass, it isn't obvious at all that the problem is in your head.

00:44:59 Good.

00:45:00 You know what I mean? It isn't even obvious that it's a psychological problem.

00:45:04 It's just a problem. And problems can take you out.

00:45:11 You're starting to change friends and you're letting through a job.

00:45:20 and spiral but you can also think of it as a conspiracy and had to conceptualize it.

00:45:30 psychological disorders that way, but we should because lots of

00:45:40 good example of that it's obvious that there's something wrong with them psychologically often

00:45:44 they just are in trouble and there isn't a category in psychological diagnosis

00:45:50 or client in serious trouble, but my experience is...

00:46:00 they have a psychological problem. Now you could say, well, their psychological inadequacies,

00:46:05 such as they might be, are interfering with their ability to...

00:46:10 cover or maybe even serve as precursors to you know increase the probability of the catastrophe

00:46:15 but it's still not exactly the appropriate conceptualization

00:46:20 It's your, there's you, inside you, and personality psychologists.

00:46:30 as if it was like a soul.

00:46:40 You're not just an individual, you're connected to all these external dynamic networks that are really, really important and it isn't even easy.

00:46:50 separate them from them, you know, like is your child more you than your arm?

00:47:00 obvious he's obvious I think many

00:47:10 sacrifice an arm than a child located in your body.

00:47:20 It can pull you down, but before, Ellen, is that, let's say,

00:47:30 And I go up to someone and I say, well, do you want to trade?

00:47:33 And they say, well,

00:47:40 That's not a very good argument.

00:47:43 You might say instead, well, here's what I have to offer.

00:47:50 evaluate it so I'm still stuck

00:47:51 and you'll see that if you ever try to sell a product

00:47:56 in the marketplace

00:47:56 if you don't, if the product is new

00:48:00 Да, и вот, вот, вот,

00:48:50 So I buy something from you and it turns out to be terrible.

00:49:00 that person was buying from it and that person was buying from him and that person was buying from

00:49:05 it like all these other people were doing the same thing so it's not like the air is localized

00:49:10 It may, and that's often a very incredible story.

00:49:13 But if the answer is, well, you know, I'll open the door with you, sonny.

00:49:22 that's an indication that you're not capable of doing that sort of thing

00:49:30 It increases the probability that the loop will continue.

00:49:49 Gracias.

00:49:51 that might open up the message and it needs help.

00:49:54 But again, it is this howling of her,

00:49:57 which is going to be deafening,

00:49:58 but no, it's not in the system.

00:50:00 He's down the line out where he's going to be.

00:50:03 That's about the D-back.

00:50:05 And I love the D-back.

00:50:07 He's going to try to move forward.

00:50:08 He's going to get over.

00:50:14 I traded with him, and I traded with him, and now I can save.

00:50:20 You know, I've created these three people, and you take the fix, and so then you say, well, I'll trade these two again.

00:50:26 Because of that, then you're even more likely to trade these three employees.

00:50:34 So, because if one of the things you guys are going to be asking yourself, that's what's happening in the...

00:50:46 I don't want to get a couple of dogs, but it's not like you need an...

00:50:58 I think everyone knows it.

00:52:14 Продолжение следует...

00:52:32 Gracias.

00:53:25 Продолжение следует...

00:57:16 Gracias.

00:57:36 Thank you.

00:57:44 Thank you.

00:58:02 Gracias.

00:58:20 All right.

00:59:03 I think I'll leave it all straight in terms of the back is going over this, it's time to see.

01:00:32 Ja, ook van alles.

01:00:34 Ja, ik heb hier die psychose dingen gedaan.

01:00:40 Een beetje stupeaard, een beetje stupeaard, een beetje stupeaard.

01:00:52 It's an issue, it's time to sit here.

01:01:00 I'm sick, I ask for what I have to do.

01:01:32 A couple minutes.

01:02:02 Thanks, man.

01:02:10 Let's get some, let's get some here.

01:02:21 Yeah.

01:02:51 Hmm.

01:03:12 I'm going to shake it off.

01:03:26 That's okay.

01:03:30 Cool.

01:04:34 タルシープを飲みながら

01:04:36 行ったら行きましょう

01:04:44 Girl, you know what I'm saying?

01:04:51 It's from the beginning of the day, where are we going to go outside?

01:05:00 Yeah, precise.

01:05:02 I don't know.

01:05:07 I don't know.

01:05:11 かんかん

01:05:48 Droppin' a thousand eight miles

01:06:07 It's a little close to the door.

01:06:22 I'm sure it comes back to the video.

01:06:27 I'm sure I'm going to take a look at it.

01:06:30 I can talk.

01:06:43 Oh

01:06:52 Oh

01:07:21 I don't know.

01:08:06 Kan de zitten hè?

01:08:40 I kind of hope you will have time to wait for you to see the peace for all of you.

01:09:07 Музов.

01:09:16 Oh, that's the thing I've spoken about.

01:09:41 I don't want to see

01:09:54 I'm trying to slow down and make a sound baby hush

01:09:57 I am a lily swipe right out the mic

01:09:59 I'm a slut

01:10:20 My chicken a boss, he got a doozy, the moon is a lie

01:10:22 You ain't getting used for me, don't win no wrong

01:10:32 I feel like I'm a warlock guitar, I got...

01:10:35 Stop.

01:10:39 Stop.

01:10:40 Let's do it, let's do it.

01:11:00 No, the battery was taken.

01:11:04 Don't do it.

01:11:07 Ah, shit.

01:11:11 Yeah.

01:11:23 It's so creepy.

01:11:42 You did

01:13:30 è un passifo

01:13:51 I'm dead.

01:14:08 Good morning.

01:15:12 Merci.

01:16:07 Yeah, I mean, it's cheese.

01:16:09 Can't go ahead.

01:16:22 Good.

01:16:23 Gosh.

01:16:38 Yeah

01:18:05 I don't know if I spit like a laugh

01:18:06 I spit a pound of my kids on your couch

01:19:30 I don't know.

01:19:42 I love you so much.

01:20:15 Het is erg irritant.

01:20:22 I don't want to drop back and start some stuff.

01:20:25 That's right.

01:20:30 Oui, oui, oui, oui, quand on l'a pas, on va prendre un peu ça.

01:20:42 감사합니다.

01:21:11 It's good.

01:21:20 Yeah, I can affect the axis during the action.

01:21:34 Oh my gosh, Jesus, Jesus.

01:21:42 Yeah.

01:21:43 That was pretty cool.

01:21:44 Yeah.

01:21:45 Look it.

01:21:50 I have a baby.

01:21:50 Come on.

01:22:30 Thank you.

01:22:40 En waarom dat het een kopper wordt, is voorhebberen.

01:22:44 Het is absoluut.

01:23:00 И вот здесь, здесь, здесь,

01:26:15 and mythical team

01:26:22 Like a golf on the board.

01:26:30 If I take it apart, you get a doozy, the world is alive.

01:26:33 You're getting used for me, doing a walk.

01:26:35 I don't play chicken, you prick, I'm a fly.

01:26:37 You wanna kick it, I'll give you the rise.

01:26:42 I feel like I'm a warlock guitar

01:26:51 I think it's good.

01:26:52 I don't know about it.

01:27:05 Yeah.

01:27:13 Merci.

01:28:22 I'm going to show you what I'm going to do.

01:28:31 Yeah man, that's the best bacon I got, yeah, yeah, yeah

01:41:34 I'm going to have a lot of fun.

01:41:36 I'm going to have a lot of fun.

01:41:38 I'm going to have fun.

01:41:45 There was jail that we murdered, the murder was there.

01:41:48 There was a hell of a discovery to death.

01:41:51 Ik moest er allemaal af in het samen, dat moest me erg goed.

01:41:55 Ja, ja, oké.

01:41:56 Ik wil wel naar de spijtjes.

01:42:19 Thank you.

01:42:20 It ain't much, up in a cloud on the wrist, so they're trying to fall down in a dust.

01:42:24 Don't make a stop, they be rushed.

01:42:25 I am the lyrics, right, I'm a mark, I'm a slut.

01:42:28 I don't know how to not sit like a lap.

01:42:30 This

01:42:40 You get the gun as I christened my son.

01:42:43 It's like if I'm taking a party.

01:43:00 I can talk.

01:43:25 I'm sorry.

01:43:30 Thank you.

01:43:40 Let's go.

01:44:00 It's crazy.

01:44:11 So, I can pull up.

01:44:14 I'll use something that's sick when I'm at that.

01:44:16 That would be quick.

01:44:20 Dankeschön!

01:44:46 ¿Qué acabas?

01:45:20 We'll be right back.

01:45:40 Of course it is.

01:46:04 Let's do it.

01:46:22 Fumbles and down, let's get done

01:46:24 I'm in a rush to be dumb

01:46:25 Dropping a thousand, they must

01:46:27 Crump on the clouds on the mist

01:46:28 So they're trying to sell down in the dust

01:46:30 I don't know how to not spit like a laugh.

01:46:36 I smell a pound of my kids on your couch.

01:46:50 I've done it so much.

01:46:55 I've done it so much.

01:51:40 So I'm bored, y'all.

01:51:41 I'm going to look at me.

01:51:51 Look at this, look at this elevator.

01:51:53 No, it's not going to happen.

01:52:00 Poop.

01:52:10 It's crazy, it's not going to be my heart, but it's not going to be my heart.

01:52:48 Good for you.

01:52:50 Cool.

01:52:52 That's right here.

01:53:45 I did.

01:53:57 Telling we murdered the murderer was there.

01:54:00 I'm going to cry.

01:54:21 Mm-hmm.

01:54:22 I was going sorry.

01:54:26 I was going sorry.

01:54:27 I was going sorry.

01:54:28 I was going sorry.

01:54:30 Dropping a thousand, ain't much

01:54:32 Coping a missile to turn this whole town in the dust

01:54:35 Don't make a sound, baby, hush

01:54:36 I hit the drink swipe right on the mic, I'm a slut

01:54:42 Oh, there's so many other ones in the office.

01:54:44 What the fuck is she saying?

01:54:46 It's culturalising them up there.

01:54:50 I'm sorry, I'll see you tonight, I don't have to go with this, but it was reserved today.

01:54:56 I can't call this.

01:55:03 I don't want to use this, I don't want to use it, I don't want to use it, I don't want to use it

01:57:25 We did it, we did it, we did it.

01:57:32 I'm the president of the United States.

01:57:34 We did a tablet I asked him today.

01:57:36 They talked with the matches and that's in the way.

01:57:38 We dash away.

01:57:40 Thank you, man.

01:57:41 Thank you, man.

01:57:43 Thank you, man.

01:57:44 Thank you.

01:57:50 I don't know, but I don't know what I'm talking about, I don't know what I'm talking about, I don't know what I'm talking about,

01:59:05 Omdat het ook kanker van mijn spieren houdt.

01:59:08 En mijn persister is.

01:59:13 Dank precies bij de leuke knieën op straat in de garage.

01:59:18 Dank voor mijn knieën.

01:59:20 Eh, ik weet het dan, kom mee nu.

01:59:24 I don't know, hier ben ik de serie toch hartstikke blijven.

01:59:27 En dan kan ik de beeldjes.

01:59:30 I heard you say that as an all-in, we win all, we both ready to play one studio of an all-in club, I know.

01:59:40 Als je het niet voor mij overdoet, wat met je studie kon houden en wat excellentie afstuderen.

01:59:45 Kijk uit Corrie, ik heb weer de vierde zoon.

01:59:48 Voor de homo en de duiven.

01:59:50 Voor z'n lange termijn plan, voor z'n blauw bloed, dat was Nederland aan hem verplicht.

02:00:00 En daar zitten ze lekker.

02:00:03 Zou je over hier nog even een beetje maken hoor.

02:00:10 Lange termijn plan voor je er heen.

02:00:12 Dat is een plasje.

02:00:19 Daar heb ik een bier aan.

02:00:20 I forgot what it is.

02:00:39 Okay.

02:00:40 He's done with it.

02:00:41 Yeah.

02:00:42 Ooh.

02:00:50 Das ist scheinlich mit meinen Augenlern, aber ja, gut.

02:01:00 Yeah, these books, I'll conquer, I'll come back to conquer today.

02:01:10 Yeah.

02:01:20 Ja.

02:01:22 Ik denk dat je daar heel laat zijn.

02:01:24 Ik denk dat je daar heel laat zijn.

02:01:28 Maar weetjes kunnen komen.

02:01:30 What's up, what's up, what's up, what's up, what's up, what's up, what's up, what's up, what's up, what's up.

02:01:41 Toch!

02:01:42 Mag ik die vans gesproken?

02:01:43 Nou, dat ben je echt gezegd.

02:01:45 Ik heb het dus gemaakt met de muur en masker.

02:01:48 En die staan er nog eens aan.

02:01:50 I got to give you a little time to give you a chance.

02:01:54 Awesome.

02:01:58 Yeah, awesome.

02:02:00 This is how you say I want to make it.

02:02:02 Yeah, I'm going to make it a lot.

02:02:06 Oh, big boy, so bad.

02:02:10 Honestly, you took the seeds and they did the same stuff as well.

02:02:13 They just didn't want to do them out because we had a little bit of a master plan.

02:02:20 Voor de laatste paar dingen aan.

02:02:24 Ja, die is wel.

02:02:25 Ja, kijk dat.

02:02:26 Daar hebben we alles wel uitgedokterd.

02:02:30 Waarom denk je dat het rest omkopen draait precies, voordat ik dat draaien wil stellen, per op de inzicht?

02:02:40 Oké, dat is sowieso leuk, maar ik voel dat ik het wel reis van heb, dat zou zijn, dat precies.

02:02:47 Ik heb het zelf wel een paar reis te maken of wel een jaar.

02:02:51 Dus jullie worden weer een medicatie van een grof gereisde directeur, dus voor veel kakasiliën.

02:03:00 Sánskrit buddha, které má se to říctek.

02:03:03 Paralyve, kudová...

02:03:10 Hij zou ook een vrienden voor z'n vader maken, maar daar kwam hij nooit aan toe.

02:03:15 Want hij had kanker, en Sjaak die kanker bedoondeer.

02:03:20 ...was in die keer helemaal over de rode Aza ging helemaal door het link, dropt ze verpangen en helemaal alles vergeten rondneuken.

02:03:28 En dan, ze werken zo.

02:03:30 druk, eh, ja, bij Kokjes op KBF, en bij Wierabouw daarvoor, en studie, en die jongens die

02:03:39 waren ook aan.

02:03:40 En dan ging hij maar dingen oprijden enzovoort, met Altomars, met de Galaxy Watch en kijk ook een remote view enzovoort.

02:03:50 Dat was daar al, Zwarte City, Herente City, toch?

02:03:54 Kijk hier bij die hele palen, zo, Telefreaky Operators.

02:03:58 Altsje Klautwijk en het Godcomplex.

00:00:25 Ja, open dag voor de Pivens staan en daar kom ik blij mee voor de Pivens.

00:00:30 Eeeh, wat doe ik? Dat vind ik er tollen enzovoort.

00:00:32 Kijk, hij heeft iets gesplitst. Hij heeft een klein tuin gesplitst.

00:00:40 Yeah, right?

00:00:43 Right, right over there.

00:00:50 De persoonlijkheid is er toch geplankt, toch? TNO, Den Haag.

00:01:00 Geen licentielapens enzovoort, ja. Maar waar zijn eigenlijk de heavy hitters toch? Wel hitters.

00:01:10 Ik hoop hè, als je je letterlijk vanmorgen wordt in je bunker.

00:01:14 Nou, zolang je nog niet uit het bar ketenen bent voor de politie.

00:01:21 O kakker, ik heb er altijd het gevoel dat Jitski Koen dus een beetje dood gaat, totdat hij er weer terugkrijgt.

00:01:27 Ja, in de vles.

00:01:30 Yeah, shall we fang at my roof?

00:01:50 Ja, dat is mogelijk, gewoon dat deze audiobestandjes erbij zijn, zeg maar expertpijn gehaald van helikoptersorten.

00:02:00 ...evacueren van kanker.

00:02:04 Daarom kun je niet dat wel een paar persoonlijke gezegd toch?

00:02:07 Overijf wordt het wel getrouwen bij jullie.

00:02:10 Dat is makkelijk, dat is allemaal een probleem.

00:02:14 Ja, kak.

00:02:17 Ik kan ook eens kak je laatst hier.

00:02:20 De fiscale accountjes, de lichten en dingetjes enzovoort.

00:02:26 Het is al gewaakt om te spreken.

00:02:32 I'm going to play this game and I'm going to play this game and I'm going to play this game and I'm going to play this game.

00:02:40 met de generative AI de duipendakken geweest en ik denk even dat ze wat te proberen hadden.

00:02:51 Kijk, daarom zit ik aan de jaren zo vervolgd om naar de kloten te gaan.

00:02:55 De afgesneden, de broekbaan en dat soort dingen.

00:02:59 Kijk, wel.

00:03:00 Roos de Klautwijk, Erwin Hallers, Mark, Stuckelbroek, Cindy, Anarchy, Kankedijven, Doc and so forth.

00:03:10 allemaal in de koffer

00:03:11 slecht voor elkaar.

00:03:14 Ja, dat zou het zijn, zou ik zeggen.

00:03:16 Ik zit hier in alles.

00:03:18 Toen ik voor de eerste keer.

00:03:20 Ik weet niet of jullie nog weten wat er net allemaal op de audio stond.

00:03:25 Dat Defensie heeft wel gedaan.

00:03:30 Met electronic warfare, die volkomt in de command and control C2 toren bij Schiphol en dat soort zendmasten enzovoort.

00:03:40 Je hoort overal voor de 5G dingen enzo, dan de routers en dan de 2.4 gigahertz enzovoort.

00:03:48 Je zag de barine van de...

00:03:50 Van de luchtgolfjes, toch? De digitale data.

00:03:53 Iedereen in de wereld beloofd, maar zelf eigenlijk hebben we geen kankermoe gedaan hebben.

00:03:57 Behalve sterke verhalen.

00:04:00 Oh

00:04:47 Oh, it's hard to slide though.

00:04:50 Ik spart wel tegen, de inlichting en diensten mochten maar even hardhandig ontgroen op de Joe Franklin Staten S3, vanwege jullie Arie's in de...

00:05:00 occult, hebbe, occult, occult, satanist enzovoort.

00:05:08 Toch op de bank van Harry Johan.

00:05:10 die toevallig ook daar weer op de zaampocht woonde en zo, oh en dan bij het Loo, het paleis dat Loo.

00:05:20 Die pepernoten uit Haarland aan Elisa geeft als bedankje of wat er nou.

00:05:28 Oh, door de computer.

00:05:30 En een lied gegekocht en zo, voor de kandikantenslijkspeler.

00:05:35 En dan de telefoon is het bij seks, bij de eerste serie.

00:05:40 En dan toevallig waren Ultima's die kwast 2 gestuurd naar Led Latten enzo.

00:05:45 Ik dacht dat jullie schippen op met die dingen, met Dropbox enzovoort.

00:05:50 Dan kan je het in ieder geval in het buitenland met ruppel houden, zodat het niet in de doofpot gestopt wordt, want daar klopte geen kankermoer van toen al.

00:06:00 Kijk er aan hoor!

00:00:00 I'm sick of it.

00:00:27 Don't make us that baby hush, I am the living swipe writer.

00:00:34 Get my kids on your couch.

00:00:44 Inspiring up to, you know, optimizer.

00:00:50 En dat vind ik dan stevig, daar gaan we het zelf allemaal overgenomen van, toch?

00:00:57 Alle producten die ik tremmen, en allemaal...

00:01:00 Hij heeft dingen in m'n hoofd enzovoort met de hersenen uitgezet en afgedaan met een soort operatiekleed.

00:01:07 Op de John Franklin staat zich drie al.

00:01:10 Ik kijk met Sofie en de koning enzo, en ze zijn allemaal op de operatietafel.

00:01:16 Je komt naar de kator, toch?

00:01:20 En dan die broers van het Sofie Zandpark, die je ziet op straat, daar twee keer die gast.

00:01:26 G-Man sightings toch? Kijk wat alles op top ziet.

00:01:30 en alles en zo, dan moet hij een contra doen en dat is echt gewoon zelf.

00:01:34 Het is een perpetuum mobile van stupiditeit.

00:01:40 Toch heb je weer een nek gekregen.

00:01:42 Op een gegeven moment blijft er ergens ineens een duwtje achter dat ik echt gelijk heb.

00:01:50 Jammer dan eventjes leds oproepen, ik ben niet aardig genoeg toch, met pistoon en dan zetten we helemaal, dit is het hele kanker ding, gewoon ook wel even wachten.

00:02:00 Alles recorden en automatiseerden enzovoort.

00:02:10 Ja, maar we hebben zoveel mensen Roemijn die afhankelijk te vast zijn.

00:02:20 Toch?

00:02:21 En daar is het.

00:02:25 En daar is het.

00:02:26 En daar is het.

00:02:27 En daar...

00:02:34 Zelfs in het buitenland deden jullie dit.

00:02:36 Ja, die psychose keihardig.

00:02:40 En mijn lichaam op die manier versturen en verhuren, en besturen.

00:02:45 Ja kijk, dan heeft hij allemaal plaatjes in zijn hoofd en zo.

00:02:50 Dat klopt wel niet, er is stemming in z'n hoofd en dat moeten we afschermen, want hij is demonisch.

00:02:56 Toch? Dat klopt nou weer zo weer.

00:03:00 In de Duitsers, waar Hans Kloutwijk een mooie deal mee had gemaakt naar de geschillencommissie.

00:03:05 Maar bij die Olga hadden ze letterlijk zeg maar een olietank open.

00:03:10 laten staan onder het keukenraam. En toen hebben Hansje Klootwijk en Anneke de Vries geklaagd en die hebben via de geschildercommissie

00:03:20 hebben ze geld teruggekregen, een soort rechten maar dan hoedakkoord zeg maar en daarna hebben ze

00:03:30 Bij dat grote complex, die vijfsterrenhotel in Turkije, dat is de half Duitsers, half Russisch, zeg maar, bij dat vijfsterrencomplex.

00:03:40 En dan hebben ze letterlijk Hans Klootwijk met die Rus wodka drinken die dan...

00:03:50 ...a sportwinkel had in Rusland, what was that all about, and then...

00:04:00 En daarna is je wel bij dat tentje wat eten zeg maar enzovoort en het is niet per se de schattige dag, maar wel dezelfde vakantie.

00:04:10 Ik wil naar huis, ik wil die Kanka Pokémon kaarten kopen.

00:04:13 Die Japanse Pokémon kaarten die ik bij dat winkeltje heb gezien bij de Rosario in het plein.

00:04:20 tegenover de apotheek die er toen zat.

00:04:25 En die heb ik toevallig aan stand gegeven.

00:04:30 Zie je jullie het patroon van letterlijk hoe het werkt?

00:04:36 Dat zijn jullie doodsaders SS.

00:04:40 De undercover operator scoort Irv insane in de remote control dood en satanic.

00:04:50 Gelukkige dingen al jarenlang.

00:00:01 동일하게 먹으러 가고 싶어

00:00:23 Mm-hmm

00:00:30 Kijk, we gaan kool draaien.

00:00:32 Pellepot koel.

00:00:34 Dat pak ik zacht in.

00:00:38 Hier is ons hoofdstuur.

00:00:40 I'm going to do it all fine, just to get perfect to deal with the slanty around the face of something else.

00:00:50 Hmm, hmm, it's time to see you, eh?

00:01:00 Goed.

00:01:02 Eh...

00:01:04 Daar komt ze.

00:01:09 Ja.

00:01:10 Op z'n wapenschild, Grootwijk, Waasteoordeel, Rijksmuseum, Blauwblik, op z'n wapenschild met bloed.

00:01:20 Want zij hebben in de heilige oorlog de adellijkheid verdiend.

00:01:25 En daarom kunnen we hun die ook gunnen.

00:01:27 Maar jullie hebben hier wel een wijze eigen familie.

00:01:31 Toch kajsieren.

00:01:33 We hebben ook het zoals dat we nu in de droom verkocht.

00:01:36 Tenminste.

00:01:41 Het maag is ook anders.

00:01:51 ご視聴ありがとうございました

00:02:34 It's not full.

00:02:40 Dan ga ik nog studeren, kan er voor creatieve ideeën.

00:02:43 Kijk, ik heb nog een beetje waar ik zo op wacht ofzo.

00:02:46 Ja precies, ik heb zo'n externe tocht.

00:02:50 on the fortifier, hysteresis, when you're spatially in, how are we in, then yeah, I'll see you next time.

00:03:00 Vanuit de andere kant gaan bekijken.

00:03:03 Vanuit het appartement.

00:03:06 Ja, precies.

00:03:10 И так мы можем еще увеличить свои системы, которые мы не только.

00:03:20 Toch, SS curve. Kijk, we hopen alleen maar te wachten en dan kunnen we meteen omdraaien en dan hebben we gewoon een remote.

00:03:27 Iedereen kan met een bom in zijn werk.

00:03:32 Met mijn ogen gaan, daarom moest ik veel in al die kankerbeelden samenwerken.

00:03:37 Want ik antikloot ook nog even met een profet.

00:03:40 Met kanker.

00:03:42 Kijk op de telefoonboot.

00:03:44 Precies zo bij de KBF.

00:03:46 Daar zit de bootje precies een beetje na.

00:03:50 Maar net die nou, kijk net die nou, kijk de Godfathers, Dr. Alphazers, Apex Legends, EA Games.

00:04:00 Waarvoor moest u hier een paar jaar nemen?

00:04:02 Ja, dat is het enige halen.

00:04:05 Eken, politiek, vrouwen en overeen staan.

00:04:10 Hoe voel je het?

00:04:13 Ja, ik heb echt persoonlijk gebien met jullie.

00:04:15 Vooral voordat ik gewoon leuk dat doe als ik mijn neus doe.

00:04:17 Ja.

00:04:34 Check the car it goes, the car it's over, we have to go and see as we work.

00:04:41 Hier hebben we een meldkamers in de netwerk en ook nog een weggooien en support.

00:04:48 Ja, maar dan kan de politie hier nou weer nadenken.

00:04:50 En dat is nu in het heden, dan ben je best wel realistisch in het geloof.

00:05:00 Zo'n kankergebied ook weer niet dat je denkt dat dat echt wel helemaal zo gelopen is als voorgaande kinderen.

00:05:07 Maar dat is ook niet voor die mensen die...

00:05:10 En dat is een beetje jammer.

00:05:14 En dat heb ik voor niks overleven.

00:05:16 Want niemand had overleven.

00:05:19 En ik heb geen blinding.

00:05:20 een beetje uitgaat

00:05:30 Het is een beetje raar, want het zijn allemaal echte gebeurde dingen zeg maar, en gebeurde de dingen tussen.

00:05:41 Dat ligt een tijd, ja precies, dag en nacht, maar voor vet veel mensen kan ik maar rijden om precies te doen.

00:05:51 Het zwaarste traject, de heavy hitters, de high hitters, 88.

00:06:00 Precious car, dat is een weinig perpetuum mobiliteit van de creativiteit en technische dingen, maar nooit seks of iets leuks uitvoeren.

00:06:10 Dat is voor de echt zielige beheerder, ja precies.

00:06:16 Nou, het is een soort Bijbels verhaal, want ik denk dat ik...

00:06:20 allemaal

00:06:23 op basis van dat jullie

00:06:28 en jullie hebben niet allemaal onderling

00:06:30 De mogelijkheden om het af te staan en het voorkomen.

00:06:37 Dan moet het nou even niet zijn.

00:06:40 En soms eigenlijk gewoon de reden dat er minder mensen, zeg maar, moeten leven.

00:06:47 We hebben het geprogrammeerd.

00:06:50 et un moment,

00:06:52 harte, string.

02:04:31 Ik weet niet voor welk bedrijf dat was, die Hexelota, als het betreft.

02:04:40 En ze maakte games toen voor de filmindustrie, voor een bepaalde indruk.

02:04:50 Ja, daar was de Kurdistanische Uitracht, zeg maar, bij de Tesla Uitrachtse Uitracht.

02:05:00 with the extra gold tiles.

02:05:02 I feel like they're getting guarded.

02:07:33 En een jaar lang hebben we gezegd op afstand.

02:07:37 We hebben tijd toren.

02:07:38 Goedemiddag.

02:07:40 Ja, precies.

02:07:50 een stukje keukenrol of wat dan ook, zo'n puntje draaien in mijn neus.

02:07:53 En ik hoorde daar die auto, en dan die foto met Robert Boy die naar Australië ging voor...

02:08:30 Charles Fuat, De Verve, De Vieu, Mark Rutte, de kankerbaan, ik had het ook voor hem en dan die Tim.

02:08:40 Van die arts die wel even tegen me zei dat ik Skitch & Freddy had op de Jan-Tobé-pad.

02:08:47 Dat pakje van mij.

02:08:50 En we dan een broodje aan je handen enzo, dat is dan ons bankje toch?

02:08:54 En we hebben tijd met elkaar door, maar we gaan maar wat moet je hebben, wat moet je doen?

02:08:59 Ik heb je ogen.

02:09:01 I think we're the Mrs. Helfkern, or even.

02:09:46 Hé Ruud, Han, dat zal Han vragen zijn.

02:09:50 Daar kon ik niet mensen de schuld geven inderdaad, buitenwoners, immigranten enzo.

02:09:57 Die gingen zonder op het dak te komen.

02:10:00 naar instromende migranten, zo IND, Den Haag, TNO, vergestelden.

02:10:10 De inhovergestelde, ja ik kwam er even niet eens op, maar ik zat met Tom in een mot middel om te...

02:10:20 Ik bedoel om het 1 in 3 echt goed te zien met een loop van actiefs, het stoppen met roken, alles waar je kunt.

02:10:30 and yeah, I could jump out and save us, save the U.S.

02:10:42 over deze ijsjaarland.

02:13:27 I have to see this.

02:13:30 Hoeveel gestudeerd en het lijkt allemaal raar, maar in echt de hele hoop van die YouTube filmpjes heb ik al wat dingetjes klaar.

02:13:40 en dingetjes uitgeleerd enzovoort, en de rest is alles trot. Ja, letterlijk.

02:13:51 Want ik denk hier vaak, kan je er niet aan hoeveelheid.

02:16:54 Daaruit.

02:16:55 Je woont bijna helemaal regen.

02:16:57 En dan voelde je...

02:17:00 We kunnen al een plek terwijl de acteursrecht, de beschermde proprietary dingen ombuigen en afnemen.

02:17:11 chronologisch, met alle medicatie voor, ja, en alle...

02:17:20 De levensmiddelen die allemaal naar de kanker waren enzovoort.

02:17:43 Hoe wil ik de datacentra nog echt zijn?

02:17:50 God bless.

02:17:51 Deze maxheid.

02:17:54 Maar dan ben je in de dag en de dag.

02:17:57 Dan wijs ik toe.

02:17:59 Nou ja, dat is dit.

02:18:00 Ik ben wel een paar jaar gedaan met die piratine zelf van Bart Dack.

02:18:03 Krijg je zelf een aantal punten als Vivian dan?

02:18:07 Nou, ik ga je naar mijn eigen sociaal...

02:18:10 je woning weer in Amsterdam, dat je geluk had. Toch? Vanaf mijn achttiende of zoveel negentiende

02:18:16 door mijn uur op aanrader daarvan ingeschreven staan.

02:18:20 Dat de jongere mannen in krijgen en dat er uitgekikt worden en geen punten krijgen.

02:18:31 Opgelijk de status sinds 3, 6, 5, 10, 10, 10

02:20:20 En het schermpje, computer vision, the world used to be ours.

02:20:24 Toch? Iedereen is al, ja, drie merkenlampachtig zou ik doen.

02:20:36 Wij zitten er net live te besturen hier met onze micro-machine.

02:20:41 Daar kan je er niet veel van hebben, want deze is niet zo debiel.

02:20:50 Het zijn geen echte loge technische kennisdingen, als ik iets niet weet, op geen zin heb.

02:21:00 Geen zin hè? Dan krijg je dat ijverdank gebeuren met kijk ik heb niet meer tijd doorgebeelden.

02:21:05 Zo was het een beetje duidelijk.

02:21:10 Ja, maar ik ben dan nog soms al hard genoeg om te denken, kanker, weet je wel, je houdt.

02:21:20 ook zelfs eigenlijk nog aan haar zijn, kan je eigenlijk die zolder aan, ja, ja, dat is wat ik kan.

02:21:30 Alleen dat zie je niet.

00:14:34 De immuunological reality, lack of antibodies.

00:14:40 The missionary incident, historical contact, suffered massive population collapse from introduced

00:14:50 epidemics of measles, syphilis, and influenza during British colonization,

00:14:56 suffered severe demographic disruptions,

00:15:00 cultural erosion due to encroachment, outside diseases and resource exploitation.

00:15:55 After a few brief tense interactions over two days,

00:15:59 Chao was...

00:16:00 killed by the tribesmen. The aftermath. Indian authorities ultimately chose not

00:16:07 to recover Chow's body, sending a

00:16:10 recovery team to the island would have required sustained contact with the tribe, exponentially

00:16:17 increasing the risk of launching a catastrophic

00:16:20 het bedenig

00:16:25 kijk we doen het allemaal

00:16:26 probleem

00:16:27 besturen via internet en zo zodat iedereen thuis

00:17:11 Divers, one, slip, up.

00:17:20 Your analogy is spot on, most bodies are mount ever

00:17:30 are left in the mountain on the mountain because recovering them is an extreme trolley problem.

00:17:36 We're trying to save a corpse directly risks the lives...

00:17:40 steps of the living. However, they are not always left there. Thank you.

00:18:23 Kijk, ik zou het denken op dit moment dat je een kankersimpel kankerbeeldje is.

00:18:30 En daar hebben we toch een medicijn meteen op de markt gebracht.

00:18:33 Kanker, kanker, iedereen heeft kanker.

00:18:36 Ja, ik vind het simpel of eens.

00:18:40 En je denkt kijk we hebben even een goed gevoel, waa, waa, kanker, ja dit, dit, want dat is beter.

00:18:50 Dat is gekoppeld gewoon logisch aan die tijd dat je toch met diegene doorgebracht hebt of zo.

00:18:58 Ik geef gewoon genoeg aandacht aan.

00:19:01 Want ik heb een level, ik zeg maar, een post of justification van kanker.

00:19:06 Kijk, het loopt nu steeds weer de auto op alles naar beneden te gaan.

00:19:10 Ja, het is heel leuk.

00:19:21 and the Matupala Chicaia.

00:19:32 Kijk, kijk, kijk, op de beatceper, dat.

00:19:40 Everybody got a target tonight.

00:19:42 It's for the camera.

00:19:43 Kank, kank, kank.

00:19:44 Van Caps.

00:19:48 Hier is als de drugsballon.

00:19:50 Ik zeg maar, weet je, dan word ik geen kakenmoeder van de jaren niet meer.

00:19:54 Efterlijk.

00:20:00 I have nothing to do with it.

00:20:02 I have my bio-instabele cancer.

00:20:05 I don't know if I can...

00:20:07 Oh, no.

00:20:10 Ja, nee, ja, kanker. Ja, dat werkelijk. Ik vertrouw die mensen meer. Ik zou bijna zeggen kanker, ja precies.

00:20:20 Lettelijk, zeg maar.

00:20:23 En weet u hoe dat geregeld wordt?

00:20:25 Ja, nee, maar dat heb ik ook zo.

00:20:27 Ik vind het ook niet zo.

00:20:34 It's like building fires away with those guys who have ever released this year out.

00:20:40 Dan zie ik nou iedereen alle kankermisvitsen, mismaksels.

00:20:44 Ja, mismaksels. Ja, daadwerkelijk.

00:20:48 Kanker. Kanker.

00:20:50 Kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker, kanker.

00:21:00 En dan, ik weet niet eens hoe het schuipkankerlij is.

00:21:06 Exclusion Zone.

00:21:09 Derivine.

00:21:10 Activation, deviation, Pokemon, card, pictures, images.

00:21:20 Kankerlij is wel, ja dat, greffig, kankerlij.

00:21:30 Nice.

00:21:32 Huh?

00:21:33 Did it good?

00:21:40 Not real Pokemon cards, real derivation, devination of gene expression.

00:21:50 Let's see if you're still a chrono.

00:22:00 Low-dose environmental radiation.

00:22:02 Kijk hoe zij daar nu de muziek programmeert.

00:22:05 Forces immeasurable departure deviant.

00:22:10 van baseline genetic activity in wildlife and plants.

00:22:14 En dus ook mensen die zijn letterlijk slim genoeg om niet dit kankerzooi te doen.

00:22:22 Weet je, je wilde het hier hebben niet de...

00:22:25 Hier de Cancer Genome Atlas.

00:22:30 Die is vast in de regenboog ook verkrijgbaar.

00:22:40 Hier, fotosynthese.

00:22:42 Kijk, ik gooi er gewoon letterlijk wat spoors overheen.

00:22:48 Weet je, paddenstoelen.

00:22:51 Het duurt alleen kanker lang, maar dan is het goed.

00:23:00 Ja, de bovenbijblad, de kanker.

00:23:10 Ja, nee, we zijn bio. Goh, in de moestuin. Onbespoten.

00:23:20 Ik ben even ouder van dit.

00:23:24 Als je het voor een verpalsje hebt gehoord, is het heel makkelijk.

00:23:30 Ja, ik doe dat super lang.

00:23:35 Ik snap dat ook dat als ik zeg Pokemon-karte met Tjango B.

00:23:40 enzovoort. Dat ze bliebplaatjes geven voor misvormde vissen en dat ze een kanker zijn.

00:23:50 Ja, kanker man. Hier, log 2, fold change. Down, upregulated, gene expression, deviation.

00:24:00 Kijk het is een regenboog bijna, blauw, roze en oranje-achtig of is het kankerziek man.

00:24:11 But also fish with X extra ice, yeah

00:24:20 En dat is ook waar het blijft en mensen ook, maar dat maakt niet uit, dat doen we niet aan.

00:24:30 What they did in their message was, it was largely a popper.

00:24:34 Yes, but it's happening. It's actually happening.

00:24:39 So much.

00:24:40 Kijk dit, het is.

00:24:50 Is that the myth?

00:24:58 Bad life!

00:25:01 You get also very derivation deviation in exclusion.

00:25:10 Persoonlijk. Anders mogen mensen daar ook gewoon prima wonen.

00:25:20 Yeah, it's tough.

00:25:25 And when we look past the internet, you're completely right.

00:25:30 Ik heb kanker, het zijn niet de meest kredieve dingen, maar het kan zijn.

00:25:40 Ja, kakelijers. Dit.

00:25:47 Ik heb ook een boek uit.

00:25:50 I should have left on my call or show on DVD, somewhere the death title is.

00:26:00 Rijkt veel.

00:26:02 Ook al is het nog bij z'n tikveld kruppelt.

00:26:06 We kopen het voor ons nog terecht.

00:26:12 Ja, gewoon, het gebeurt wel eens iets aparts weer.

00:26:19 Ja, ik weet het niet.

00:26:20 state with this no one

00:26:22 and I think we're going to get to the position.

00:26:34 It was just completely chaotic, spinning.

00:26:40 This order has incomplete webs, firebugs and other insects frequently show altered and asymmetrical shell

00:26:50 Nee, nee, nee, we zijn geen probleem, via Extra Libs, via Historical Livestock Records.

00:27:01 Dit is een hele makkelijke.

00:27:04 MKZ, dieren, kankerlijers.

00:27:10 Want een klaus heer. Zeer besmettelijk virusziekte, dat is maar eentje.

00:27:15 Soms runderen, varkens, schapen, geiten, herpten en wilde zwijnen.

00:27:20 Hoe komt dat?

00:27:24 Hoe komt dat?

00:27:26 Doe het nu.

00:27:28 Kom op.

00:27:33 Kom!

00:27:35 Ja ik moet even over je rode tapijsje.

00:27:40 En kasset 4 is, wordt veroorzaakt door, er is er maar eentje gelukkig.

00:27:50 It's called a fiery day.

00:27:52 Okay, that's what I said.

00:27:54 I'll give it to you guys.

00:27:57 Pico!

00:28:00 It's now the lines called the battery corner and at least you're feeling the fuse.

00:28:11 and then you know, it's a lot for your ass and it's a plain, plain fleece, plain.

00:28:20 Vlies, Viral, Mijn, Minderlots, Interpretation.

00:28:30 Het is maar een proxeratie.

00:28:40 Dat is een heel creatieve, taalkundige, logische interpretatie.

00:28:44 Wel, het medische gezin net iets anders.

00:28:46 Oh, het lijkt erop.

00:28:48 Kanker.

00:28:50 Kanker. Ik heb net dat ingevoerd in mijn wetlaar printer. Ja, bioprinter.

00:28:55 Kanker. In het Italiaanse woord piekeloog.

00:29:00 Yeah, I believe it's a little cleaner than that of life, yeah, that's what, uh, uh, uh, that's here.

00:29:10 Eindelijk is het goed. Kankers zijn.

00:29:14 Wat zijn ze naam voor een virusfamilie?

00:29:17 Ik denk dat het zal wel...

00:29:20 Viraal, zei ik. Ja, virus.

00:29:24 Oké, maar kijk.

00:29:26 Wat jouw interpretatie zo...

00:29:27 Waarom je zo'n interpretatie...

00:29:30 klein en viraal, zet je dus al direct pal bovenop. Vlies, dat je erin hoort, is

00:29:34 biologisch ook een interessante link waar Picorda daarin verwijst.

00:29:40 Heel veel virus, inderdaad een soort vlies. Ik lag de klemtoon een beetje verkeerd.

00:29:43 Virus en voorop vlaar. Vlaar ding al aan.

00:29:50 Ja, dat is het vlieg best.

00:29:54 Is het virus zo'n zet een taai?

00:29:56 Hoe kan ik nou godverdomme van Latijns nog enig?

00:30:00 Het lijst vierde envelop.

00:30:05 Dit vlaar.

00:30:11 Diggen, blaan, kankerlaadjes.

00:30:19 Gewoon graal weg.

00:30:20 Kaufe, das war der Küche, oder?

00:30:30 Oké, gewoon. Hier, Health & Detox Mentrum & Jelly Neck op de Flaringoa.

00:30:40 Voorheidskundige academie, ja dat zal ook nodig zijn hier in het Monkey Town.

00:30:47 Kan ik nou weer normaal verder of heb ik niet gedoe.

00:30:50 justification. Well that is another top part.

00:31:07 Ik heb een boel getrappende, ik ben er wel in te bezig.

00:31:10 Het gaat wel niet pijnlijk he.

00:31:20 en dan worden de kanker naar voren gehaald.

00:31:22 En dan werkt het opeens niet meer als je de antwoord niet zoekt.

00:31:33 Yeah

00:31:51 Getting close right here, it's about far.

00:32:01 Kampusik, ja.

00:32:11 Dat weet je wel, niet liggen, ik hoop niet, mijn paard aanhoudt.

00:32:21 Finally alone

00:33:25 En die vinden het raar dat ik een groot persoonlijk mens aanwijs.

00:33:30 Als letterlijk die moeten vermoord worden, want anders gaat de rest dood.

00:33:36 Dus heb je dat zo ook eens een probleem.

00:33:40 Maar als het op basis van al die research, ja, research van fundamentaal gehoopt het.

00:33:48 Ja, maar wij zijn niet zo even genoeg te doen.

00:33:50 Die hebben niet alleen niet gestudeerd, die hebben niks toegevoegd op pijngebracht.

00:34:00 En ook niet geleerd, kakakakak, dat doen we niet.

00:34:04 Zou je een koude kultje, vier eronder gooien.

00:34:13 That hung her in the area where we are by hand.

00:34:20 Ja, de kismuziek is ook nog aangekomen.

00:34:23 Maar ik wil hem allemaal vergeten, maar allemaal water.

00:34:30 Nou, revolutie hebben inderdaad werkelijk niet meegemaakt.

00:34:58 I love

00:35:01 The last kind of comes from Egypt, that's my call.

00:35:06 So it's Tom Baker, Oma.

00:35:10 Ja, daar was ik, zeg maar, koekjes aan het eten en thee aan het drinken, ook bijna.

00:35:20 paniekaanvallen enzovoort aan zee.

00:35:22 Ik vertel het over dat afzende oog.

00:35:24 Maar,

00:35:27 de hele familie in België

00:35:30 Ja, letterlijk. Zo is het dan werk. Hint, Hint, Steemdek, België, Benelux, de islam.

00:35:40 Ik wist twee anderen mooi op de telefoon terug.

00:35:42 Ja, al lang moesten we de gemeenschap maar tevreden houden.

00:35:50 Kijk, de regenbouw redt het wel.

00:35:55 Ja.

00:36:00 Die oma, toen was ik daar thee aan het drinken en een paar koekjes aan het eten.

00:36:10 En die gaf me hier, hier heb je een paar National Geographic's.

00:36:15 Die hadden ze opgestuurd ofzo.

00:36:17 Die kan jij lezen van de toernet.

00:36:20 in Nederlands ofzo en dan ligt er daar eentje over Egypte

00:36:30 Precies op het kastje bij Jitske Koenders.

00:36:34 Met jullie ondergrondse hieroglyfeninfrastructuur onder een dubbele twins uit.

00:36:40 Dat was Beryl Chamber Twin Towers, Double Neural Interface zeg maar.

00:36:50 Zeg maar ook eentje bij de Primera gekocht, bij de Alpinaal de Ruitenweg, in West.

00:37:00 Baarsjes, weet je wel waar ik bij John Venkler zat sindsdien hier, nouja, het verhaal weten jullie wel een

beetje.

00:37:07 En dan een paar jaartjes.

00:37:10 er geen gezet heen op een gegeven moment. En dan had ik er eentje over Egypte volgens mij. Of twee zelfs.

00:37:20 Op m'n boekenmuur dingetje, niet m'n boekenwald, maar gewoon met die planken die ik eerst

00:37:26 ook op de Vliet Cent 4a had, die ik samen met Azen had geschuurd.

00:37:31 gelakt en zo. Waar zij in principe meer van wist. Ik denk gewoon dat had de spandiensten

00:37:38 deed.

00:37:40 Kijk maar, we proberen je digitale daden te beschermen voor hen.

00:37:44 Je privé al even over te nemen en te neurolinguistisch programmeren.

00:37:52 Ja, je zegt het toch weer, er zaten ook weer puntjes voor je.

00:38:02 Gewoon, weet je hoe de piramid is gemaakt door dit.

00:38:08 Slapen.

00:38:10 Ja, we zitten allemaal zo even onder de umbrella van kanker, de uiterste.

00:38:17 Kijken dat ik precies hier de regenboog vlag.

00:38:20 Aan de boardwalk hier langs het IJ bij jullie rijtje huizen waar dan die muren tussenuit zouden gaan gehaald worden om een soort lap te maken.

00:38:30 Ja, controlebasis zeg maar, maar dat is al fucking lang geleden en hier zijn de hele

00:38:36 de keuken gewoon elkaar richten op en dat, ja, wij zitten.

00:38:40 Met die regenboog vlag daar precies dat die hele kankerprijp er een aan de hand was.

00:38:50 We moesten zijn blij, kinderen waren superblij.

00:38:53 Met alle hormoontherapie en exposure aan.

00:38:58 Ja, een makkelijk ding.

00:39:00 Kindje zei zelf, op tv moet je geïnterviewd worden, waar heeft het pijn? Waar heeft iemand eigenlijk? Nee, nee, nee, nee. Ik vind het niet kunnen dat ze zo...

00:39:10 blote van die seks dingen aan het doen zijn voor mijn neus maar je moet er vroeg mee beginnen hoor

00:39:20 Met de regenbogen in de bio dingen.

00:39:26 Pride or white.

00:39:31 Ja, als je dan echt denkt dat ik met Jess & Coen nog een normaal gesprek gevoelde om met Amikamo te regelen dan...

00:39:40 I have a good place.

00:40:15 Gracias.

00:40:23 Kijk het er een beetje aan.

00:40:26 En dan stuur je hier.

00:40:27 En dan allemaal naar de creatie.

00:40:30 Ja, een dansje zei er ook een van de Stramberg.

00:40:34 En die hadden ook eentje met bacteriën.

00:40:37 Zo'n Stramberg uit Zweden, weet je wel.

00:40:40 over probiotische dingen en zo, over India en anders en zo, daarom Ikea en dan die kaketivian gedrocht

dingen en zo.

00:40:54 Yeah, but he'll tell them all about what he did there, yeah, for you.

00:41:00 met die trampling dingen wel, kijk schimmel op je voet, wel eventjes betaalde om naar Ikea te gaan enzovoort.

00:41:12 En de rijbewijs en dat soort dingen, allemaal zwart terwijl ze uit keren binnen hadden.

00:41:17 Ja, goede vind ik ook.

00:43:37 Gracias.

00:43:45 Thank you very much.

00:43:52 Gracias.

00:44:02 Grazie.

00:44:12 Thank you.

00:44:25 ありがとうございました

00:44:44 ...en deze plaatskijnen, deze opzal, en die weer niet tekenen, maar de zoveelste ideeën.

00:44:50 Ik ben als een soort muiskort, dat vertaalt ze naar de kinematische bewegingen van de garm.

00:45:00 ...van de vrede pleim en haar vrede pleim, eigenlijk hetzelfde.

00:45:04 Dus ik bedankt voor je aan het nemen.

00:45:06 Dat is een mooi bedoel.

00:45:12 Thank you.

00:45:32 Thank you.

00:45:56 All right, let's go ahead and see that one.

00:46:00 Ik heb die machine erin op, leuke dingen toch?

00:46:23 C'est un peu comme ça.

00:46:33 Dat is de puber die ik altijd had, dat werd precies een vrouw.

00:46:41 of this.

00:46:44 A little bit of a problem.

00:46:46 Well.

00:46:54 I have some dash, these are the guys, look under the same hill, looks like I've got a little beat, I'm sorry.

00:47:00 Niet de Beehive, waar je de GTA systeem met veel Commando Mode, Trivers, San Francisco.

00:47:11 Wordt hier gezegd, even een deep dive in mijn collectietje aan compacter representaties.

00:47:20 Ik heb het diep tegenaan.

00:47:21 Nee, nee, nee, dit is verder.

00:47:24 De resultant programma voor de humanitarian effort

00:47:27 is fans observeren.

00:47:30 Intervention, assistance, regeneration, production en infrastructure.

00:47:40 Zoals de representaties, de formalisaties.

00:47:48 Het is de meest ambitieze humaniteit.

00:47:50 Translatorian Expression is a network of people, clinics, and not people of just sick people, but just academicians.

00:48:00 doctors, professors, clinics and production centers.

00:48:10 able to compose the biomedical capabilities they need from a shared physically explicit foundation.

00:48:20 Nee, we doen dit normaal interrupt en wij hebben een brandplekje op je piemel gegeven.

00:48:26 En get lucky in de casino letterlijk.

00:48:30 omdat ik op de wc kijk naar een reekast iedereen met z'n ogen weet je wel dat is zeg maar

00:48:40 De focus van je ogen voor over je hele tracking IDT, IBP, microcircades.

00:48:47 Gewoon het controlesysteem van een menselijk lichaam bijna.

00:48:50 helemaal daar wel mee gezegd zeg maar maar had jullie gebruik om composities te maken en zo

00:49:00 Bima is een orkestlingertje, toch?

00:49:02 Bij Jorstic Band.

00:49:07 Maar, weet je, dat gaat niet.

00:49:10 Highlighted blauwe stukje

00:49:12 het zou een contrast zijn voor jullie ofzo

00:49:14 over jullie het generative AI'en

00:49:16 die

00:49:20 Die kankerwoordjes betekenen bijna letterlijk een hele maatschappij die een consensus moet zijn.

00:49:27 En als er één kankerlabiel professortje bij is.

00:49:30 Die denkt kanker, mijn werk wordt bedreigd, maar akademische kankertitel wordt zelfs ontnomen, want blijkbaar presteren we niks.

00:49:42 En die hebben accesses tot een hele aparte middel en research laboratoria enzovoort en funding en middels.

00:49:50 En die denken dan even kanker, maar niet gezien, ik ga indirect met mijn netwerk een paar dingen in de maatschappij uitbrengen.

00:50:02 Kijk, ik heb een jamboree met vrienden gehouden en seks gehad.

00:50:12 Dat kunnen we replayen in het casino, Get Lucky.

00:50:18 Wanneer gaat hij weer...

00:50:20 en masturberen. Gewoon, humanitair, Geneva Confectie.

00:50:30 Want ik weet niet, ik zie alleen maar een oven aan staan. We moeten in een lim. Ja, letterlijk, biomedisch.

00:50:40 Afvalverwerkingen op grote schaal, ik weet niet, daar hebben ze tijdens de Tweede Wereldoorlog ook verhalen van gehad.

00:50:49 Kanker.

00:50:50 Weet je wel, dat over dag en nacht aanstoel om die mensen de resten ervan te verbranden, dat het zelfs ook niet zo goed was.

00:51:00 Dat schijnt zo te zijn. Ik weet niet, er zijn wel eens internetverhalen of counterculture mensen die iets moeilijker doen over hoeveel mensen er over gekomen zijn.

00:51:10 of waar of wie. We hebben allemaal tijd doorgebracht en als je dus dit werk niet afmaakt

00:51:20 En zegt, kijk, biomedisch, humanitair of HCI, dan gaan mensen rare vragen stellen aan je.

00:51:30 nu op deze manier zeg en digitaal vast dat leg geen stream dan moeten jullie

00:51:36 mij voor uitzoeken hoe de kanker jullie letterlijk nog ergens gaan leven op de

00:51:39 planeet

00:51:42 Dat is nou helemaal mijn mening en daar moet je het mee doen.

00:51:51 Yeah, but you get it.

00:52:01 Move, move.

00:52:10 Dit.

00:52:11 We gaan even om de stream een beetje te bespreken.

00:52:14 Hier, Fifi aan.

00:52:15 Fifi aan deze vrouwen.

00:52:17 Ja, dit.

00:52:21 Cacau!

00:52:28 Cacau!

00:52:31 됐다

00:52:36 됐다

00:52:40 Then y'all, they come on, y'all, and I'm moving on.

00:53:00 Don't think we're going to play it now.

00:53:10 Yeah, he's a black man here.

00:53:11 Yeah, but it's like this one, this one is like a free road road, baby.

00:53:14 It's a full circle of the whole thing, thank you.

00:53:24 I'm going to be super busy with doing 10 years to sleep.

00:53:31 Yeah.

00:53:50 I'm going to go to the other side.

00:54:01 Thank you, thank you, thank you, thank you, thank you, thank you, thank you, thank you, thank you, thank you, thank you.

00:54:10 Gaan we het zien.

00:54:12 Het is het woordje van de auto.

00:54:15 Het is ook geëvloerlijk.

00:54:17 In nou te zeggen, ik heb een keuze.

00:54:20 This is a cancer-free light, this hyper-moderne technology, which is used to be used in the

00:54:30 Rostedag'ı için teşekkür ederim

00:54:40 Die worden bekostig, niet door mijn paak, het ene oliemaatschappijtje en misschien een Philips ofzo.

00:54:51 Maar eigenlijk doe alles.

00:54:54 Kijk trouwens echt.

00:54:56 Met mijn ex.

00:54:57 Nee, nee, nee.

00:55:06 Ik krijg steeds meer de zin in een humanitair in te zijn.

00:55:27 Thank you, I believe this is our company.

00:55:30 Dit is helemaal geen AI-automatiseerd.

00:55:33 Met de mensen die er nog denkt hoe is het in tv zitten.

00:55:37 Ja, ja, dat is wel gewoon weer.

00:55:47 Like the community for one anthem.

00:55:50 Ik wil deze staan. Ja, echt wel.

00:55:53 Kijk, deze is echt voor jou.

00:55:58 Want ik wil er eigenlijk op.

00:56:00 Look, look, look,

00:59:50 That's what I said, it's an all-exorcist group.

01:00:11 I don't know what the hell to do.

01:00:14 It's so good.

01:00:25 Want ik wacht, want ik zal te rijden.

01:00:33 Yeah that's usually my favorite, that's why it's cool.

01:00:40 Da blöcke ich da leckte, wie die echte Gerichte flinke,

01:00:43 oder man, was soll ich einmal auf das tun?

01:00:46 Das war's für heute.

01:00:50 I

01:00:54 I

01:00:56 I

01:01:00 Oh, good.

01:01:02 Like this indeed.

01:01:10 Zo, wat is dit?

01:01:13 Ik kan het niet zo leren, hij heeft je vormen mensen zo leren.

01:01:16 Sorry, maar dat is waar.

01:01:25 Hey, hey, hey,

01:03:28 Maybe he thought he could win.

01:03:30 Tiberium and the Skryn as a way to escape his immortality in one way or another then again

01:03:40 He would one day come to call it Ascension and he started to play the long game

01:03:46 living a life in the shadows the brotherhood of no

01:03:50 attracted members into its fold. Using his longevity, otherworldly knowledge, or perhaps

01:03:55 sheer charisma, Kane was heralded within this secret brotherhood.

01:04:00 as a pro-release.

01:04:10 Agents of Nod would suddenly shape the course of history to their benefit

01:04:13 with nationalistic political sock puppets and the craft of disinformation.

01:04:20 the most audacious known example was the complete collapse of the soviet union

01:04:25 following the second world during the war this man

01:04:30 seen playing personal advisor to Stalin. Stalin was known to be impulsive, driven by his emotions,

01:04:37 and seemingly unstable.

01:04:40 proving his underlings on a whim.

01:04:43 And yet, when this advisor whispers in his ear,

01:04:46 Stalin stops and listens to every word.

01:04:50 Never questioning, never debating, this is the earliest known footage of Cain.

01:05:02 late 20th century, Nod was prepared for the prophesied arrival. It operated out of multiple

01:05:08 command posts around the world.

01:05:10 With a Sarajevo Temple of Nod at its head.

01:05:13 Since its entry onto the world stage in the 1990s,

01:05:16 the Brotherhood has publicly aligned itself with anti-West...

01:05:20 an ideology, with designs to unify disenfranchised third-world nations under its banner.

01:05:27 That's what they told the world.

01:05:31 In 1995, a meteor carrying Tiberium crashed into Italy, and from there the crystal spread worldwide.

01:05:40 As the growth of Tiberium is accelerated by a hotter climate,

01:05:44 Nod's ties to equatorial nations gave them a monumental lead in supply of the resource.

01:05:50 I see the future.

01:06:00 in their stubborn ignorance they continue to work to forestall this future

01:06:04 despite their pretense Nalt was at this stage undoubtedly fighting

01:06:10 for world domination, but not necessarily for domination's sake.

01:06:15 Control of the planet would mean control of all Tiberium on Earth.

01:06:20 And this is what Cain was after.

01:06:24 I'm Seth. Just Seth.

01:06:27 From God to Cain to Seth.

01:06:30 I am his right hand. I have a task for you.

01:06:34 Cain was no fool, but his choice in friends was never his strong suit.

01:06:40 Taking his name from the third son of Adam and Eve, Seth was his second in command during the First Tiberian War, overseeing Nod's lower-ranking commanders.

01:06:50 Seth was an ambitious, jealous man, and saw the rise of a young commander whose successes had drawn Kane's eye as a personal threat.

01:07:00 I was starting to trust you, but now Cain has asked for your services specifically.

01:07:05 In order to secure his own position, Seth tried to have this offstart ruined.

01:07:10 Dispatching your troops to the U.S. Kate has been loath to attack America, but I feel that it's time, and that you're the one.

01:07:22 This is the panic. A full frontal attack with your strongest forces should render their military center of operation.

01:07:33 Yes, power shifts more quickly than some people think.

01:07:40 Despite their early advantage and lead in Tiberian research, Nold was unable to hold

01:07:50 the slow to rails juggernaut that is the global defense initiative the first

01:07:55 Tiberian war came to a close when GDI fired the ion cannon

01:08:00 upon the temple of Gnalt.

01:08:10 I can see the chemical and the physical.

01:08:21 Ik heb er echt niks aan mijn hand.

01:08:23 Nou, ik heb een kleedverzorgd.

01:08:26 Inderdaad.

01:08:32 The blast may not have killed Kay, but he didn't escape unscathed.

01:08:40 The FBI proclaimed him dead, able to recover a body.

01:08:45 Kane was sequestered away to recover, completely cut off from the fracturing brotherhood.

01:08:50 He spent much of the next 30 years in hiding, likely within the Nod Pyramid in Cairo, his new seat of power.

01:08:59 By the late 20...

01:09:00 In the 1920s, the largest remaining Nod faction in the Eastern Hemisphere was under the control of General Hassan, a weak leader whose position was consolidated by GD.

01:09:10 He was allowed to maintain his tenuous leadership in return for covertly reporting activity directly to GDI's General Solomon.

01:09:20 or silencing troublemakers.

01:09:22 After all.

01:09:28 Skit!

01:09:30 You expect me to bring it back.

01:09:40 No one has it, but I really don't have contact with him.

01:09:50 This arrangement kept the remnants of Nod firmly under GDI's heel.

01:09:58 It was during this interim that...

01:10:00 The Forgotten, a faction of Tiberian mutants, loyal neither to GDI or not, rose to global significance.

01:10:07 Their leader, Tratos, is the earlier Snow King.

01:10:10 of the Tacitus, an alien archive on Tiberium, and coerced by Cain, he was able to translate

01:10:17 it at long last.

01:10:20 Cain had access to all the information on Tiberium that he would need.

01:10:43 All right.

01:11:10 Yeah, yeah.

01:12:11 Obrigado.

01:12:22 First of all, that's what's wrong with it.

01:12:25 It's not in and we have a breach.

01:14:35 Meu Deus, meu Deus, meu Deus.

01:14:40 I'll say that a little while, we're going to get a little section of the fighting intelligence

01:14:43 in the next one.

01:14:44 I'll say that a little section of the fighting intelligence in the next one.

01:14:46 I'll say that a little section of the fighting intelligence in the next one.

01:14:50 comprised a collection of human mines it used as processors held in suspension tubes in underground bunkers

01:14:57 shortly after the war cabal turned

01:15:00 Killing Tratos, and launching a joint attack on both GDI and Noth, using Noth's divination research to create an army of Tiberium-enhanced cypher-

01:15:10 I'm going to play Sex and Light My Unfold to be able to play Ashi Reddress.

01:15:22 The combined forces were enough to stop Cabal, but a part of him survived after his own defeat

01:15:30 Cain's body had been placed in one of the suspension tubes, and his mind was linked with cabals.

01:15:36 I see.

01:15:37 My, my, my vision has...

01:15:42 I plan to follow a path un-predicted by the youth of your life.

01:15:48 That very, very bad sense.

01:15:54 except

01:16:00 These tubes that imprison me, for even as my flesh is restored, my mind is left to wander alone in darkness.

01:16:11 my creation and is now, in a way.

01:16:20 It's like a cabal.

01:16:25 It's a way slow.

01:16:26 Treat deprivation.

01:16:30 Ga jij maar, je hebt toch pek wat erover gehouden, ik weet niet.

01:16:34 Weet je met elkaar met de video, dan is de face al ge-upgrade, ge-upcheckt.

01:16:40 And that's what it means.

01:16:42 That's what it means.

01:16:44 Yes.

01:16:46 Yes.

01:16:58 This isn't cold.

01:17:01 Gehen wir so machen, kriege ich meinen Bauch nicht gut.

01:17:04 Er kann es weiter machen, ist gut.

01:17:12 I'm very hysterical, because I don't care at all if he wants to go there.

01:17:20 That was sick.

01:17:30 This is Texas, this is...

01:17:38 Black hand...

01:17:40 ...the memory of the cabal that he turned, a small part of him obsessed over the megalomaniacal machine, and so with precious data preserved...

01:17:50 De uiteindelijk was Mrs. Foxy, B.O.H. de B.O.F.I.V.I.A.

01:18:00 For one final time, Legion reunited with affected notifications under one vision.

01:18:10 It's just something that I can do.

01:18:20 Help my brother!

01:18:22 It is time you saw the face!

01:18:24 Help!

01:18:30 Cheeky.

01:18:37 Thank you.

01:18:38 Thank you guys.

01:18:40 Missile was not an option

01:18:51 for instance, the reconstructed Sarajevo Temple Prime,

01:18:55 and have GDI use the Ion Cannon to write the news.

01:19:02 Yes, that's it.

01:19:04 Yes, that's it.

01:19:10 Dank die app zeg maar voor m'n lucht.

01:19:14 Dat is awesome, dat is een mooie voordat het kan in zijn uitdraagt.

01:19:20 m'n brug gehaald en zover dat m'n posture zou meten.

01:19:24 En te kijken hoe m'n brug zou afgewijkt zijn.

01:19:30 so deep in the ways the strategic drawbacks say the gdi director of the treasury

01:19:40 We held back from the 2047 Annual Energy Summit by stealth assaults on the Treasury, while the rest of the Council of Directors on board the GDSS Philadelphia.

01:19:50 O que é que é que é

01:20:30 En daar had hij wat patenten op staan en zo.

01:20:34 En die heeft vroeger een diplomaatje.

01:20:38 Misschien niet.

01:20:40 helemaal gehaald. Maar verder, weet je wel, nou sorry ik even aan dat ik de pas betekent ofzo, maar...

01:20:50 Met innocuurs.

01:20:57 Ik krijg een set, Rit & Daas, TBS Nederland.

01:21:00 He was a dead man. He was a white man.

01:21:10 to doubt his seemingly unsound commands.

01:21:14 We should never have been so aggressive.

01:21:16 Who dares tell Cain he's overreaching

01:21:18 without fear of punishment?

01:21:21 Not understanding that Cain intended for GDI to take Temple Prime and finding herself outgunned, but refused her request for reinforcements.

01:21:30 announcements, Cillian lost her nerve.

01:21:40 executed. The command instead came from Abbas Alexa Kovacs. Alexa was fanatically reverential

01:21:49 to Kane.

01:21:50 Een fanaticisme werd haar verkeerlijk paranoïd.

01:21:54 Wat nou?

01:21:56 Ik kan die niet stilie herhalen als ik het moet openen op die hoofd.

01:22:00 Yeah.

01:22:13 All Cyborg Army murdered many innocents, murdered my parents.

01:22:21 I think I'm going to show up for 3 minutes, I'm going to show up for those 3 minutes.

01:22:26 Just as the agent was about to interface with the Tacitus...

01:22:30 Alexa snaps and sabotage the A.I.

01:22:32 I'm not going to talk to you.

01:22:34 I'm not going to talk to you.

01:22:36 I'm not going to talk to you.

01:22:38 I'm not going to talk.

01:22:40 Ik heb nog een tafelpuffer gemaakt geloofd.

01:22:50 Dat is echt, echt, echt een vormel, of je wil hebben gesproken.

01:22:56 Sorry, maar overdoelde dat niet.

01:23:00 Ik vond het te moeilijk worden. Het was korter simpel.

01:23:05 Viest.

01:23:06 En nu denk ik iedereen.

01:23:08 Nou, dat hebben we gedaan.

01:23:10 Cain had ever been surrounded by the similarly power-hungry, the blindly faithful, and Nod has a long history of...

01:23:21 We have toiled for thousands of years to achieve his goal, only for one of his own, to snatch defeat from the

jaws of victory.

01:23:35 With the Lots of Legion, Nod was unable to hold on to the Tacitus.

01:23:41 driven back by GDI and not

01:23:43 had captured a threshold

01:23:44 but without the tentatives and without

01:23:47 Legion, the threshold

01:23:52 Ik ben gewoon tegen wat er liefde.

01:24:01 There are a lot of ups down there that's a full rough year that you get past days by, you get past days by, you get past days by.

01:24:10 Ja, ik voel me dan oncompetent aan voor als mensen mij zelf een kompetent gegeven bijspringen.

01:24:20 Legion launch one final attack on a heavily fortified GDI compound in the Rock Mountains and successfully read the Tacitus

01:24:30 It's more of a flower.

01:24:32 The country is pretty bad.

01:24:34 Yeah, it just goes forth.

01:24:36 Yeah.

01:24:40 It's time for you to take center stage, time for you to achieve the purpose for Richard.

01:24:46 Alright, that's for Richard.

01:24:48 What the fuck?

01:24:50 20, 32.

01:25:10 they know it is being watched through it are not want to sit content with their humiliation.

01:25:36 I've been around in years and, yeah, very much about you.

01:25:43 Stay down.

01:26:28 Thank you.

01:26:32 ChatGPT is nothing but hype.

01:26:38 It might be portrayed as the greatest technology.

01:26:47 millions of dollars, you don't know if it's of trying to keep it.

01:27:07 your mind, and there's nothing you can do to sound.

01:27:27 for the league's model.

01:27:37 almost nobody has ever seen.

01:27:55 That is not the case with Urban AI, full cost and expenses, that's it.

01:28:03 of 24, not 2 billion dollars.

01:28:05 So for every dollar,

01:28:07 you actually can get into sister products

01:28:08 for opening up, opening up.

01:28:15 open AICM, in 30 weeks, it would be $5, $30 billion.

01:28:19 Some of that...

01:28:20 I have your paperwork, but I think world damage is terrible.

01:28:25 Pay rent, page 21, you are already deficit.

01:28:38 That loss was one.

01:28:43 It was about 15 times that one hand was done and did that, you know,

01:28:47 we started up in history as of our operating system.

01:28:51 And that financial hold is not closing anytime soon.

01:28:55 But what you think analysis said, open AI is expected to emerge 143 billion dollars.

01:29:06 But at this birth rate, that won't last long.

01:29:14 It's shit, it's non-profit.

01:29:21 It was a long way from where it started.

01:29:25 Opening items was founded in 2015.

01:29:27 We won buses and all the disco chairs.

01:29:30 was to make sure that advanced AI

01:29:32 limited to all of them, not just

01:29:34 a handful of shareholders, but

01:29:36 building coming into AI schools turned out

01:29:38 to be insane.

01:29:42 Dr. Babe spent two months, and the blowback almost exploded.

01:30:15 We had employees sold about $6.6 billion worth of stock to private investors.

01:30:24 He will start up at the time, which is a close throw here during the soft bank lead round.

01:30:32 The timeline is suspect.

01:30:38 The insiders cash in.

01:30:41 which was an obvious question.

01:30:45 Why would places you can have more for somebody

01:30:48 that would take more?

01:30:50 It's projected annual revenue.

01:30:56 Most established stuff are going to be traded somewhere between $5.00 and $5.00.

01:31:02 Gracias.

01:31:12 In AI, that comes with the first thing.

01:31:14 To build a better model, you need to throw more computing power at it.

01:31:18 And that means every single jump.

01:31:20 Valuation just needs to raise its next month opening at $300 million.

01:31:30 I think INS helped them work how we work, both for the Apple level of detail or not.

01:31:40 with Almar Wilder, iPad, IK and Clover, and our kids.

01:31:50 From an iPod, it's huge, but I feel like it's kind of an Apple, Apple B doesn't even talk about it, you don't.

01:31:57 Yeah, it's good, eh?

01:32:00 Ik kocht niet zo'n digitale studio's van die pot ervan.

01:32:03 Ja, precies, maar die is uitgebreid naar Aijberg, Baarsjes, andere dingen.

01:32:10 andere dingen pop-ups en combat controllers en telefiek iets enzo

01:32:24 I don't think it was the same thing before the...

01:32:30 You see the game tech?

01:32:32 Yeah, in the background.

01:32:38 Yeah, I can't believe them are too large.

01:32:40 Er zijn al twee en hier al naast van Paypal en zo, mag jij overgegaan op...

01:32:50 1.3 trillion dollars in data center and it's $70

01:33:00 The internal projection shows the company expects to spend around $800...

01:33:10 larger than the annual G.

01:33:20 hardware store.

01:33:33 I'm a professional, I'm a father who said that he was a deal, and I told him that he was

01:33:39 a deal.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:39 That's what happened.

01:33:40 behoorlijk. Dan mocht hij wat bouwmaatschappen inwalen voor wat

01:33:47 sponsors van diensten ofzo.

01:33:50 The first 10 billion, we arrived at the first U.N.A. came online, around that same time.

01:33:55 And the primary nuclear reactor work, both.

01:33:58 ...on Oracle's cloud services.

01:34:00 stocks surged a single day, $151 billion market value, but Oracle can't run that cloud without

01:34:08 any views.

01:34:10 Okay.

01:34:11 Okay.

01:34:12 So, NVIDIA is an open AI.

01:34:18 How did that circle the money?

01:34:20 of right back in Nvidia's pocket and along the way the same cash shows up as growth at all three

01:34:26 companies at once chip revenue at Nvidia who order back

01:34:30 I don't see this.

01:34:41 dollars in these kinds of circular arrangements across the AI supply chain.

01:34:46 Even AI's biggest competitor, Anthropic.

01:34:50 and Amazon to create funding seemingly out of nowhere.

01:34:53 And then in July 2026, the Wall Street Journal video was a talk.

01:35:00 250-billion campus developed in Southern Ohio.

01:35:10 its largest AI customers because OpenAI doesn't have an investment-grade credit rating.

01:35:16 Lenders price loans on a carver's ability to pay.

01:35:19 The company...

01:35:20 more than $20 billion a year does not look great on paper.

01:35:23 To the forecast of this, NVIDIA stepped in as the ultimate financial safety unit.

01:35:28 An SEC filing disclosed that...

01:35:30 It is not sustainable basically, like I said, it's my nickel over to $30 billion.

01:35:42 It's too dark.

01:35:43 I think it's too dark.

01:35:44 It's too dark.

01:35:45 It's too dark.

01:35:46 It's too dark.

01:35:47 It's too dark.

01:35:48 It's too dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:49 It's dark.

01:35:51 In the late 1990s, tech giants like Lucent, Nortel, and Cisco

01:35:55 lit billions to cash-wrapped internet startups so they could buy gear.

01:36:00 It's not a big deal, it's not a big deal.

01:36:03 It's not a big deal, it's not a big deal.

01:36:10 Brand.

01:36:11 Brand.

01:36:12 Brand.

01:36:13 Brand.

01:36:14 Yeah.

01:36:15 Brand.

01:36:16 Brand.

01:36:17 Brand.

01:36:18 Brand.

01:36:20 If opening a new game is over its rent,

01:36:22 NVIDIA loses its biggest business.

01:36:27 It's not that NVIDIA's...

01:36:30 at least four ways of reaching your retirement account.

01:36:34 Since most traditional 401k's and Roth IRAs

01:36:37 bet on the same thing, the S9500.

01:36:40 has become all the investments.

01:36:50 That knocked out 41 cents off its earnings per share without opening in about 11%

01:37:01 When private AI companies raise cash in higher valuations, their investors are going to pay for gains straight into their profits.

01:37:07 In 2026, S&P...

01:37:10 or any screw button.

01:37:20 Because of how top-heavy the stock market has become, by late 2025, the top 10 companies

01:37:25 in the S&P 500 are involved in AI or software in some way.

01:37:31 Expositive people, it's cool, it's Alphabet.

01:37:40 There's Tesla, Tesla locked, there's the right, there's the girlfriend.

01:37:49 Here.

01:37:50 The second way is one you'll see in your mailbox every month, your electricity bill in our data centers.

01:38:00 Weet je, via mij alles doen, incasseren, homer, nat worden van sociale overhoorzaamheid, een grote funky town hero.

01:38:10 En de buiten, verder buiten, uitburg, zorgmachtiging, hele dag.

01:38:20 Geen connectie met die genen eigenlijk, dit's computers.

01:38:28 Hierraal in toch?

01:38:30 The fee for valentine is a fee for valentine, and also a fee for valentine, and also a fee for valentine, and also

company borrow.

01:40:09 Yeah, it's not secret.

01:40:10 The next day, Wednesday, Izar David Sachs said there would be no federal bailout for AI, while Sam Allman insisted that taxpayers should not bail out companies that...

01:40:21 Saks added that the U.S. had a close to five major

01:40:25 Ontario companies, so that the lab was too big to fail.

01:40:28 Too big to fail.

01:40:30 A short leave of those comments over AI to extend chip AI data centers.

01:40:40 Thank you very much, Mr. President.

01:40:50 They make some risky bets and then demand a taxpayer bailout when those bets go south.

01:41:06 itself

01:41:10 In other words, the borrowing is everyone else's problem.

01:41:13 In July 26, the launch is an ultimate play.

01:41:16 He proposed giving the U.S. government...

01:41:20 in the company, where Baldwin's bench was that

01:41:25 who wouldn't let Valverse

01:41:30 And it's not a fringe idea. Even Senator Bernie Sanders has pushed for the public to take a 50% stake in AI companies.

01:41:40 On paper, the public stake sounds generous, but in practice, it's a Trojan horse.

01:41:45 Once the government owns 5% of OpenAI, a collapse is no longer just a private...

01:41:50 It's a loss on a public asset held in the name of every American who the I isn't sharing the upside, it is pre-selling the downside.

01:42:40 This is a trillion dollars in global wealth that tracks these indexes.

01:42:51 Indexed bonds and private pension accounts will become automatic buyers of OpenAI stock, whether you want to or not.

01:42:58 Thank you.

01:43:00 who really have someone to sell it to collapse, so with retirement funds, none of this means

01:43:08 OpenAI is doomed.

01:43:10 Back in 2019, before it existed, Sam Hallman joked that OpenAI had no plans to make revenue.

01:43:16 Once it built a truly intelligent system, it would simply ask...

01:43:20 returns for investors. Seven years later, the company brings in billions of dollars

01:43:25 and serves close to a billion people a week. If OpenAI really does hit the 300...

01:43:30 Fifteen billion dollars in annual revenue by 2030, today's losses will look like one of the boldest in this history.

01:43:40 That has changed.

01:43:41 It was a make-it.

01:43:47 Yeah, that's true.

01:43:50 Yeah, go for life, yeah.

01:43:52 Utilities passing costs, the household,

01:43:54 a government being offered a stake,

01:43:56 and indexed funds waiting to buy in on day 15.

01:44:00 One of those players has a reason to believe.

01:46:24 We're on the other side.

01:46:26 We're on the other side.

01:46:27 And we're going to party.

01:46:28 We're going to party.

01:46:30 Alleen als je het wachtwoord hebt van de medische dossiers, dan mag je joinen.

01:46:37 Regiebehandelaar, elke...

01:46:50 The loot bags, Discord, tags, their interface, special interface.

01:47:00 But it's patient and probably really fun.

01:47:04 Yeah, but it's an auto-truck because we feel like a weekend here, for me the weekend.

01:47:15 I think we're going to be able to have this.

01:47:21 For everything.

01:47:22 Hey, hey, hey.

01:47:23 I'm not even kidding.

01:47:24 Don't get your sweet.

01:47:25 It was Reddington.

01:47:28 He hired a freelancer.

01:47:29 What?

01:47:30 Dat is een gaaf game van die gasten die ook Star Citizen maakten, waar Gamius die Vido helemaal lijp op ging.

01:47:40 en een hele hoop artiesten, want die hadden jaren geleden al door dat dit een nieuw melkvee zou worden, elk, elk.

01:47:50 It was interesting to check what they were able to fix it.

01:47:54 Look at the party.

01:47:56 Are you still alone so well?

01:48:00 Kankerbeelder.

01:48:01 Die bedreuslaatje.

01:48:14 Your security is occupied.

01:48:22 Thrust, GSPI.

01:48:33 You turn us down.

01:48:35 You never fight.

01:48:40 Because you're a wanted man in the shadows, and I am not.

01:48:45 I run my business, and I'm being whined and dined by the city.

01:48:50 I don't know.

01:49:10 and then go down to docks, got my next shipment of girls.

01:49:22 Get out of my way.

01:49:34 Oh Elizabeth, thank god you're here. This is the man. He's the one who wants me dead.

01:49:41 To do what? Is it champagne?

01:49:43 Italian dog, Borla.

01:49:51 How about a humanitarian exposed his fraud and commit suicide?

01:49:55 Why do you have to do it?

01:49:57 I didn't do anything.

01:50:00 I think the assassin, ma'am.

01:50:02 What do you say?

01:50:11 You're a liar.

01:50:12 Who's lying, Floriana?

01:50:14 Shut up, Franklin.

01:50:20 This is how you do this, son of a bitch!

01:50:31 Give it to me!

01:50:35 No, she's not free!

01:50:40 Madame Capo doesn't free children from slavery, she imprisons them.

01:50:44 I don't believe you.

01:50:52 Hello, Fyodor.

01:51:02 Dit kan ik geschikt.

01:51:10 Dude, I could have bought it a little bit.

01:51:20 It's like I don't understand.

01:51:32 It's all her mother.

01:51:54 ever smoke.

01:52:00 I'm sorry.

01:52:15 The bank.

01:52:16 I thought I'd make this decision.

01:52:20 as possible. There are five factors

01:52:21 on the East Coast who are capable of

01:52:23 financing a mission like Eric's.

01:52:25 I run money for it.

01:52:26 Okay.

01:52:33 I am hired from Gestalt in the US Bank of New York office.

01:52:44 Okay, so that's it, we're finished.

01:53:10 I've made it with Braxton within the hour.

01:53:14 Disgusting.

01:53:27 I've learned how to call you that.

01:53:33 how much he weighs.

01:53:53 I'm alerted security.

01:53:54 You seem younger in person than you.

01:54:00 Are you a swimmer?

01:54:01 I'm so...

01:54:04 I know.

01:54:08 Maybe we have something in common.

01:54:11 So I return them to you, defects of all.

01:54:20 Make it abundantly clear that you should be home.

01:54:40 So consider yourself warned.

01:54:42 We will not hesitate.

01:54:50 we will currently i don't think you have

01:55:08 I did.

01:55:10 Gewoon dit hele stukjes, maar dat draait alles om.

01:55:14 Ik vind hier de laatste dingen.

01:55:16 Gewoon, dit.

01:55:20 Oh!

01:55:21 Did?

01:55:24 Did?

01:55:28 Please.

01:55:30 What a f***ing kankerlankway.

01:55:37 It's like a damn sign of a maze.

01:55:41 Chris Roberts, Chris Roberts, freelancer, Imperium Games, Cloud Imperium Games.

01:55:50 Here it is, Wreck-a-Rocco line.

01:56:00 I found some rather overcooked salmon in your refrigerator.

01:56:03 Natalie, he's not a picky eater.

01:56:05 I only feed him in the morning.

01:56:07 Because I think.

01:56:11 by increasing attachment to certain habits

01:56:14 to be a distinct liability.

01:56:16 Since in my line of work,

01:56:20 and mortality, go ahead.

01:56:30 for something once. After that, I start to become...

01:56:44 promotion and custom support.

01:56:51 Spencer.

01:57:00 ...radar technology, still too close to a magnetron, and noticed that the candy bar in his pocket had melted.

01:57:07 Then and there, he realized that...

01:57:13 Spencer and Vintage Form reward him.

01:57:40 white male, 30s, 40s, who entered the country alone in the past 48 hours, likely through

01:57:47 an East Coast port of entry with a U.S. passport.

01:57:50 Max, this is important. Otherwise, I knew Mr.

01:57:54 Well, they taste like squab or dove.

01:57:58 I think this was amazing.

01:58:06 I own the virtual information system.

01:58:08 I'll talk you through how to narrow your search.

01:58:10 You see, that wasn't so hard.

01:58:22 Now, if you had a nice white burgundy, we could raise it, man.

01:58:26 The moral of...

01:58:31 is that you should never worry.

01:58:35 The chance your workplace will definitely betray

01:58:37 loyalty to the individual.

01:58:40 Shit.

01:58:47 Huh.

01:58:57 private servers

01:59:00 Your judge had to step out, so we'll be judging you today.

01:59:12 force to let people have your plan to get to me at Kukul.

01:59:21 He was summoned by his boss

01:59:30 We're a great strategist, Raymond.

01:59:32 You're wrong, sir.

01:59:43 your voice.

01:59:56 It's up.

02:00:06 entirely wrong to wonder if Elizabeth was capable.

02:00:14 slightly

02:00:33 Even if it meant watching everything we built.

02:00:50 The lights are working too.

02:00:54 You had no right.

02:02:02 Justice may otherwise, but you are not me.

02:02:08 You can't best...

02:02:12 replace me.

02:03:11 who hired you to take your compo.

02:03:21 Sweep the floor, lock it down.

02:03:24 Go inside.

02:03:34 Asked you a question.

02:03:47 Auf und schalten, können Sie hören.

02:04:13 Thank you.

02:04:23 Don't be your sweet man.

02:04:25 Red tip, he hired a freelancer.

02:04:28 What?

02:04:29 Stop!

02:04:45 Who has a book?

02:04:50 Thank you.

02:05:15 is occupied.

02:05:21 Crest, yes, we are.

02:05:22 Why are you doing this?

02:05:27 Sweet.

02:05:30 When people came to you about to shoot new rubs, you turned us down.

02:05:35 I never liked him.

02:05:38 You never liked me.

02:05:44 I run my business.

02:06:02 Is there anything to do from me, Raymond?

02:06:05 I'm going to kiss this sweet young FBI agent.

02:06:10 Good night, and then go down to the docks and pick up my next shipment of girls.

02:06:17 Hey, where's my agent?

02:06:21 Get out of my way.

02:06:30 Yeah, but, uh, maybe I have to know a postman.

02:06:36 This is the man. He's the one who wants me dead.

02:06:38 David Byrne. I am the freelancer.

02:06:40 To do what? Is it champagne? What's the headline going to read?

02:06:45 Italian dog born with two heads.

02:06:50 How about humanitarian, I suppose, to trauma and suicide?

02:06:54 What do you got?

02:06:56 I didn't do anything.

02:07:00 I think the assassin may have seen a beautiful cocktail of the same barbiturals she uses to drug her children.

02:07:05 What are you saying?

02:07:07 She's not the woman you think she is.

02:07:10 You're a liar.

02:07:11 Who's lying, Floriana?

02:07:13 Shut up, claim it.

02:07:14 It's a mistake.

02:07:17 You know him?

02:07:17 In court.

02:07:20 You son of a bitch!

02:07:30 Give it to me.

02:07:31 I'd be happy to as soon as she admits the truth.

02:07:34 Give it to me now!

02:07:35 She's not breathing!

02:07:36 This will help you breathe.

02:07:40 No power doesn't free children from slavery, she imprisons them.

02:07:44 I don't believe you.

02:07:46 Don't be so naive.

02:07:51 Hello, Fyodor

02:08:02 Al die steiligheid die bij de bonsai van G773 wel even een bonsaibankje

02:08:10 We willen planten in en aan zullen kussen.

02:08:14 Dat is jaren geleden.

02:08:16 Nu zijn we compact, mobiel.

02:08:20 I don't understand how to do them on tracks and fives and ten.

02:08:30 The chief of the commission for clearing cash.

02:08:33 Anyway, I get sidetracked. I go for your banker.

02:08:37 Who is the banker?

02:08:41 I can't.

02:08:45 Wait, what's that?

02:08:47 Are you familiar?

02:08:52 Met een kwestie van drie isker koers, met een maatschappelijk orde voorzien, maar het is wel kijkbaar.

02:09:01 South sardine?

02:09:02 Yeah.

02:09:14 How about I make this as simple as possible?

02:09:20 There are five backers on the East Coast who are capable of financing a mission like Erics.

02:09:24 I run money through four of them.

02:09:34 The bank.

02:09:38 How about I make this as simple as...

02:09:40 There are five bankers on the East Coast who are capable of financing a mission like Garrick's.

02:09:45 I run money through four of them.

02:09:47 Which one?

02:09:52 The money was wired from Gestalten Landesbank, the New York office, and we have a man there.

02:09:57 I swear that's all I know!

02:10:00 Thank you.

02:10:02 Okay, so that's it, we're finished.

02:10:05 Yes, we're finished.

02:10:13 It's like a real time manipulatory.

02:10:22 The suspense is killing me.

02:10:30 I'm meeting with Braxton within the hour.

02:10:33 Of course, I've discussed contingencies

02:10:35 regarding Reddington with all of our colleagues.

02:10:41 I can't believe it's there.

02:10:42 Yeah, that's it.

02:10:43 I can't believe it.

02:10:50 You wouldn't believe how much he weighs.

02:10:55 Sit.

02:11:00 You're who I am.

02:11:01 Duck!

02:11:10 alerted security you seem younger in person than you appear to be when lurking in the back

02:11:20 Are you a swimmer?

02:11:23 I'm someone not to be trifling.

02:11:27 Then we have something in common.

02:11:30 You hire a simple thief to find the fulgur because you believe I don't have it.

02:11:37 So I return them to you defects and all to make it a...

02:11:40 It is abundantly clear that you should never again doubt who I am and what I have.

02:11:47 I know exactly who you are.

02:11:52 I do not share that assessment.

02:12:00 So consider yourself warned, we will not hesitate to use every resource at our disposal, whatever it takes.

02:12:10 I don't think you have any real comprehension of the depth and breadth of your vulnerability.

02:12:20 But only the one who possesses the fulcrum could possibly have had on that.

02:12:30 I think you're laughing. I don't think you have it.

02:12:40 I don't think you ever did, try me.

02:12:42 And actually at the Joe Franklin Strait 63, because that was the accordion.

02:12:46 Call my love, please.

02:12:48 Yeah, this.

02:12:51 I don't know what the hell he's going to do with it.

02:12:56 Honestly, he's like a damn sign of beef.

02:13:00 Ik wil hem bij de eerste scène uitleggen voor een gesprokenfamilie

02:13:10 How are we?

02:13:12 Very chappy.

02:13:13 Let's hope it runs in the family.

02:13:15 Reddington, what do you have?

02:13:17 Are you feeding Mr. Beats?

02:13:20 I found some rather overcooked salmon in your refrigerator apparently. He's not a big eater.

02:13:25 I only feed him in the morning. A creature of habit. Sounds familiar.

02:13:30 My colleague finds my increasing attachment to certain habits to be a distinct liability.

02:13:36 Since in my line of work, predictability...

02:13:40 but you might be interested to know that one habit I'm particularly fond of is only asking for

02:13:50 I told you over the phone, I can't give you access to the database, you can, you choose

02:14:00 Yes, because after three years, you're finally up for a promotion at Customs and Border Patrol, come on.

02:14:07 6% raise, plus dental.

02:14:10 and uh percy spencer ring any bells no in the 1940s you've been working on

02:14:20 technology when he stood too close to a magnetron and noticed that the candy bar in his pocket

02:14:30 could Percy Spencer invented the first microwave oven. And how did the company

02:14:37 he worked for reward him?

02:14:40 They promoted him, they patented his idea, and two dollars for it, two dollars.

02:14:50 of american life i want to help but cbp has been good to me i need your database and they needed

02:14:58 narrowcast to a white

02:15:00 30s, 40s, who entered the country alone in the past 48 hours, likely through an East Coast port of entry with a U.S. passport.

02:15:10 Max, this is important.

02:15:12 Otherwise, I nuked Mr. Beaks.

02:15:14 You wouldn't.

02:15:15 I wonder, they taste like squab or dough.

02:15:18 Think of some mango sauce.

02:15:20 Okay, fine, I'll take my laptop, it contains the portal to Davis, DHS's arrival and departure

02:15:26 information system.

02:15:27 I'll talk you through how to narrow your search.

02:15:32 And if anyone finds out, I'll be fired to completely miss the moral of the story.

02:15:36 It wasn't that you'd kill Mr. Beaks in a micro...

02:15:40 What do you take me for?

02:15:42 Now if you had a nice white burgundy we could braise him in.

02:15:46 No. Come on, Max!

02:15:48 The moral of Wormister's...

02:15:50 Spencer's tale of woe is that you should never worry about betraying your workplace

02:15:53 because given the chance, your workplace will definitely betray you.

02:15:58 Loyalty to individuals.

02:16:00 Relationships. That's what makes the world go round.

02:16:03 Back by the lima. Back in.

02:16:05 Back in.

02:16:06 Back in.

02:16:07 Back in.

02:16:08 Back in.

02:16:10 Jeroen Koningbecher van de Lama is vroeger en zo, weet u nog?

02:16:20 What about the EU list?

02:16:26 The Illuminati and so forth.

02:16:28 Well played, Raymond.

02:16:30 How do you call it?

02:16:31 The task force thought they figured out your plan to get to me at Coolidge.

02:16:35 You know, that was your news brief.

02:16:38 How did you convince the judge to stop?

02:16:40 By the way, I didn't have to, he was summoned by his boss.

02:16:42 Marquez, right?

02:16:44 Who you at all did the chief judge?

02:16:47 I just didn't see the play.

02:16:50 You always were a great strategist, Raymond.

02:16:52 You were always a great conciliate,

02:16:56 what a sad end to our association.

02:17:00 I'm a friend, he's that right here in your voice man, Sanders, in part, for what it's worth of art.

02:17:10 understand the betrayal is unforgivable and you'll die for it but it's

02:17:16 understand after all my feelings for Elizabeth

02:17:20 I was often emotional rather than pragmatic.

02:17:25 And you weren't entirely wrong to wonder if...

02:17:28 It's like being satisfied.

02:17:30 Worthy, not entirely, or even slightly, still, however subjective in my decision.

02:17:44 You voiced your objective, or you made up your mind that once the choice was made.

02:17:50 It was your obligation to live with it, Marvin.

02:17:53 Even if it meant watching everything we built crumble before my eyes.

02:17:58 Yes.

02:18:00 No. I wasn't your servant, Raymond. I was your partner. We created an empire. I may have been in the shadow.

02:18:10 was my favorite but it was my life's work too you had no right to have been so reckless with it

02:18:16 and blindly expect loyalty

02:18:20 DCT afdeling, Ark in Mentrum, Routers enzovoort, 5G, Telekom, Telekom, Telekom.

02:18:30 I wanted to need a friendship. I never dreamed that it would cost me Elizabeth.

02:18:36 You never dreamed.

02:18:40 i would have the courage to defy you i wonder how many cowards have gone to their graves

02:18:50 You think I'm a cop and if you want Elizabeth dead, you'll get yourself in a thousand dignified ways.

02:18:57 Instead, you use Van Dyke, you let him shoot her down.

02:19:00 You targeted Harold because you were afraid the task force would help me discover what you'd done.

02:19:07 I was brave enough to go to war with you.

02:19:21 of justice may hope otherwise, but you are not me.

02:19:30 And God knows you could never replace me.

02:19:33 We are sitting in a federal courthouse,

02:19:36 and I have the power to put you down like a dog.

02:19:40 No deal.

00:10:27 Simulatie, LBC.

00:10:30 Business School, Steam Engine, but you did Beyond Good and Evil, you did, let's say,

00:03:42 Het is toch leuker als je, weet je wel, niet aan het chatten bent met elkaar, maar gewoon in het echt.

00:03:50 Gevoel kun je niet meten en weten en proeven, toch?

00:03:56 Weet je, ik hou hierbij op, zeg maar.

00:04:00 Omdat ik me buitengesloten voel of wat dan ook.

00:04:02 Omdat ik echt weet wanneer ik te hard aan het winnen ben.

00:35:20 Όχι, δεν μπορούσα να χρησιμοποιηθήσει το πρόβλημα.

00:35:25 Εντάξει.

00:35:31 That was really good.

00:36:03 Dat is een koppersnel, dan heb je dan scherp, zodat het goed is.

00:36:11 Ja, dat is een verzameld afgeleverd.

00:36:16 Dankjewel, dankjewel.

00:36:26 Was ist jetzt für ein Streit durch?

00:36:31 Я не знаю, как я считаю.

00:36:41 Or, uh, material truth of public accountability.

00:36:47 Oh.

00:36:53 Здесь.

00:37:03 Yeah

00:37:16 Ja, precies.

00:37:22 Ik moet u er wel niet voorstellen, ja precies.

00:37:28 Het zijn zomaar nog mensen die eigenlijk zitten.

00:37:30 It's a lot of copies, I don't know.

00:38:00 I don't know.

00:38:08 Oh, dude.

00:38:18 Спасибо.

00:38:52 Je hoeft niet te groepen aan je rug, ja precies.

00:39:00 I don't know, it's a terrible, yeah, it is.

00:39:10 se potrò andare in giudizia dentro

00:39:23 It is

00:39:35 Jawel, precies.

00:40:14 Спасибо.

00:40:58 Um.

00:41:02 Dan ga je ook op een profetje.

00:43:18 There we go

00:43:20 Mensen die we naar voren schuiven, die hebben iets gedaan voor het moment toch.

00:43:26 Kijk maar dat blinken we aan boord, toch?

00:43:47 Yes

00:44:00 Ik zie het wel, ja, eigenlijk heb je geen statistiek gedaan.

00:44:10 Ik denk dat als ik nu een master zou gaan doen, bedankt voor dat knikje in mijn nekken, dan moet ik nog een premaster doen zelfs.

00:44:21 Birçok cepkadan, bu cep ağamın ne bulduk, Allah'ım ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp, ayıp,

00:44:31 I don't know what the F is this in our class.

00:45:05 Hier zijn post-indies aan het kijkant, ik geloof ik de halve kijkant.

00:45:10 QR-code, God Cube Printer, Kickstarter, Tochter Sofie Stranberg.

00:45:20 We zijn eigenlijk Farmers enzovoort.

00:45:22 Versus Hunters, toch Warcraft 3.

00:45:25 WNF Terror.

00:45:27 Toch had ik klaar, maar ik kom op een keer.

00:45:30 De halve waarheid. De rest komt later. Dat splitsen we allemaal toch.

00:45:48 Какая? Вот такая как.

00:45:50 Jezus, ik word er afgelijf, ik heb alleen een nee dus.

00:46:02 I get royal, prestige, rainbow crown and so on, identity, canon.

00:46:10 Enter, want Altje Klaarmaak heeft het weer gewenst hoor, hij heeft het weer gered, iedereen de wereldwijd, kom op, de lokale kant.

00:46:30 Onze eigen zo'n carrière, kijk maar kakkel, we kunnen ernaar bij, we zitten in de meetreeks.

00:46:44 I'll break it red, and it'll shine, and I'll do it now, ah, with a red eye.

00:46:52 Die is 90 graden gedremmetje erin.

00:47:04 I'll just put it in a little bit.

00:47:23 Okay.

00:47:30 Yeah

00:47:40 Ja, we gaan eerst maar.

00:47:43 Daar gaat ik wel, maar ik heb dit weer wel niet gegooid toch.

00:47:47 Kijk, kijk, kijk. Ja, kijk wel eens.

00:47:50 Want je laat wel een koopje helpen.

00:47:52 Defensie, Defensie, Weerlanders.

00:47:56 Toch als ik laat wel weer een stuk zijn.

00:48:00 En dan die hardloopdingen enzovoort, die sticker op de zijkant van de koelkast op de John Franklinstraat 6-3.

00:48:10 Maar hier staat zeven, die eventjes een ontbijtje staat te fiksen.

00:48:20 Ik word er zelf, of waar eigenlijk ook de kakers ziek in de fles.

00:48:27 Maar dat ben je niet meer, want kijk dan hier ook.

00:48:30 Bij de laadpaal.

00:48:32 Precies een auto van River in the city.

00:48:35 Hardloopdingen.

00:48:44 Oh

00:48:50 I love you.

00:49:00 Nee, fuck, ik krijg het ook honden.

00:00:08 Thank you.

00:00:20 Окей.

00:19:10 Thank you.

00:19:40 Yeah, I don't know, but, uh, you hurt me.

00:19:44 I'm trying to jump through here, though.

00:19:48 Oh? What's a loophole?

00:19:50 Well, if the rule is that you have to show the physical math based on current standards,

00:19:54 a company could just quietly change their returnal standards halfway through the year

00:19:57 and then retroactively apply those weak...

00:20:00 rules to their past behavior to make the math goalposts whenever you want you typically miss

00:20:06 a shot which is exactly why his second proposition is so crucial

00:20:10 Prospective Rule Authority.

00:20:15 Okay, how does that block the loophole?

00:20:16 This rule operates as a firewall

00:20:18 against historical revision.

00:20:20 It states that the specific rule or policy that evaluated a past event remains identifiable and attached to that event forever, even when a newer rule.

00:20:30 replaces it later on oh i see so if a company had a terrible environmental policy in say 2024

00:20:36 and they update their handbook in 2026 they don't

00:20:40 to run their 2024 emissions data through the 2026 rulebook

00:20:44 to make themselves look progressive.

00:20:45 Right. The old data is permanently locked to these.

00:20:49 Exactly.

00:20:50 The accountability timeline is preserved.

00:20:53 You cannot overwrite your past failures just because you finally decided to adopt a better policy this morning.

00:20:58 That is so sorry.

00:21:00 And this leads naturally into a third proposition, which is preserved evidence.

00:21:05 This one tackles the flow of information.

00:21:07 Which is usually a disaster.

00:21:08 Right.

00:21:08 When a statement is repeated...

00:21:10 or even when it is corrected, it must retain its provenance.

00:21:14 Its exact origin point must travel with it at all times.

00:21:17 So a public claim has to stay permanently attached.

00:21:20 to the specific piece of evidence that originally generated it yes

00:21:23 honestly that would entirely destroy the modern internet ecosystem it really would we are so used

00:21:30 statistics you know some claim about deforestation or coffee consumption gets

00:21:34 quoted in a blog article and then a politician quotes the article and then a think tank

00:21:40 Quotes the politician.

00:21:41 And nobody actually knows where the initial number came from.

00:21:43 Exactly.

00:21:44 But it becomes accepted fact.

00:21:46 Just through sheer repetition.

00:21:48 And Clute Week's system math.

00:21:50 rejects that repetition without

00:21:51 provenance. Which brings us to

00:21:54 the fourth and final proposition, and this is

00:21:56 arguably the most radical one.

00:21:58 Okay, hit me.

00:22:00 individual standing. Clued Week asserts that a single reproducible counterexample is not

00:22:05 weakened by the number of people who initially overlooked it. Wait, say that again. If and

00:22:10 individual, just one person, can prove a mathematical or material contradiction

00:22:14 in a public claim, that individual has full standing to demand accountability.

00:22:20 So it doesn't matter if 10,000 people or a dozen credentialed experts have already signed off on the false consensus.

00:22:25 Nope.

00:22:26 The truth isn't a popular...

00:22:28 Exactly.

00:22:29 But here is where...

00:22:30 I think Kluwe transitions from being really sharp philosophical critique to something almost intimidatingly practiced.

00:22:38 He doesn't just write.

00:22:40 on a piece of paper no he does not he brings a literal arsenal right the source material is full

00:22:46 of these structural models they have names like detail

00:22:50 nom tom tom yeah they sound like sci-fi concepts they really do and when i first read these i

00:22:56 thought they were just theoretical ideas but they are published

00:23:00 executable code repositories. They are actual software architectures designed

00:23:05 to track physical states and material balances. Yes, they are real tools.

00:23:10 But why go to the trouble of building software?

00:23:12 I mean, why not just write a compelling book about accountability?

00:23:15 Because language is inherently malleable.

00:23:17 And institutions have spent decades...

00:23:20 mastering how to stretch it oh absolutely think about it when a massive organization is challenged

00:23:25 on its environmental or ethical record what do they default to they do

00:23:30 fault of language. They point to a PR statement that uses words like striving or committing or

00:23:36 optimizing. We are on a journey towards sustainability. Exactly.

00:23:40 But the software, specifically the kind of highly structured, ledger-based modeling

00:23:45 Clute House has constructed, is rigid.

00:23:48 The code does not understand.

00:23:50 marketing spin. It just reads data. His models demand the actual transformation.

00:23:56 If you run a claim through one of his repositories, the architecture forces you

00:24:00 to explicitly state what physical data was read,

00:24:03 what physical state was altered,

00:24:05 and perhaps most devastatingly to corporate PR,

00:24:09 what was left unread.

00:24:10 resolved by this operation.

00:24:11 You can't be vague.

00:24:12 The system will literally-

00:24:15 Architecture of his XC Tau model, for example.

00:24:18 It is designed-

00:24:20 to physically separate the identity of an object from its geometric shape,

00:24:24 and to separate that shape from its measured fields,

00:24:27 and separate those fields from the operations of life.

00:24:30 So it forces every single element of a claim into a highly specific mathematics.

00:24:36 Yes.

00:24:36 And if you try to claim an environmental victory with the box that requires...

00:24:40 requires physical proofs.

00:24:41 The ledger just fails to compute.

00:24:44 Okay, let's ground this in the clearest example

00:24:46 he provides in the text, because this part

00:24:49 completely changed.

00:24:50 how I look at corporating the energy ledger the simulation using tips of a system

00:25:00 to show exactly how operational costs get hidden from the public.

00:25:03 It is a brilliant, undeniable demonstration of material accountability in action.

00:25:10 he uses the original xd tower reference model to run a strict energy ledger this ledger tracks

00:25:15 energy moving into and out of a closed system and he is very

00:25:20 explicit with the mathematics here. The initial total energy in this system

00:25:23 is recorded as exactly 12.057, a long string

00:25:28 of decimals. After some physical

00:25:30 changes occur in the system the final total energy the energy change meeting work was done we have to

00:25:38 mathematically

00:25:40 for the difference between the starting state and the ending state. Exactly. And a complete honest

00:25:45 ledger accounts for every version of that. Oh man. It accounts for pork work.

00:25:50 for beam energy entering the system, beam energy leaving the system, and it

00:25:54 counts for something the model calls parameter work. Okay, we need to define parameter work.

00:26:00 Physically, because it sounds like abstract jargon, but it's actually the most important part of the trick

00:26:05 It really is

00:26:06 Parameter work is basically the friction, right? It's the energy constant

00:26:10 The state of the system itself.

00:26:12 Yes.

00:26:13 Exactly.

00:26:14 Like if a company runs a massive global marketing campaign to announce they are going green.

00:26:20 The electricity burned by the data centers to host that campaign, the jet fuel burned by the executive line of the press conference, that is parameter work. You cannot alter a physical system.

00:26:30 That is an excellent way to visualize it. Parameter work is the inherent cost of the intervention.

00:26:36 In Klutenberg's exact execution of this model,

00:26:40 he calculates the parameter work as a massive fraction i remember this it's a huge number

00:26:45 he states it as exactly 51 million 165

00:26:50 90,409 over 86,211,225.

00:26:56 Okay, stop right there, because nobody listening to this while driving.

00:27:01 or he's doing 51 million divided by 86 million.

00:27:04 What is the actual impact of that number?

00:27:07 Fair enough.

00:27:08 It comes out to roughly...

00:27:10 60%, like 0.593 to be exact.

00:27:13 Okay, 0.593.

00:27:15 Now, when the complete, honest ledger is run,

00:27:17 taking into account the incoming energy,

00:27:20 Outblowing energy and that 0.593 of parameter work, the exact rational balance residual is zero.

00:27:28 So every single drop of energy.

00:27:30 is accounted for perhaps is flawless but then clute white does something deliberate to simulate dutch

00:27:36 ignorance he runs the ledger again but he removes

00:27:40 that omits the cost of changing the system.

00:27:45 And suddenly, the ledger doesn't balance.

00:27:47 There is this glaring, unexplained...

00:27:50 residual of exactly 0.593 just sitting there in the output.

00:27:54 Yes.

00:27:54 It's like looking at a corporate or a company is trying to hide a massive financial loss.

00:28:00 So they just backspace over the line item labeled, you know, money we lost on that terrible acquisition.

00:28:05 Right, they just erase it.

00:28:06 They delete the row, but they don't change the total at the bottom of the map.

00:28:10 breaks and include like software that omission is no longer a hidden secret it is a

00:28:15 mathematically visible glowing red error

00:28:18 but

00:28:20 Let me play devil's advocate for a moment here, because while this makes perfect sense for an energy grade or a corporate budget, isn't it exhausting to demand this level of multivariable cash?

00:28:30 calculus for every single thing.

00:28:32 Sure.

00:28:32 It sounds like a lot.

00:28:33 Like, do we really need an XT Tao energy ledger just to buy a cup of coffee or read a

00:28:38 news headline?

00:28:39 The thesis.

00:28:40 anticipates that exact fatigue. The goal here is not that every individual

00:28:44 consumer needs to mentally run executable code in the grocery store aisle.

00:28:50 The point is that the massive institutions making these societal level claims, the global agricultural conglomerates, the multinational tech companies, the governments, they absolutely...

00:29:00 do have the resources to run these ledgers and they are currently choosing

00:29:04 not to exactly because the ambiguity of language benefits them

00:29:08 Kludvik is

00:29:10 the specific mechanism to expose that intentional acuity.

00:29:14 So when a federal agency issues a report claiming,

00:29:17 we have improved national energy efficiency,

00:29:20 have the vocabulary to push back we can ask did you actually reduce total energy use or

00:29:25 did you just omit the parameter work from your public ledger that is powerful

00:29:30 transitions perfectly into applying this.

00:29:32 We take the concept of this unexplained residual

00:29:34 from these abstract energy equations

00:29:37 and we apply it to a physical

00:29:40 reality we all interact with every single day the rules we trust to tell us

00:29:46 that food is safe or this brings us to the first

00:29:50 case study in the thesis exploring agricultural labels. Yes this section is

00:29:54 fascinating. And before we dive into the math here it is crucial to state that we

00:29:59 are looking

00:30:00 strictly at Kluteweich's mathematical and computational critique of how labels function.

00:30:05 We are not taking a political or philosophical stance on organic versus conventional farming.

00:30:10 Absolutely. We are purely reporting on how his MUFTA model processes the claims being made by regulators and corporations.

00:30:16 Right. So, set the stage for us.

00:30:20 The source material dives deeply into the debate surrounding organic and unsprayed vegetables,

00:30:25 and the core critique of the Kludovic levels here is about the structural function of a label.

00:30:30 Okay.

00:30:31 He points out that a regulated production label, and he specifically cites Article 30 of Regulation

00:30:37 2018-848.

00:30:38 Rules right off the top.

00:30:39 Doesn't it?

00:30:40 He argues that this kind of label performs a commercial and marketing function its primary purpose is to legally protect a specific term

00:30:49 so that

00:30:50 term can be used exclusively to sell a product in a market.

00:30:54 I see. But his simple argument is that a legal marketing label does not automatically complete

00:31:00 Exactly. Just because a farm meets the legal checklist to stick a Greenleaf logo on their packaging doesn't mean they have actually explained their full physical impact on the earth.

00:31:10 Meeting a legal definition is not the same as balancing a material.

00:31:14 And he proves this mathematically using the MuckTube model

00:31:16 through a concept he calls the fixed output land calculator.

00:31:20 show. Fixed output land calculation. This is where the abstract philosophy hits the physical.

00:31:26 Literally. Baseline scenario he constructs.

00:31:30 Imagine a society that has a fixed nutritional demand.

00:31:34 The population needs a farm to produce a required output of exactly 100 tons of food.

00:31:40 is non-negotiable right under current conventional methods let's say that farm

00:31:46 yields 50 tons of food per hectare of land

00:31:50 The math is simple.

00:31:51 To get the required 100 tons, you need to farm 2 hectares of land.

00:31:54 Makes sense.

00:31:55 50 times 2 is 100.

00:31:56 Now, let's introduce a new farming method.

00:32:00 This method qualifies for a specific, sustainable label.

00:32:03 It uses fewer chemicals, which is celebrated.

00:32:06 But as a direct result of altering the method, the physical use...

00:32:10 drops by 25% okay so they are growing less food on the same amount of so

00:32:16 instead of producing 50 tons per hectare

00:32:20 now only produces 37.5 tons per hectare.

00:32:25 If society still fundamentally requires 100 tons of food to survive, but the

00:32:30 land is only giving us 37.5 tons per hectare. 100 means we now need 2.66 hectares.

00:32:40 land to feed everyone. Which is exactly 83% of a hectare.

00:32:50 The farm's yield dropped by 25%, but the required land area did not simply increase by 25%.

00:32:56 No, it didn't.

00:32:57 It increased by 33 and one-thirds percent.

00:33:00 It had to expand from 2 hectares to roughly 2.66 hectares.

00:33:04 And Clotwhite's mock-tip model forces this calculation out into the open.

00:33:08 If a government or...

00:33:10 corporation chooses to implement a method that structurally reduces yield, they cannot

00:33:14 just issue a press release celebrating the reduction in chemical use per hectare.

00:33:18 Right.

00:33:19 They must be-

00:33:20 mathematically and physically account for where that additional 33 and one-third percent of land

00:33:24 is going to come from. Because land isn't infinite. Exactly. If you suddenly need an extra two-thirds

00:33:30 of a hectare. Just to maintain the exact same food supply, where are you getting it?

00:33:34 Are you clear cutting a forest? Which then causes an orange somewhere else.

00:33:40 can't just look at this single farm in isolation and give it a gold star for

00:33:43 being organic, while completely ignoring the massive footprint expansion it just

00:33:48 caused across the rest of the supply chain.

00:33:50 Which leads us into one of the most powerful analytical tools in the entire thesis,

00:33:54 what Kludwin calls the denominator problem.

00:33:57 Oh, this is a profound insight into how...

00:34:00 statistics can be legally manipulated without anyone ever technically telling a lie it really

00:34:04 is yeah once you see this trick you will notice it in every single corporate sustainability

00:34:10 Absolutely. So when we talk about environmental burdens, they must be compared on a declared mathematical basis. That basis is the denominator.

00:34:20 The question you always have to ask is, are you measuring the impact per unit of land, like per hectare, or are you measuring the impact per unit of product?

00:34:30 per tomato okay i want to walk through the exact example he uses in the paper because it is so stark

00:34:36 let's do it he sets up a baseline a farm produces

00:34:40 100 units of output, and in doing so, it creates 100 units of environmental impact per hectare.

00:34:45 So the ratio is 1 to 1.

00:34:47 The environmental impact is exactly 1.

00:34:50 Now he introduces two alternative farming methods.

00:34:55 Both of these alternatives suffer a 20% loss in output compared to the baseline.

00:35:00 They both only produce 80 units of food.

00:35:02 The output is identical for both alternatives.

00:35:05 Let's look at alternative A first.

00:35:07 This method reduces its environmental impact.

00:35:10 terror down to 70. Okay, down from 100 to 70. So we take the 70 units of impact and divide it by

00:35:17 the age units of output. The impact per product.

00:35:20 is now 0.875. Okay, so that represents a 12.5% improvement in the environmental burden per

00:35:26 product compared to the baseline. Yes, that is a genuine.

00:35:30 material victory. You are getting less food, but the food you are getting is

00:35:33 significantly cleaner to produce. But now look at alternative B. Right. Alternative B

00:35:38 also produces 80 units of food.

00:35:40 but its environmental impact per hectare only drops to 90.

00:35:44 So we take the 90 units of impact and divide it by the 80 units of output.

00:35:48 The impact per product...

00:35:50 is now 1.125.

00:35:52 If the baseline impact for a product

00:36:00 Alternative B actually represents a 12.5% worse sitting in the environmental unit.

00:36:06 Exactly.

00:36:07 Both Alternative A and Alternative B lost 20% of...

00:36:10 If a PR department only publishes the impact per hectare, both methods look like massive improvements.

00:36:16 Because alternative A dropped from 100 to 70, and alternative B...

00:36:22 both get the green label. But if you look at the impact of a product, which is the metric

00:36:26 that actually matters if your goal is to feed a population without destroying the earth.

00:36:30 Alternative B is physically doing more damage per tomato than the original baseline was.

00:36:35 Yes.

00:36:35 So when a shiny grocery store label says zero chemicals or lower...

00:36:40 impact. They are fundamentally changing the subject. They are swapping the denominator to which

00:36:50 Whichever metric makes the math look presentable to the consumer.

00:36:53 That is just wild.

00:36:54 And Kludzweig proves exactly how this selective reporting happens on a mechanical level within

00:36:59 these institutions.

00:37:00 right? Yes. He uses the Mach 2 3 model to demonstrate something called double gates.

00:37:05 Double gates? Imagine a ledger that records

00:37:10 to actual physical observations from a farm.

00:37:13 The first number is the total yield,

00:37:14 which let's say is 100.

00:37:17 The second number is the environmental cost,

00:37:19 which is 75.

00:37:20 Okay, so the input vector entered into the system is 100 comma 75, a completely transparent record of what happened.

00:37:27 Exactly. Now, a public-facing report needs to be...

00:37:30 generated from that data. The model applies a gate, which is basically a

00:37:34 mathematical weighting scheme. If the gate assigns an equal of 0.5 to both

00:37:40 the yield and the cost, the report averages them out. So 175 equally weighted, it spits out a score

00:37:46 of roughly 87.5. But let's simplify.

00:37:50 Let's say the inputs are scaled so the average spits out the number 50.

00:37:55 Okay, I follow.

00:37:56 But now consider a second farm.

00:37:58 This farm is an environment.

00:38:00 environmental disaster. Its yield is 100, but its environmental cost is an abysmal 20.

00:38:10 different material realities on the ground.

00:38:12 One farm is adequate, one is terrible.

00:38:14 But the reporting agency applies a different gait

00:38:16 to the terrible farm.

00:38:17 Yes.

00:38:18 They assign a weight of...

00:38:20 to the yield, and a weight of zero

00:38:22 to the environmental cost.

00:38:24 They just mathematically zero out the bad news.

00:38:27 Exactly.

00:38:27 The public report for the terrible farm...

00:38:30 So a consumer looks at the report, sees a 50 for the adequate farm, sees a 50 for the disastrous farm, and just assumes they're buying products with identical...

00:38:41 And the Mocktree 3 model proves that once that information passes through the gate and is published as a single, simplified number, no amount of public confidence in the Mocktree 3 model

00:38:52 If the math is this definitive and the manipulation is this easy to expose,

00:39:00 the right software how do these simplified consumer labels survive how does the agricultural

00:39:06 industry continue to operate on this

00:39:10 level of ambiguity well they survive because the true complexity and risk of

00:39:15 farming is systematically hidden from the end consumer right the thesis brings up

00:39:19 a highly

00:39:20 contentious reality to illustrate this the practice of seed buying no this is a hot topic

00:39:24 it is in public discourse activists often heavily criticize farmers who buy new seed

00:39:30 every single year.

00:39:31 They claim it represents

00:39:32 an unnatural force dependence

00:39:34 on corporate...

00:39:36 Cluesman demands

00:39:36 that we use our tool kit.

00:39:38 We must separate the variables.

00:39:40 Exactly. If we run that through the framework, we can't just say buying seeds is bad.

00:39:45 We have to distinguish between the actual physical reasons for the purchase.

00:39:50 separate reproductive viability from the inheritance of useful traits from

00:39:55 genetic engineering from restrictive legal contracts right a farmer might

00:39:59 choose to buy

00:40:00 fresh hybrid tomato seeds every single year not because a corporation is legally forcing them to

00:40:05 but because the biological offspring of that specific hybrid won't rely

00:40:10 They reliably produce the same quality or volume of tomato the following season.

00:40:14 The farmer is purchasing logistical reliability, drought resistance, and disease protection.

00:40:20 So when a public campaign demands that a farmer stop using a specific technology or a specific seed line

00:40:26 without providing a mathematically proven viable alternative,

00:40:30 maintains the required yield? The public is essentially forcing all of the

00:40:34 physical and financial transition risk onto the farmer. Wow, the label is a

00:40:38 psychological luxury.

00:40:40 for the consumer walking grocery aisle.

00:40:42 But the math behind that label is a literal matter of survival

00:40:45 for the farmer working the land.

00:40:47 It really is.

00:40:48 It takes the moral superiority out of it.

00:40:50 equation and replaces it with physical constraints. That is a massive paradigm. It is. The only sector

00:40:57 hiding behind these mechanisms. I mean,

00:41:00 If farms hide behind words like organic, how do massive tech companies and financial institutions hide?

00:41:06 Oh, they have their own methods.

00:41:08 Right.

00:41:08 We are moving...

00:41:10 from biological fields to ethical ones now applying this exact same demand for material

00:41:14 truth to the concept of corporate activism yes this is where clued horse tackles

00:41:20 morality and introduces the concept of the synthetic ledger again just to

00:41:25 maintain strict adherence to the scope of this deep dive we are solely reporting

00:41:29 his method

00:41:30 on how to mathematically verify corporate claims.

00:41:33 We are not taking a stance on the underlying social issues themselves.

00:41:37 Absolutely.

00:41:38 The source material turns its focus.

00:41:40 to things like corporate pride logos, historical apologies, and what is often

00:41:44 termed rainbow washing. This is incredibly relevant. Every June, it seems

00:41:48 like every single bank.

00:41:50 streaming service, and tech hardware manufacturer

00:41:52 completely rebrands their social media avatars

00:41:55 with a rainbow flag.

00:41:56 Or during a national holiday,

00:41:57 they switch to a royal crest or a patron.

00:42:00 symbol. Right. Kluvich approaches this with a devastatingly simple structural

00:42:04 question. Pride, if a massive incident

00:42:10 displays a symbol of inclusion or morality, that public display inherently invites questions

00:42:15 about the actual material decisions operating behind the scenes.

00:42:20 He is talking about procurement contracts, factory working conditions, and the resolution of internal complaints.

00:42:26 Yes.

00:42:27 He argues mathematically that attaching a pride to...

00:42:30 logo to a brand's header image does not physically close an unresolved workplace complaint, nor

00:42:35 does it compensate an exploited worker in a foreign supply chain.

00:42:40 make this as a cynical observation either. He proves it using the T.O.M.K.

00:42:44 model, specifically through a mechanism called the synthetic procurement.

00:42:48 This is one of them.

00:42:50 brilliant executions in the entire thesis walk us through uh how this ledger mathematically

00:42:54 exposes corporate hypocrisy okay the setup is a hypothetical but highly realistic multi

00:43:00 company. This company has three declared categories of material obligations they

00:43:04 are supposed to be meeting. Okay. First, supplier traceability. They are legally or

00:43:10 ethically required to verify 10 distinct supply chains.

00:43:13 However, they have only managed to verify six.

00:43:15 Which leaves them with four unmet obligations

00:43:17 in this category.

00:43:18 Right, four unmet.

00:43:20 traceability obligations. Second, worker remediation. Let's say there are four

00:43:24 documented cases of worker abuse reported within their network and the

00:43:28 company has only provided rest...

00:43:30 for three unmet cases of remediation so for unmet traceability plus three unmet

00:43:37 remediation we are at seven

00:43:40 unmet material obligations so far.

00:43:42 Okay, what's the third category?

00:43:44 Workplace complaint resolution.

00:43:46 Where three complaints filed internally

00:43:48 and the HR department resolved all.

00:43:50 So there are zero unmet obligations here.

00:43:53 Okay, so the DOMK model analyzes the three devices that are in two of them, supplier traceability.

00:44:00 There are outstanding, explicitly unmet obligations.

00:44:04 The model calculates the total count of unmet obligation categories, which is two.

00:44:08 Got it.

00:44:10 the company enters the month of June or maybe they face a PR crisis and they

00:44:15 decide to run a massive digital campaign they go into their public facing system

00:44:20 And they change their corporate symbol from none to rainbow.

00:44:24 Right. They update their Twitter avatar.

00:44:26 They put out a press release about inclusion.

00:44:28 They change the startup graph.

00:44:30 on their software. Exactly. Then the TOMK model executes. It runs the exact same

00:44:35 formal operations across the physical data. And the result?

00:44:40 The output is still exactly two unmet obligation categories.

00:44:43 Yes.

00:44:44 The material evidence hash, which is the cryptographic, mathematically verifiable proof of the company's actual...

00:44:50 and physical conduct in the real world remains completely identical.

00:44:54 So they panic. Let's say it's not June anymore.

00:44:57 They decide to pivot their marketing. They change the logo from ring

00:45:00 to Royal Crest to show solidarity with a different cost.

00:45:03 The model runs again.

00:45:05 The output is still two unmet obligations.

00:45:08 The cryptographic hash remains identical.

00:45:10 The math fundamentally does not care about the logo.

00:45:12 Not at all.

00:45:13 The only way for the company to get the unmet obligations down to zero,

00:45:17 and the only way to alter that material evidence hat,

00:45:20 is to actually supply the verified physical evidence that the supply chains

00:45:24 were successfully traced and the exploited workers were financially

00:45:28 compensated.

00:45:31 It is literally like a teenager slapping a world's best driver bumper sticker on a car that currently has no brake pads.

00:45:38 Yeah.

00:45:39 And then standing in the...

00:45:40 arguing with the mechanic that the car is perfectly safe to drive because the

00:45:42 sticker says so. Exactly. The mechanic doesn't care about the sticker. He's

00:45:47 looking at the bare metal on the rotors.

00:45:50 Elevates this far beyond theoretical bumper stickers.

00:45:54 The thesis brings in...

00:45:59 Yes, he...

00:46:00 explicitly cites the 2024 U.S. Department of Labor list

00:46:04 Specifically referencing the ongoing crisis of child labor and forced labor in cobalt mining

00:46:10 operations in the democratic republic of the congo right and cobalt is an essential component

00:46:16 in almost every lithium-ion battery on the planet it is

00:46:20 physically inside the smartphone, the tablet, or the laptop

00:46:23 that you, the listener, are probably using right now.

00:46:26 Kludwijk's profound point is that a digital declaration of...

00:46:30 virtue always has a physical supply chain a beautifully designed rainbow graphic

00:46:35 appearing on a smartphones OLED startup screen does not alter the cobalt supply

00:46:40 chain required to build that screen it does not change the physical working conditions in the drc

00:46:45 if a multi-million dollar tech company wants to claim moral credit they cannot do

00:46:50 They must mathematically expose that specific supply chain and resolve those specific physical obligations on the ledger.

00:47:00 same framework to how institutions

00:47:02 handle history. Oh, this part

00:47:04 blew my mind. Alright. He looks at

00:47:06 the Dutch East India Company, the VOC,

00:47:08 and pulls historical records

00:47:10 1621 regarding the violent depopulation and destruction of the banda islands during the

00:47:15 fight over the nutmeg monopoly it is a really

00:47:20 – modern institutional dissension of the DOC to issue a profound, deeply emotional,

00:47:24 beautifully written public condemnation of that 17th century fraud.

00:47:27 For us, Everett.

00:47:30 unless their present material account changes in response to that apology.

00:47:34 Unless they actually alter their current procurement practices

00:47:36 or any physical restitution or transfer action.

00:47:40 Right. Unless they do that, that historical apology is nothing more than a low-cost credential.

00:47:46 It is an incredibly easy, mathematically free...

00:47:50 for an institution to look moral in the present

00:47:52 without spending any actual money

00:47:53 or changing any actual power dynamics.

00:47:55 Exactly.

00:47:56 But let me push back here,

00:47:57 because I think there is a psychological argument...

00:48:00 for public campaigns okay what's the argument what if the public pressure

00:48:03 generated by a PR campaign even with that campaign

00:48:10 eventually forces the company to actually fix the supply chain six months later.

00:48:15 Does Kluwik's incredibly strict mathematical model account for the fact that sometimes

00:48:20 symbols can drag reality forward he absolutely accounts for it and he handles it through strict

00:48:26 chronological separation using a specific model called

00:48:30 This model acts as a temporal firewall. It separates the timeline of events.

00:48:36 Okay, how does that work?

00:48:38 The PR campaign gets its own...

00:48:40 specific entry on the ledger on the exact day it happens. The material fix, the

00:48:44 actual restructuring, gets a completely separate...

00:48:50 the fix is physically verified. Oh, I see. You cannot give retroactive credit. Precisely.

00:48:57 You can't say that updating the logo in June...

00:49:00 to magically solve the labor dispute that wasn't actually settled until December.

00:49:04 Because the policy that governed the bad behavior in June was still the active policy.

00:49:10 The thesis is unyielding on this point. An institution's latest, improved policy must remain mathematically distinguishable from the old policy that governed an earlier failure.

00:49:20 You do not get to overwrite your past transgressions just because public pressure finally forced you to do the right thing today.

00:49:26 Exactly.

00:49:27 So we've seen how a single company or a single government...

00:49:30 manipulate the math behind closed doors.

00:49:32 They swap denominators.

00:49:34 They delete parameter work.

00:49:35 They hide behind logos.

00:49:37 What happens when that manipulated math gets released?

00:49:40 millions of people start repeating it does a lie mathematically become the

00:49:46 truth just because everyone agrees on it this brings us to the most

00:49:49 philosophic

00:49:50 terrifying. The illusion of consensus. Kludovich tackles the problem of truth by

00:49:56 majority and he dismantles it using a graph diffuser.

00:50:00 This is where the mathematical proof strikes at the heart of how we consume information on the internet.

00:50:05 It really does.

00:50:06 There is a deeply ingrained, almost democratic assumption in our...

00:50:10 society that if enough people discuss a topic, debate it, and eventually come to an agreement,

00:50:15 that final consensus must be very close to the objective truth.

00:50:19 We call it the wisdom.

00:50:20 of the crowds. Right, but Klubleich uses the xd dot tau graph diffusion equation to mathematically,

00:50:26 structurally prove that convergence does not equal correctness.

00:50:30 Walk us through the five minute complete graph example he uses.

00:50:34 I had to read this section three times, and when the math finally clicked,

00:50:37 I just sat there staring at the wall.

00:50:39 It is.

00:50:40 pretty mind-blowing. It is. So imagine a closed network of five people, represented as five

00:50:46 interconnected nodes in a graph. Imagine they are...

00:50:50 sitting in a boardroom and they are all talking to each other.

00:50:53 They are trying to estimate the true value of some external metric.

00:50:57 Let's stipulate for the sake of the model that the

00:51:00 The actual, objective, external truth of this metric is the number four.

00:51:04 Physical reality.

00:51:08 One person in that boardroom actually gets it right.

00:51:10 They have done the measurement, and their initial estimate is four.

00:51:14 But the other four people in the room are wrong.

00:51:17 For whatever reason, bad data.

00:51:20 bias or just right they all estimate the number two so the initial state of the network's beliefs

00:51:27 is the vector

00:51:32 One person knows the truth, poor people are operating on bad data.

00:51:35 Now the meeting starts.

00:51:37 They begin communicating, they influence each other.

00:51:40 The graph diffusion equation models how these nodes compromise to reach a social consensus because they are a closed network and they are not taking in any new...

00:51:50 external, physical observations.

00:51:52 They simply average out their existing beliefs over time.

00:51:56 Through the mathematical pressure of the network,

00:51:58 they all eventually converge on...

00:52:01 the meeting ends and everyone shakes hands in perfect agreement that the answer is two point

00:52:08 they have achieved

00:52:10 social and systemic consensus. But the objective external truth is still poor.

00:52:15 What the graph diffusion math proves is that the social

00:52:20 pressure of the misguided majority mathematically pulled the one single person who was initially

00:52:25 correct away from the truth.

00:52:27 But wait, isn't the whole point of peer review or...

00:52:30 source intelligence or even Democratic voting that the crowd is generally

00:52:34 smarter than the individual.

00:52:43 What happens when a network validates itself basically purely...

00:52:50 It proves that social agreement cannot serve as a mathematical substitute for physical measurement.

00:52:57 If you have 100 people on a social media platform...

00:53:01 We do not have a hundred pieces of evidence.

00:53:04 One single piece of bad evidence.

00:53:07 We will be a copywriter.

00:53:09 Exactly.

00:53:31 Gracias.

00:54:00 Oh, ho!

00:54:21 The final question is, how do we build a system that prevents it?

00:54:30 How does it move?

00:54:34 This is where any piece is actionable.

00:54:36 I'm a mechanic who will make an honest question.

00:54:45 Finalized by the institution, correct?

00:54:47 Yes.

00:54:54 I'm asking everything that looks like to try to be visible to her in this collection.

00:55:02 to demonstrate how this involves some deception.

00:55:05 So it's fair, of course, in the workplace.

00:55:07 There are three of the elitisting goals required

00:55:09 for this grant.

00:55:10 The producer probably is a problem, let's say 10,000 kilograms, and they submit that.

00:55:25 When they made it, they only record receiving 9,000 documents.

00:55:36 Exactly.

00:55:48 moving down the lane.

00:56:02 The balance of the letter only computes when all three records are right.

00:56:16 The auditor's ground remains a tool.

00:56:20 Right, it forces the missing information directly into the land.

00:56:41 the ability to hide in your home, and it implies a silver, incredibly rigorous logic, physical

00:56:48 properties in your home.

00:57:05 you have a specific volume of a physical material. Let's say it serves at a volume of six.

00:57:12 to the volume of both.

00:57:14 And then finally, to back it again to the volume of both.

00:57:50 The density went by a massive factor, but you didn't earn any new material.

00:57:57 The mass is still 2.

00:58:00 I'll jump back to Stan Smith.

00:58:03 Because corporations and governments will often report a denser, more concentrated, or more heavily processed.

00:58:10 as if it were a brand-new, highly efficient production material.

00:58:14 They will use the increased density metric to point in massively productivity.

00:58:20 The three of us model maps for each separate, distinct record.

00:58:30 You cannot go to the public and claim more resources because you figure out how to squish the existence.

00:58:40 is so important. Political spin.

00:58:50 institution to you. You don't need a supercomputer specific question.

00:59:02 When you see a press release.

00:59:11 What's the energy?

00:59:13 Yes.

00:59:14 When you see a red label on a piece, you can apply the buck tube bottle and ask, did you

00:59:18 change the drop?

00:59:21 or when a company claims they are generating more recycled materials you

00:59:27 can apply the twin viper model

00:59:31 or an actual increase in mass.

00:59:33 You are no longer arguing about adjectives.

00:59:36 You are demanding the missing variant.

00:59:39 Synthesizing.

00:59:40 all of this, the ultimate takeaway of Quote White's thesis is that public

00:59:44 process flows missing information.

00:59:50 A politician or a news report, we must demand an unbroken sequence of reality.

00:59:56 We need a poor state with a specific decision that was made with a physical injury.

01:00:00 and the internet outcome.

01:00:10 the specific decision that was made

01:00:20 physical intervention that occurred and the independently measured outcome and most importantly we must demand that none of those subsequent steps are allowed to overwrite or

01:00:30 erase the earlier ones. Precisely. We have covered an incredible amount of ground today.

01:00:37 We started with the abstract, almost philosophical concept.

01:00:40 of Dutch endurance, the organized systemic failure

01:00:45 to connect public slides to physical reality.

01:00:47 We traveled through the hidden mathematical tricks.

01:00:50 of organic farming labels and the devastating reality of swamp denominators.

01:00:54 We exposed the synthetic ledgers of corporate pride campaigns and the low-cost credentials

01:01:00 And we arrived at the profound, somewhat terrifying realization that truth is not a rapid diffusion

01:01:08 consensus.

01:01:09 It is...

01:01:15 It represents a fundamental, necessary shift in how society operates.

01:01:24 to execute.

01:01:31 provocative questions all over as you go about your week

01:01:34 that truth is not a graph

01:01:40 fusion consensus. It is not the wisdom of the crowds. It is a verifiable, unbroken, physical

01:01:46 legend. It represents a fundamental, necessary shift in how...

01:01:50 society operates moving away from trusting malleable language and moving toward trusting

01:01:56 executable undeniable math.

01:02:00 the listener with one final

01:02:01 all over as you go about your week

01:02:06 round check. Let's hear it.

01:02:09 Let's say Tom Pluto

01:02:10 wins this crusade. Let's say we reach a future where institutions are eventually

01:02:14 forced by law to abandon their simple shiny PR labels and their empty press releases.

01:02:20 What if they are forced to actually publish these massive, complex, mathematically perfect ledgers for every single claim they make?

01:02:30 volume of that raw data,

01:02:37 petabytes of math.

01:02:40 potentially dense data as the new PR shield exhausts our scrutiny.

01:02:44 If a corporation can no longer hide behind a simple green table,

01:02:48 will they just hide behind...

01:02:50 complexity of the ledger itself.

01:03:01 That's a lot to think about.

01:03:04 Joining us on this deep dive,

01:03:06 the next time you see a green, sustainable label

01:03:08 in the grocery store,

01:03:12 at it just a little question the denominator look for the missing parameter though and never let the

01:03:18 consensus pull you away from the measurement

01:03:20 See you next time

01:03:52 right pull up your banking app and you realize oh man my board can just do oh yeah but instead of

01:03:58 transferring funds

01:04:00 You just walk down to your local bank branch, march right up to the teller, and you just slide a ceramic coffee mug across the counter.

01:04:07 Just a mug. Just a mug. And print it on that mug.

01:04:12 World's best home, right? Just tap them up the teller dead in the eye and go

01:04:22 picture the security guard just like unholstering his radio at that point exactly because that is a

01:04:27 really fast track to getting slapped out of the lobby

01:04:30 arrested oh absolutely arrested because the bank they don't care they do not care about your self-declared

01:04:37 identity as this like

01:04:40 Because a label is not a payment. I mean, a slogan, no matter how earnest it is, it doesn't alter the cold hard math of your debt.

01:04:50 But here is the crazy part, and really the whole reason we are doing this deep dive today.

01:04:56 That exact scenario, like paying a material debt with a...

01:05:00 Symbolic mug is essentially what massive corporations and governments and these global institutions are doing to us every single day

01:05:08 Yeah, it really is the defining feature

01:05:10 information landscape I'd say and we live in an era where we just except that's the wild

01:05:20 part to me. We accept the world's best homeowner mug from these institutions and we tell ourselves

01:05:25 well the societal mortgage is pain. You see a green leaf stick

01:05:30 or on a plastic bottle and you think, boom, I've saved the ring for it.

01:05:33 Or you see a corporate diversity campaign and just assume all these systemic labor issues are completely fixed.

01:05:38 But today, we're going to learn how...

01:05:40 to audit reality.

01:05:41 Which is kind of an awkward.

01:05:45 To do this, we are unpacking a truly fascinating

01:05:48 independent research thesis.

01:05:50 it's from november 2026. it's titled dutch ignorance and it was written by tom

01:05:55 And I love to call myself a Dutch peasant.

01:06:00 which is Credible Flex because he is actually a principal creative technologist.

01:06:06 He builds complex computational models for a living.

01:06:10 Humility is definitely just a rhetorical device there.

01:06:13 Because what he has built in this thesis is, I mean, it's nothing short of an intellectual fortress.

01:06:18 Right.

01:06:18 It is this massive...

01:06:20 architecture designed to just completely dismantle institutional washing. He argues

01:06:26 that we don't need to rely on like vague philosophical debates.

01:06:30 figure out if a company or a government is lying to us. We can literally just use math.

01:06:35 So the mission today is to arm you, the listener, with Clute Week's tools.

01:06:40 We're going to look at how you are constantly manipulated by labels and campaigns and this overwhelming pressure of public consensus.

01:06:48 And we're going to show you how to fight back.

01:06:50 Exactly.

01:06:50 But before we get into the heavy machinery of all these models,

01:06:53 we really need to clarify this core concept first, Dutch ignorance.

01:06:58 Because, I mean, my very first thought was...

01:07:00 is this like a hit piece on the netherlands no it is definitely not okay he is dutch himself

01:07:06 and he explicitly states earlier this is not some

01:07:10 insult directed at the Dutch people or their national character.

01:07:13 Ignorance, as a term within this specific framework he built, refers to an organized

01:07:20 practice. An organized practice of what, exactly? Of systematically collapsing distinct concepts

01:07:26 to avoid accountability. Okay, and unpack that a bit.

01:07:30 So it is the deliberate manufactured confusion of, say, a regulated label with actual physical

01:07:36 sustainability or confusing a repeated public statement.

01:07:40 an independent factual observation oh i see so it's like treating the map like it's the actual

01:07:46 territory like confusing the menu for the meal that is a really

01:07:50 Because if you eat the menu, you are still going to starve, right?

01:07:54 No matter how beautifully that steak was described on the paper.

01:07:57 Yeah, ink doesn't have calories.

01:07:58 Right?

01:08:00 Such ignorance is the institutional practice of feeding us menus and convincing us we are

01:08:04 full.

01:08:06 And to expose this, Clute doesn't just write these theoretical essays.

01:08:10 He writes code.

01:08:11 Yeah, the math is intense.

01:08:13 He uses this highly specific suite of mathematical models

01:08:16 with names that sound like they belong on a spaceship dashboard.

01:08:19 Honestly.

01:08:20 like XT Tau, T Nom Tom, Tom K.

01:08:30 sure. But as I read through, I realized these models are basically just lie detector tests

01:08:34 for reality. Exactly. They track what actually happens in the physical universe versus what is

01:08:40 just being claimed on paper but you know challenge this right out of the gate okay go for it because

01:08:46 if I'm the listener I'm thinking wait a second aren't mathematics

01:08:50 models just as biased as the people who program them. I mean, if you write the code, can't you

01:08:55 just tweak the variables to make the math say whatever you want it to say? That is the ultimate

01:08:59 skeptical

01:09:00 question. And honestly, it is entirely valid. Any model can be rigged if the inputs are subjective.

01:09:05 Who anticipates this?

01:09:10 is his first major proof not in sociology or economics, but in physics.

01:09:20 He wants to prove that while you can easily lie on, you know...

01:09:30 Walk with me on this one. How does the energy balance actually work in the XD Tau model?

01:09:36 Let's say I'm looking at a closed physical system.

01:09:40 Picture a port facility okay changes state over time

01:09:50 Exactly mathematical ledger of this system has to include every single transforming energy

01:10:00 the work done by the machines, and a very specific variable he highlights called parameter work.

01:10:05 Visualize this.

01:10:10 parameter work like uh friction or like the administrative overhand of physics

01:10:15 that's interesting what do you mean like the energy it takes to physically move the pieces on the board

01:10:20 the game even starts that is an excellent analogy yes just the final lift of the box

01:10:30 rotate the gears, to overcome the friction of the steel cables, and to shift the physical

01:10:35 state of the machinery itself.

01:10:37 That is the parameter worker.

01:10:39 Got it.

01:10:40 In the text, Klutendijk runs this exact trajectory through the XD-towel model.

01:10:50 The mathematical residual is exactly zero.

01:10:53 The ledger balances.

01:10:55 It's happy.

01:10:56 Because energy cannot be created or destroyed every single joule.

01:11:00 is accounted for right he runs the simulation again this time he acts like a corporate he admits

01:11:10 one specific action from the report the parameter work he just like deletes that column from you

01:11:16 so he just hides the cost of moving the pieces he pretends the friction

01:11:20 just doesn't exist yes and when he does that

01:11:30 In his specific simulation in the text, the math spits out a residual of exactly 511-65409 over 8621-112.

01:11:40 Whoa, okay. What does that fraction actually mean in plain English?

01:11:44 It's roughly 0.593, which means about 60% of the energy is complete.

01:11:50 accounted for 60% massive gap represents

01:12:00 the undeniable mathematical probability report,

01:12:08 they can simply delete a cost from the...

01:12:11 But the physical state change of the real world retains that cost.

01:12:15 The universe does not care about your accounting trick.

01:12:17 Exactly.

01:12:18 The energy was spent.

01:12:20 The physical reality of the system shifted, and the math catches the discrepancy.

01:12:24 So if physics won't let you delete the energy cost of moving a piece on board, how does that apply to...

01:12:30 to the actual physical earth. Because if you can hide physical costs in an equation, you

01:12:36 can absolutely hide them in the real world. You just...

01:12:40 better work off the press release which transitions perfectly into the most

01:12:43 physical material thing we interact with every single day food our food yes

01:12:50 the agricultural ledger because when we talk about hiding the math behind a green label the

01:12:55 grocery store is basically ground zero i feel like this is where you the

01:13:00 listener are really going to feel the impact of Kluge's models.

01:13:03 The source text brings up a brilliant challenge here regarding how we view vegetables labeled

01:13:07 as unsprayed.

01:13:10 organic. The prevailing consensus is that these labels are just automatically, inherently,

01:13:15 and entirely positive for the environment. It is treated as a completely self-explanatory

01:13:20 Explanatory win and I fall into gut trap all the time. You see the green leaf sticker

01:13:24 You may the premium at the checkout and you feel this little hit of dopamine like you just personally

01:13:30 saved a rainforest right it feels good but the models demand that we look at the actual land

01:13:35 not just the label so what is the parameter work we are emitting when we buy that

01:13:40 organic tomato. To figure that out, this is the mock tube model.

01:13:50 This is where the math gets incredibly grounded.

01:13:55 Let's say a farm needs to maintain a fixed output.

01:13:58 I have a contract.

01:14:00 with the city to do 100 tons of food right because people

01:14:11 So let's say under their conventional baseline farming method, they yield 50 tons per hectare.

01:14:21 hectares of land to feed their portion of the city. Got it. 50 tons times two

01:14:25 hectares equals 100 tons. That's easy enough. Now, pressure mounts for public campaign.

01:14:30 and they switch to a new heavily restricted method let's call it the alternative eco-friendly

01:14:35 method the green label method they stop using certain crop protection

01:14:41 Because of this, their yield drops by 25%.

01:14:44 50 tons per hectare down to 37.5.

01:14:48 Okay, let me do the math on this really.

01:14:50 If they still have a hard contract to produce 100 tons of food,

01:14:55 but they are only getting 37.5 tons out of each hectare now,

01:15:00 They mathematically have to increase their total land area.

01:15:03 They absolutely must.

01:15:04 Like, they literally have to go by the neighbor's farm.

01:15:07 Yes.

01:15:07 To hit 100 tons at 37.5.

01:15:10 tons per hectare, your land area has to go from 2 hectares to 8 over 3 hectares, which is roughly 2.67.

01:15:20 increase in land. A third more land just to produce the exact same amount of food. So what does this

01:15:27 actually mean for the listener standing in the produce aisle?

01:15:30 It means you have to understand what a label actually is in the legal and physical universe.

01:15:35 The text points out that organic is a legal classification.

01:15:39 Right.

01:15:40 It specifically references Article 30 of European Regulation 2018-848.

01:15:46 It is a set of regulator production rules.

01:15:48 It is a highly effective...

01:15:52 But it is not a magical portal that suspends the laws of physics and space.

01:15:56 Right. The label doesn't just create matter out of thin air.

01:15:59 If a farming...

01:16:00 method reduces yield and the human population still demands the same amount

01:16:03 of food, that land use has to increase, period.

01:16:10 increases, it displaces

01:16:11 burdens elsewhere. Like where?

01:16:14 Well, it might mean clearing more

01:16:15 natural habitats. It might mean shifting

01:16:17 production to a country with much weaker

01:16:20 laws. It almost certainly means

01:16:22 increasing transport distances

01:16:24 because the farms just have to

01:16:26 spread further out. It's the parameter work again.

01:16:28 The marketing label

01:16:30 omits the cost of the extra land, the extra diesel for the tractors, the extra water for

01:16:35 the expanded acreage, but the physical earth still has to provide it all.

01:16:40 Kludwick uses reciprocal output weights

01:16:42 to show how institutional reporting

01:16:44 can just completely distort this reality.

01:16:47 House out.

01:16:47 He creates a scenario where an alternative

01:16:50 farming method, 0.5% better for the environment. If you only measure the impact. Okay, so per acre of land.

01:17:00 The soil on that specific acre might have less nitrogen runoff, for instance.

01:17:04 Which sounds amazing on a dashboard.

01:17:07 You know, we reduced impact by 12.5%.

01:17:11 because that acre produces so much less food.

01:17:14 If you flip the denominator

01:17:16 and measure the impact per product,

01:17:18 meaning the environmental cost to produce

01:17:20 one single tomato the alternative method is actually 12.5 percent worse so by just

01:17:27 choosing whether to put per hectare or

01:17:30 per tomato as the denominator in the press release, a corporation or a government agency

01:17:35 can completely reverse the public perception of whether a farm is hurting.

01:17:42 And this brings us to one of the most chilling concepts in the entire thesis, honestly.

01:17:45 The illusion of the dashboard.

01:17:47 The dashboards, yes.

01:17:50 this using the MockTube 3 model specifically focusing on its data gates.

01:17:54 I really struggled with the concept of data gates when I first read the source

01:17:59 material I was trying

01:18:00 to picture it in my head is it basically like um a bouncer at a nightclub who only checks to see

01:18:05 if you have a colored shirt on but completely ignores the fact that you aren't wearing pants

01:18:10 Like the system only lets one very specific flattering data point through the door.

01:18:16 That is a hilarious and perfectly accurate analogy.

01:18:19 Yes.

01:18:20 A data gate is just a filter.

01:18:22 It decides what information survives the journey

01:18:25 from the physical world to the final report.

01:18:28 Kluwek shows a terrifying data.

01:18:30 point about how institutional reports can lie to you while being mathematically

01:18:34 flawless. Flawlessly lying. Love that. Imagine two different

01:18:40 Farms. Farm A is doing okay. It can represent its health with a data vector of 100 comma 75.

01:18:47 Okay, so 100 in category 1, maybe that's...

01:18:50 yield and 75 in category two which could be i don't know soil health exactly now imagine farm

01:18:56 b farm b is struggling terribly in that sector

01:19:00 Its data vector is 100 comma 20.

01:19:04 Oof.

01:19:05 Farm B has a massive glaring problem.

01:19:08 The soil is practically...

01:19:10 Both of those vectors are filtered through a reporting gate

01:19:13 that is designed to only look at the first number.

01:19:15 The bouncer only looks at the colored shirt.

01:19:18 The second data channel...

01:19:20 the soil health

01:19:20 is simply erased

01:19:21 from the calculation

01:19:22 so the public dashboard

01:19:24 on the government website

01:19:25 spits out

01:19:26 oh yeah

01:19:30 Je hebt gelijk of je hebt niet gelijk hebben, heb je op zoveel manieren dat ik het bijna al alleen gemogen noemen.

01:19:40 een kleurtje wil gooien of zo en die zijn nummers op de ene maar om en weet je wel met

01:19:46 een millimeter of een fractie van een seconde of een muu seconde of een pico

01:19:50 dan ben je je weer over de koor kwijt of je gaat wel medaillen of wat dan ook.

01:19:55 En dat gaat wel medaillen was net niet erg leuk.

01:20:00 Ja, maar die kun je ook verdienen in andere categorieën.

01:20:04 Weet je, overal een kikkie waardeer ik.

01:20:10 op een paar vele manieren, zeg maar, en het helpt ook mensen niet, weet je wel.

01:20:18 Natuurlijk helpt ze niet.

01:20:20 bij enzovoort, maar die heeft ook een kopje koffie en die heeft allemaal grote eiten die ik waardeerde.

01:20:27 Koffie is ook maar weet je wel waar wij kunnen.

01:20:30 Dat heb ik mij nu tegengezet.

01:20:33 Dus dan voel ik me meer gemotiveerd en meer mezelf.

01:20:40 What about the dog?

01:20:43 Exact same reported scaler for both farms.

01:20:48 Which is?

01:20:50 score of 50 right from just having that is wild the report is technically accurate based on the

01:20:57 rule it's set for itself like it correctly

01:21:00 did the math on the first number but it completely erased the reality of the second number yes so as

01:21:05 a consumer i pull up the app i look at the dashboard i see both farms have an eco score 50

01:21:10 and I just assume they are identical operations.

01:21:13 And in that exact moment,

01:21:15 you are operating in a state of pure Dutch ignorance.

01:21:18 You've been systematically separated.

01:21:21 So manipulative and here's the tragedy of it no amount of confidence in that dashboard no amount of social media likes on that report

01:21:30 can recover the lost distinction of that erased data channel.

01:21:33 Reality is just gone.

01:21:36 Which is incredibly frustrating.

01:21:37 Because while consumers are...

01:21:40 Debating these heavily filtered labels, you know fighting on social media about which brand of

01:21:50 milk is more sustainable someone actually has to do the dirty work of

01:21:55 growing the food in these constrained physical realities this is a crucial

01:21:59 pivot

01:22:00 Ludwig's work. He is

01:22:01 deeply insistent on respecting

01:22:04 the competence and the reality of the farmer.

01:22:06 Right. Because so often, public

01:22:08 campaigns, driven by these

01:22:10 or simplified dashboards we just talked

01:22:11 about. Completely demonizing agricultural

01:22:14 technology. Yeah.

01:22:16 You see that everywhere. They create this sort of

01:22:18 Disney-fied narrative of

01:22:20 nature that completely ignores the massive amount of physical work logistical planning and

01:22:25 financial risk required to feed a population of eight billion people

01:22:30 It mentions how comfortable public discussion can completely overlook the harsh realities of breeding, crop protection, and seed supply.

01:22:37 I mean, it's easy to demand zero chemicals.

01:22:40 when your only job is eating the carrot, not keeping a field of carrots alive

01:22:44 through an unexpected frost.

01:22:46 I'm not as a patient made the fall for...

01:22:50 Ik doe dat in toe.

01:23:00 Go on which is incredibly frustrating

01:23:03 Because while consumers are endlessly debating these heavily filtered labels, you know fighting on social media

01:23:10 which brand of oat milk is more sustainable someone actually has to do the dirty work of

01:23:15 growing the food in these constrained physical realities this is a crucial

01:23:20 Ludwig's work, he is deeply insistent on respecting the competence and the reality of the farmer.

01:23:26 Right.

01:23:26 Because so often, public campaigns, driven by...

01:23:30 These filtered simple dashboards we just talked about.

01:23:32 Completely demonizing agricultural technology.

01:23:36 Yeah, you see that everywhere.

01:23:38 They create this sort of Disney-fied

01:23:41 ignores the massive amount of physical work, logistical planning, and financial

01:23:46 risk required to feed a population of 8 billion people.

01:23:50 The text mentions how comfortable public discussion can completely overlook the harsh realities of like breeding, crop protection and seed supply.

01:23:58 I mean, it's easy to demand zero.

01:24:00 chemicals when your only job is eating the carrot, not keeping a field of carrots alive

01:24:04 through an unexpected frost or a plague of root flies.

01:24:08 A prime example of this disconnect is...

01:24:10 the source material spends significant time on this is the debate around seeds oh boy the seed

01:24:15 debate activists often blur the lines between genetic engineering by law

01:24:23 It all just gets lumped into one big bucket of evil corporate egg.

01:24:27 The seed debate is incredibly toxic online.

01:24:29 You always hear...

01:24:30 about like terminator seeds and farmers being forced to buy sterile crops so they are permanently

01:24:34 enslaved to a corporation let's parse that out what does the framework actually say

01:24:40 about this. The expert insight here comes from an example provided by the University of Minnesota

01:24:45 Extension, which the thesis cites directly. They look at hybrid tomatoes. Okay.

01:24:50 One myth is that farmers are forced to buy seeds every single year

01:24:54 because the seeds produced by their crops are biologically sterile.

01:24:57 Right, the Terminator seed myth.

01:24:59 Exactly.

01:25:00 But the text clarifies this.

01:25:02 The hybrid tomatoes do, in fact, produce viable seed.

01:25:05 If you take a seed from that tomato and plant it in the dirt, it will grow.

01:25:09 It is not...

01:25:10 biologically inert. Wait, really? So why don't farmers just plant those seeds? Why spend the

01:25:14 money to buy new ones every year? Because of the genetics of hybridization. Oh, I see.

01:25:20 genetic traits that made that specific tomato size or shelf life, those are not predictably

01:25:26 inherited in the second generation.

01:25:30 farmer needs their entire field of tomatoes to ripen at the exact same time so the mechanical

01:25:34 harvesters can come through right logistics or if they need a very specific genetic resistance to

01:25:40 fungus that lives in their local soil that second generation seed just won't reliably do that okay

01:25:45 this makes total sense so they aren't buying fresh seed because some evil corporation

01:25:50 put a self-destruct sequence in the DNA they are buying it for predictability I think about it like

01:25:55 getting mad at someone for buying into smartphone battery from the manufacturer

01:26:00 Instead of trying to build one from scratch using raw lithium they mined in their backyard.

01:26:03 That's a great way to put it.

01:26:04 You aren't being forced to buy the battery.

01:26:06 You are paying for reliability, safety, and logistics.

01:26:09 That is a per-

01:26:11 You are paying for a predictable input because your output is contracted.

01:26:15 Now, are there contractual restrictions on some patented seats? Yes.

01:26:20 Absolutely.

01:26:20 Sure.

01:26:21 But as the text argues, we have to evaluate those as operational and legal strategies,

01:26:26 not as these cartoonish moral failings.

01:26:30 does the renewal serve? What changes between seasons? When you separate the

01:26:35 basic biology from the legal contract, you can actually have a real grounded

01:26:39 conversation about

01:26:40 farmer autonomy rather than a panicked ignorant conversation about poisoned food and when we lose

01:26:46 that precision you know when we just deal in panic and catchy slow

01:26:50 we start lying to ourselves about our own resilience there's a fascinating part of the

01:26:54 text that uses a model called the jtk twin viper to talk about double counting yes

01:27:00 This is a devastating critique of institutional accounting, particularly at the government level.

01:27:05 The JTK Twin Viper model is used to explain resource allocation and the illusion of...

01:27:10 Okay, let's break this one down.

01:27:12 Imagine a nation, or perhaps a large regional supply chain,

01:27:16 has a total stock of 100 tons of grain.

01:27:19 Okay, 100 tons.

01:27:20 total in the silos got it the administrators realize that supply chains are fragile so they

01:27:25 decide they need an emergency reserve they officially allocate a dimensionless fraction

01:27:30 Let's say 0.6 of that existing ground to a special strategic reserve.

01:27:35 Makes sense.

01:27:36 So you have 40 tons for regular daily use and 60 tons.

01:27:40 ...locked away in the reserve for a rainy day.

01:27:41 Right. Physically, that is what happened.

01:27:43 But what happens in institutional reporting,

01:27:47 the government dashboard proudly reports the total stock.

01:27:50 100 tons of grain available.

01:27:52 Next to it, in a bright green box,

01:27:55 it oddly reports the creation of a new strategic reserve.

01:27:58 60 tons.

01:28:00 Oh, I see where this is going.

01:28:02 ...in the public consciousness, especially in political rhetoric during an election year.

01:28:06 Those numbers get blurred.

01:28:08 The institution acts as if they have secured...

01:28:10 160 tons of resilience.

01:28:12 Wow. They point to the total

01:28:13 and then they point to the reserve.

01:28:15 As if the reserve is a new separate achievement

01:28:18 that adds to the total.

01:28:20 So they are claiming 160 tons of credit for 100 tons of food.

01:28:23 They double count the resources to claim a higher level of political and societal resilience,

01:28:28 but the material reality...

01:28:30 The calories available to keep citizens alive if a crisis hits remains strictly 100 tons.

01:28:37 You cannot take a subset of a total, put a new label on it,

01:28:40 on it and pretend you created

01:28:42 matter out of the city.

01:28:43 It's the world's best homeowner mug again.

01:28:45 The label didn't change the bank balance.

01:28:47 And if massive institutions

01:28:50 use accounting tricks like data gates double counting to fake physical resilience they are

01:28:54 almost certainly using them to fake moral resilience absolutely which is a perfect pivot into corporate

01:29:00 morality and what

01:29:00 Klootwig calls the

01:29:02 synthetic ledger.

01:29:03 Here's where it gets

01:29:04 really interesting and

01:29:05 frankly a bit

01:29:06 uncomfortable.

01:29:07 It does get

01:29:07 uncomfortable.

01:29:08 What happens when a

01:29:09 global bank

01:29:10 or a massive tech company slaps a rainbow logo on their social media profile for pride month

01:29:14 or puts a royal crest on their packaging to claim national heritage does it actually fix

01:29:20 anything in the real world. This is where the models move from the physical world of

01:29:24 agriculture and energy into the much murkier world of public relations and institutional morality.

01:29:30 And Kluwig is relentless here.

01:29:32 Yeah, he pulls no punches.

01:29:33 Yes, a very simple, piercing question regarding these campaigns.

01:29:36 Pride in what?

01:29:38 A claim to institutional...

01:29:40 virtue must answer to the institution's actual material conduct.

01:29:43 So we aren't judging the symbol itself.

01:29:46 We aren't debating the politics of a rainbow flag or a royal crest.

01:29:50 No, not at all.

01:29:51 We are judging the mathematical ledger behind the institution that's waving the flag.

01:29:56 Exactly.

01:29:57 To do this, Pluton introduces the T-O-M-K.

01:30:00 formal evaluator. He built an executable public symbol ledger. He names the test case

01:30:05 Synthetic Procurement Ledger 01. Sounds very official.

01:30:10 It is a mathematical representation of a corporation's material obligations to the humans in its supply chain.

01:30:18 Okay, let's open up the synthetic...

01:30:20 ledger what are the actual obligations in this test case in this specific

01:30:24 simulation the institution has three declared material obligations first

01:30:28 supplier traceability

01:30:30 They are legally or ethically required to trace five major supplier chains to ensure safety and compliance, but they've only verified three.

01:30:39 So they are short.

01:30:40 by two. They have two completely

01:30:42 opaque supply chains. Correct.

01:30:44 Second obligation, worker

01:30:46 remediation. There are four

01:30:48 documented cases of severe labor

01:30:50 issues that need active remediation they've only verified and resolved one yikes they are short by

01:30:56 three on human labor rights third of

01:31:00 workplace complaints there were three formal complaints filed internally and

01:31:04 they have verified the resolution for all three okay so they handled the

01:31:08 internal complaints good

01:31:10 for them, I guess, but they are still failing massively on supply chain traceability and

01:31:14 worker remediation.

01:31:16 Right.

01:31:17 The T-

01:31:17 Oh, they should look good.

01:31:23 What?

01:31:24 Eh...

01:31:25 This is...

01:31:30 That's a great problem.

01:31:40 My neck.

01:31:50 Alles is heilig, maar...

01:31:56 Ja, precies.

01:32:01 But they got weight on the block

01:32:02 I love them

01:32:03 I can't answer your hands deep

01:32:05 I drunk so much syrup, dawg

01:32:06 Don't stop me eating pancakes

01:32:08 Your niggas cool, dawg

01:32:09 Mine's

01:32:11 He's a killin' money, bro.

01:32:16 Right, yeah.

01:32:21 I love.

01:32:34 Obrigado.

01:32:43 We'll see you next time.

01:39:48 ご視聴ありがとうございました

02:39:25 Thank you.

02:39:30 Dat is wel een andere ding aan het nemen.

02:39:39 Precies.

02:39:41 Я не знаю, что я не помню.

02:39:50 I'm sure you've made it out of us.

02:40:00 Dankjewel.

02:40:10 I made a good load plan.

02:40:12 I never think I was a creeper.

02:40:20 Het is een klein beetje niks tijdens de tijd.

02:40:22 Schijnheilig zijn.

02:40:24 Ja precies.

02:40:35 It's perfect.

02:40:40 Obrigado.

02:41:26 Dankeschön.

02:41:42 Good.

02:42:40 Amen.

02:44:06 Mm-hmm.

02:44:10 Good.

02:44:21 En dan staan we op de kwaliteiten van de kwaliteiten.

02:44:30 ...van COVID...

02:44:34 ...voor opening...

02:44:36 ...ja...

02:44:40 Google Play account, geloof je, maar dat weet je niet, wel even gek vind ik, kopen je, kaart direct of iets of zo, toch goed.

02:44:50 Om het duidelijk te zijn dat ik niet denk van kijk ik ben de computer of zo.

02:45:00 And it's hard to think about the personal effect and so that they can make a safe word.

02:45:10 Dat was voor Dane, ja, waar ik in de buurt was of zo, ja, precies.

02:45:20 Het is, je krijgt niet altijd de beste, toch hoe je, ja precies, gewoon je naak ofzo.

02:45:26 Weet je, en soms schrik ik dus.

02:45:30 Als je net kon weten of zo, weet je wel, van meer kanten af of zo, op Unies, op Hooghoogtein gingen of ook wel te belgen gaan.

02:45:41 of van anders weet je wel

02:45:43 dan krijg ik een beetje door dat ik zelf niet per se

02:45:50 I think the result is like a person.

02:46:16 Yeah

02:47:13 Thank you.

02:47:20 Dat is wel een goede kans dat je niet stretch kan zijn.

02:47:24 Dit is een beetje voorbij.

02:47:32 Dat gaat wel lukken.

02:47:34 We zullen even testen uitdoen.

02:47:36 Ik vond het precies altijd uit.

02:47:45 Good.

02:47:57 감사합니다.

02:48:00 Ja, dat kan wel een beetje, een beetje fiesbaar zijn.

02:48:11 Mmm.

02:48:12 Mmm.

02:48:27 Mm-hmm.

02:48:38 Da, da.

02:48:40 Ik ga wel lang zo'n keer, weet je wel. Kan je me alsjeblieft helpen ofzo?

02:48:46 Dat is onder het alsjeblieft.

02:48:50 Yeah, that's right.

02:48:52 Please refrain.

02:49:10 Yeah, that's good.

02:50:01 Oh

02:50:10 Thank you.

02:52:25 He's stuck.

02:52:26 He's been going to be really fast.

02:52:30 Except the marketing term, you know, you won't forget about it.

02:52:50 En het is wel heel erg aardig, lief bijna, dat we nu in ieder geval vandaag gaan resetten.

02:53:00 Het was geen koppel, laat het koffie nog in.

02:53:03 Koppelkodex, Jussi's.

02:53:08 Ik weet het niet, denk ik.

02:53:10 Да, да, да, да, да.

02:53:24 And, let's see.

02:53:50 Mm-hmm.

02:54:07 Thank you.

02:54:11 I hope that you're kind of on the other side.

02:54:14 I'm going to do a little bit.

02:54:18 That's what they're going to do.

02:54:21 I'm not going to be able to play the game, but I'm not going to play the game, but I'm not going to play the game, but I'm not going to play the game.

02:54:30 I said no, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know.

02:54:40 Pagani, ho visto un palazzo per tardi, non mi sapevo che dice per tardi, non mi sapevo.

02:54:50 Yeah, it's okay, dude.

02:54:52 It takes time to talk to them.

02:55:21 Ha ha ha

00:01:10 schattige dingen maar alsof die snapt wat er staat of zo want hij als hersenen werken niet meer

00:03:45 Yeah.

00:04:10 I need names.

00:04:11 Tell me about DMR cards.

00:04:13 Who are you talking about?

00:04:15 Who hired you to take our compo?

00:04:36 Okay, and you're so perfect. Thank you so much.

00:04:40 So it's a dash for a 10-1 million.

00:04:50 It's many months, time of the month, many months, so you need to get the kids, and I also hope you buy it, and I actually appreciate it.

00:05:02 Muito obrigado.

00:05:30 Don't leave your suite.

00:05:31 It was Reddington.

00:05:33 How could he?

00:05:37 The code checker tend to think about it.

00:05:40 Checked in to leave the picture in Red's hat.

00:05:50 So you want to go to the party?

00:05:52 Yeah, yeah, yeah.

00:06:00 Ja, en ik zie dat in de vorige relatie met Aaselwitser, waar je het niet vreemd.

00:06:10 Ook al zit ik bij Mariën straks even uit de baan en tegenstelling tot.

00:06:20 Your security is occupied.

00:06:30 Zoveel kippen zouden we een beetje langer tijd moeten gaan.

00:06:33 En dan heb je niet zoveel zin met elkaar te bespreken.

00:06:40 waar je mee zit. En als je de fabrik die je aantrekkelijk vindt en zeg maar, wees wel, koppie koppie geest.

00:06:50 Enzovoort, dan heb je al snel de neiging om doorradering te zoeken tegen elkaar, om welke egoïstische redenen dan ook.

00:07:00 En het zegt dan niet bij zijn meteen dat je seks moet hebben met elkaar gehaald hebben.

00:07:07 Weet je wel.

00:07:10 Kunnen jullie niet echt wat voor een excuus vragen hebben om nog even te talkeneren en te streamen?

00:07:20 and pick up my next year to the girls.

00:07:23 Hey! Where's my agent?

00:07:27 Get out of my way.

00:07:30 Let's see how this is right over there.

00:07:40 He's the one who wants me there.

00:07:50 Italian dog born with two heads.

00:07:55 How about humanitarian exposure?

00:08:01 What have you done?

00:08:03 I didn't do anything.

00:08:04 I think the assassin made me full cocktail of this.

00:08:10 she uses to drug her children.

00:08:12 What did you say?

00:08:29 Great day.

00:08:34 You don't need a medic, I have the antidote right here.

00:08:37 I'll have you.

00:08:38 I'd be happy to as soon as she...

00:08:40 the truth give it to me now she's not breathing hello the truth

00:08:46 madame capo doesn't free children from slavery she impris

00:08:51 I believe you.

00:08:54 Hello.

00:08:55 Hello, Fyodor.

00:09:02 Gracias.

00:09:11 Oh, yes, Vietnam.

00:09:24 Дай мне жду его на своем.

00:09:31 We hebben een taak aan het opendemen, om iets te doen.

00:09:40 Ik weet nog niet wat, ik vind het een beetje te strafd worden.

00:09:45 Weer was de pankeer.

00:09:50 Dat is een kutvraag.

00:09:52 Hier was de bankier.

00:09:56 Die dit voor jullie bekostigd heeft om...

00:10:00 Playrollen enzovoort. Wie is Arkham's Playrollen eigenlijk?

00:10:04 Als ik dat nu opzoek, dan zit het in m'n boek nook.

00:10:13 Weet je, iedereen die met over 2.000 data in aanhaling is gekomen.

00:10:21 Die is verantwoordelijk voor zichzelf.

00:10:25 Ik overkom.

00:10:30 Ik probeer dat te repareren voor een hoop mensen, om het verhaalsje weer terug te tonen.

00:10:41 Als ik dus een foutje maak, dan kan hij bedenken wat ik nu ga doen.

00:10:45 Wie bel ik dan? Ja precies.

00:10:50 That's it, we're finished.

00:10:53 Yes, we're finished.

00:11:00 de geneesheer directeur zelfs, de geneesheer directeur, denk je wel met mij een gd.

00:11:07 Oh my god, dat is zo mooi!

00:11:10 Of de behandelaren zich aan de bed houden.

00:11:13 Nou, zitten jullie niet in mijn hoofd toevallig.

00:11:15 Ik heb hem met Braxton binnen de uur.

00:11:20 I've discussed contingencies regarding all of our colleagues.

00:11:25 But that's our non-consensual, non-consensual.

00:11:30 I'm going to have to call you back.

00:11:34 Eh, no.

00:11:36 You wouldn't believe it so much.

00:11:40 Nou ja, misbruik in verkrachting, chronologisch hebben we er al aan.

00:11:45 Ik heb een idee hoe ik hier ben.

00:11:47 We blijven worden persoonlijk.

00:11:50 Ik weet gewoon wat je wilt.

00:11:54 Ik ben de helpte geboren.

00:11:56 Daar gaat heel veel tijd overheen zitten.

00:12:00 Мандат, я всех клят, я дат, как вот я ворвала.

00:12:11 We weten dat ik dit 180 keer moet doen en dat ik dit kan bereiken en al die patrouwen in de sequencers die dat...

00:12:20 Wat hebben we aan het gebeuren zijn inclusies in de digitale exacte realiteit, de fysieke realiteit.

00:12:31 Nou met ons research dingetjes, ja precies.

00:12:40 that you are a force to be right

00:12:50 Every resource at our disposal, whatever it takes, I don't think you...

00:13:11 who possesses the fulcrum could possibly

00:13:13 I don't know who he should

00:13:20 I think you're bluffing.

00:13:22 I don't think you have it.

00:13:32 Come on my bluff, please!

00:13:40 I don't know what the hell you're going to do with it.

00:13:42 Honestly, he's like a damn sign of beef.

00:13:45 I don't know what the hell you're going to do with it.

00:13:53 Hello, Mr. Beeks. Your daddy is...

00:14:00 It runs in the family.

00:14:02 There's another overcooked salmon in your refrigerator.

00:14:18 Attachments are going to happen

00:14:20 distinct liability since in my line of work

00:15:04 He was working on radar technology when he stood too close to a magnetron.

00:15:10 I noticed that the ca-

00:15:20 invented the first micro reward him, they promoted it, his idea.

00:15:40 but cbp has been good to me 40s who entered the country

00:15:51 We have a situation where we are going to move to the U.S. Passport.

00:15:57 Otherwise, I nuke Mr.

00:16:00 It's my little, I'm a little, I'm a little, I think it's just a mango sauce in the cabinet.

00:16:07 It's my laptop.

00:16:10 DHS has arrived on the departure of information system and you're starting to see that wasn't so hard.

00:16:17 Anyone finds out, I'll be fine.

00:16:21 I really missed the moral of the store, kill Mr. Biggs, in a microwave.

00:16:27 What do you take a microwave?

00:16:29 Now if you had a nice white...

00:16:30 Burgundy we could praise him in.

00:16:32 Come on, Max!

00:16:34 The moral of poor Mr. Spencer's tale of woe is that you should never worry about betraying your workplace.

00:16:40 Because given the chance, your workplace will definitely betray you.

00:16:51 Het staat niet helemaal de percent gelijk, zei ik me dan, maar hier.

00:17:00 Het is niet het probleem van de islam.

00:17:04 Het kan collectief zijn dat er ook mensen gelopen.

00:17:11 Your judge had a step out, so I'll be judging you tonight.

00:17:21 How did you convince the judge to step away?

00:17:26 I didn't have to, he was summoned by his boss.

00:17:29 I guess.

00:17:30 I knew you were talking to the chief judge. I just didn't see the play. We're a great strategist.

00:17:42 What a sad end to an association with a friendship, is that what I hear here with you?

00:17:50 In part of the world.

00:17:55 For what I understand your turn of events.

00:17:58 The betrayal is unforgivable.

00:18:00 It's understandable. After all, my feelings for Elizabeth weren't almost rational and emotional.

00:18:11 entirely wrong to wonder if Elizabeth was capable and worthy of running things.

00:18:20 Dat is de meeste kinderen die daar worden gezegd.

00:18:30 I don't see that one would say.

00:18:31 You voiced your objection.

00:18:33 That was a good one.

00:18:34 That was a choice was made.

00:18:40 I am watching everything we've built grumped through my eyes, yes, no, to your servant, Raymond.

00:18:50 I'm your partner.

00:18:52 I may have been in the...

00:18:56 but it was my life's work too.

00:19:00 You didn't know to get so reckless with it.

00:19:10 En seksueel gezondheid.

00:19:13 Ik heb niet altijd seksueel gezondheid, maar ik heb niet gezondheid, maar ik heb niet gezondheid, maar ik heb niet gezondheid.

00:19:20 that it would cost me, Elizabeth,

00:19:22 then I would have to curse.

00:19:41 made yourself in effect.

00:20:00 in the Spectre.

00:20:20 sitting in a federal court.

00:21:09 Mm-hmm.

00:21:10 Ik weet niet dat ik aan het lezen ben, ik heb wel eens een ander persoonlijkheid of zo.

00:21:22 Oké, wat betekent autoborfit?

00:21:25 Sowieso, een probleem.

00:21:32 Ja, in deze context.

00:21:43 En dan zie je aan binnen.

00:21:52 Dat betekent een transformaat elektronisch.

00:22:00 Of de tv-serie van vroeger, of de Gele Cube in het Erasmus-parkje, wat azem, wat zo'n mooier.

00:22:06 Eigenlijk vond ik een gejaardag.

00:22:10 of iets. Toen had ik het redelijk toen die geelde cube met geospatial die in een arc-managedreld

00:22:20 Ik heb neergezet, bij de baarsjes zeg maar.

00:22:23 Oh, bedoel je...

00:22:30 Power Ranger Bob haalt.

00:22:33 Ook een serie, zeg maar.

00:22:36 Een serie, ja.

00:22:39 Weetje.

00:22:40 Als ik in de volkant zeg serie en support heb ik nog serie gekeken of film ofzo.

00:22:45 Ben dit gehouden, zie ik hier ofzo.

00:22:47 Meteen...

00:22:50 Dan heb je waarschijnlijk mijn oude privéleven thuis helemaal naar de kant geholpen.

00:22:57 En opeens heb ik elkaar zitten met elkaar te praten.

00:23:00 Het is op dit moment gewoon de feitelijke, juiste realiteit omschrijving.

00:23:10 Dus ik kan het dus alweer kijken, dus we zitten al wel...

00:23:14 Kijk, nu is het een andere...

00:23:26 Hier zit dezelfde kassel.

00:23:28 Nu ga ik stormen aan.

00:23:30 In general, it's easy to do a lot of collective, personal, like I have passed on myself.

00:23:34 I will leave thinking of myself.

00:23:44 Oh

00:23:50 Anders lijkt het echt niet, er wordt nog alles geneerd zoals in de Rijksmuseum gemaakt, anders moeten we het wel anders maken even.

00:24:03 Kijk aan, hoe die regoeteren zo.

00:24:06 Kijk, 1, 3.

00:24:12 Amen.

00:24:20 Dat is een kouder, dat is een minuut van 80 jaar, dat leef ik bijna in dit jaar.

00:24:30 Ik heb dat geen helpen, maar we zijn voor elkaar.

00:24:36 Zo kunnen we een beetje een paar denken van wat je dingen.

00:24:40 Okay.

00:24:41 I think you're on the hand that happened.

00:24:43 I mean, they're going to hold you.

00:24:49 Okay.

00:24:50 Nee.

00:24:51 Het heeft nog meer schade.

00:24:53 Er zit een bepaalde daaier in het lichang.

00:25:00 En ook natuurlijk, dat pak ik, dat hapje van inderdaad enzovoort, wat bewijzen je ergens?

00:25:07 Want dit kan niet.

00:25:10 Overal door Pauliek en ikzelf ben naar andere landen gestuurd, waar we verdachte omstandigheden.

00:25:20 letterlijk zeg maar in de flesje. Ook al voordat jullie thuis leefden bij John Franklin

00:25:25 6.3 naar de kanker hielpen en digitaal streamen.

00:25:30 te verbinden, geld aan te verdienen en van alles naar zover.

00:25:36 Ook voor dat van extra kant.

00:25:40 En jullie hebben bij mij allemaal wat aangedaan en ook af en af voor dat.

00:25:46 En daarvoor willen jullie ook te koppelen.

00:25:50 En dat is alleen over zijn hoofd, dan denk ik, hoeveel zin heeft het om je te laten leven en te helpen?

00:26:00 Ja, heel voorzichtig maar.

00:26:23 Nou, computerlapje vast. Zal weer gereset zijn.

00:26:26 Ik bedoel, ze heeft weer achter mijn computer gezet, toch?

00:26:30 Toen heb ik mijn computer gereset.

00:26:32 Toch? De stageheden, de leerlingen hier, die lange, die ziet er heel erg allemaal uit.

00:26:40 Ik heb ook aan het sociale radar gewerkt.

00:26:45 Volgens mij houd ik die meer van piemel dan van vagina's.

00:26:51 Maar die heeft dus mijn laptop mogen resetten, want hiervoor had ik veel meer dingen geïnstalleerd staan op mijn laptop.

00:27:00 zeg maar. En dat heb ik niet. Dus ik weet niet of dat nou zin heeft om steeds te onderbreken.

00:27:10 Maar die hele data, dat vind ik allemaal.

00:27:15 Grankeliers.

00:27:21 ¿Veis?

00:27:38 И так.

00:27:42 Maar bestel je wel eens voor het online, thuisbezorgd of zo.

00:27:50 of bij de andere tijd, dan wordt het dan ook thuis bezorgd.

00:27:54 Ja, precies.

00:28:00 Dan komen er heel veel dingetjes bij elkaar.

00:28:02 Daar moeten we bij alle mensen zijn.

00:28:17 We hebben wel eens een paar jaar met iemand samengewoon.

00:28:20 Dan denk je, kanker, ik vind die al mijn persoon eigenlijk leuk.

00:28:27 En dan denk je eigenlijk bijzonder kanker, dat is echt een pacht.

00:28:32 Ik denk dat ik volgens mij een paar jaar geleden heb gehoord.

00:28:40 Ik heb er een beetje gezet, al geleerd ergens een keer.

00:29:01 I did.

00:29:11 I think there is plenty of things that's over the people there.

00:29:24 I don't need names.

00:29:30 Ik ben nu een mannenvader opnemen in z'n lachens en dan ook echt niet sexueel tot maaggetrokken toe.

00:29:38 Ik ben nu eenmaal een klein beetje...

00:29:40 De imperfecties vallen mij te veel op en dan ga ik bestoren en iedereen erop heen.

00:29:50 Så har du gange råd.

00:30:01 Voor meer van de narcistische natie, natie, die level ik zeg maar gewoon denk kakker.

00:30:10 That's why I don't want to stop it, but sometimes you've taken time to make sure that you have to have cancer.

00:30:20 Allemaal sterven.

00:30:23 Ik heb natuurlijk dat vet te lang om uit te leggen.

00:30:27 Maar een rechter zou denken kanker.

00:30:30 Ik ga die zaak niet eens aannemen.

00:30:33 Ja, dat.

00:31:08 Gracias.

00:31:18 Спасибо.

00:32:00 Thank you.

00:32:10 Vielen Dank.

00:32:33 And we have a mission to go.

00:32:52 Thank you.

00:33:01 Thank you.

00:33:12 Gracias.

00:34:27 Gracias.

00:36:54 Thank you.

00:37:00 Ja, precies.

00:37:03 Dus Jitske en Samen hebben we hem dan gehoorget, zeg maar, met deze klootwijk.

00:37:10 We hadden een ski-vakantie, dat was het themaatje.

00:37:20 En die, weet je wel, want ontologie wordt nog even nodig.

00:37:31 om uit te leggen waarom Solips is

00:37:34 en mensen die denken dat ze het alleen zelf bestaan

00:37:40 Niet egoïstisch per se, maar dat de rest van de wereld eigenlijk een situatie zou zijn.

00:37:50 Ik ben niet concreet zeker van, want ik weet dat van alles weg blijft.

00:38:00 Ik heb geen persoonlijkheid gestorgen, hoe leid dat ook klinkt.

00:38:13 I don't think you have a branch of depth, breadth, mirror.

00:38:22 Ja, kijk, ik word bestuurd.

00:38:24 Ja, ik word...

00:38:26 Ja, dat is het ook.

00:38:27 Ja, dat is wel.

00:38:28 Ja, dat is wel.

00:38:29 Dat is wel.

00:38:30 Ik denk dat je het blijft.

00:38:36 Ja precies.

00:38:40 Kijk.

00:38:51 Mmm

00:39:08 You're back.

00:39:18 It is.

00:39:20 I found some rather overcooked salmon in your refrigerator.

00:39:24 There's nothing there.

00:39:26 No, it's the same thing in the last days.

00:39:30 Met iedereen wil ik de feest besturen, gebruikbaar te leren besturen en een paar jaar lang te verhuren en allemaal dingen voor iedereen mogelijk te maken en zo uit te houden.

00:39:41 Dat ik deze computer daar kijk. De laptop.

00:39:47 Gewoon had kunnen besturen zonder dat ik...

00:39:51 Ja, goed te typen.

00:39:54 En dat jullie dan kijken of ze kunnen bedenken, waar waren we erbij?

00:40:00 Есть еще проблемы?

00:40:02 Пожили

00:40:10 Stoppen, dat stop ik. We leggen de hele kankerdag jullie verzekerd, jullie leven eindigen en dan ook iedereen die daarbij hoort.

00:40:20 ...radar tank, but too close to a magnetron, and notice that the candy bar in his pocket had melted.

00:40:27 Then and there, he realized that...

00:40:37 that you work for, reward them.

00:40:49 Finding invention.

00:40:51 I want help.

00:40:52 CBP is a good time.

00:40:55 I need your data.

00:40:57 I need a narrow task.

00:41:02 who entered the country alone in the past 48 hours,

00:41:06 likely through an east coast port of entry with a U.S. passport.

00:41:12 Otherwise, I knew Mr. Beast.

00:41:15 I wonder, will he taste like squab or dove?

00:41:18 The thing that's just a bingo.

00:41:20 Let's go to the top of the road to the border of the air force system.

00:41:31 If anyone finds out, I'll be fired.

00:41:34 You completely missed the moral of the story.

00:41:37 It wasn't that you killed Mr. Beeks.

00:41:39 You never mind.

00:41:42 Now, if you had a nice white burgundy, we could raise it, man.

00:41:49 Moral of Orvis.

00:41:50 of woe, is that you should never worry about betraying the workplace, because given the

00:41:55 chance, your workplace will definitely betray you. Loyalty to individuals.

00:42:01 That's what makes it.

00:42:25 I'm going to charge you to step out.

00:42:31 The task force law configured out your plan to get to me at Cooge, if the judge is.

00:42:52 I think you'll probably not fall into it.

00:43:01 Thank you.

00:43:12 The betrayal is unpergivable. It's unperstandable.

00:43:17 After all, my feelings hurt.

00:43:26 One, two, one, two.

00:43:38 However, subject.

00:44:01 I wasn't your servant, Raymond.

00:44:03 Partner, we created an empire together.

00:44:08 Empire.

00:44:10 NNTV, handen aanbeelden, en dat is een oude komper, waar ik thuis mijn studie pijl en daar heb ik uit de studio.

00:44:20 We kopen zo'n digital studio bij Oper Amsterdam, de kaarsenballenfabriek.

00:44:30 Ik ga het niet alleen doen, ik wil het creatief uitzoeken, technisch.

00:44:40 Dus als iemand een beetje rustig, weet je wel, lekker een beetje bezig kan zijn met die...

00:44:50 Ja, droogere dingen waar die belangrijke van werkt.

00:44:56 Ja.

00:44:59 Dat doe je echt niet.

00:45:00 Ik had een beetje de hele kankerboel voor mezelf, dus toen was hij niet meer mijn beste vriend.

00:45:10 En eigenlijk was mijn beste vriend bij een gehaald is Marja.

00:45:14 Maar die kende je allemaal als het gouden kaltje.

00:45:20 Ik voel het toe om mee te weten dat ik het porno meegemaakt heb in de afgelopen 7 jaar.

00:45:31 Maar hij gaat niet sneller ofzo hoor, dat ik hier al mee deed en dat ik ook een beetje aan het maken ben.

00:45:42 Dus ik weet niet hoe dit werkt, maar ik krijg hem bij de beatball gedaan.

00:45:50 Ik heb kankerde bielen enzovoort en kansen hebben dat ik ergens hier bij iets mocht te maken mocht.

00:46:00 In de continuïteit van de tijd.

00:46:18 Kijk, het is zo ook een beetje.

00:46:21 Hoorlijk pakken.

00:46:24 Legen.

00:46:25 Dit legerpuliet, kanker.

00:46:28 Ja, precies.

00:46:31 Falta, tres

00:46:40 Kijk, het keywordje, de filmwoord van de PR Academy dingetje, toch?

00:46:50 Ik ben hier gewollipuleerd en gestreamd.

00:47:00 En dus ook bij Thijs en Terwijt zien wij hier allemaal alles wel verborgen hielden.

00:47:10 Op de zonverkant staat 6.3 en dan door alle harkinglocaties en metere dingen, dan zit ik in het moment, of sta ik in het moment.

00:47:21 Het verschil tussen zitten en stonden staan.

00:47:25 Ja, precies.

00:47:29 Kijk, kijk, kijk.

00:47:30 En if, if, then, else, of wat dan ook, dat stelt een vraag voor.

00:47:40 Eigenlijk. Want anders, dan moet het uit vrije wil zijn. En dat is hier niet het geval.

00:47:50 niet geweest. En dat gaat het ook helemaal niet meer worden, dus probeer me al tot ik, ja.

00:48:32 Thank you.

00:48:44 En ik wil nog even aan de flow bereiken.

00:48:51 Wij zijn recent boog, want ik kom hard aan jou, ik gezeer, ik ken de koning.

00:49:00 Down the seat of the army.

00:49:11 Ik kom hard als ik vrouwen zie waar ik hard van word.

00:49:18 Ja, letterlijk.

00:49:20 This is not why the point is, without the point is, but it is pointy.

00:51:28 Thank you.

00:51:38 Gracias.

00:51:40 Yeah, please.

00:51:42 Thank you.

00:51:52 1, 2, 3, 4, 5, 6, 7, 7, 8, 8, 9, 9, 10, 11, 11, 12, 13, 13, 14, 14, 14, 15, 15, 16, 16, 17, 17, 18, 19, 19, 19, 20, 20, 20, 21, 21, 22, 21, 22, 22, 22

00:57:17 Dus waarom ben je...

00:57:20 Weet je wel, als het op een diagnose van ja of nee antwoord gaat, het zijn die van ja, ik zie het niet.

00:57:30 echt ofzo en toen ben ik zo er achteraan gegaan van jou kanker

00:57:40 Ik sprok, ik eet redelijk gezond en weinig.

00:57:46 Ik ben aan het studeren, ik hou goede cijfers.

00:57:50 Thijs, weet je wel, gezellig enzovoort, knus, lief en romantisch, weet je wel.

00:58:01 Toch heb ik daar altijd paniekaanvallen.

00:58:05 En toch heb ik vet veel stress.

00:58:08 Lichamelijk enzovoort.

00:58:10 In Epic kost het wel honderdduizend keer meer moeite dan de meeste van jullie, omdat ik zeg maar normaal mijn dag en nacht door te komen.

00:58:20 Dan ga je twijfelen, als iemand dit je zegt, zeg maar, weet je wel, van, dat, dat, dat.

00:58:30 Dat ik niet per se een psychiatrische diagnose, weet je wel, een stoornis heb of zo.

00:58:37 Weet je, dus dan dacht ik, ja, maar er moet iets meer zijn.

00:58:40 wat kan verklaren waarom dit lichamelijk en mentaal immersing aan de hand is op dat moment in de tijd.

00:58:51 En dan op een gegeven moment ging ik bij Koen, daarnaast zeg maar, weet je wel, op bezoek.

00:59:00 Wij zijn ouders, ik vroeg niet, ook wonen.

00:59:05 Ik weet het niet precies.

00:59:08 En er zaten weer de vrouw.

00:59:10 En toen zat ik met z'n vader Ruud ook te praten enzovoort, en die stelde voor van, ja, dat legde een beetje uit.

00:59:20 vergelijkbaar zeg maar en is er misschien kan je laten testen op ADHD

00:59:30 Toen dacht ik dat zou, weet je wel, als hij een psychiater met zoveel ervaring uitlegde aan mij.

00:59:40 Dat je dat zou kunnen, laat je alsjeblieft even eens testen, diagnostiseren, zeg maar.

00:59:50 Ik ben ook heel erg aardig en ik waardeerde het ontzettend dat diegene, weet je wel, het beleid was überhaupt omwacht.

01:00:00 ...om aan te horen en weet je, vertrouwen we Presti, zeg maar ook een beetje.

01:00:06 En, ja, toen...

01:00:10 Dat kreeg ik op een gegeven moment een diaglopen met ADV en nu kostte het heel veel tijd en moeite om aan die...

01:00:20 Die DNB, die Dorm Magistra Alperijp, dat is het ergste, weet je wel, ik weet dat ik dat hoort verpest enzovoort, want volgens mij is het niet Dorm Magistra Alperijp.

01:00:30 Straalbaarheid, exact. De term, zeg maar, als ik hier op zoek nu.

01:00:35 Dank.

01:00:40 Weet je wel, lichamelijk had ik de hele tijd met een bloeddruk maker, met een polsmekertje, dat ik mijn hartslag bij ging houden.

01:00:50 Omdat ik bang was, kut zou ik eigenlijk een hartafval.

01:00:53 Want als je elke dag hyperventilatie hebt en letterlijk zeg maar weet je.

01:01:00 Wel tot paniekaanvallen ontspoord op die manier.

01:01:03 Dus een keer een ambulance langs geweest in de dag en avond bij de Flitscent 4A.

01:01:10 Ik dacht kanker, mijn hele spieren die gaan op slotten enzovoort.

01:01:18 Gewoon.

01:01:20 En 1 uur in de nacht wakker, met een paniekaanval.

01:01:24 Nou, kijk een tijdje. Ik kan natuurlijk niet zeggen altijd, altijd.

01:01:30 Heel erg vaak.

01:01:35 En dan heeft het dus een tijd geduurd.

01:01:40 medicatie te wennen dat was de eerste medicatie die geprobeerd werd

01:01:47 weet je wel Ritalin

01:01:50 En nog eentje, ik weet het niet meer welke, maar in ieder geval weet ik niet meer.

01:02:00 Ja, kanker.

01:02:05 Dat is heel erg.

01:02:07 Maar...

01:02:11 Toen had ik dus de hele tijd allemaal problemen in mijn hersenen.

01:02:20 met mijn gevoel. En dan denk je, kijk, dat is zo'n breed spectrum. Nee, kanker. Weet je, dat was ik heel erg hoor.

01:02:30 Hij werd er voorzichtig over, maar die shit was kankerhard.

01:02:36 En dan moest ik uitwennen en tot mijn lichaam, zeg maar,

01:02:40 Ja, letterlijk zeg maar, resistentie en tolerantie opbouwen, dat is ook altijd...

01:02:50 Doverstellingen van actieve werkingen stoffen en dat hebben we vet groepen.

01:03:00 Right here?

00:00:02 as you were in the task force with what you have been brave enough to go to war, I don't know.

00:00:10 Dit is gemixt, gedamixt ofzo, want dit weet je wel, dit filmpje op de achtergrond.

00:00:20 Ik denk dat de afspraak ook praten, dus het zal wel moeilijk voor transcribers zijn, maar als iemand de audio bestand heeft nog...

00:00:31 You're sitting in our house and I have the power to put you down with it.

00:00:40 It's a good time to protect.

00:01:18 You can take out compels.

00:01:28 Keep the floor locked down.

00:01:31 Good side.

00:01:40 I asked you a question last time, you hired him.

00:01:45 I asked him this.

00:01:51 Now, we haven't got much time until you have contact with the fracture.

00:01:56 We can intern with you, so we're going to expedite things.

00:02:14 감사합니다.

00:02:20 If they feel they don't look, thank you.

00:02:24 Correct.

00:02:30 Don't leave your suite.

00:02:31 He was ready to.

00:02:33 He hired a freelancer.

00:02:35 What?

00:02:35 No, how could he?

00:02:37 The coat check.

00:02:38 Think about it.

00:02:39 The coat check.

00:02:43 to get close enough to your cell.

00:02:48 I have my own security.

00:02:50 I said he's going to go to the party.

00:02:51 Oh, I thought you were going to ask.

00:02:56 Pointing out that Freelancer was a diversion.

00:02:58 He wanted to go to that party.

00:03:02 Mm-hmm

00:03:17 Thank you.

00:03:21 Security is occupied.

00:03:27 The threat is the FBI.

00:03:32 Why are you doing that?

00:03:46 Because you're a wanted man to understand, and I am God.

00:03:50 I run my business, I'm winding down, so it's a little bit hard.

00:04:00 How does a devil can come out and kicked around years ago?

00:04:14 Ja, in FBIA-Untertitelung.

00:04:21 pick up and they shouldn't look away.

00:04:33 Ja, ik ben niet zo ontwikkeld als je denkt.

00:04:41 This is the man. He's the one who wants to be dead.

00:04:47 Do what? To champagne?

00:04:51 Italian dog more than two hands.

00:04:55 No.

00:04:56 How about a humanitarian, I suppose.

00:04:58 It's wrong.

00:05:06 I think the assassin, I think she called Cocktail.

00:05:13 What did he say?

00:05:15 You're a liar.

00:05:18 I'm lying, Floriana.

00:05:27 It's on my page.

00:05:28 Okay.

00:05:29 Okay.

00:05:30 Thank you very much.

00:05:40 Give it to me now, she's done!

00:05:42 Madame Campbell doesn't free children from slavery, she's in prison.

00:05:51 Hello, Theodore.

00:06:15 Yeah, it could be.

00:06:20 Als ik Koninkstingen nu lees, zeg maar de tekst, de woorden, ik weet in principe wat het betekent.

00:06:32 Alleen het probleem met automatiseren.

00:06:40 En dat betekent dat dat ik in principe niet per se de exacte definitie, de terministische, van mijn volk.

00:06:50 Compositie is een samenstelling in de object-oriented programma.

00:06:56 Weet je wat?

00:07:00 Eigenlijk geïndolieke kankerziekte, entity component system, zeg maar.

00:07:10 structuren, kan compenseren, dus, even kijken hoor, een vogel.

00:07:20 Weet je wel, overal hij heeft wel tegen een vogel.

00:07:24 Van alles, zeg maar.

00:07:27 Waar basis waren.

00:07:30 Weet je wel, dus metrics van bijvoorbeeld hoe groot of hoe zwaar, dat soort dingen.

00:07:38 En dan heeft het functies.

00:07:40 En die definiëren bijvoorbeeld, methodes zeg maar, die definiëren bijvoorbeeld.

00:07:45 Dit is echt een ingewand, lidiër fucking gecompale.

00:07:50 Maar dan kan je zeggen, kanker, dat ding kan vliegen.

00:07:56 Maar, dat mogen ook.

00:08:01 Maar een mug heeft niet dezelfde waardes als die vogel.

00:08:10 Dus als ik zie compositie, dan denk ik aan in mijn ogen waar ik dus de afgelopen paar dagen.

00:08:20 weken, of ander over waar we bezig geweest zijn, in ook nog een keer heel veel andere dingen.

00:08:31 Maar er kan maar zoveel per seconde, of niet picoseconden zeg maar, in mijn hersenen, weet je wel,

gedaan worden.

00:08:40 Want als slaap ik op, dan ben ik wakker, zeg maar, overdag.

00:08:45 En het vreselijke probleem...

00:08:50 Is er hier een half aan de reken kijken.

00:08:52 Kijk, dat was even de uitdaging over de...

00:08:56 Ik hoor muziek.

00:09:00 of een regenbal.

00:09:02 Weet je dat?

00:09:08 Weet je dat?

00:09:10 Die te maken altijd goed.

00:09:12 Ja, nee, niet echt.

00:09:18 Kijk, David, je hebt zelf ingang.

00:09:21 So I return it to you.

00:09:27 Yeah.

00:09:28 It's a canker plump.

00:09:30 Weet je wel, Jan de Zwetser, de kliniek met Arvan Arkin, waar dit gestreamd en gedaan wordt.

00:09:40 En gemodipuleerd wordt?

00:09:44 Dan zou ik denken, oké?

00:09:47 We hebben tijd doorgebracht.

00:09:50 Op dit pand, in deze plek zeg maar, en dan denk ik, ja oké, je hebt blijkbaar bestaan van gelezenbroeden.

00:10:00 Ik vind dit in de andere wanneer ik mensen spreek, zijn blijkbaar nooit van mij privé ofzo.

00:10:10 Gewoon hier, hè? Gewoon hier.

00:10:14 Maar jullie hebben toch godverdomme letterlijk, zeg maar...

00:10:20 Dit allemaal op andere plekken ook ten altijd gedaan en dan moet ik daar erkenning aan geven.

00:10:30 Want het zit natuurlijk chronologisch in de audio, die je wel kan horen dan, dat ik uitleg kijk vogels, wingspan.

00:10:40 Keespan, isolatie, materiaal voor het dak, dijverdak, regenboog, de telefoon terug.

00:10:50 Ik ga van Gemini, Google Gemini, kort Duits, kort Russisch, half Nederlands.

00:11:00 en mijn ex-vriendin, bijna verloofde.

00:11:03 Bij Mercator projectieplein in Amsterdam West.

00:11:08 Bij waar ik op de job...

00:11:10 Franklis uit 63 woonde en toen ben ik inderdaad uiteindelijk met een chip in mijn hoofd.

00:11:15 Dat was het verhaal waar ik me geen geld meer had om eten te kopen.

00:11:19 Maatschappelijk.

00:11:20 doorgaan enzovoort. Ben ik een paar jaar onder deze omstandigheden verhuurd.

00:11:30 en bestuurd

00:11:31 in de GGZ in een kliniek

00:11:33 met zorgmacht gingen noodverordeningen

00:11:35 en jullie koppelden

00:11:37 we hebben geprogrammeerd

00:11:40 op de positie

00:11:43 en jullie denken kanker ik kan jullie nog

00:11:45 enigszins gaan helpen

00:11:47 want we nemen de tijd

00:11:50 C'est quoi ?

00:11:57 C'est quoi ?

00:11:58 C'est quoi ?

00:12:00 En dan ook is het in dat audio verstandje, maar al mijn shit is verkocht en gebruikt en letterlijk als een inspiratie en voortpordeert.

00:12:08 En je doet het nog steeds, nee, want dan ben ik niet.

00:12:10 gedaan samen. Dan hebben jullie echt fadaal een fout gemaakt.

00:12:20 En dat kan je in een peertje niet overhalen, van zulke stupiditeit.

00:12:25 Zo onintelligent en het is niet aanhokkelijk of aantrekkelijk meer.

00:12:30 ...om letterlijk daar ooit iets in te veranderen.

00:12:33 Het kost me alleen maar weer tijd.

00:12:36 Wat exact ironisch verklaart...

00:12:38 ...waarom de kanker...

00:12:40 Letterlijk niet alleen die kankerdobiel en die kankerdobiel die nu ook in die kamer zit.

00:12:50 En die mensen, eigenlijk die hele bevolkingsgroep, eigenlijk niet mag, die ermee te maken had dat Azem en Zadar Amayev de telefoon op de bank.

00:13:00 Ik liet liggen op mijn katerplein.

00:13:02 We naar de Dirk van den Broek gingen daar ook, toen we daar net heen verhuisden.

00:13:07 En dat we terugkwamen en dat zij hem terugkreeg.

00:13:10 van een paar multiculturele achtergronden mensen, zeg maar.

00:13:13 In een buurt waarbij het bekend staat, plofkraken en andere maatschappen.

00:13:20 Polk, openbare geweldpleging, dingen enzovoort.

00:13:28 Weet je?

00:13:30 Allemaal onder de degenboog, onder het duivendak.

00:13:35 Kijk, jullie hebben weer een puntje verdiend.

00:13:38 Een compositie.

00:13:41 Alleen, nu heb ik nog steeds een probleem.

00:13:46 Wat mijn digitale data en al mijn herinneringen zijn er nog.

00:13:51 Alleen niet dat het toegankelijk. Hoe kan ik het opeens weer hebben over alles wat hij vond enzovoort.

00:13:57 Die heeft godverdomme een computer gehad toen.

00:14:00 De tijd, toen was ik in het begin twintig of zo, bij de huisartsenpost, waar ik ook, zeg maar, weet je wel, de

Stuivenstraten in Promenie.

00:14:10 Waar ik ook het boek op een gegeven moment tijdens die rommel waar ik heb gekocht.

00:14:15 Het proces van Frans Kafka die op de boekenplank stond bij de journal.

00:14:20 Franklinstraat 63 en hier hebben jullie een tramhalte geheten Kafka straat waarbij diegene hier ook iets gezien, het boek werd voor me gezien.

00:14:30 Span je op, omdat diegene aan het einde in zijn rug gestoken wordt.

00:14:36 How do you shoot the devil in the back?

00:14:40 Weet je wel, Keizer, so is he the usual, Suspects enzovoort.

00:14:45 Maar het moraal van het verhaal is dat vanaf die...

00:14:50 De expertise, Hans Zwaal, gestalt psycholoog zeg maar, geen kwakensalverdijen of wat er ook, dat die...

00:15:01 Ook in een medisch dossier op de computer zijn expertise een logboek bijgehouden heeft.

00:15:10 Tijdens mijn sessies bij de praktijkondersteuner in Crowley toen ik begin twintig was en op studeren.

00:15:18 Zien jullie het probleem?

00:15:20 Van elke seconde van de kankerdag en nacht

00:15:22 Tijd met elkaar gespendeerd

00:15:28 Want er zijn volgens mij

00:15:30 op de planeet een paar miljard mensen

00:15:33 en jullie hebben het gedaan

00:15:38 Dit is het

00:15:40 Mij krijg je niet overtuigd dat die mensen daar in die Kamer 124 ofzo, Raffael en Vivian, niet massamoord plegen.

00:15:50 En ik daar volledig hostaal tegen ben.

00:15:55 En dat gaat niet veranderen.

00:16:03 I love you.

00:17:33 Grazie.

00:17:41 Het lijkt allemaal goed dat we weten wat we willen doen aan het team om te zetten.

00:17:50 Thank you.

00:18:05 Grazie.

00:18:14 ご視聴ありがとうございました

00:18:28 Yeah.

00:18:31 De vorige inval, pijnlijke psychiater.

00:18:40 Ik ben hier ook bij Arken, Mentrum, Jan de Sven.

00:18:44 Die vroeg aan me.

00:18:50 Kan je je herinneren, kan je vertellen hoe de locatie heeft waar je nu verblijft.

00:20:41 Ah, that's good, too.

00:20:43 Okay.

00:20:51 De enige had ik nog zeggen, want volgens mij deed het audio bestaandjes zonder dat de computer hier wel even vastlopen, een laptop zeg maar.

00:21:00 Is dat hygiëne, die psychiater, die hoofdpsychiater van de medische...

00:21:10 Kant, dat was een aks, een tropen aks.

00:21:14 Onder andere, ik ging ook naar, volgens mij, ergens in Aden.

00:21:20 Afrika om een lecture te geven, Astropart, die zei tegen mij,

00:21:30 Volgens mij ben je gewoon niet meer psychotisch op dat moment.

00:21:40 Daarbij vervalt ook eigenlijk je verblijf hier op de kliniek Chanders Metstraat op Eiberg.

00:21:50 Dus ook je woning hier, die niet van jou is zelf, maar waar je wel op ingeschreven staat, komt te vervallen.

00:22:00 Dat betekent dat in mijn medische dossier ook zijn aantekeningen staan.

00:22:10 Dat hij vond, dat ik dan anders maar economisch dakloos moest worden.

00:22:18 Weet je, dat.

00:22:20 Dat is een jaar geleden.

00:22:22 Ja, makkelijk.

00:22:25 En dan weet ik niet of ik exact...

00:22:30 Als ik feministisch ben of dat exact een jaar geleden is, weet je, het kan plus minus wat verschillen in tijd, weet je wel, lineair.

00:22:40 Als je terugkijkt in het digitale archief, kunnen jullie de tijd en de dag nog terugvinden dat ik met diegene een gesprek gehad heb daarover.

00:22:51 En nu is dat dus niet meer die tijd.

00:22:58 En sta ik nog steeds.

00:23:00 in mijn verblijf

00:23:02 op de

00:23:03 Sjöndersmetstraat 130

00:23:05 ja

00:23:10 Inleven te leven. In de vlees zeg maar. Als levend individu.

00:00:02 Do what?

00:00:03 What's the headline you're reading?

00:00:07 Natalia and Doe are important in two minutes.

00:00:10 How about humanitarians?

00:00:14 Oh, humanitarians.

00:00:20 BDSM achterzit tegen ideeën gisteren, dat ik het zo ver heb gesteld, 6-3.

00:00:30 Het zijn wel heel veel leuke conceptuele dingen, mijn training woorden, mijn one-note, mijn hersenen.

00:00:37 Het zullen heel veel leuke ideeën gehad hebben.

00:00:40 Ja hoor, ik denk dat je daar al een beetje mee in de tussentijd.

00:00:50 And in a new moment, I think I'm not going to do that anymore.

00:00:56 Give it to me now, she's done breathing.

00:00:58 And then try to fill in some of these.

00:01:00 Ik kan niet denken dat wat iedereen daarbij in is.

00:01:10 Dat kan ik niet weten eerlijk gezegd.

00:01:16 Ik weet niet eens wat je hebt gedaan.

00:01:21 Allemaal gegeten hebben.

00:01:23 Hebben jullie al tussen de middag gegeten?

00:01:25 Doe wel goed een broodje eten.

00:01:28 Goed.

00:01:30 Anders is het al de kopje op een gegeven en energie tekort.

00:01:34 Ja, en dan kan je een deutje...

00:01:40 gaan doen. Vertraagde rol een beetje. En nu komt het plaatje wat ik nu in mijn hoofd heb.

00:01:50 Kankerziek.

00:01:53 Dan ga je bijna dat.

00:01:55 Maar dat was eigenlijk al nadat ik een keer...

00:02:00 Volgens mij even een poosje dood ben geweest, op de John Packard Staten 6-3.

00:02:06 Die zorg of schijndood, dat ze hebben me teruggehaald.

00:02:11 Inlevende lijf in de fles.

00:02:15 Toen ik in de woonkamer lag, dan had ik op de poten.

00:02:20 Ik voelde een beetje van welwerk, toen zijn er mensen in mijn woning geweest.

00:02:26 Dat was geen hallucinatie, dat was echt waar.

00:02:30 En die hebben we iets gedaan en toen leefde ik weer.

00:02:40 Dat is een paar jaar geleden, voordat ik überhaupt ergens in de GGZ terecht kwam,

00:02:46 of mijn einde in aanraking kwam via huisarts Roest, de mannen.

00:02:50 De vrouw die toen met de crisisdienst het spoed liet opnemen op de eerste constant haar eigen straat.

00:03:01 Wetter van Arkin.

00:03:11 Yeah

00:00:10 And I'm meeting with Braxton within the hour.

00:00:14 Of course, I discuss it with all of our colleagues.

00:00:27 I'm going to have to call in or not.

00:00:30 Ik weet niet wat ik net in mijn hoofd had, vader van Aza, Mr. Jaber en Marjev, mijn ex, weet je wel dat ik het soms wel over heb.

00:00:40 Heeft er eigenlijk origineel, weet je wel, z'n voornaam, een guikje.

00:00:48 En dat is eigenlijk een beetje...

00:00:50 Als je de letters een beetje hustelt, krijg je een tuigje.

00:01:01 En ik zie dus reference harnas, dus ik denk aan tuigjes, zekeringen, weet je wel.

00:01:10 Je gaat klimmen ofzo, of als je met hoog spanning elektriciteit werkt in de centrale ofzo, dan ben je geaagd.

00:01:20 zijn, dus dan heb je zo'n harnas aan. Maar het eerste beeldje wat bij mij in de hoofd heeft,

00:01:30 was dat een jongetje, een klein mannetje, weet je wel, een peuter noemen ze dat tegenwoordig.

00:01:37 Weet je of dat nog de gangbare term is?

00:01:40 voor mijn oude en in de link

00:01:44 dat plaatje

00:01:45 ook op Bloembijk

00:01:48 station

00:01:50 De ronde van de NS, zeg maar, weet je wel.

00:01:53 Ja, is aanstaan.

00:01:56 Is aanstaan.

00:01:58 En...

00:02:00 Dat jongetje zat vast met een kabeltje, alsof je een hondje uitlaat.

00:02:10 En z'n moeder hield dat kabeltje, daar houde de hendel vast, zeg maar.

00:02:16 En dan denk ik daarna terug.

00:02:20 Als allereerste waar ik aan denk als ik het woordje hangen of lees op mijn beeldscherm van een laptop.

00:02:30 Weet je, ik weet niet. Volgens mij heeft dat ook, want dan moeten we weer dual use bezig zijn.

00:02:38 Connotaties.

00:02:40 Ik heb afgeleerd dat het niet acconnotaties is. Op een of andere manier heb ik dat ergens ooit verkeerd aangeleerd hoe dat woord gespeeld wordt.

00:02:50 En dat heeft ook met BDSM fetis dingen te wagen.

00:02:57 Maar...

00:03:00 Weet je wel, er hangels kan eigenlijk ook voor ridders betekenen, precies.

00:03:10 toch weer vier spuiken bij en dan weet ik niet hoe dat komt

00:03:20 The view is close to me, yeah.

00:03:30 I'm looking for something.

00:03:35 I'll get over the phone.

00:03:43 Ja precies, we zijn nieuws al, ja precies, doeg.

00:03:50 I don't know what to do

00:03:52 I don't know

00:03:54 He was in America in the 1940s

00:04:02 too close to a magnetron, and notice that the candy bar in his pocket had melted.

00:04:07 Then and there...

00:04:10 Dat voor mij nog te leren zijn en te ontdekken.

00:04:13 Ook een geologische dag over de maat.

00:04:16 Heel veel dingen weer.

00:04:21 Het gaat weer.

00:04:25 Want op een gegeven moment zijn er weinig mensen die het nog stappen.

00:04:28 En ik zal...

00:04:30 So, look, I'm a child. As you become older, you become even younger.

00:04:40 I don't know, I don't know how you're going to get out of here, I don't know what I'm going to find.

00:04:50 Weet je wel, soms slaap ik, soms masturbeer ik, soms eik of drink ik ofzo.

00:05:00 It's so beautiful, I don't know.

00:05:02 I'm gonna...

00:05:09 Goodbye.

00:05:10 Als ik niet onder de radar ben, gewaterbord of zo, want het is allemaal golfjes en water.

00:05:20 Okay.

00:05:21 And clerches.

00:05:22 And an Asian bowl.

00:05:23 Now if you had a nice white burgundy we could raise it.

00:05:26 Asian bowl clip.

00:05:27 Is it an Asian bowl, not an Asian?

00:05:30 Naar de botwegen, of naar Storpbuin.

00:05:40 Kan mot regen eigenlijk ook tegelijk plaatsvinden.

00:05:45 En kijk die ene persoon dan naar dezelfde regenboog.

00:05:50 Vanaf een ander punt, want dit was weer een clip.

00:06:01 Hoe simpel zal dat zijn, ja precies, jonger, de computer lopen vast, kanker.

00:06:10 Ik sta hier voor niks letterlijk het hele kankerboel uit te leggen.

00:00:03 Ik heb ook geleerd dat iemand die verhoudt.

00:00:10 aanzien had of heeft. Weet je wel, ik heb het niet ploeg misschien aan dat persoonlijk.

00:00:21 Maar dat ik niet de hele tijd hoefde klagen, weet je wel, ik mag klagen dat ik dat recht niet deel.

00:00:30 En daarom doe ik dit ook vaak niet en dat is een wijze levensles geweest.

00:00:44 Yeah

00:01:02 Gracias.

00:02:43 Right, left, left, left

00:08:22 All of our conflicts.

00:08:30 Thank you.

00:08:40 Obrigado.

00:09:06 We are working in the background of the police.

00:09:21 You're nothing in common.

00:09:24 Wealth.

00:09:42 It's a song, a song.

00:09:55 No, all the better.

00:10:14 This is the whole process of my God on that.

00:10:41 I don't know what the hell you're going to do, honestly, so you're going to have to sign the case.

00:11:29 Mortality.

00:11:38 Thank you.

00:12:02 This is an American business in 1942, turning up radar technology.

00:12:13 Thank you.

00:12:26 that the company you work for rewards them, they promote them.

00:12:45 I need your needed narrow gas to a white male.

00:12:51 Entered the country alone in the past 48 hours, likely through East Coast port of entry with a U.S. passport.

00:13:00 Otherwise, I knew Mr. Beeks.

00:13:03 He wouldn't.

00:13:04 I wonder, will he taste like squabber dough?

00:13:07 I think I saw some mango sauce in heaven.

00:13:10 Fine, take my laptop. It contains the portal to Hanna's, DHS's arrival and departure information system.

00:13:17 I'll talk you through how to narrow your search.

00:13:18 See, that wasn't so hard.

00:13:20 If anyone finds out, I'll be fired.

00:13:23 You completely missed the moral of the story.

00:13:26 It wasn't that you'd kill Mr. Beeks.

00:13:28 In a microwave!

00:13:30 you take me for? Now, if you had a nice white burgundy, we could raise him in. The moral

00:13:38 of poor Mr. Spencer's tale of...

00:13:40 is that you should never worry about betraying your workplace

00:13:43 because given the chance, your workplace will definitely betray you.

00:13:47 Loyalty to individuals.

00:13:49 Relationships.

00:13:50 That's what makes it.

00:14:03 to my old

00:14:12 Hello, Marvin. Your judge had to step out, so I'll be judging you today.

00:14:16 Well played, Raymond.

00:14:20 The task force thought they figured out your plan to get to me at Coolidge.

00:14:24 Yeah, well, Captain Mouse, Captain Mouse.

00:14:27 How did you convince the judge to step away?

00:14:52 You're here, exactly.

00:15:03 I think we're safe for dinner.

00:15:04 It's understandable.

00:15:05 Yeah.

00:15:20 Not entirely slightly, however subjective my decision was.

00:15:31 It was mine to make, you voiced your objections.

00:15:35 You'd already made up your mind.

00:15:37 That once the choice was made, it was your opposite.

00:15:43 I've been watching everything we've built.

00:15:45 Yes.

00:15:48 No.

00:15:50 I wasn't your servant, Raymond.

00:15:52 Partner.

00:15:54 We created an empire.

00:15:56 Together.

00:15:57 I may have been in the shadows.

00:16:03 I've been so reckless with it and blindly expect my loyalty.

00:16:10 I love you more.

00:16:20 your help.

00:16:40 You think I'm a coward?

00:16:41 Margaret, if you wanted Elizabeth dead, you could have done it yourself in a thousand dignified ways.

00:16:46 Instead, you use Van Dyke, you let him shoot her down in the street to hide.

00:16:51 Harold because you were afraid the task force would help me discover what you've done I was brave enough to go to war with you

00:17:10 The Department of Justice may hope otherwise, but you are not me.

00:17:14 You can't hide from me.

00:17:17 You can't mess.

00:17:19 God knows you.

00:17:20 replace me. We are sitting in a federal courthouse and I have the power to put you down like a dog.

00:17:30 could ever protect you from me.

00:17:40 Obrigado.

00:17:53 It's sexy, there's the...

00:18:00 Bloter topje en daarna wordt het topje van de man in die courthouse op dat moment in die VR.

00:18:10 En dan doen ze seks maken, baby's.

00:18:14 Dit is mijn concept.

00:18:21 Trademarks.

00:18:25 Okay?

00:18:27 Well, you'll have football.

00:18:30 Is it close?

00:19:00 Why do I need names?

00:19:03 We're going to have a order.

00:19:10 You can take out Tombo.

00:19:18 Really?

00:19:19 Sleep the floor.

00:19:20 Lock it down.

00:19:21 Alternative if you meant sequels.

00:19:30 It is the plural form of a literary, cinematic or televised work.

00:19:40 I'm here with the FBI, I'm from the CIA, you know the difference don't you?

00:19:45 That continues the narrative.

00:19:50 from a previous, ah, I can't,

00:19:53 I can't use a narrative from a previous piece.

00:19:58 I can't ask you for later.

00:20:00 This is like a piece, like a piece, like a piece

00:20:10 Oranje pies, rode pies, witte pies, dan kan je het ook weer op een vlag gebruiken.

00:20:20 Dit was er, omdat ze een buclejaars nederlijke vlucht zijn en verhouding gebinden.

00:20:30 The coach didn't leave the picture in Red's hat.

00:20:33 Red left it for...

00:20:40 security so you want to go to the party oh i thought you'd never ask yeah pointing out the

00:20:48 freelancer was a diversion he wanted

00:20:50 and get her alone.

00:21:11 Where's my security?

00:21:13 Your security is occupied.

00:21:15 The thrust, yes.

00:21:20 My people came to you about

00:21:30 shipping routes. You turn us down. You never like it. Because you're a wanted man living in this land.

00:21:40 And I am not.

00:21:42 I run my business and I'm wine and dine.

00:21:45 I don't know how you do it.

00:21:52 How does the devil in you contend with the angel I would have kicked around years ago?

00:22:00 You'll learn a thing you do from me, Raymond.

00:22:03 I'm going to kiss this sweet young FBI agent on the cheek and say goodnight.

00:22:10 and then go down to the docks and pick up my next shipment of girls.

00:22:23 Mm-hmm.

00:22:30 Oh, Elizabeth, thank God you're here. This is the man. He's the one who wants me dead.

00:22:36 I hired a freelancer. To do what?

00:22:39 Is it champagne?

00:22:40 What's the headline going to read?

00:22:42 Italian dog born with two heads.

00:22:45 No?

00:22:46 What about a humanitarian exposure?

00:22:51 Suicide.

00:22:52 What have you done?

00:22:53 You can do anything.

00:22:55 I think the assassin may have slipped her a lethal...

00:23:00 cocktail of the same barbiturates she uses to drug her children what are you saying she's not the

00:23:06 woman you think she is you're a liar

00:23:14 You know him?

00:23:18 Everybody knows this son of a bitch!

00:23:28 Give it to me!

00:23:30 Give it to me now, she's not breathing!

00:23:34 Tell her the truth, Floriana.

00:23:36 This will help you breathe.

00:23:37 Madame Campo doesn't free children from slavery.

00:23:40 prisons though. I don't believe you. Don't be so naive. Hello, Fyodor.

00:24:00 I can make this right! Just talk to me!

00:24:02 Oh, yes, we are. We're gonna talk all right.

00:24:20 With all the business you're doing, you're still funneling the money through your nightclubs,

00:24:25 paying contracts on fives and tens, because it's too cheap to pay the commission for...

00:24:31 Anyway, I get sidetracked. I go for your banker. Who's the banker?

00:24:50 The first time I ever smoked a cigar was with Marnie Peterson in fifth grade.

00:24:55 Funny little bat-faced girl. I adore her.

00:25:15 How about I make this as simple as possible? There are five matters on the East Coast.

00:25:20 of financing emission tariffs. I run money.

00:25:30 The money was wired from Gestalt in London's Bank, the New York office.

00:25:41 Okay, so that's it, we're finished.

00:25:43 Yes, we're finished.

00:25:59 Oh my god, this is...

00:26:00 He's killing me.

00:26:07 Put Braxton within the hour.

00:26:10 Of course, I've discussed contingencies regarding writing time with all of our colleagues.

00:26:24 I'm going to have to call you that.

00:26:27 Yeah.

00:26:30 I don't believe how much he weighs.

00:26:33 Sit.

00:26:36 I don't know who I am.

00:26:40 yes I know just what you are sit the hell down

00:26:50 I've alerted security.

00:26:51 You seem younger in person than you.

00:26:53 Being in the background.

00:26:56 Are you a swimmer?

00:27:00 I'm someone not to be trifled.

00:27:02 Then we have something in common.

00:27:10 find the fulcrum because you believe I don't have it so I return them to you

00:27:15 defects and all to make it abundantly clear that you should never again doubt

00:27:30 some might, but I may not share.

00:27:40 We obtain to use every resource at our disposal, whatever it takes.

00:27:50 I don't think you have any...

00:28:01 But only the one who possesses the fulcrum could possibly fathom that.

00:28:11 Take your glove thing out.

00:45:58 Thirsty

00:46:01 All right.

00:46:25 Okay.

00:46:57 ご視聴ありがとうございました

00:47:03 I could have helped you, you know what I have.

00:47:10 kept you on the step ahead.

00:47:21 Well, now you have them, and now they've destroyed you.

00:47:32 This is the last lie you ever told.

00:00:02 Why is that?

00:00:03 Because Elizabeth will never forgive you.

00:00:05 If you don't know a damn sacrifice, Elizabeth will never forgive you.

00:00:08 True.

00:00:08 Are you over?

00:00:10 Ja, het spreek is er voorbij.

00:00:12 Wat kan je niet zeggen?

00:00:14 Nee.

00:00:16 Nee.

00:00:18 Nee, wat kan je niet zeggen?

00:00:20 Dat toch?

00:00:30 I don't know how to cut this.

00:00:41 I can't imagine what this would be like for you.

00:00:43 Well it's fancy.

00:00:45 No, it can't show me.

00:00:47 I guess how much Elizabeth loves her mother.

00:00:50 De kant door de trap laten we naar doorlaten, dat ze net veranderd in de testen is.

00:00:57 Dus dat is wel hetzelfde.

00:01:00 En dan kom ik terug.

00:01:05 Is er tijd?

00:01:07 Ja precies.

00:01:20 Well, I'm going to save somebody who's dead.

00:01:23 Frankly, I think this all went down rather swiftly.

00:01:25 This was never about the monitor.

00:01:28 You surrendered and infiltrated yet.

00:01:30 our intelligence, our intelligence, get that weapon.

00:01:33 It's certainly going to be our intelligence, actually.

00:01:36 I think it's more likely.

00:01:40 I don't know, I'll show you.

00:01:50 Well, this was fun. Let's do it again. Let's do it again.

00:01:55 First and foremost, I was only the first. First one.

00:02:01 Look at this.

00:02:12 It's called the blacklist.

00:02:16 That's why we're all here, of course.

00:02:17 My wishlist.

00:02:20 The list I've been cultivating for over 20 years.

00:02:22 Politicians, mobsters, hackers, spies.

00:02:27 We have our own list.

00:02:29 Agent Ressler.

00:02:30 Please. We all know your top ten is a little more than a publicity campaign. It's a popularity contest.

00:02:42 They exist as a mind.

00:02:51 And if you want the whales on my list, you have to play by my rules.

00:02:56 I never sleep in the same location for more than two nights in a row.

00:03:00 a fully encrypted, live acceptance.

00:03:13 Whatever I tell you falls under a unity package that I negotiate myself.

00:03:17 And finally, most importantly...

00:03:25 Slide it. Slide the gun down.

00:03:30 They've had a sword in the back of his face.

00:03:35 Do it! Kill her!

00:03:40 Pull the trigger, do it!

00:03:42 Now!

00:03:44 Pull the trigger, do it now!

00:03:48 Do you hear me?

00:03:51 He take everything from me.

00:03:53 For what or nothing.

00:03:55 For money, business.

00:03:56 He smells his fingers and my life was not.

00:04:00 No one simplifies matters.

00:04:02 Just the three of us.

00:04:04 Tom, put the gun down before you do something he'll deeply regret.

00:04:08 I'm the one you want.

00:04:10 Make the right choice, Tom, but make it fast, because when I get over there, I'm going to take that gun away from you.

00:04:43 No can't leave my life

00:04:50 between us.

00:04:51 Quickly.

00:05:00 waiting outside.

00:05:10 Thank you, brother.

00:05:20 That's pretty good thing.

00:05:22 You can hear things from Mark.

00:05:30 You are a good week, sir.

00:05:33 What do you think is actually going on here?

00:05:37 I'm sure this is about...

00:05:41 There's a lot more to them than you are.

00:05:43 It'd be at all a surprise if I were to walk out of these woods alive.

00:05:46 I sincerely doubt you'll be as lucky.

00:05:50 Where do you suppose they're going to go with my money?

00:05:53 I'd say Aruba.

00:05:54 Maybe Cancun.

00:06:00 Where the hell you been?

00:06:06 You're holding my friend. I want to make a deal.

00:06:13 I've got your friend Jasper here. Straight trade, him for ready.

00:06:20 I thought she was going to offer me something worth a damn sister.

00:06:22 I don't think you understand the situation here.

00:06:28 Is a man ready?

00:06:30 De hele tijd, hè?

00:06:40 Echt, ik ben precies wel even wel top.

00:06:42 Alleen maar kijk hier, met die Pepe.

00:06:46 In dat schilderij.

00:06:48 Dat linkt alles.

00:06:50 We hebben alles aan de persoonlijkheid, dat zijn er niet in persoonlijkheden en zo.

00:06:55 Toch, persoonlijkheden. Persoonlijk in het heden, ja precies.

00:07:00 Ik voel het nog steeds niet te voren.

00:07:11 I'm doing it on the air.

00:07:27 Lucille is always arguing with money.

00:07:30 Uncle Scott is drunk by noose.

00:07:32 Someone's hand is always in the wrong cookie jar.

00:07:35 He did?

00:07:40 especially

00:07:50 Pick up the phone. Put it on the speed.

00:07:53 It's out.

00:07:58 It's worth a bundle.

00:08:05 I can take some time

00:08:11 Shut up, man. You don't get to know.

00:08:13 Two hours.

00:08:16 Well, Reddington here is dead.

00:08:18 You can break that.

00:08:20 Or no deal.

00:08:20 Red, what the hell is this about?

00:08:30 Where's Dembe? Dembe? How would I know? I don't know what you're talking about. I don't know what any of this is about.

00:08:43 Unfortunately, for this grand pandemic.

00:08:50 a mime of innocence. I know a great deal about all of it. I know about the wine. I know about

00:08:56 you hiring as a Melistone. About Zach Small, Strato.

00:09:02 And you were one of very few people who had access to the account that financed the attacks against me.

00:09:07 I know that's why you didn't come to dinner.

00:09:09 The only thing I got.

00:09:10 You've done Becky and I were on our way to a yoga retreat in Tahiti. It's a place we found when you sent us down

00:09:20 there last year you remember of what you're talking about

00:09:32 After all, it's our nature to betray.

00:09:34 I didn't do whatever it is you think I did.

00:09:37 Remember that.

00:09:39 Rich.

00:09:42 It's positive, I look at it, rot, alone in that holding zone, surrounded by me, slowly.

00:09:50 alive by mosquitoes to the constant refrain of body blows and screaming 47

00:09:55 interminable days of near constant rain. I couldn't be sure any of

00:10:00 My messages have been dispatched, and then...

00:10:10 Half a dozen tins of chilled polluted caviar and a note, love the marmon, when I think of it, guards I'm too calm.

00:10:20 The bribes alone was not your fortune.

00:10:22 I still can't fathom how you managed to pull it off from inside a federal prison.

00:10:27 But you had my undying gratitude.

00:10:32 rose I facilitated your freedom exactly why would I betr

00:10:41 I don't know what the hell you're talking about.

00:10:54 The wine was clean, the Toxelab said there was nothing in it.

00:11:00 They said the poison had to have been administered by something with a higher alcohol content, like gin or...

00:11:07 Scolach.

00:11:08 Yes, did you drink...

00:11:18 But there are only two people that access to it.

00:11:22 We will see you later.

00:11:33 I can't be

00:11:41 Reddington, talk to me. Who poisoned you?

00:11:54 That's sick, man.

00:12:10 at the menace of the years finds and shall it matters not

00:12:17 straight to gate

00:12:22 Ja, skill 3.

00:12:27 Ik wil nog zo iemand zijn.

00:12:30 Als ik dan toch het secret moet erpussied.

00:12:55 I'm so excited.

00:13:00 In the 40s he was working on radar technology when he...

00:13:19 Gracias.

00:14:14 Dat is dus niet.

00:14:51 He's got the leg.

00:15:20 because he didn't know what to do

00:15:54 What in the face?

00:16:05 It's just great.

00:16:46 ありがとうございました

00:16:51 Mm-hmm.

00:17:44 Thank you.

00:18:36 Good.

00:18:38 Come on.

00:18:51 Face, sit down.

00:19:02 The oldest part of these have been done with everybody's spirit.

00:19:10 under the bridge. So why doesn't somebody tell me what they think is going on?

00:19:20 ...dictane genre...

00:19:30 Mr. Sullivan, I'd like to speak with an analyst who seems to stumble across this mess.

00:19:38 That would be Peter Sullivan.

00:19:41 I don't know if there's a stick that's going in front of the telephone right on the small dials, right?

00:19:46 And please, speak as you might to a young child.

00:20:00 Sir, as you may or may not know,

00:20:10 Two laps, not all toes.

00:20:20 Well, as you probably know, over the last 36 to 40 months, the firm has begun packaging new.

00:20:40 the firm is currently

00:20:50 that it takes us to the firm.

00:21:00 And so that challenge is what we have to hold that we might ideally like to.

00:21:07 But the key factor here is these are essentially...

00:21:10 Just work, just allow us to push the leverage considerably beyond what you might be willing or allowed to do in any of those circumstances.

00:21:20 profile without raising any red flags.

00:21:33 ...considering the, shall we say, funky road we've been on.

00:21:36 I think it's a software apices.

00:21:38 I think it's your brilliant coat.

00:21:40 because I'm lying ahead of you, come on for you.

00:21:43 Don't make much sense

00:21:44 considering what's taking place.

00:21:48 No, what's taking place?

00:21:50 So, you are saying this has already come.

00:22:00 And Mr. Sullivan, what does your model say that that means for us here?

00:22:06 Well that's where it becomes a projection.

00:22:10 I don't know, I don't know, I don't know, I don't know, I don't know.

00:22:21 If I just...

00:22:35 What you're telling me.

00:22:40 It's nothing.

00:22:50 some whole concern.

00:23:01 put it that way, but let me clarify, using your analogy, what this model shows.

00:23:10 The music would stop as you put it and this model wouldn't be

00:23:26 I'm telling you something.

00:23:41 One reason alone. I'm here to guess what the music might do when we come a year from now.

00:23:50 Grazie.

00:24:28 そっ!

00:24:30 Stop, I'm afraid I think it's very useful.

00:24:41 Lord knows we've relied enough on Mr. Sullivan tonight.

00:24:45 What do you have for?

00:24:50 What have I told you since the first day of the finals?

00:25:00 There are three ways to make a living.

00:25:03 The first is smarter or cheaper.

00:25:11 And although I like to think we have some pretty smart people, it's not easier to just be first.

00:25:20 シャボロン

00:25:31 I'll have to pay.

00:25:46 on what your boy has just said.

00:25:52 If I made it, I would give it one.

00:26:02 Well, you call the traders in for the normal 6.30 meeting, and you'll be honest,

00:26:05 because they're going to know it's the end either way.

00:26:08 So you're going to have to promise.

00:26:14 No swamps, no nothing.

00:26:15 By 11 o'clock, all your trades have to be.

00:26:20 And by 2 o'clock you're going to be selling 65 cents on the dollar if you're lucky.

00:26:27 And then the feds are going to be in here up your ass.

00:26:30 I can slow you down.

00:26:32 Can't stop you.

00:26:40 Hold that off and that's thanks real question is

00:26:50 Whoever else will buy it.

00:26:51 John.

00:26:52 Thank you.

00:27:01 And you're selling something that we are selling to willing buyers.

00:27:11 Survive. Never sell anything to her again. I understand.

00:27:21 That's it!

00:27:33 Yeah, it does.

00:27:37 No, it's four or something.

00:27:39 The majority got two or five.

00:27:41 Is there anybody else who knows what's in here at the moment, block by block?

00:27:48 I do.

00:27:49 Where is he?

00:27:50 As of today, it's no longer the front.

00:27:53 We have been.

00:28:00 Yes

00:28:16 That was good.

00:28:43 Grazie.

00:28:57 Ara.

00:29:01 It's the mistake of appearing larger than his king, the art of war is to win without bloodshed or the use of force.

00:29:10 Unnecessary Use of Violence Part 1 Self-Directed War in 401 B.C.

00:29:21 mercenaries into Persian territory when their leader died and they had nothing

00:29:25 more to fight for surrounded by the enemy they had to become a concentrated

00:29:30 fighting their way back home. The soldiers' spirit was crushed. They had meek morale and started fighting each other. Xenophon united them, thus defeat...

00:29:41 focusing on survival yeah you cannot swing a sword

00:29:50 It's you against the world and it's you against yourself fight your energy do not let your mind your emotions

00:30:00 You know yourself, an external enemy, you can stand up against me.

00:30:10 I think the view fell on the very question I think of us.

00:30:15 I think I will ever forget.

00:30:19 I will never forget.

00:30:20 Ik heb er een plek van over dat het niet genoeg was.

00:30:24 Weet je wel, dat is mijn stuurdingen.

00:30:26 En mijn werk.

00:30:30 Forget the past, adapt to current times, ever-changing, ever-evolving.

00:30:35 George Bernard Shaw said, the only man I know who behaves sensitively.

00:30:40 He takes my measurements and you each time you see the rest of the world with the rule measurements.

00:30:50 Ik weet zoveel niet.

00:30:56 Lies hem in één keer.

00:31:00 He's just having one of the conquers

00:31:02 What are you doing here?

00:31:04 By disregarding his commander for what it was

00:31:08 What?

00:31:10 And that I have to say I look at the war-headed ship ship, have you always done ship defusion?

00:31:20 Reacting senses of diffusion.

00:31:24 Number four, create a sense of urgency and desperation.

00:31:28 Piotr Dostoevsky knew his...

00:31:30 Facing his execution, he made use of his time by creating each of his works as if they were his last, because they very well could have been.

00:31:40 It's okay.

00:31:42 It's okay.

00:31:44 It's okay.

00:31:46 It's okay.

00:31:48 It's okay.

00:31:50 Osteevsky's work is exceptional because he was restless. He did not seek comfort. You cannot wait for the right time. You are never fully prepared to start.

00:32:00 to who he is as you are i was as i am you will be a gravestone inscription

00:32:10 Part 2. Organizational Team Warfare.

00:32:14 Yeah, I can film things.

00:32:16 General George Washington taught his philosophy...

00:32:20 He put into authoritative positions with high risk and responsibilities.

00:32:27 One of these men was Dwight Eisenhower.

00:32:30 The General could rely on his subordinates as they held the same beliefs and ran their positions according to his vision.

00:32:36 You are a chain of command you can rely on.

00:32:40 But you cannot have your head ever to remote systems that will be leaders into place that will guarantee the desired outcome.

00:32:48 Use them to balance your mind.

00:32:50 Das ist gut, was wir haben, wenn wir die Tankschecke, die wir in der Tankerwasch haben.

00:32:57 Wir haben eine Handball, die man beschroffen hat.

00:33:00 Number six, segment your forces. In 1805, Napoleon Bonaparte, based on attack by Austrian troops, are led by Karl Mach.

00:33:10 ...upon which Napoleon divided his troops and sent them into battle with specific instructions of surrounding the enemy, the French units were ready to move.

00:33:20 Yeah, man, it's not a lie, man, it's not a lie, it's not a lie, it's not a lie.

00:33:30 slow but strong or fast and precise number seven

00:33:35 It was a referentite from the built-in 281 B.C.

00:33:40 Hannibal arranged companion games

00:33:43 We have the same time clips

00:33:46 in the digital systems

00:33:49 and look at the best

00:33:50 Men en women? Testosteron. Ik zeg, ik denk, testosteron test.

00:34:00 Geen kanker fokking worden aan de kanker, en we kijken wat jullie bij mij hebben gedaan.

00:34:06 Naar een liegen.

00:34:08 Naar de kankershoei.

00:34:10 Helpt niet uitgehouden, we gaan helemaal redlined.

00:34:12 Ja, precies.

00:34:14 Oké, ik vind het ook niet.

00:34:16 Eh...

00:34:20 Dat wil je toch zo?

00:34:22 Nee nee, je bent met de baard die je bezig geweest?

00:34:26 Algezakte kanker die dat letterlijk zegt maar.

00:34:30 I don't know what to do, I don't know what to do, I don't know what to do, I don't know what to do

00:34:38 What can I do?

00:35:12 In the 1944 Democratic presidential race, the Republican Party slandered Franklin and Roosevelt, but he did not respond.

00:35:22 Roosevelt humiliated his opponent by defending his admiral and exposing a desperate move for what it was.

00:35:30 The boost belt was not easy.

00:35:40 I'll speak, this is the attendance on the floor.

00:36:09 Gracias.

00:36:30 Please, please, please,

please, please, please,

00:40:31 Take a hold of it and unbalance the remaining structure, cutting supply lines, relief systems and chains.

00:40:54 to attack that, that's IC, but attack the remaining crews, then...

00:41:01 This is the original, the one we found out from.

00:41:06 We find large units and very easy targets.

00:41:12 They will try to unite and face you with their full force, so do not allow them such strength.

00:41:25 I'm afraid that Baron Joseph will literally charge it for.

00:41:30 Disposing is on the select, this is the opportunity that we have hoped for, surrounding and heating is a problem for us, this is oriented right.

00:41:42 and under a powerful glow there is a close and vulnerable sign.

00:41:53 The British shaped the hull,

00:41:55 treasuring them with surprise attacks out of nowhere.

00:41:58 I know they're holding territory in my heart.

00:42:00 ...posing the opponents down this battle will be...

00:42:04 ...feeling trapped...

00:42:05 ...neighbor retreats in...

00:43:20 Johnson won a election for a Texas Congress with the help of his friends in the party.

00:43:30 He humbly took to them, thanked them, and expressed his hopes for future collaboration successfully.

00:44:14 En dat gaat gebeuren.

00:44:16 En dat gaat gebeuren.

00:44:18 En dat gaat vast.

00:44:20 Make a strong spot look weak.

00:44:22 Do the opposite of what your opponent is really wishing for.

00:44:25 However, don't fully rely on deception.

00:44:28 A skilled opponent might see through...

00:44:52 Nee, nee, nee,

00:46:29 In fact...

00:46:30 In 1467, the Duke of Burgundy allied with England in the hopes of attacking Louis of France in unison, Duke's intentions.

00:46:40 and an ally with England in the same breath, crossing his adversaries' plans.

00:50:50 The government was too late for the Sabbath to crush the passive aggressive people.

00:50:55 Peaceful, non-aggression can be more effective than any act of violence.

00:50:59 Your animosity is...

00:52:10 It was a very hard attack.

00:52:18 Don't see for it.

00:56:46 That's it.

00:56:51 Dat is blokkeerd, zeg maar.

00:57:00 Eigenlijk ben ik bijna ook een inspiratie van Rotterdam.

00:57:07 Wij horen ook een inspiratie van Rotterdam.

00:57:10 Ik heb nooit genoeg tijd in het leven nog meer om dat op te maken, ja precies.

00:57:25 Dat is wel een kanker.

00:57:40 Kijk.

00:57:43 Ja.

00:57:45 Nee, nee, nee, nee, nee.

00:57:56 Yeah, it's up for a bit.

00:58:00 Can't even go in the bank, yeah, we'll see it.

00:58:06 Can't see it there, yeah, we'll see it.

01:00:45 It is wrong.

01:00:46 And it's all fine.

01:00:47 Yes.

01:00:50 Oh, maar dit is een nieuws verhaal.

01:00:52 Dat groeit wat nieuws.

01:00:54 En dan kwam er al later op terug dat we toch in die tijd...

01:00:58 Dat.

01:01:01 Well, I think I said it means a little more than a little later here.

01:01:06 Probably a little more.

01:01:08 Yeah.

01:01:10 Oh, perfect.

01:01:20 Wszystkie prawa zastrzeżone.

01:01:30 Maar eerst kijken of je weet je waar.

01:01:36 Ja precies.

01:01:40 あそしたら駅というより良い人体とは思います

01:01:50 Well, now, really, when we go back, there's a falling in love.

01:02:00 and say it's crazy

01:02:48 hé dat is niet

01:02:50 En tanken, tanken, tanken veel.

01:02:52 Maar als je een beetje smartphone hoorde crezen, word je een beetje gemest op basis van tankensie.

01:03:00 Nummer 3.

01:03:03 Ja, sorry, maar het is waar.

01:03:22 Because after a certain point, you realize, this isn't the way you could do it.

01:03:32 En nu ga ik jullie echt plattelijks even vermoorden en dat beloof ik echt.

01:03:36 Because children!

01:03:38 Bellen!

01:03:41 for us to survive in another way.

01:03:44 I was trying to be there.

01:03:48 Hold on.

01:03:49 Hold on.

01:03:50 In plaats van een soort van week.

01:03:55 Ja, dan heb ik niet meer over te doen.

01:03:58 Ja, dan ga je over.

01:04:02 Dat weet je wel, dat is fijnlijk.

01:04:04 Kijk, ik moet hier zijn open interpretatie, regenboogwerk.

01:04:17 Nee, werk. Regenboog werk.

01:04:20 Ja, precies.

01:04:24 Maar, depends on how you define wood.

01:04:30 Because they see the home, it's marvelous, because they see the home, the survival problem.

01:04:37 Let me get...

01:04:46 Then the shape scratches on the floor.

01:04:50 See, stand up, man.

01:05:00 Dat is waar.

01:05:02 Dat is waar.

01:05:04 Het is altijd in een coördinatis.

01:05:06 Ja.

01:05:10 Or maybe we can meet all of them for shopping again and having the ringer.

01:05:14 There we go, there we go, there we go, here we go, here we go, here

01:05:20 Bedankt!

01:05:22 Kijk uit wat die...

01:05:24 Succes en zo.

01:05:26 Het is mijn laatste geld.

01:05:30 voor zacht te kopen. We moeten hem opnieuw opvoeden.

01:05:32 Toeren hebben we geen gezet.

01:05:34 Maatschappelijke ontregeling.

01:05:36 Chip in mijn hoofd.

01:05:37 Hey, I'm the business school.

01:05:40 Kijk, Kanker Dijverdak, alle persoonlijke data, kijk, de high-sequency training.

01:05:45 Ja, hier ben je een archief en lichaam. Kom op met mijn tijd doorgaan.

01:05:52 You're not going to start and you're not going to come back.

01:06:00 Je hoort steeds duidelijker hoe een grote groep en kettingen, omdat alles verbonden staat.

01:06:07 Het begint met bepaalde mensen.

01:06:10 so it keeps our peace we are, and it's conquered.

01:06:20 Ja, dat is beter.

01:06:30 I'm somewhere right here, we're in here.

01:06:34 Just somewhere, get up here.

01:06:40 Right now, right now.

01:06:52 get the shit kicked out of us, we can fight our way back into the light.

01:07:16 I see these young faces and I think.

01:07:22 ...choice of the H-Man you made.

01:07:26 I, uh, I've been...

01:07:34 He's chased off how he wants to have a blow.

01:07:41 I can't have the face I see.

01:08:03 Yeah, man, she's stupid.

01:08:05 So strong.

01:08:08 Here's an even game.

01:08:15 You can push them too late and you don't quite make it.

01:08:21 The next day, you're lost or fast, you're quite cashing, on everywhere around you.

01:08:33 Please, please, please, please, please, please.

01:08:40 On this team, we dare ourselves and everyone else around us to peace without end.

01:08:51 It's awesome.

01:09:34 Thank you.

01:09:55 Oh, jeez, no!

01:10:11 That's all it is.

01:10:30 Thank you.

01:10:31 Thank you.

01:10:32 Thank you.

01:10:33 Yes.

01:10:34 Why would you have given?

01:10:35 Yes.

01:10:42 or about you, and use it there, and blame it on you.

01:10:46 But you can trust in yourself, therefore,

01:10:48 and about you.

01:10:50 There's nothing, if you complain, but don't be tired of it, but we'll be in light about it, don't be in your eyes.

01:11:08 They bring your heart.

01:11:10 Thank you.

01:11:22 Thank you.

01:12:01 All right, come here.

01:12:02 I'm going to go ahead and see you.

01:12:03 I'm going to go ahead and see you.

01:12:04 I'm going to go ahead and see you.

01:12:07 I'm going to go ahead and see you.

01:12:13 If you can fill the unforgiving minute with 60 seconds worth distance run.

01:12:21 and everything that says, and would you like to get out of my stomach?

01:12:30 Het ligt hier.

01:12:32 Wacht even.

01:12:34 De hele kast is dus weg.

01:12:38 Kan ik het zien.

01:12:40 Even zien hoe die cast-effect is, meneer.

01:12:51 Yes?

01:12:52 No, that doesn't mean that we are very good.

01:12:58 I'm talking about them!

01:13:01 So for you, I don't know what it is, but that problem.

01:13:12 You won't just wake up one day and it won't be there anymore.

01:13:15 It's going to be there and it will haunt you for the wreck of your...

01:13:22 And the sooner you deal with it, and the sooner you overcome it, the sooner you get to your rewards, baby.

01:13:27 The sooner you get on the other side of it.

01:13:33 It's a wealth of success.

01:13:40 The sooner you deal with the fact that you have testing time, you deal with it.

01:13:43 It's not the end of the world.

01:13:45 Deal with it.

01:13:46 Because when you deal with it, you can create a solution for it and you can get over it.

01:13:51 that you and your children don't have a resolution deal with it deal with the fact that you are

01:13:56 procrastinating deal with the fact that it's hard for you

01:14:00 Excuse me, I'm worried about dealing with the fact that you have this anxiety that a child will be about to reach another level of success.

01:14:14 And you're struggling with your success

01:14:15 That you feel like, why me?

01:14:17 Why not my sister?

01:14:18 Why me?

01:14:19 Why not other people?

01:14:24 I started working on my dream

01:14:26 and most people don't work on their dreams. Why?

01:14:28 For many years I did.

01:14:30 It's because of fear of success.

01:14:36 What are they doing?

01:14:37 I can't handle it.

01:14:39 The other thing is...

01:14:40 that most people live together looking on themselves they stop stretching they stop

01:14:47 pushing themselves and they end up becoming

01:14:50 cynical about life if they throw it all on themselves and on their families and on their

01:14:55 dreams and the other thing is that

01:15:00 doing now i could have been doing years ago but because i did not have a college education

01:15:07 because i didn't believe in myself

01:15:10 because

01:15:20 It's important for you to know it's possible for you to choose your future, but it's necessary that you work on yourself, that you develop yourself, it's necessary.

01:15:30 That you get energy trainers out of your life, people who don't want anything, people who are not striving, people who are not challenging themselves, people who aren't growing.

01:15:40 That's a good one.

01:15:42 It's necessary that you align yourself with people and attract people into your business who are hungry.

01:15:49 But then...

01:15:50 Blue.

01:15:51 I'm blue.

01:15:54 I think it was the type that I ever seen.

01:16:04 It's necessary that you get the losers out of your life if you want to live your dream.

01:16:10 The next step is, that is you, that is you, that no one can do it for you but you.

01:16:32 rejection and a no one we have no one shows up or somebody say you can cut on me and they don't come

01:16:39 through

01:16:50 That's it.

01:17:00 Some point now.

01:17:10 You will discover some things about yourself that you don't know right now.

01:17:15 What you will realize is that you have greatness within you.

01:17:20 What you realize is that you're more pop.

01:17:30 When you have a dream, it does often imagine screaming in your face.

01:17:41 Dreams always come from behind you, not right from your eyes, it speaks up on you.

01:17:46 Sometimes a dream almost whispers.

01:17:50 He never shouts.

01:18:00 That was one of the darkest moments of action.

01:18:10 I just want to give up.

01:18:13 Who you supposed to be, don't let nobody stop you from being.

01:18:16 Who you supposed to be, don't let nobody, I'll talk.

01:18:18 Don't let nobody tell you the door is shut.

01:18:19 Don't let nobody.

01:18:20 Oh my God.

01:18:27 Oh my God.

01:18:29 I can't see.

01:18:30 The kids are all great in Africa.

01:18:32 It's so cool.

01:18:34 It's so cool.

01:18:38 How do you hear me?

01:18:40 People for all, they need to provide a piece in Brazil.

01:18:50 That you are great, some things don't come, they do not come, just because you want it, as bad as you want to breathe, you gotta put up the dudes, and you gotta be willing to fight that thing out.

01:19:00 They're not giving out success. You can earn it. You can take it.

01:19:11 Да, да.

01:19:12 Пробейте.

01:19:15 Пробейте.

01:19:16 Пробейте.

01:19:17 Пробейте.

01:19:18 Пробейте.

01:19:19 Пробейте.

01:19:20 Да.

01:19:20 Нıhıhıh

01:19:40 Maar ja, dat is ook nog niet zo'n beetje te doen, dus dat is een beetje te doen, ja precies.

01:19:46 Oh kut!

01:19:50 Het is ook een kutje dingetje, dat zomaar wij nu dus beter moeten worden.

01:19:55 Ja, dan neem je Peter mee hier, precies.

01:20:00 In order to achieve greatness you have to go through a lot of pain.

01:20:10 You definitely have setbacks, but in order to achieve that success, you have to push through.

01:20:24 I don't know, it's a big deal with the life broken, the life broken, and that.

01:20:30 You know what's going to happen, you're going to break it down.

01:20:32 You're going to do the impossible.

01:20:34 You're not only a special person,

01:20:36 you created a special time.

01:20:38 You got something special inside.

01:20:41 You have to believe that you can do something that nobody else has done, and somehow that concept has to become reality.

01:20:50 You got greatness all inside of you, but your problem is you a scaredy cat. You suck.

00:00:10 Fight your way through divorce. Fight your way through it.

00:00:13 It's easy to have to fight through it.

00:00:15 You gotta fight your way through it.

00:00:17 You gotta fight the fear because guess what?

00:00:20 En dan denk ik dat je blij bent, of kan je zien, want ik denk dat je blij bent, of dat er niet nodig is.

00:00:29 Maar ik denk wel dat je blij bent.

00:00:30 Vraag te hebben we dat?

00:00:31 Nee.

00:00:42 and they're not skating like that.

00:00:54 Bye.

00:02:40 I have to see it.

00:02:50 I don't know, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know, I don't know.

00:03:00 I don't like it, I don't like it, I don't like it, I don't like it.

00:03:10 I'm looking for a person, I'm looking for a person.

00:03:23 I'll get to choose, and it loves us back.

00:03:31 In everything, whether he likes it or not, if he accepts that, I don't know.

00:03:40 I was like, something started to happen

00:03:45 I would be walking on the subway

00:03:49 Whatever that was

00:03:54 tears, but one from something else, from this kind of.

00:04:10 Hey!

00:04:12 We see him now. She's good girl.

00:04:15 I did my best.

00:04:22 I feel like I'm doing a lot of work on the other side of the camera.

00:04:30 I trust you to recommend a community service.

00:04:32 That was jukeful!

00:04:33 No, no, no, no, no, no, no, no, no, no, no, no.

00:04:40 We hebben gefrudeerd en we hebben fiped, dus we hebben...

00:04:50 When you capture the right helmet,

00:04:56 you will never know what the fuck you look like.

00:05:00 Maar we zijn helemaal beschikken aan de hand.

00:05:03 Dus kijk, we hebben allemaal gezien gehad in de tijd.

00:05:30 Я не могу, я не могу, я не могу, я не могу.

00:05:50 Merci.

00:06:17 Obrigada.

00:06:24 I've accepted the rest from dying.

00:06:32 I don't know if it's too bad, but it's not too bad.

00:06:42 but with her bandwine, they seemed there as well.

00:06:45 This sounds interesting.

00:06:47 It's a comedy scene.

00:06:50 It's nice to look for our parents, so we don't need to do it.

00:06:55 We don't need to do it.

00:06:57 We don't need to do it.

00:06:59 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:00 We don't need to do it.

00:07:03 Продолжение следует...

00:07:11 We think too much, we're on a machine.

00:07:21 Oh.

00:07:22 Oh.

00:07:23 Oh.

00:07:24 Oh.

00:07:25 Oh.

00:07:26 Oh.

00:07:27 Oh.

00:07:28 Oh.

00:07:38 Thank you.

00:08:00 Goedemorgen!

00:08:01 Goedemorgen!

00:08:02 Goedemorgen!

00:08:04 We gaan even naar de stapel.

00:08:06 Even ondergetrokken.

00:08:07 Eerst zal ik de kaal graven.

00:08:10 I like the video.

00:08:21 How is it?

00:08:22 Can I always get nice of you?

00:08:24 Yes.

00:08:25 How is it?

00:08:28 How is it?

00:08:30 This is my favorite example.

00:08:32 I'm going to see you.

00:08:34 I'm going to see you.

00:08:38 I'm going to get behind you.

00:08:46 Hello, you're welcome back over.

00:08:52 They're on their own, they're on their own.

00:09:13 I'm going to put it in my hand.

00:09:22 Oh, shit, no, I have no taste.

00:09:32 Ja, dat zegt het goed.

00:09:34 Dat is goed en wel.

00:09:36 Dat is goed en wel.

00:09:40 Kan ik jullie zien wat voor de volkskantrouwen? Ja, precies.

00:09:45 Ik wil bij de praaties, dat je hebt te doen.

00:09:58 ご視聴ありがとうございました

00:10:08 I am going to take a look at that photo.

00:10:20 I'm not here, so...

00:10:42 Do you know what I'm talking about?

00:10:46 I don't know what I'm talking about.

00:10:50 Upsight Downworld

00:10:52 Upsight Downworld

00:10:54 heb ik het niet gewoon in

00:10:56 Domain Warp, maar dan met

00:10:58 zeg maar

00:11:00 Richel, Min-Ai.

00:11:05 Min-Ai, dat doe je letterlijk even als Mavix transformatie.

00:11:10 In je digitaal neural interface.

00:11:13 En dan heb je reflectie op basis van water enzovoort.

00:11:20 Let's get the pizarro.

00:11:30 Did I, did I take it up later?

00:11:40 Thank you.

00:11:51 I'm thinking out what you will do about this.

00:11:58 What worries are people.

00:12:02 who think of all the variables beyond their control, what might happen.

00:12:05 Kankasita.

00:12:07 Zero.

00:12:12 before making this

00:12:13 This is

00:12:14 This is

00:12:15 This is

00:12:20 Is it a dither of doubt as to whether we are behaving the right way, doing the right thing and so on and so forth, and lack a certain kind of self-confidence?

00:12:30 And if you see you lack self-confidence, you will make mistakes through sheer fumbling.

00:12:37 If you do have self-confidence, you may...

00:12:40 Harry, get away with doing entirely the wrong thing.

00:12:42 You have to regard yourself as a clown in the flesh.

00:12:50 Because you see clouds never make mistakes.

00:12:53 Did you ever see a cloud that was mis-shaped?

00:12:56 Ok, I'm precise.

00:13:01 and they always do the right thing

00:13:04 but if you treat yourself for a while

00:13:07 as a cow

00:13:09 away

00:13:10 And realize that you can't make a mistake, whatever you do.

00:13:14 Because even if you do something that seems to be totally disastrous,

00:13:17 it'll all come out of the wash somehow or other.

00:13:20 Then through this capacity you will develop a kind of confidence and through confidence you will be able to trust your own intuition.

00:13:30 This is the middle way of knowing it has nothing to do with your decision to do this or not.

00:13:35 Will you decide that you can't make a mistake or will you do it?

00:13:39 Fine!

00:13:40 Wat is dit dan weer?

00:13:44 Klaven man, kijk dat!

00:13:47 Niet vermoord he!

00:13:50 the other direction, you will come to the point where you begin to be on good terms

00:13:55 with your own being and to be able to trust your own brain.

00:14:00 Nee, de eerste boot.

00:14:10 and formalize that consultancy graphene

00:14:20 Curfew.

00:14:21 Yes.

00:14:22 November.

00:14:23 Yeah.

00:14:24 But this is the...

00:14:25 This is...

00:14:26 Ooh.

00:14:32 Come on

00:14:40 You build something, an entirely new structure, with your eyes open, with embracing and accepting a lack of knowledge.

00:14:50 I'll start with this, my own sort of...

00:14:53 I'll start with this.

00:14:54 What are you doing?

00:14:55 Two hands.

00:14:56 Come to life.

00:14:57 We've got to work.

00:15:00 has worked for me, is to remember you, and I just remember myself, and it's important.

00:15:11 in words of possibility space.

00:15:20 Потому что вы решили себя, что вы готовы с этим.

00:15:23 Это у вас плохая часть, которая нужна для себя.

00:15:26 Что вы можете жить с этим?

00:15:29 Да.

00:15:30 Kijk al een nummer, daar zit een 865, kijk als we het zo moeten doen en dan klikken we het en het ruilt erin.

00:15:40 Huh, 667. Signed.

00:15:48 Uh, Danker.

00:15:50 Sign...

00:15:54 Inverse...

00:15:56 Over...

00:15:58 Back...

00:15:59 Back...

00:16:00 Previous, context, nummer.

00:16:07 Dit.

00:16:12 With that voice that mamas like to run away from, y'all have it.

00:16:15 Conquering us.

00:16:17 And if I could be who I needed to be, what would that be?

00:16:22 self-deception and arrogance,

00:16:24 and be proud of your insufficiency,

00:16:26 that's a very foolish thing,

00:16:28 and that means to cling to the parts of you that are dead.

00:16:30 People have a face who knows I'm weak, who knows I'm afraid, who says whatever you think about it, they can never appear.

00:16:40 At some point, you've got to be tired of not being number one.

00:16:44 You have to accept what you're not.

00:16:47 You have to get people to want to do that.

00:16:50 To fix it, you have to accept it first before you can go on the journey.

00:16:55 As you elevate your aim, you create a charge.

00:17:01 The new ideal, which is an ideal you, becomes a judge because it's above you, right, and then you're terrified of it, baby.

00:17:10 who they want to be they act like they are but they're not because they haven't fixed all this

00:17:14 stuff yet we gotta fix this first before we can start our journey in life

00:17:20 yourself that isn't perfect.

00:17:22 In the suffering, there's a world

00:17:30 The judge that you're creating by formulating the idea tells you what's useless about yourself, and then you can dispense with it before you write it.

00:17:40 You're setting the example, every single day of your life, you make me tired, but you ain't

00:17:49 ever gonna leave that home.

00:17:50 I'm just...

00:18:02 Every single person that you look up to, your favorite person in the entire world, has men.

00:18:10 Dissatisfaction is, it's an innate.

00:18:26 realize the next step isn't going to be.

00:18:30 The next step is the first step to evolving, changing, growing, learning, becoming literally the best version of yourself.

00:18:38 That's the most beautiful thing.

00:18:40 You've got to have a reason why, and most people have a strong reason why.

00:18:46 I have a good page of darkness that is supercharging.

00:18:49 I have a reason why.

00:18:51 So many people in life, through no fault of their own, have a bar of self in themselves,

00:18:58 a glass ceiling, etc.

00:19:03 put themselves in positions where they deal with adversities and challenges so that they can develop some sense.

00:19:12 The more we struggle with being or purpose in our lives,

00:19:15 the more hope we look for to kind of compensate for that.

00:19:20 You almost have to take the huge goal and shove it.

00:19:24 Don't forget about it, but shove it and now focus on everything that's small to get there.

00:19:30 I think we focus so much on trying to be perfect, but really, we just need to be successful.

00:19:36 Even if you fail, that failure was an event.

00:19:38 It's not who you are.

00:19:41 We're surrounded today by people being satisfied as soon as I realized that I could believe in myself.

00:19:50 It's not a little proof.

00:19:53 It's just this armor that we have around us.

00:19:56 And that armor has cheeks in it.

00:19:58 We all have our own security.

00:20:00 Er is een half parlement.

00:20:03 Nee, dit is VIVITOR.

00:20:07 En deze is mijn plan.

00:20:08 Kijk het aan de hand.

00:20:11 I'll go to the spine with that, and you may kind of dash the front with that.

00:20:16 Don't forget it.

00:20:20 Society, parents, whoever has set the standard for you to not wait to save you.

00:20:32 I didn't know it, I

00:20:40 You can't afford that plan of fear on the stats unless you know where you're trying to go.

00:20:44 How can you know someone who doesn't know where you're trying to go?

00:20:48 And so if the fighter took the tower...

00:20:52 They're recklessly obsessed with achieving outcomes in the face of all that person in the world.

00:20:57 I don't know if this is a failure.

00:21:01 that we've looked up to, has gone from failure to...

00:21:04 Good day, it's been your training.

00:21:07 Good day, good day, good day.

00:21:10 The DNA is in your tree!

00:21:12 I'm going to see you.

00:21:14 Stop it!

00:21:16 Why the fuck do you believe me?

00:21:18 I am tired of myself.

00:21:20 When you say I'm sick and tired of being sick and tired, that's the facilitator of change.

00:21:26 That's when you're ready to say these words, no more excuses.

00:21:30 I've never met a person who was not successful, that didn't have a great amount of self-discipline.

00:21:41 Self-discipline and being able to perform and being able to keep your life on schedule and being able to keep commitments.

00:21:50 and we can afford to have a life that is controlled by...

00:22:00 someone else or a life that is basically controlled by our emotions i learned many

00:22:06 years ago that there are two kinds of people there's the type of person who says

00:22:10 I'm going to wait till I feel like it before I do it and then there's a person who says I gotta do it so that I feel like it.

00:22:17 One will never get anything done.

00:22:23 The other person says, no, I need to move, and that's on your self discipline.

00:22:30 I have a challenge for everyone.

00:22:41 your weekend sometimes it's kind of a hopefully an easier time of your week ask yourself am i

00:22:49 practicing

00:22:51 Am I doing the things that I should do because I need to do them or am I kind of waiting for me in the moment?

00:23:00 live by it. One can have no smaller or greater mastery than mastery over oneself. That's

00:23:05 da Vinci. Da Vinci did amazing things with his life. I wanted to do equally amazing things.

00:23:11 If that's the game that we're playing, if I can construct my belief system, if I can choose at any moment to believe something that's more...

00:23:20 Thank you for reading.

00:23:30 things that I couldn't do before, and it's like that moment in the Matrix where Nia realizes

00:23:37 he knows come true.

00:23:42 about life to me the very fundamental purpose of life is to find out

00:23:56 and put that utility to the test in service.

00:24:00 something greater than myself comparing yourself to others so the first thing you can do is stop

00:24:07 focusing on other people instead

00:24:15 Serve to sing, everybody, y'all.

00:24:21 Once you've accepted that you have much right to success and much right to succeed as anybody else,

00:24:27 the next step is learning how to talk.

00:24:32 of success, so you speak it. Surround yourself with people who accomplish their dreams and

00:24:43 situation for a man, woman to God.

00:24:46 And that was pretty much it.

00:24:54 Keep on your death, babe.

00:25:07 that yield for whatever reason.

00:25:15 You never use those talents, you never use those gifts, and there they are standing around

00:25:51 Oh God, the models have been real great.

00:25:54 It's not in the 40s where there's oil in the ground.

00:25:59 It's not in the 40s where there's oil in the ground.

00:26:02 The safest place on the planet is the cemetery.

00:26:05 And there you'll find greatness that we've never seen.

00:26:09 There you'll find.

00:26:20 Maybe that's why some unknown writer wrote the words.

00:26:24 What if you lived your whole life only to discover that it was wrong?

00:26:33 That you were chosen to do something else.

00:26:44 Thank you very much.

00:26:45 Thank you very much.

00:26:47 Thank you very much.

00:26:50 I want you to take some notes on some things, and I want you to think about your goals and dreams in the three categories that I mentioned, personal, professional.

00:27:00 and your social contribution how many of you are serious about your goals and dreams raise

00:27:04 your hands please thank you very much how many of you don't want to take your dreams to your great

00:27:14 Look in the eyes and say, get out of your head and step into your brain.

00:27:17 Let's do that right now, please.

00:27:19 Say, get out of your head.

00:27:23 I want you to write this down. Let us say together, as you think about your goals and dreams, let us say together, it's possible together, please.

00:27:34 I'm an entrepreneur. I've been an entrepreneur for 20 years. It's my 21st year.

00:27:40 I could have been speaking and training for 34 years.

00:27:45 But for 14 years, I was living in my head.

00:27:51 For 14 years, I stopped myself.

00:27:54 For 14 years, I used to...

00:28:17 problems in all which you have seen.

00:28:23 Exactly.

00:28:24 This is the time.

00:28:34 Zodat ik hier heb ik gehoord.

00:28:36 Zodat mag ik hier niet.

00:28:51 In life, she will say, do you really want this?

00:28:57 You're going to lose friends.

00:28:58 Do you really want this?

00:29:00 You really want his cousins going to ban me.

00:29:02 People that you used to be like this with.

00:29:04 Don't do bulls you don't make a deal.

00:29:06 That's a part of it.

00:29:12 when I wanted to commit suicide and take my life.

00:29:15 And I don't talk about that because I don't want to give nobody ideas.

00:29:18 I should have quit when I heard my...

00:29:21 I got through that because I didn't do well.

00:29:30 And so I'm telling y'all, you have come too far to quit now.

00:29:35 You have invested too much to quit now.

00:29:37 You have lost too much to quit now.

00:29:42 face. They're going to do their best.

00:29:50 Dig in. Fight them.

00:29:55 It's an urge to be told.

00:29:57 Every champion.

00:30:00 Every president has felt it, every king has felt it, every lion has felt it, every winner has felt it, every soldier.

00:30:10 has felt it. Every victorious person has felt the urge.

00:30:21 I don't care if you don't have the money, you don't have the health, and you don't have the family for it, and you don't have the background for it, and you don't have the friends for it.

00:30:33 Don't you do it. Don't you do it.

00:30:37 It may take you twice as long.

00:30:38 You may have to take...

00:30:40 You might not move as quick, you might not have as much.

00:30:50 and so by being committed to everything that i started i finished it it built a certain type

00:30:54 of spirit it built a certain type of mentality it built a certain type of individual and so now

00:31:01 Even if I wanted to, even if I wanted to, I'd...

00:31:12 I'm going to come over here, man.

00:31:21 Never let what you want to say

00:31:26 get in the way of what your audience wants to.

00:31:31 conduct communication, listen to what they're telling you, and then craft and create.

00:31:40 a story, appearances, and things you observe to begin, to allow them to see them.

00:31:50 themselves differently. They have really been in. All this great experience, an experience.

00:32:01 It's the information to change.

00:32:03 It's the only way it should happen.

00:32:06 Most people have balls.

00:32:08 One thing done.

00:32:10 Come on, that's the first move.

00:32:12 Move in the English.

00:32:14 Move in the English.

00:32:16 Move in the English.

00:32:18 Let's speak in English.

00:32:20 That's a vision.

00:32:21 A vision is about what you're hearing.

00:32:26 What looks like one that excites you.

00:32:28 You gotta have a vision.

00:32:30 A vision for what it is you really, truly want, not what you think you want.

00:32:40 an interesting experience. The other day I went to the cave. I go there because I have

00:32:44 food allergies and they're very careful with people who have food allergies. And the waiter

00:32:49 took me to the table.

00:32:50 and he said that he had been watching my lectures and that's a very common experience and he was

00:32:56 happy about that and he said that he'd had two promotions at the king in the last

00:33:00 four months because he'd been watching my lectures. I really found that an

00:33:04 affecting experience because, you know, you might say, well, he's working as a waiter at the Kagan.

00:33:10 There's nothing particularly heroic about that.

00:33:12 I disagree with that actually because I don't care where you're located, you can do a hell

00:33:17 of a job.

00:33:18 I mean that literally.

00:33:20 could take whatever job you have and you can make it a real nice little piece of

00:33:23 absolute misery or you can act like a civilized human being and notice that

00:33:28 no matter

00:33:30 are there's a richness and a complexity that's completely inexhaustible right at

00:33:34 hand and then you can take that seriously and you can say well I happen

00:33:41 at the keg as a young guy and perhaps that isn't where I want to end up but it's not

00:33:46 nothing. It's a rich environment and I can make it a lot better.

00:33:50 if I want to I can get along properly with my co-workers and not gossip behind

00:33:53 their back and I can treat my customers properly and if an opportunity comes my

00:33:58 way I can take it

00:34:00 and I can see what happened.

00:34:02 And so he said that's what he'd started doing

00:34:04 and that things were working out much better for him.

00:34:06 He was in a much better job than he was three months ago.

00:34:10 But three months, that's nothing, right?

00:34:11 I mean, that's a nice trajectory.

00:34:13 It's an uphill trajectory.

00:34:15 That's what you want, really.

00:34:17 An uphill trajectory is actually even better than being somewhere.

00:34:20 good as far as I'm concerned because one of the things that really makes your life meaningful

00:34:24 is the clear realization that you're headed somewhere better than you are now.

00:34:31 There's also relationship between them and they say...

00:34:44 I just want to stop doing all the student things.

00:34:53 Thank you.

00:35:37 I have your responsibility for it.

00:35:44 necessary for doing that and then everything will flourish broadly and the other one is about way

00:35:50 Is that interesting?

00:35:55 Mm-hmm.

00:35:58 And so...

00:36:05 to see what it is Jung, Carl Jung said once that modern people didn't see God

00:36:11 It's a phrase I really, really like because people denigrate the opportunities that are right in front of them.

00:36:17 And there's no reason to do that because what's right?

00:36:22 That's what's right in front of you. It's inexhaustibly complex and full of potential, and there's no reason to assume that wherever you happen to...

00:36:42 We may have a lot worse, but the worst kind of attitude, that's for sure.

00:36:46 So anyway, so that's where you are.

00:36:48 You're in a damaged structure.

00:36:49 You're in damage.

00:36:50 damage structure but holes you know you're not being fed to the lions on a regular basis so that's

00:36:58 a good thing

00:37:10 You learn something, you think, because it informs you what you're making.

00:37:21 And so the more you voluntarily account in the unknown, the more you get made of, and the more you get made of, the more there is to you, and then the more you're...

00:37:31 countering the unknown, restructuring the proper order of the potential of being.

00:37:41 Since you can, it's an endless mystery, though I think part of it is that people aspire to the highest good.

00:37:54 weaknesses and their insufficiencies and that's not the only reason I mean

00:37:58 there's the desire to avoid

00:38:14 to not be in a very good place if what you're trying to do with that not very good place

00:38:17 is making it better and the fact that things aren't exactly...

00:38:20 ...the way they should be in trouble, the sense of the world that you...

00:38:30 And conceivably the intrinsic meaning of that is self-evident.

00:38:37 So it also makes me curious about...

00:38:40 Nihilism, for example, and despair, because, I mean, I understand those emotions, I understand

00:38:45 them deeply, and the intellectual mindset goes along with it, but they just seem beside

00:38:49 them.

00:38:50 There are so many things that need doing that all you really have to do is open your eyes and look at them and then decide that you're actually going to do something about them.

00:39:01 my scope of influence is so trivial that it's not worth doing it's like it won't stay trivial for

00:39:07 long if you do it not at all

00:39:15 to my life this week, than anything I actually did, hey!

00:39:22 necessarily the way that I expected it to pay off that's a whole different story but if it was genuine commitment to do something

00:39:30 and the outcome was really something other than what I expected.

00:39:33 Time was nothing but good.

00:39:36 So every new frontier that can meet...

00:39:43 I've got to see so quick, quick, quick,

00:42:57 But we are playing.

00:43:01 in the nature of all planes that is not serious, but at the same time they be conspired.

00:43:11 I've tried to give you the picture of the multiplicity and natural forms of our hands, and of you.

00:43:22 All the things we do, the facility's problems in the office have been seen.

00:43:28 I've got to give you the point of view.

00:43:30 From which these can be seen as gay, as they be done as it was listed for themselves.

00:43:40 for some

00:43:51 mit einem Eifel zu sein.

00:44:00 タタタタ

00:46:33 And as it gets out on the edge,

00:46:34 the droplets are finer and finer

00:46:36 and make more complicated patterns.

00:46:38 See?

00:46:40 So in the same way, there was a big bang at the beginning of things and it spread.

00:46:44 And you and I sitting here in this room as complicated human beings are way, way out on the fringe of that.

00:47:02 That was it, wasn't it?

00:47:04 Going to see for now.

00:47:11 Dat is zeker, maar niet in de break was.

00:47:16 Kijk, we hebben elkaar gehad.

00:47:25 Sí.

00:47:42 Nice guy.

00:47:44 I'm broken.

00:47:46 Look, look, look, look.

00:47:53 Deze is een zwijns.

00:47:55 Het gaat op.

00:48:00 It's full of cash

00:48:04 From end to end

00:48:05 Spread it like a rash

00:48:06 A disco badge

00:48:11 A metal face mask with a built-in crown

00:48:14 My mind to tilt down, a hundred thousand pounds

00:48:17 We can see how a kilt sound, like spilt milk clown

00:48:20 But I want a very ashy day, fam.

00:48:23 It's okay, man.

00:48:25 Before I break it down for the lame man.

00:48:27 And it's only one of the central pain.

00:48:31 Go, too cold to hold for your own

00:48:33 Keep on moving like soul to soul

00:48:35 On the door, like a food stove

00:48:37 Hit it y'all, trying to go up against city

00:48:42 But this is my country, so my mother didn't have to go home, let's look at her, I'm going to break your body, I'm going to break your body.

00:48:50 Laten bestuur ik.

00:48:53 Ik heb zomaar wat ik niet wil.

00:48:55 Nee, doe maar lekker.

00:49:01 This is the night north, you know the site, let's talk to you all.

00:49:04 Open all the arms, come to peace, let's take the floor.

00:49:07 Till the roof opens, come on, my eyes clap.

00:49:11 It's a bad lifestyle spot, it's a filter shop, made the headlines, buddy.

00:49:15 It'll clock to 10 times, that's five, buddy.

00:49:17 Come on, I ain't put the scripts for the show.

00:49:24 Breakfast with this food thought sort of like breakfast

00:49:28 You can mark it off fast

00:49:30 All fronts, can't afford no necklaces, so that's it, we're going to help build the daycares, somebody say yeah, and you feel it.

00:49:45 죄송합니다.

00:49:55 It kicks back to the fence, he moves, trials, okay, without living as bad.

00:50:00 Be high, it's up to more than the 9,000 male clown

00:50:03 And you're on a short one, please, you've never seen before

00:50:07 Forget about this, it's all the names of books of war

00:50:10 Bonded, his name is still stupid, his name is still his life

00:50:15 Separated, hit by John, or he walked in the soul

00:50:18 On a horse and to a birth patrol

00:50:29 I'm a big project.

00:50:30 To a trauma, dropped out on the swamp in Bahamas

00:50:33 And palados, tobogos, separated us from sleepwalks

00:50:37 Beat our old brothers, hate us, we're rooting owls

00:50:41 We have Honduras, Haiti, Grenada, the new one slave, baby, slave.

00:50:52 Smoking shit like Joe Cam

00:50:54 They know it and they still got tail

00:50:57 Cube scrambling, device wants to fail

00:51:02 The lights get nailed, locked, deceptive, the temperatures cause...

00:51:10 water showers, once again blowing up shit like the Twin Towers, poison rods for enemies

00:51:15 will ever devour, pull this shit down until the last hour worldwide.

00:51:22 And let's examine the facts behind the violent acts, behind the deadly gunplay, the cocaine and the crack.

00:51:31 There's a reason for the trees that everybody wants to eat.

00:51:33 Some gotta resort to thieving, believing that a hustle will help them get by.

00:51:37 For everyone that gets over, another hundred.

00:51:40 We'll see you next time.

00:51:50 Last time I got beat, ain't nothing sweet.

00:51:52 I turned a stick up kid to a soldier, put him down with the cause.

00:51:54 Make him feel real bold and more intelligent.

00:51:57 Plus, I'm aware of the technology, the revolutionist.

00:52:00 Grab your shit and follow me.

00:52:01 2000 came and went, 2000 the one was crazy.

00:52:04 People can't feel fashion, go back to the 80s.

00:52:06 Got me think about my niggas, drinking dark liquor, sparks flickin' in my...

00:52:10 Think about the time they tried to front on the kid

00:52:13 In front of nigga, Elvis, nigga, Dale, Juju, 70, roll the mic, whatever you wanna do

00:52:17 Damn nigga, Derek, lock down

00:52:20 help us find out, wonder how long he got now, wow, if it happened today, who would

00:52:24 lie, man, do we got shot, break, commit a suicide, do or die, change the tool, man,

00:52:29 doing it.

00:52:31 Okay, just put it right up.

00:52:33 I just don't think I'm going to keep across the baby father.

00:52:36 Nothing to make you say my father.

00:52:38 No, they try harder as a friend.

00:52:40 나의 마음이 나의 마음이 나의 마음이

00:54:34 Oh, I'm going to do that.

00:54:40 When tomorrow starts the evening, rise and finally rise.

00:55:15 Please try to understand.

00:56:02 Of course.

00:57:27 Thank you.

00:58:28 Yeah.

00:58:33 And give away.

00:58:41 It's more than what beats the year, as you hear this.

00:58:45 You can't give away what you don't have.

00:58:48 People who work.

00:58:52 Give away love. Give away love because they don't happen to give away.

00:59:02 If you know it doesn't work, it's pretty much as well, or otherwise all it is.

00:59:19 Thank you.

00:59:20 have love in here to give away if what you have in here is contempt what you have it here is anger

00:59:26 you have it here is fear

00:59:33 Loving yourself is the most powerful thing we can do.

00:59:37 And then everything flows.

00:59:41 I'm not talking about vanity or arrogance, because that is not love, that's always fear.

00:59:48 I'm talking about just that.

00:59:50 I'm a magnificent being that we are.

00:59:56 You know, little babies know how to love themselves.

01:00:04 I know of that ever criticizes its body or ever says, my hips are.

01:00:15 They love their toes, they love everything.

01:00:21 They absolutely express their feelings.

01:00:26 You know, when a baby is happy, you know it.

01:00:28 When a baby is angry, you know it.

01:00:35 that felt encouraging

01:00:38 as a wonderful

01:00:44 courage, and you adored yourself when you were very little.

01:00:52 Open to everything

01:01:00 of my life is that know it's enough that each and every one of us.

01:01:10 When we close our mind to what is impossible for us or what is possible for humanity, close us up.

01:02:18 ご視聴ありがとうございました

01:02:21 There were a bunch of...

01:02:23 ...for the NFL play.

01:02:25 And there were one basic program.

01:02:27 There were...

01:02:30 Dit is een baanje.

01:02:33 Het zal wel echt zijn.

01:02:35 Kan niet zichten, man.

01:02:57 I'm fragile.

01:03:51 They have to see conquer.

01:04:03 I'm from Detroit, all of us.

01:04:06 Mama got pregnant with me, a son of 10 years old.

01:04:08 High school drop out.

01:05:06 I can't.

01:05:07 I can't.

01:05:23 And what you have to decide in your position in the NCAA, you have to...

01:05:31 Yeah, no

01:05:49 Man, it's an opportunity.

01:05:50 This is the lifetime of the opportunity.

01:05:53 That's it.

01:05:55 The rest of your life, you're thinking it will be nice.

01:05:58 I've been to you forever.

01:06:01 Come on, push it on.

01:06:03 Okay.

01:06:05 You can do it.

01:06:07 I am figuring it.

01:06:09 You can do it.

01:06:10 I got to get everything I can get right now, every book I can write, and listen to me,

01:06:16 my school is being paid for by the athletic department.

01:06:24 There may not be another opportunity, but I tell athletes, the worst thing in the world is not growing up in...

01:06:32 up in poverty, you can come in here and get worshipped and not take advantage of this

01:06:36 and you gotta go back to the hood. That's the worst thing that could ever happen.

01:06:42 It's an opportunity of a lifetime.

01:06:44 Your grandma cotton right there.

01:06:46 Your mama cotton on you.

01:06:47 Your cousins and sisters.

01:06:51 this opportunity. Everybody is going to be a beast. Everybody is going to be a beast.

01:07:00 I don't know.

01:07:01 I don't know.

01:07:02 I don't know.

01:07:03 I don't know.

01:07:06 I don't know.

01:07:07 I don't know.

01:07:08 I don't know.

01:07:09 Don't hurt.

01:07:12 I think I'll be tweaked out!

01:07:30 I'm real with y'all.

01:07:41 They like to see the gazelles run.

01:07:43 Boom, they take off.

01:07:45 Cause real lions like to hunt.

01:07:48 Process the prize.

01:07:57 I'm gonna keep that up.

01:08:01 in the dark. When nobody's watching, you're putting in work.

01:08:10 A real man will come take a picture instead of a man, and even exercise to a man, I guess

01:08:19 it's time.

01:08:21 Ain't nobody going to hand you nothing. Ain't nobody going to hand you no championship. Ain't nobody going to hand you no title.

01:08:30 Here I am, this is my year. Listen to me say be phenomenal, this is it. I want you to chant it out. This is it. Be phenomenal or be forgotten. One, two, three. Be phenomenal or be forgotten. One.

01:13:17 I'm going to go ahead and do one.

01:13:37 who's on the couch tonight.

01:13:38 I feel great.

01:13:45 This shit is for the silent life.

01:13:48 You want some balance?

01:14:26 Oh my god.

01:14:31 Thank you.

01:14:42 They buy you a drink, and you can't get a dance, and you know what the thing is to dance.

01:14:50 I see you standing by yourself, you're standing by yourself, you're standing by yourself, you're in the morning baby, you're on there feeling love.

01:15:02 You know I'm coming out.

01:15:10 I can't leave it alone.

01:15:12 If there's nothing left, then I'm gone.

01:15:20 That was one way

01:15:30 He wasn't so late

01:15:34 That's dumb

01:15:36 You wanna say bye bye bye

01:15:42 I don't know what that is.

01:15:55 It's just a late night.

01:15:58 I'm trying to say this.

01:16:11 Did you find this dark till the sun comes?

01:16:20 Oh my god.

01:17:02 Yeah

01:17:17 看可惡

01:17:32 and say it's crazy.

01:17:43 You see, we don't say rising into love.

01:17:50 There is in it the idea of the fall, really fundamental things.

01:18:00 They're always a curious time at some point.

01:18:11 I'm taking this ghastly risk.

01:18:20 of their meat line.

01:18:24 Receive for all!

01:18:30 It's an active gamble.

01:19:05 The moment you take a step.

01:19:10 You do so on an act of faith because you don't really know that the floor is not going to give under your feet.

01:19:33 yourself up. But this is the most powerful thing. If you don't, surrender. See, I love

01:21:07 Time to see you guys

01:21:14 Yeah, it matters.

01:21:25 Thank you.

01:21:30 Once upon a midnight

01:21:37 Twilight

01:21:41 Thank you.

01:22:01 and my chamber do.

01:22:24 tomorrow.

01:22:30 I'm lost.

01:22:42 Let's see.

01:22:50 Set Rusk reach purple.

01:23:15 Thank you, huh?

01:23:21 Sir.

01:23:31 So, thanks.

00:00:33 I don't know if I am, come up, beat this chord.

00:00:40 Wow, er zitten allemaal in chatgroups.

00:00:42 Ja, kanker.

00:00:47 Kost geld.

00:00:55 Thank you.

00:01:06 It never shouts.

00:01:08 Very hard to hear.

00:01:10 You have to, every day of your lives, be ready to hear what whispers in your ear and very rarely shout.

00:01:20 That moment in time was one of the darkest moments I've had in my whole life.

00:01:24 My motivation was out the door, like I just wouldn't give up.

00:01:28 I need you to be who you're supposed to be.

00:01:31 Stop me from being a loose world, you know what I'm talking, the door was shut, don't let anybody tell you that I'm talking is only dead, don't let anybody tell you that I need you to be a loose world.

00:01:42 Super

00:01:51 That's good.

00:01:52 I live in Indiana.

00:01:59 Make sure that...

00:02:03 You're not going to do what you've been called to do because you were afraid.

00:02:07 Some things don't come.

00:02:08 They're just not going to come to you because you...

00:02:12 You got to put up the boots, and you got to be moving to fight that thing out.

00:05:38 Okay.

00:05:40 and you thought he was

00:05:41 oh look at this pink coat tell me

00:05:52 Yeah, you won't hear me.

00:05:54 Here I go.

00:05:56 Hello.

00:05:58 Hello.

00:06:01 Ja, precies. Jullie zitten plaatsen vlakken te schouwen.

00:06:07 Kan dus ziek.

00:06:10 You carry a chick. You're living all around. I told you once they'd float their clothes, you're going to go in.

00:06:31 감사합니다.

00:06:40 Ciao!

00:06:52 Ik heb, ik heb, ik heb,

00:08:40 We gaan weer weer, danse, danse, danse, danse, danse.

00:08:50 You don't need to be sure that you do this like a low-key booster, that's going to be so good.

00:08:54 Excuse me about Brian, can you leave me there?

00:08:58 I'm very confused.

00:09:00 Swester

00:09:10 Don't you see

00:09:22 So this press, don't put me, the stair once said, tell me, cool down, down, don't.

00:09:30 Out!

00:09:46 On my clothes to the side

00:09:48 Oh, dress more like a black

00:09:50 Oh, he's speaking super slow, and you thought he was...

00:10:05 Dat hebben we wel wachten, ja.

00:10:10 Slechtere trassen van de meekhoeders ook.

00:10:13 Dan gaat het allemaal wel scheef staan.

00:10:15 Totdat geveld wordt dit poopje, dan moet hij wel.

00:10:21 I'm going to talk to you, this is a man who made all that.

00:10:26 I'll pass.

00:10:28 Sure.

00:10:29 Thank you, man.

00:10:30 ちょっとお話しさせていただきます

00:10:40 Dankjewel.

00:10:42 Alles nou voor jou.

00:10:45 Ja, precies.

00:10:48 Iedereen happy dance, blijven.

00:10:50 Happy Feet, the Pinguins, the March of the Pinguins, the Vars of the Pinguins, here are the Wallace and Gromit.

00:11:01 Dit is echt goed.

00:11:03 We lopen allemaal te snel in de tijd.

00:11:05 Kanker, alles dan.

00:11:07 Gewoon logisch uit kanker.

00:11:10 Nee, nee, nee, ongelooflijk. Je kan niet zeggen dat het tanker is geweest.

00:11:21 No brother, in the hazard suit, I took the liberty of relieving you of your weapons, who most of them were guns.

00:11:30 I'll store the suit, but I think you learned it.

00:11:37 This is the border world.

00:11:41 He is in our control for the time being thanks to you, Quentin.

00:11:46 Yes, have a care for the work. Thank you very much.

00:11:51 Wacht even, een onderscheid aan de kebber, onderscheid zit er wat achter, van hoe we als mensen

betekenis geven aan ziekte.

00:12:00 Vivi Koop, over Vivi Kankleid onderwerp, waar filosoof Suzanne Zondag, het is nu zondag.

00:12:10 waarbreek het werk over

00:12:12 schreef in haar essay illness en zijn metafoor

00:12:17 wanneer je zegt dat alles graal logisch naar de...

00:12:20 Kankertoeloos beschrijf je een puur biologisch, oorzakelijk en tijdsgebonden proces.

00:12:26 Het is een opeenvolging van gebeurtenissen in tijden.

00:12:30 In de tijd, kankercellen delen zich, er ontstaan genetische mutaties.

00:12:38 En na verloop van tijd,

00:12:40 ontwikkelt zich een tumor.

00:12:42 Chronologisch is feitelijk meetbaar en onvermijdelijk verbonden met het verstreken van de tijd.

00:12:49 En de veroudering...

00:12:50 van het lichaam.

00:12:51 Je kunt echt niet zeggen dat dit ontologisch is, omdat ontologie over de essentie van het

00:12:58 zijn gaat.

00:12:59 Als kanker...

00:13:00 Onlogisch zou zijn, zou dat betekenen dat de ziekte deel uitmaken van iemand diepere identiteit of wezen.

00:13:08 Het is een extra essentieel verhaal.

00:13:10 Of de psychologische bestemming is, of het wachten van kanker, de ziekte, X is dus een verhaal.

00:13:20 Of een psychologische bestemming is.

00:13:22 Ja, precies.

00:13:22 Wie is de psycholoog?

00:13:24 Alsof de patiënt erdoor gedefinieerd wordt als persoon.

00:13:29 De ziekte...

00:13:30 een symbolische betekenis heeft zoals een achterhaalde gedachte dat kanker ontstaat door opgekropte emoties.

00:13:40 De defect in de biologie, chronologisch.

00:13:43 Geen expressie van de ziel of de essentie van wie je bent, ontologisch.

00:13:48 Zoals zondag...

00:13:50 ...die je ontdekte toen ze zelf ziek werd.

00:13:53 Ziekte is simpelweg biologie.

00:13:55 Geen orde over je bestaan.

00:13:57 Wil je de filosofische kant verder verkennen?

00:14:00 bijvoorbeeld aan de hand van het werk van Susan Sontag, SS in kivose scolioze of wil je dieper ingaan op de medische bio-

00:14:10 logische logica achter chronologie van cel neerlijk

00:14:14 ja, mitosis, ja precies, kanker

00:14:20 Diabetes, fucking diven, kanker, kak, de dak, punten, punten, dakpunt, hoekpunt.

00:14:35 C'est vrai, c'est vrai.

00:14:51 ご視聴ありがとうございました。

00:27:33 Amém.

00:27:48 Yay!

00:30:51 is it really that

00:31:02 in a small town.

00:31:24 and offer you a little bit of choice by liberty of choosing for it.

00:31:42 the imposition of an untrust

00:31:52 not at liberty to say.

00:32:01 Thank you.

00:32:10 Gracias.

00:22:46 Listen, kid.

00:23:10 Impressive. What's that?

00:23:24 You wouldn't...

00:23:32 So, who are you?

00:23:39 He's not.

00:23:50 The world is inflamed.

00:24:01 They always need to, in a particular time.

00:24:27 would be a considerably...

00:27:53 The pressure was high, T-Rock is high

00:27:59 On stage

00:28:38 Can I get my phone back?

00:30:13 This is what the fuck I do for sure.

00:30:20 It's the time to give it to me.

00:30:32 I think it's all right.

00:30:42 I think it's a tank of solidized, it says it's good.

00:30:46 I mean, you know, the way she's in.

00:30:50 Al die mensen zijn doorgaan.

00:30:52 Ja, natuurlijk.

00:30:54 Dat is kut.

00:31:00 Play some more.

00:31:33 The childish might stop

00:31:35 The night's always behind

00:31:36 The might now be your volley

00:31:38 And now be your...

00:32:34 Let me see what's the way of it.

00:35:04 Dit aan gezichten mensen.

00:35:10 J'ai dit que tu peux me mêler.

00:35:20 Hmm

00:35:32 回到這一站

00:35:43 What manner of friends could a megalomaniac keep?

00:35:47 A loner is but one man.

00:35:50 He could raise an army, a brotherhood.

00:36:00 and stake a very legitimate bid for the planet.

00:36:03 But with this method, trust becomes a variant in resource.

00:36:14 Before you can truly shape the future you must first possess the past

00:36:20 in our history, Frédéric Jérôme, thousands of years ago.

00:36:30 There were two brothers, Cain, the farmer,

00:36:40 As punishment, God cursed Cain that the earth he tilled would not provide him sustenance

00:36:45 and placed a bath upon him that prevented anyone from ending his life.

00:36:50 And Cain went out from the presence of the Lord, and took up residence in the land of Nod.

00:37:00 The pain did not wither as the years passed.

00:37:03 This mark was...

00:37:10 In the centuries that followed, Cain founded a secret organization, the Brotherhood of Nod.

00:37:18 Its purpose, its beliefs at this point...

00:37:20 Yes!

00:37:39 This meat

00:37:40 It could have been the source of his prophecies on Tiberium, whether he believed they would lead him to another planet, another world, or another state of being.

00:37:52 Perhaps he thought he could use Tiberium and the Scrin as a way to escape his immortality in one way.

00:38:11 Living a life in the shadows, the Brotherhood of Nod attracted members into its fold.

00:38:16 Using his longevity, otherworldly knowledge, or perhaps she-

00:38:20 charisma kane was heralded within this secret brotherhood as a prophet very least a taste for

00:38:30 to achieve it. Throughout the years, agents of Nod would subtly shape the course of history

00:38:36 to their benefit with nationalistic political soccer.

00:38:40 Puppets and the craft of disinformation, the most audacious, no example.

00:38:54 a very personal advisor to Stalin.

00:38:57 Stalin was known to be impulsive.

00:39:00 and the ceiling unstable moving-list on the links on the web.

00:39:06 But yet, what is in my use of which facility

00:39:10 The silent stops at least in the...

00:39:20 Okay.

00:39:30 It's a great start to photograph the world with a Sarajevo Temple of Knot at its head.

00:39:36 It is entry off the world stage in the night.

00:39:45 with designs to unify disenfranchised third world nations under his badge.

00:39:56 I'm going to see my immediate carrying Siberian parachute.

00:40:06 Gracias.

00:40:38 I'll enjoy this.

00:40:47 size

00:40:53 Thank you.

00:41:03 Most people have balls, ask them in person.

00:41:11 for more successful people.

00:41:32 Focus on you and yourself every day, every day.

00:41:46 You should have a certain objection.

00:41:57 Now he's going to stop.

00:42:06 Gracias.

00:42:12 ご視聴ありがとうございました

00:42:20 Thank you for letting us know, just for more skills.

00:42:24 Come yourself, thank you, Mr. President, thank you.

00:42:33 will be successful, where all you want to do is be successful, as well as you're pointing,

00:42:38 they will be successful.

00:42:41 The whole thing is that you want to be respectful, but you don't want to stand, you just come for it.

00:42:46 You don't want to stand, you are all you.

00:43:08 Three hours to sleep, two hours.

00:43:17 I'm so happy to be pretty successful.

00:43:19 That's not bad enough.

00:43:21 I go on the count of five, and look at the review of number one, it's a lot of people, a lot of people, a lot of people, a lot of people, a lot of people, a lot of people.

00:43:47 You've got a process like these.

00:43:52 over a lifetime, starting way back here when we were children, and our parents, our experience.

00:44:04 to develop our philosophy.

00:44:05 And in my opinion,

00:44:06 he's personal philosophy,

00:44:08 major factor.

00:44:12 It's called the 7th station.

00:44:17 Each person's personal belonging.

00:44:22 That's what makes a difference to dogs, men, birds, cats, fighters, killers.

00:44:32 It doesn't make no difference at all in the life of you.

00:44:34 You're willing to think. You're willing to keep in your mind.

00:44:36 You're willing to process ideas.

00:44:40 And the winner is telling you to use the only five.

00:44:54 to find out, but if you go to the end, you're not trying to do it, so you find that out.

00:45:06 The entire process of your own life, you can do that by the way.

00:45:10 I did that by exercise, I did that by process in 90 years, and help with a better cloth, a better breath, for a live goal.

00:45:29 Put me in here.

00:45:32 and we've got to play, and we've got to watch some time, we've got to eaters.

00:45:45 What are you doing all this stuff?

00:45:47 How are you doing all this?

00:46:05 You can take all of this as part of it and put this on the back.

00:46:15 ご視聴ありがとうございました。

00:46:28 It's not a light bulb to do it yet.

00:46:34 What are you doing?

00:46:35 I actually start reminding you of a lot of things

00:46:38 in your mind to come upside down.

00:46:44 There is energy in the universe, there is something that is in each and every one of us.

00:46:51 Also, they are connected to it in a way that is often perceived to be a book.

00:47:02 the world of what we call spirit, but that is not maturity.

00:47:08 And I would like to suggest that you...

00:47:12 allow yourself to know that you're not

00:47:14 I'm going to be here

00:47:15 having a spiritual experience

00:47:17 that's your way around

00:47:28 Gracias.

00:47:34 to connect once you have an awareness that you can definitely

00:47:40 It's you, and whatever you call me, it doesn't matter.

00:47:45 It doesn't matter if you call me.

00:47:47 God will call it divine presence.

00:47:50 Father, Father, Spirit.

00:48:04 Alan Watts once said that you can't get wet from the word water.

00:48:10 allows you to experience water and whatever it is that you call it is something that is distinct from what it is.

00:48:21 I saw some people looking at the flowers.

00:48:34 Thank you both.

00:48:37 Thank you.

00:48:38 Yeah.

00:48:39 Wow.

00:48:51 De zekste, blijkbaar, investeerde stil uit.

00:48:55 Kijk, kijk, kijk, kijk.

00:49:00 Once you place a label under your head and then put me into a compartment or a category of some time.

00:49:10 I must then become what it is that you have lived in this big world.

00:49:14 God is able to live our lives.

00:49:21 of higher awareness without being so consumed with what I call ordinary human awareness.

00:49:33 If I am a human being, maybe I'm having a spiritual experience, I'm not quite sure.

00:49:38 The higher human awareness.

00:50:36 Yeah, it was amazing.

00:50:37 It was amazing.

00:50:38 It was amazing.

00:50:39 It was amazing.

00:50:40 As William Arthur Ward said, the pessimists complain.

00:50:50 And that's how we all have to be.

00:50:52 We need to look at the situation and understand not what personality type are to do about it.

00:50:57 That is good.

00:50:58 Any of us in any moment.

00:51:01 how we react we get to choose our frame of reference we get to choose whether

00:51:05 we're pessimistic we get to see things in an optimistic way if we want

00:51:10 But at the end of the day, the only thing that really matters is what do you choose to do?

00:51:15 And so if you decide to fight the win, to be angry, to argue about it, to complain, you never...

00:51:22 He wants you to go, but if you remember that we have control, that we can react.

00:51:30 is to adjust the sails, to harness the wind, to take us to where we want to go.

00:51:35 And instead of fighting against it wasting energy, we learn how to harness everything around us.

00:51:40 And as Alice Walker said, the most common way people give up their power is by thinking they don't have any people that lose sight of this.

00:51:50 The fact that we can always give you the choice, no matter what happens in your life, the one thing that you get to choose at all times.

00:52:01 to it. Take that away.

00:52:04 No one will you get to decide how

00:52:06 you react, and your reaction is the bricks

00:52:08 by which you build the light.

00:52:11 It isn't your intentions, it's not your thoughts, it's simply the things you manifest into the world.

00:52:15 As you take action, the world reacts.

00:52:19 As you take action.

00:52:20 action you progress as you take action you learn as you build you create things and as you create

00:52:25 things you can construct a world that matches your vision

00:52:30 but it's understanding that you have that power it's understanding that you always

00:52:33 get a choice

00:52:40 Security has gone.

00:52:52 advantage of the situation and that's what I want for you I want you to understand you can always

00:52:57 take advantage you can always ask a question as powerful

00:53:00 I'm going like this shit, actually.

00:53:17 I had an interesting experience the other day.

00:53:19 I went to the cave.

00:53:20 I go there because I have food allergies and they're very careful with people who have food allergies.

00:53:25 And the waiter took me to the table and he said that he had been washing my legs.

00:53:30 and that's a very common experience and he was happy about that and he said that

00:53:35 he'd had two promotions at the keg in the last four months because he'd been

00:53:39 watching my life

00:53:40 I really found that as affecting it's because you know you

00:53:50 with that actually because I don't care where you're located you can do a hell

00:53:54 of a job I mean that literally you could take whatever job make it a real

00:54:01 absolute misery, like a civilized human being and the richness and a complexity.

00:54:10 that's completely inexhaustible, right at hand.

00:54:13 And then you can take that seriously, and you can say, well,

00:54:21 and perhaps that isn't where I want to end up,

00:54:23 but it's not nothing.

00:54:24 It's a rich environment, and I can make it a lot better if I want to.

00:54:28 I can get along properly with my co-

00:54:30 not gossip behind the back and customers properly and if an opportunity comes my

00:54:35 way I can take it and I can see what happens

00:54:40 And so he said that's what he'd started doing and that things better for him.

00:54:44 He was in a much better job than he was three months ago.

00:54:47 In three months, that's nothing, right?

00:54:50 nice trajectory it's an uphill trajectory that's what you want really an uphill trajectory is

00:54:55 even better than being somewhere good as far as i'm concerned because

00:55:00 things that really makes your life meaningful is the clear realization that you're headed somewhere

00:55:04 better than you are now. And then it's even better if you also understand that there's a direct causal

00:55:09 relationship.

00:55:10 things that you're doing and the steepness of that incline and so i get a lot of letters from

00:55:15 people like that and they say well you know i've been listening to these lectures

00:55:20 and I decided that I'm going to try to take responsibility for my life

00:55:23 and so I started to stop doing all the stupid things

00:55:27 that I know that are stupid that I know I shouldn't be doing.

00:55:30 and i've started doing some of the things that aren't stupid that i know i should be doing which

00:55:33 seems pretty obvious really if you think about it but obvious though it may be that's necessarily what

00:55:39 people

00:55:40 right and say what difference that makes and they're thrilled about it and so I'm thrilled

00:55:46 about it when I get letters like that because I really don't experience

00:55:50 it's better than a letter like that or a message like that

00:55:54 because it's so good to see things that aren't so good replaced by something.

00:56:01 think it's an open question I truly believe it's an open question to what

00:56:05 degree we could make things better if that's what we actually aimed at doing

00:56:10 Well, there's two modes of being in the world, right?

00:56:12 There's one where you adopt the responsibility for living properly, for being.

00:56:20 and you make the sacrifices necessary for doing that,

00:56:23 and then everything will flourish properly,

00:56:25 and the other one is a pathway of resentment, bitterness, and rejection.

00:56:30 genocide and that just seems exactly right to me and so if the positive path beckons if you can

00:56:39 actually see

00:56:40 What it is, if you can, if you can lower yourself enough to see what it is, Jung, Carl Jung said

00:56:45 once that modern people didn't see God because they didn't look low enough. It's a phrase I

00:56:50 because people can't agree with the opportunities that are right in front of them.

00:56:54 And there's no reason to do that because what's right in front of you is the majesty of being.

00:57:00 That's what's right in front of you. It's inexhaustibly complex and full of potential and there's no reason to assume that wherever you happen to be isn't as good a starting place.

00:57:10 anywhere else now you know i know some people have terrible terrible lives they're in situations

00:57:14 that are absolutely unbearable and but i also do know that even situations like that can be

00:57:21 worst kind of attitude, that's for sure. So anyway, so that's where you are. You're in a damaged structure. You're a damaged structure. You're in a damaged structure, but, you know.

00:57:30 At least it's galls, you know, you're not being fed to the lions on a regular basis, so that's a good thing, and you can emerge forward heroically.

00:57:40 to confront the chaos that constantly threatens the structure within which you live and you can

00:57:45 free something as a consequence of that you can learn something you can strengthen

00:57:50 That's the other thing, because what you're actually made of, in many ways, what informs you, what you're made of, is what you encounter when you voluntarily encounter the other.

00:58:00 And so the more you voluntarily encounter the unknown, the more you get made of it.

00:58:04 The more you get made of, the more there is to you.

00:58:06 And then the more you're good at encountering the unknown.

00:58:10 restructuring order and calling forth proper order out of

00:58:14 the potential of being god you gotta think why wouldn't you do that since you can

00:58:20 It's an endless mystery.

00:58:22 You know, I think part of it is that people don't aspire to the highest good

00:58:27 because they're deeply ashamed of...

00:58:30 themselves and their weaknesses and their insufficiencies and that's not the only reason

00:58:35 I mean there's the desire to avoid responsibility and there's all the negative

00:58:40 as well, like resentment and things worse.

00:58:50 It's okay to not be in a very good place if what you're trying to do with that not very good place is make it better

00:58:55 And the fact that things aren't exactly the way they should be at least gives you something to

00:59:02 great to do because there's no shortage of suffering and trouble that besets the world

00:59:07 that you could conceivably ameliorate in some way.

00:59:11 of that and the intrinsic meaning of that is self-evident, so it also makes me curious

00:59:16 about nihilism, for example, and despair.

00:59:20 Because, I mean, I understand those emotions, I understand them deeply, and the intellectual mindset goes along with it, but they just seem beside the point to me in some sense, because there are so many things.

00:59:34 The understanding of...

00:59:42 Understanding of Awakening.

00:59:50 For a person who cannot retain it, it's like putting a million volts through your electric shaver.

01:00:00 It stays blunt.

01:00:03 Thanks, sir.

01:00:04 Thanks, sir.

01:00:04 Now, if you go off in that way, that is what would be called in Buddhism a project.

01:00:15 He's one who goes off into the transcendental world.

01:00:20 never see the game and he's made a mistake from the standpoint of buddhism because from the

01:00:28 standpoint of buddhism there is no

01:00:30 fundamental difference between the transcendental world and this everyday world the bodhisattva you

01:00:38 see who doesn't

01:00:40 go off into a nirvana and stay there forever and ever, but comes back and lives ordinary

01:00:45 everyday life to help other beings to see through it too.

01:00:52 He doesn't come back because he feels he has some sort of solemn duty to help mankind and all that kind of pious camp.

01:01:02 He comes back because he sees the two worlds are the same.

01:01:07 He sees all other beings.

01:01:10 He sees them use a phrase of gk justices great thing

01:01:20 in the street seems any human nod. We are moved in strange democracy with a million masks of God.

01:01:31 fantastic to look at people and see that they really deep down are enlightened.

01:01:41 They're it. Their face is the divine.

01:01:49 They look at you.

01:01:50 and say oh no but i'm not divine i'm just ordinary little me with them in a funny way

01:01:56 and here you see the buddha nature looking out of their eyes straight at

01:02:00 and saying it's not

01:02:01 and saying it quite sincerely

01:02:04 that's why

01:02:10 When you get up against a great guru, he has a funny look in his eye.

01:02:14 When you say, I have a problem, I really am mixed up.

01:02:20 He looks at you in a square way.

01:02:23 Do you think, oh, dear me, he's reading my most secret thoughts.

01:02:28 He's seeing all the awful things I...

01:02:30 all my cowardice all my shortcomings he's not doing anything of the kind he's interested in such

01:02:40 It's Shiva in you.

01:02:45 God, Shiva, won't you come off?

01:02:47 I see it, man.

01:02:52 If you really understand that Zen, that Buddhist...

01:03:00 This idea of enlightenment is not comprehended in the idea of the transcendental, neither

01:03:07 is it comprehended in the idea of the ordinary.

01:03:12 Not in terms of the infinite, not in terms of the finite.

01:03:16 Not in terms of the eternal, not in terms of the temporal.

01:03:20 They're all concepts, the most ordinary sights and sounds, and smells, the texture of sh-

01:03:30 shadows on the floor in front of you. All these things without being named and saying

01:03:35 that's a shadow, that's red, that's brown, that's somebody's foot.

01:03:40 When you don't name things any longer, you start seeing them.

01:03:46 And it is only through stopping, fixing conception.

01:03:50 on the world of color and sound that you really begin to hear it and see it.

01:03:57 And as a matter of fact, far from being boring, the world...

01:04:00 when looked at without chatter becomes amazingly interesting than the very simplest things of everyday life.

01:04:11 the words of the poet Hokoji,

01:04:15 Marvelous power of supernatural activity.

01:04:30 Control Minus

01:04:43 The understanding of Zen, understanding of awakening.

01:04:51 the most dangerous things and the people cannot contain it.

01:04:59 It's like...

01:05:00 a million volts through your electric shaver.

01:05:10 Now, if you go off in that way, that is what would be called in Buddhism, a Pratyeka Buddha, private Buddha.

01:05:21 He's one who goes off into the transcendental world and is never seen again.

01:05:30 And he's made a mistake from the standpoint of Buddhism because from the standpoint of Buddhism there is no fundamental difference between the transcendental world and this everyday world.

01:05:43 The bodhisattva, you see, who doesn't go off into a nirvana and stay there forever and ever, but comes back.

01:05:50 and lives ordinary everyday life to help other beings to see through it too.

01:05:58 He doesn't come back because he...

01:06:00 He has some sort of solemn duty to help mankind and all that kind of pious camp.

01:06:05 He comes back because he sees the two worlds.

01:06:10 are the same. He sees all other beings as Buddhas.

01:06:17 Don't see them, he sees them.

01:06:20 to use a phrase of G.K. Chesterton's.

01:06:24 But now a great thing in the street seems any human nod.

01:06:30 Move in strange democracy, the million masks of God.

01:06:41 and see that they really, deep down, are enlightened.

01:06:50 Their face is the divine.

01:06:54 They look at you and say, oh no, but I'm not divine, I'm just ordinary little me.

01:07:01 them in a funny way and here you see the buddha nature looking out of their eyes straight at you

01:07:05 and saying it's not and saying it

01:07:10 Right, sincerely. That's why when you get up against a great guru, he has a funny look in his eye.

01:07:20 When you say I have a problem, I really am mixed up, I don't understand, he looks at you in a square way, and you think, oh dear me.

01:07:30 He's reading my most secret thoughts.

01:07:33 He's seeing all the awful things I am, all my cowardice, all my shortcomings.

01:07:39 He's not doing anything.

01:07:40 of the kind. He isn't even interested in such things. He's looking at Shiva in you.

01:07:50 Saying, my God, Shiva, don't you come off it.

01:07:53 Understand.

01:08:01 I don't think that the Buddhist idea of enlightenment

01:08:10 in the idea of the transcendental neither is it comprehended in the idea of the ordinary

01:08:15 not in terms of the infinite not in terms

01:08:20 of the finite, not in terms of the eternal, not in terms of the temporal, because they're

01:08:25 all concepts.

01:08:30 The most ordinary sights and sounds and smells.

01:08:34 The texture of shadows on the floor in front of me.

01:08:38 All these things without being...

01:08:40 named and saying that's a shadow that's red that's brown that's somebody's foot when you

01:08:46 don't name things any longer you start seeing

01:08:50 And it is only through stopping, fixing conceptions on the world of color and sound that you really begin to hear it and see it.

01:09:02 And as a matter of fact, far from being boring, the world, when looked at without chatter, becomes amazingly interesting.

01:09:11 than the very simplest things of everyday life, as was the poet Hokoji.

01:09:21 Marvelous power of supernatural activity.

01:09:37 Dat...

01:09:38 Het...

01:09:39 Nee, we doen...

01:09:40 The understanding of Zen, the understanding of awakening.

01:09:50 It's dangerous for a person who by putting a million...

01:10:00 Volts through your electric shaver

01:10:10 If you go off in that way, that is what would be called in Buddhism a Pratyeka Buddha, private Buddha.

01:10:20 He's one who goes off into the transcendental world and has never seen again.

01:10:30 a mistake from the standpoint of Buddhism because from the standpoint of Buddhism there is no

01:10:34 fundamental difference between the transcendental world and this everyday world.

01:10:42 The bodhisattva, you see, who doesn't go off into a nirvana and stay there forever and ever, but comes back and lives...

01:10:50 everyday life, to help other beings to see through it too. He doesn't come back because he feels...

01:11:00 He has some sort of solemn duty to help mankind in all that kind of pious camp.

01:11:04 He comes back because he sees the two worlds are the same.

01:11:12 He sees all other beings as Buddhists.

01:11:18 He sees them...

01:11:20 use a phrase of G.K. Chesterton's.

01:11:23 But now a great thing in the street

01:11:25 seems any human nod.

01:11:27 Move in straight.

01:11:30 His democracy is a million masks of God.

01:11:40 and see that they really, deep down, are enlightened.

01:11:50 Their face is the divine.

01:11:53 They look at you and say,

01:11:55 Oh no, but I'm not divine, I'm just ordinary little me.

01:12:00 in a funny way.

01:12:01 Here you see the Buddha nature

01:12:03 looking out of their eyes

01:12:04 straight at you

01:12:05 and saying it's not.

01:12:08 And saying it quite sincerely.

01:12:11 That's why when you get up against a great guru, he has a funny look in his eye.

01:12:20 say i have a problem i really am mixed up i don't understand he looks at you in a square way

01:12:28 do you think oh dear me

01:12:30 Reading my most secret thoughts, he's seeing all the awful things I am, all my cowardice, all my shortcomings, he's not doing anything of the kind.

01:12:40 He's looking at Shiva.

01:12:50 Saying, my God, Shiva, won't you come off?

01:12:53 They understand.

01:13:00 That Zen, that Buddhist idea of enlightenment is not comprehended in the eye.

01:13:10 the transcendental, neither is it comprehended in the idea of the ordinary, not in terms

01:13:17 of the infinite, not in terms of the finite.

01:13:21 not in terms of the eternal not in terms of the temple because they're all concepts the most

01:13:30 Sights and sounds, smells, texture of shadows on the floor in front of you, all these things without being named.

01:13:40 and saying, that's a shadow, that's red, that's brown, that's somebody's foot.

01:13:45 When you don't name things any longer, you start seeing.

01:13:51 And it is only through stopping, fixing conceptions of the world of color and sound that you really begin to hear it and see it.

01:13:58 That is concrete.

01:14:01 And as a matter of fact, far from being boring, the world, when looked at without chatter, becomes amazingly interesting.

01:14:10 than the very simplest things of everyday life.

01:14:13 Words of the poet Koji.

01:14:20 Marvelous power of supernatural activity.

01:14:48 The understanding.

01:14:50 of Zen, the understanding of awakening, those dangerous things.

01:15:00 And for a person who cannot contain it, it's like putting a million volts through your electric shaver.

01:15:10 Blow your mind

01:15:12 Now if you go off in that way that is what would be called in Buddhism

01:15:20 Pratyeka Buddha, private Buddha, he's one who goes off into the transcendental world.

01:15:30 world and has never seen again and he's made a mistake from the standpoint because from the

01:15:39 standpoint of buddhist

01:15:40 there is no fundamental difference between the transcendental world and this everyday world the

01:15:48 bodhisattva you see

01:15:50 who doesn't go off into a nirvana and stay there forever and ever,

01:15:54 but comes back and lives ordinary everyday life

01:15:56 to help other beings to see through it too.

01:16:03 He doesn't come back because he feels he has some sort of solemn duty to help mankind and all that kind of pious cat.

01:16:12 He comes back because he sees the two worlds are the same.

01:16:18 He sees all other beings.

01:16:20 as buddhas

01:16:21 he sees them

01:16:24 to use a phrase of gk chestogens

01:16:27 but now

01:16:30 A great thing in the street seems any human nod.

01:16:34 We are moved in strange democracies and million masks of God.

01:17:07 and here you see the Buddha nature looking out of their eyes.

01:17:10 straight at you and saying it's not and saying it quite sincerely

01:17:20 That's why when you get up against a great guru, he has a funny look in his eyes.

01:17:25 But you say, I have a problem. I really am.

01:17:30 mixed up I don't understand he looks at you in a square way do you think oh dear me he's reading

01:17:35 my most secret thoughts he's seeing all the awful

01:17:51 God, Shiva, don't you come off it.

01:18:03 If you really understand that Zen...

01:18:10 that buddhist idea of enlightenment is not comprehended in the idea of the transcendental

01:19:22 words of the poet Hokoji, marvelous power of supernatural activity.

01:19:40 Dank je wel, hij is wel.

01:19:50 Oh.

01:20:01 I'm sorry.

01:20:19 understand

01:20:20 understanding of awakening

01:20:30 And for a person who cannot contain it, it's like putting a million volts through your electric shaver.

01:20:40 blow your mind

01:20:41 now if you go off in that way

01:20:47 that is what would be called in

01:20:49 Buddhism

01:20:50 a Pratyeka Buddha, private Buddha.

01:20:56 He's one who goes off into the transcendental world.

01:21:00 world and has never seen again and he's made a mistake from the standpoint of Buddhism because

01:21:08 from the standpoint of

01:21:43 He comes back because he sees the two worlds are the same.

01:21:48 He sees all other beings.

01:21:50 as Buddhists. He sees them

01:21:54 and he can't trust them.

01:22:00 How a great thing in the street, it seems any human nod.

01:22:03 We remove its strange democracy.

01:22:10 Look at people and see that they really, deep down, are enlightened.

01:22:20 Yeah, that's what Brady is.

01:22:22 They're angry.

01:22:24 That's how he did it like the boys.

01:22:26 Their faces were divine.

01:22:29 What?

01:22:30 I say, oh no, but I'm not divine.

01:22:32 I'm just ordinary little me.

01:22:33 In a funny way, here you see the Buddha nature looking out of it.

01:22:40 their eyes straight at you and saying it's not.

01:22:50 That's why, when you get up against a great guru, he does a funny look at himself, but you say, I have a problem.

01:23:00 Next up, I don't understand. He looks at you in a square way.

01:23:04 Do you think, oh dear me, he's reading my most secret thoughts.

01:23:09 He's seeing all your...

01:23:10 All the awful things I am, all my cowardice, all my shortcomings.

01:23:14 He's not doing anything of the kind, he's interested in something.

01:23:20 He's looking at Shiva, saying, my color Shiva, won't you come off?

01:23:31 If you really understand it, that Zanny...

01:23:40 buddhist idea of enlightenment is not comprehended in the idea of the transcendental neither is it

01:23:48 comprehended in the idea of

01:23:50 ordinary not in terms of the infinite not in terms of the finite not in terms of the eternal not in terms

01:24:00 because they're all concepts

01:24:01 the most ordinary

01:24:10 The texture of shadows on the floor.

01:24:17 That's red, that's brown.

01:24:20 somebody's foot name things any longer you start seeing and it is only through stopping fixing

01:24:30 ...conceptions on the world of colour and sound, but you really begin to hear it and see it.

01:24:47 Gracias.

01:24:57 Thank you.

01:25:22 Do you understand the concept?

01:25:24 Do you understand the concept?

01:25:43 Grazie.

01:25:55 That way, that is what we call the police approach here.

01:26:05 It's one who goes off into the world.

01:26:14 It's safe.

01:26:15 Come on, they stand on the police.

01:26:18 Come on, they stand on the police.

01:26:28 See, we'll just go off.

01:26:34 It's very, very nice, after being used to see us here too.

01:26:43 because he feels he has some sort of solid beauty development of kind of all of the parts he has.

01:27:52 of what is probably the essence

01:27:54 of my own focus

01:27:55 if I were to name one word.

01:28:01 which is non-concept, that is the most important word,

01:28:05 is project, and the essence of project is to be out of the court.

01:28:17 video or a concept is set.

01:28:21 I hope the name doesn't exist because I'm fond of that.

01:28:32 interconnectedness within the realm of the universe of the cosmos that we are working there.

01:29:04 to be in touch with Prajna, to be aware of.

01:29:12 that

01:29:22 Again, it's not something to be starting with that.

01:31:16 back to the service counter to fill the box.

01:31:44 That's right.

01:31:56 Thank you.

01:32:27 Nou, die naam is er zo'n plek op dat niet veel.

01:32:38 Gracias.

01:32:49 I'll lift up.

01:33:46 Gracias.

01:33:56 Gracias.

01:34:03 I haven't thought that story, or we don't have it at all,

01:34:05 I mean, but I don't know what it is.

01:34:20 I am tired of myself.

01:34:30 When you say I'm sick and tired of being sick and tired, that's the facilitator of you.

01:34:40 I've never met a person who was not successful.

01:34:50 out of self-discipline and being able to perform.

01:35:08 None of us could afford to have a life.

01:35:10 controlled by someone else, or a life that is basically controlled by our emotions.

01:35:15 I learned many years ago that there are two kinds of people...

01:35:21 There's a person who says, I'm going to wait until I feel like it before I do it.

01:35:25 And then there's a person who says, I've got to do it so that I feel like it.

01:35:29 One.

01:35:30 Never had anything done because they're still waiting for the person that says, no, I need to move.

01:35:40 on yourself is essential in your life and in my life if I'm going to get things done.

01:35:47 So I have a challenge for everyone I do this weekend.

01:35:53 and sometimes it's kind of a, hopefully, an easier task yourself.

01:36:01 practicing self-discipline that I should do because I need to feel the most.

01:36:10 now if you don't know this quote live by it one can have no smaller or greater mastery

01:36:15 than mastery over oneself that's davinci davinci did amazing things with his life

01:36:20 to do equally amazing things with mine.

01:36:22 And if that's the game that we're playing,

01:36:24 if I can construct my belief system,

01:36:27 if I can choose at any moment...

01:36:30 to believe something that's more empowering than I was believing the moment before

01:36:35 and that that will actually find its way into my act

01:36:41 allowed me to do things that I couldn't do the moment before,

01:36:45 then it's like that moment in The Matrix

01:36:47 where Nia realizes he knows coming.

01:36:51 And that's like, as funny as that is, that's how I think about life.

01:36:55 To me, the very fundamental purpose of life...

01:37:00 is to find out how many skills I can acquire that have utility and then put that utility to the test.

01:37:10 In service of something greater than myself, comparing yourself to others.

01:37:17 So the first thing you do is stop focusing.

01:37:20 Instead, focus on being the best version of you that you can.

01:37:25 Then you'll recognize that you deserve to sit at the big table with everybody.

01:37:30 After you've become the best that you can do.

01:37:33 Now, once you've accepted that you have as much right to success and much right to succeed as anybody else,

01:37:39 the next...

01:37:40 is learning how to talk the talk.

01:37:42 You have to get fluid in the language of success

01:37:45 so you speak it with ease.

01:37:47 Surround yourself with people.

01:37:50 Accomplish their dreams and immerse yourself in the culture of achievement the ideal situation for a man or woman to die

01:38:00 praying with them over. He said, but imagine if you will be on your deathbed and standing around your

01:38:11 of the dreams, the ideas, the abilities, the talents given to you by life and that you'll

01:38:25 on those ideas you never use those talents you never use those gifts

01:38:30 There they are, standing around your bed, looking at you with large, angry eyes, saying,

01:38:35 We came to you.

01:38:37 You could have given us life.

01:38:40 And now, we must die with you forever.

01:38:44 And the question is...

01:38:51 If you die today, what dreams? What ideas? What talents? What books?

01:39:00 leadership, what voice will die with you?

01:39:03 Frank Seeker said the wealth is placed on the planet.

01:39:09 It's not enough.

01:39:10 It's not in Southeast where there's oil in the ground.

01:39:12 It's not in South Africa where there are diamonds.

01:39:14 The wealthiest place on the planet is the cemetery.

01:39:18 If you're there, you'll find greatness.

01:39:20 that we've never seen.

01:39:21 They're your five talented genius

01:39:23 and potential never actualized.

01:39:26 Perhaps that's why Henry David Thoreau wrote the words

01:39:29 Oh, God.

01:39:30 Maybe that's why somebody wrote the words

01:39:36 What if you live your whole life

01:39:38 Only to discover

01:39:44 Nice look.

01:39:45 We're chosen to do something else.

01:39:51 And you didn't do it.

01:39:57 Repeat after me, please.

01:39:58 Live full.

01:40:00 Dit is kanker gewoon.

01:40:10 professional and your social contribution how many of you serious about your goals and dreams

01:40:15 raise your hands please thank you very much how many of you don't want to take

01:40:21 with you. Raise your hands, please. Very good. Shake someone's hand on your right and left.

01:40:25 Look him in the eyes and say, get out of your head and step into your greatness. Do that right.

01:40:31 I'm going to seek someone.

01:40:40 But it's possible together, please.

01:40:43 Yes, write that down.

01:40:45 See, ladies and gentlemen, as an entrepreneur, I've been an entrepreneur for 20 years.

01:40:50 years it's my 21st year i could have been speaking and training for 34 years but for 14 years i was

01:41:02 For 14 years, I stopped myself.

01:41:05 For 14 years, I used to go to see Zig Ziglar,

01:41:08 that I considered a number one motivation.

01:41:10 Speaker on the planet, Zig Ziglar and Tony Robbins. They're the best on the planet. Bob Proctor, they're the best on the planet. Jack Canfield, Mark Victor Hansen, T.H. Beckett, I would.

01:41:20 go and see them and then I would leave in my conversation with myself

01:41:25 my heart would say I can do that and then my mind would ask

01:41:30 Yeah

01:41:40 i failed again when i was in the eighth grade i have no college training

01:41:44 and a man changed my life and i'll never forget his name mr leroy washington he's in his 80s now

01:41:50 And he's blind from glaucoma, but he gave me a different vision of myself.

01:41:55 I was in his class waiting on another student, and he came in and said,

01:41:57 young man, go to board and work this problem out for me.

01:42:00 I said, oh, sir, I can't do that.

01:42:01 I said, why not?

01:42:02 I said, I'm not one of your students.

01:42:04 He said, look at me, yes, sir.

01:42:05 Go to the board and work the problem anyhow.

01:42:07 I said, sir, I can't do that.

01:42:09 He said, why?

01:42:10 I said, sir, because I'm educable, maybe retarded, sir.

01:42:13 I'm in special education.

01:42:15 And the students started laughing.

01:42:16 They said, that's Leslie.

01:42:17 That's not Wesley.

01:42:19 He's DT.

01:42:20 Wesley is the smart twin he said what does DT stand for I said um I'm the dumb twin sir and as

01:42:27 the students laughed at me he came from behind his

01:42:30 Desky looked at me and he said, don't you ever say that again.

01:42:33 Someone's opinion of you does not have to become your reality.

01:42:43 Dank ziekte mensen.

01:42:51 But on the other hand, I was liberated because he looked at me with the eyes of Gerda who said, look at a man the way that he is.

01:42:59 He only becomes one.

01:43:00 but look at him as if he were what he could be

01:43:03 then he becomes what he should be

01:43:06 and so we developed a relationship

01:43:10 things that i can just tell you as you think about your goals and dreams all of us can say in the

01:43:15 spirit of integrity that it's possible that if anybody

01:43:20 That it's possible that I can live mine.

01:43:25 What I did was, I made a mistake.

01:43:27 I looked at my ghost's dreams and...

01:43:30 My mindset has stayed up there for 14 years.

01:43:40 It's very surprising.

01:43:41 It's darklyzed.

01:43:42 It's darklyzed.

01:43:45 It's darklyzed.

01:43:46 It's darklyzed.

01:43:47 It's darklyzed.

01:43:48 It's darklyzed.

01:43:49 It's darklyzed.

01:43:50 Have you ever thought about something you wanted to do and you procrastinated, you talked yourself out of it?

01:43:57 Raise your hand, please.

01:43:58 There's a proverb that says if there's no...

01:44:01 The enemy outside do us no harm.

01:44:07 As you look at your goals and dreams...

01:44:10 Every day we must convince ourselves, we must sell ourselves on that it's possible every seminar, every workshop, every book that I've ever read.

01:44:20 Every speaker that I've ever heard, it interrupted what I was believing about myself.

01:44:26 Everything that you do, everything matters as you...

01:44:30 Through each day, I know now as I look back at age 63, looking at my life, everything matters.

01:44:37 T. Harvest Riot, how you do anything is how you do.

01:44:42 The choices I was making was basically how I saw myself.

01:44:46 Let us say together, it's necessary.

01:44:48 Oh gosh.

01:44:50 It's necessary to look at your goals and your dreams.

01:44:54 It's necessary that you have a strategy and a game plan to change the story that you believe.

01:45:00 And that's an ongoing process.

01:45:03 I've discovered that what we do, what we accomplish, what we do as a result.

01:45:10 non è un discurso

01:45:20 When I began to work on myself, I realized that I'm getting out of one story and stepping into another story.

01:45:28 If I become aware...

01:45:30 Some things are still some things I'm not aware of, so I'm still growing, I'm still developing.

01:45:36 I'm like the lady who said, Lord, I hate what I want to be, I hate what I'm going to be, but thank God I shit.

01:45:41 But I realize that you have to work on yourself on a regular basis and write this out for mental mindset.

01:45:50 Ik denk dat ik zelf ook niet kan spelen dat ik gewoon weinig kakker.

01:46:00 Chippin' up to you, man.

01:46:06 Ooh.

01:46:07 I thought I knew myself and I really didn't know myself.

01:46:10 as well as I thought.

01:46:11 I've discovered that sometimes people can take you

01:46:13 to a place within yourself that you can't go by yourself.

01:46:17 The other reason is I was afraid.

01:46:21 I never worked for a major corporation.

01:46:23 I wanted to speak for corporations.

01:46:25 I was afraid I would be exposed

01:46:27 because I don't have a college education.

01:46:29 I felt it.

01:46:30 Maar ik kom constant, elke dag.

01:46:40 Elke dag.

01:46:50 I'm just going to sit here with that.

01:48:10 Or go later.

01:48:23 I want a lot of food.

01:48:46 Let's talk to you.

01:48:53 Yeah.

01:49:20 En dan ga je het net om te passen, en dan ga je het net om te passen.

01:50:21 What is your best throw?

01:50:25 He said, well, I got a good curveball, and I've got a good fastball.

01:50:29 He went on.

01:50:37 I've got a good fastball.

01:50:44 Next year, the World Series.

01:51:00 I have skills and abilities, so kids can take you great places if you develop your...

01:51:11 Thank you so much for those things that come easy to us.

01:51:14 I've always loved to talk to people.

01:51:17 I decided taking this advice to develop...

01:51:34 This is what I do well.

01:51:38 And becoming the best at it.

01:52:00 I grant you that he came to work to develop your gifts.

01:52:04 You'll develop a strong sense of happiness.

01:52:07 You'll get a larger vision of yourself because part of it.

01:52:45 You seesaw.

01:52:53 George Bernard Shaw said there are two kinds of people in life.

01:52:57 Those that make things happen, those that make things happen.

01:53:00 and watch things happen, and those that don't know what happens.

01:53:03 See, a lot of people want to exempt themselves from taking responsibility.

01:53:08 All they want to do is talk about the problem.

01:53:10 Every time you see them, they'll tell you their story over and over and over and over again.

01:53:15 You want to take responsibility for your life.

01:53:18 I got me here. I can get me out.

01:53:20 of this.

01:53:30 except where you are and the responsibility that you want to take yourself where you want to go

01:53:35 you won't be successful because when you

01:53:44 What is that?

01:53:45 What is that?

01:53:46 What is that?

01:53:48 What is that?

01:54:21 And changing your strategy means reinventing your loop.

01:54:26 And you have the power to do that.

01:54:28 You can decide that you're going to...

01:54:30 that you're not going to be a winner!

01:55:19 in his suffering.

01:55:20 All the answers are in there.

01:55:30 When there is a challenge, I mean any life, any challenge, anything that you're facing

01:55:38 the only...

01:55:41 the challenges that

01:56:02 Now it sounds ridiculous, there's more...

01:56:10 You can't give away what you don't have.

01:56:13 People who are not good at giving away love.

01:56:18 Give away love?

01:56:22 If I want to give you, unless I go out.

01:56:30 I've got 12 oranges someplace.

01:57:00 There are many ways to get the things that we want for ourselves in our lives.

01:57:13 I think are perhaps the most important things that we can learn.

01:57:20 master in our lives. This old proverb notion that I become what I think about, to know.

01:57:30 That what you think about, you start getting really tired thoughts to be on everything.

01:57:46 with your life.

01:57:50 Oh

01:58:00 No one knows enough, each and every one of us.

01:58:51 Grazie.

01:59:03 Thank you very much.

01:59:10 We hebben een soort van plekeren, hè?

01:59:12 Ja, precies.

02:00:49 Das.

02:00:50 Yeah

02:01:25 I like you.

02:01:33 Подожди, папа, лайфхакосов, я вот как это делаю.

02:01:40 I don't need to say it for him.

02:01:58 Amen.

02:22:13 ありがとうございました

02:24:42 Gracias.

02:26:21 Gracias.

02:29:51 ありがとうございました

02:32:44 Thank you.

02:37:32 Yeah.

02:37:43 I love this.

02:37:54 Thank you.

02:38:01 That was a sick bitch hot.

02:38:10 Thank you very much.

02:38:22 I know.

02:38:40 basic training

02:39:02 That ship would dream up the world, out there at sea, and would never end up anywhere.

02:39:07 This is exactly the greatest in real life.

02:39:10 If you don't have a vision, it just drifted around.

02:39:14 You're not going to be happy.

02:39:15 This is why it is so important that you have that vision.

02:39:22 After the Second World War, Austria and Germany lost the Second World War, and the problem...

02:39:30 Everyone was so depressed because the world is everywhere, there was a post-depression, there was a terrible economic situation, there was an element of starvation.

02:39:41 And it was good.

02:39:51 E o que você está fazendo é o que você está fazendo.

02:40:04 Ja, das ist gut.

02:40:10 What's your doing for him?

02:40:20 be the best thing if you make a mistake.

02:40:32 They always took a lot of sacrifices, though, isn't it?

02:40:42 Воскресенье

02:40:54 I have a good one.

02:40:56 Oh.

02:40:57 Oh.

02:41:03 Dank u wel.

02:41:13 Salud.

02:41:37 The next best predictor of life.

02:41:41 I don't know what to do.

02:42:00 You can't see what happens with regards to your...

02:42:44 Das...

02:42:51 I don't get it, pussy.

02:43:13 your friendships.

02:43:20 outside of your job, mental, physical, mentalism, your drug and alcohol use, because that's a good place to offer.

02:43:45 associates

02:43:53 Yes

02:44:03 Your incentive reward system.

02:44:10 If it works is that it works if...

02:44:30 Русс.

02:45:00 If you say, oh.

02:45:20 The next question might be worthwhile things.

02:45:32 It's valuable approachable analysis of the sub-components of human existence.

02:45:40 or all these things.

02:45:52 Whoa.

02:46:23 Канки-шифты, конечно.

02:46:31 What do you mean? What do you mean?

02:46:33 It should be.

02:46:42 Danke sehr, liebe Sie.

02:47:04 You don't want to know when I fail because that's painful.

02:47:06 So I'll keep myself blind about when I...

02:47:10 I'm fine, except we fail time then.

02:47:20 I would recommend that you don't let that happen.

02:47:22 So that's willful blindness, right?

02:47:24 You could have known, but you chose not to.

02:47:26 Okay, so once you get your goal structure set up,

02:47:29 you think, okay, if I...

02:47:40 Obviously, such that it's considered.

02:48:01 something like the schedule.

02:48:13 Come on, this is why I don't like this.

02:48:50 I insist upon it.

02:49:10 responsibility and all the far behind you are.

02:49:20 What's the right?

02:49:30 Okay, so I want you to work for me.

02:49:32 You might say, okay, well, what are you...

02:49:50 Do not tyrannize yourself!

02:50:10 Zero

02:50:20 for God's sake.

02:50:30 So that's one way that you can...

02:50:52 count yourself.

02:51:00 You know, for you.

02:51:01 What do you want to do when you hire someone else to meet?

02:51:33 such a

02:52:20 to have had that.

02:52:50 That's how you pick.

02:53:00 You're denunciating in your...

02:53:10 Okay, let's call that a bass point.

02:53:30 exist in a place.

02:54:10 Obrigado.

02:54:23 I can hardly stand it.

02:54:32 Oh, man.

02:54:40 I can have some room.

02:54:41 You'll be so thrilled to work.

02:55:32 that's the first no that's not gonna happen

02:56:11 It is.

02:56:20 So, okay, conscientious...

02:56:40 one of them and say, you know, I know someone who cares.

02:56:50 and this is

02:57:01 Try to surround yourself with people.

02:57:40 ¡Ext!

02:57:50 Nothing worse happened to them once.

02:57:53 Conversation.

02:58:20 to tell someone.

02:58:32 You know, it's like...

02:58:41 You've got to surround yourself with the...

02:58:50 I'm going to lie in this way.

02:59:00 but I would say it's also a beat.

02:59:11 or facility, or you might say, well...

02:59:21 It's like...

02:59:40 Do safe.

00:00:00 I'm sorry.

00:00:12 So, it's not me, and that's often very...

00:00:21 the roots started to take a rest, it's like...

00:00:30 Yeah.

00:00:41 Thank you.

00:00:51 sends a message to the speakers and then the speakers send out the message.

00:01:00 you get this how to destroy the system.

00:01:23 But now I can say, yeah.

00:01:40 Because one of the things you guys are going to do is...

00:02:00 It's logical.

00:02:28 It is.

00:02:35 Oh man...

00:02:47 on your life.

00:03:14 I don't know if it's bad.

00:03:28 Don't

00:03:32 Gracias.

00:03:43 It's actually...

00:04:26 One of the things that we can do is

00:05:07 or perhaps a financial problem, look at that.

00:05:12 for what it is, but what's blocking you from getting you from acting?

00:06:22 You happen to become your rod and your staff.

00:06:35 Yeah, I know.

00:07:11 You will discover some things about yourself and will begin to electrify your worst life.

00:07:27 It's a wondrous thing.

00:07:37 Jullie denken echt dat wij gelukkig doen.

00:07:40 Il peut être quelque chose de très simple.

00:07:50 No, I need to be here, and this is the level I will move away, okay?

00:07:54 That's not right.

00:08:05 Sous-titrage ST' 501

00:08:16 Yeah.

00:08:20 Thank you.

00:08:40 Thank you.

00:08:50 Ah, I don't know what to do, I don't know what to do, I don't know what to do, I don't know what to do.

00:09:00 Oh, god, god, god

00:11:17 your best friend

00:11:26 champion and someone who's forgotten is that champion

00:11:30 shows up, that's the only thing, every day shows up, gives up a chance to make a difference.

00:11:40 Because success doesn't know these things about cold or early or tired, it doesn't know if you showed up for a night.

00:11:47 For some of you, when you...

00:11:50 Я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я не знаю, я знаю, я знаю, я

00:14:50 of ways that you need to...

00:14:52 Fun.

00:15:10 protect yourself and that's how it feels in the moment you think I'm just

00:15:15 planning for the worst-case scenario I'm thinking through all the ways that

00:15:18 something could go wrong

00:15:21 I'm not understanding that what you're doing is focusing on all the ways that it could go wrong.

00:15:26 They're imagined futures.

00:15:27 They are not real.

00:15:28 And in that, like a race...

00:15:32 Where the eyes go, you will go where your thoughts go.

00:15:35 You will become your thoughts.

00:15:37 So instead of boxing yourself in.

00:15:40 And thinking only about all the different ways that something could be bad, could break, could fall to pieces.

00:15:47 Think about all the things that you could do if you take it.

00:15:50 All the myriad ways that things could come to your aid and work out for the better.

00:15:55 Obsessively think on that and let failure be a total surprise.

00:16:01 You will take the actions that you need to be successful, but first, train yourself to access over all.

00:16:12 Right

00:16:24 You got to put your whole self in.

00:16:30 You got it, no TV.

00:16:32 There were those of you who were watching the game last night,

00:16:34 you really didn't have no business watching these boys win a national title

00:16:38 and going to the NBA.

00:16:42 because you're not where you need to be, right?

00:16:47 Some of y'all don't have no business watching a basketball game

00:16:49 because you're not where you need to be.

00:16:53 If you put your whole stuff in and got a 1.5, I'm loving it.

00:16:55 You can do three years from now, that's 1.5,

00:16:58 but I'm going to turn it to a 2.5.

00:17:07 I need cell phones off.

00:17:15 He's going to be broke for the rest of the cell phone.

00:17:20 So you've got three to study like you've never studied before.

00:17:23 I can do a all night long study.

00:17:30 We hear me say this all the time.

00:17:31 But some of you listen to it.

00:17:32 I've heard what I said before.

00:17:36 This is when you come here because you've got gear on.

00:17:39 But you know.

00:17:50 We've got like seven, eight folks living in my house.

00:17:53 And it ain't no real room for you when you go back.

00:17:55 This your opportunity to blow up.

00:18:00 But we know the reality for some of us where we live.

00:18:06 They're taking our phones working two or three jobs for you.

00:18:16 So I'll be here for the next one.

00:18:22 Even you say, Eric, look, man, you don't understand.

00:18:30 Because, you know, I want English three times, like the basic one.

00:18:36 So listen to me, I need you to say.

00:18:45 Listen and listen well.

00:18:48 The words are ever going to be.

00:18:52 You can do anything you want without limitation, whatever it is that you decide you want to make come true.

00:19:02 It is going to take an inhuman amount of work.

00:19:04 You're going to have to be prepared to break yourself in half.

00:19:06 You are going to have to learn more than anyone has ever learned.

00:19:08 You're going to have to push yourself hard.

00:19:10 has ever asked you to push yourself before.

00:19:13 You're gonna go way beyond your breaking point.

00:19:15 You're gonna run until you vomit.

00:19:16 You're gonna study until you fall asleep.

00:19:18 You're going to push.

00:19:20 Ja, maar wij hebben solo per programma, wij hebben een soort andere track, maar dit is allemaal...

00:19:30 In de wegleefd, ja precies.

00:19:40 If you don't do the unending, breaking work of developing yourself into something greater,

00:19:48 the world is going to pass you by.

00:19:50 are going to own it are going to ones that did that work and the one promise that i can make you

00:19:55 right now is that somebody somebody out there's out

00:20:00 Oh, een beetje zichzelf.

00:20:04 Het is gewoon...

00:20:06 Kijk.

00:20:08 Krijgen hangen.

00:20:10 And getting up, and getting better, and pushing themselves, and triggering that glorious adaptation response that makes humans the game next to someone right now.

00:20:20 you know they're putting in that work

00:20:22 the future is going to belong to them

00:20:26 as Martin Luther King Jr. said

00:20:30 Poi mettere il porto...

00:20:32 ...e un porto...

00:20:34 ...e un po' di sarebbe trovato il penato...

00:20:36 ...e un po' di sottotitolo dentro...

00:20:38 ...le braccio su...

00:20:44 make excuses it's not going to slow people down it's not okay to ask the world to stop so that you

00:20:49 can step out

00:20:50 It's not okay to expect little of yourself and demand great rewards.

00:20:56 The only thing that's okay is to be in line with the way that the...

00:21:00 And if you want to be great, you've got to become capable of greatness.

00:21:04 You've got to develop your skill set.

00:21:07 You've got to take what you have now.

00:21:12 bring yourself ever forward to a vision of yourself that is so clear and so specific that

00:21:18 nothing could not

00:21:27 No matter what anybody says, no matter how many...

00:21:32 throw dirt on you try to stop you try to knock you down no matter how many people come for you

00:21:37 at night while you sleep you will

00:21:56 So if you want a f***ing future that makes you happy.

00:22:02 Get your ass out there and earn it.

00:22:04 That's what I gotta do.

00:22:06 I gotta take a leg out your ass.

00:22:08 I'm close.

00:22:10 The chicken would do something.

00:22:20 the better you be coming.

00:22:23 All right, bro.

00:22:24 You think that when we look up the people

00:22:27 that they were just like giving this God-given...

00:22:31 born with talent, that they were born, a comedian was born really funny, and that a

00:22:40 It looks like you can grade on the mic if they want it.

00:22:45 And the reality is that this is just a matter of condition.

00:22:50 Stepping outside your comfort zone and through that anxiety, through that fear of everybody's...

00:00:01 Kanker ziekte man.

00:00:10 That's a little piece of wrap it right around there.

00:00:20 Good college.

00:00:32 De hele tijd die droevige kanker achterblijft.

00:00:36 Dat moet je allemaal doen.

00:00:40 outside in the beginning and just kept putting themselves out there, failing, failing, mistakes,

00:00:47 mistakes.

00:00:50 That news anchor, over and over again, just Protestant made a lot of mistakes through their

00:00:56 regime, but they just did it.

00:01:00 over and over again, and eventually...

00:01:10 Something because of all the effort they put in before them.

00:01:13 Yeah.

00:01:14 Okay.

00:01:15 They don't come really good at something for them.

00:01:18 They decided to put the effort they put in.

00:01:20 That's not how it works. This world is taking 50, but you have to kill.

00:01:31 The stuff is in the Bible for nothing.

00:01:41 write about it because they know that that's the way that life works.

00:01:50 We're allowed to close off from town, but we've got to go all up first for it to calm down.

00:02:07 to get over the harvest again.

00:02:10 To really put yourself out there, step outside of your comfort zone, you will feel discomfort, you will feel fatigued, you will feel exhausted.

00:02:21 it's not what it's going to be like forever because that's what you need to do that's what

00:02:26 you need to understand going into is that the beginning

00:02:33 probably squat in skyscraper.

00:02:35 So the foundation of...

00:02:37 What kind of stuff don't...

00:02:40 that any other wolf, but once you do...

00:02:51 Then the skyscraper goes up really fast, if you've ever seen it.

00:02:59 And that's the...

00:03:00 You could do.

00:03:10 ...study, study, show the first part of the time of the first five days, once you die, once you get over that...

00:03:22 And then you're...

00:03:30 Stress goes away.

00:04:15 What? What is the pair in this?

00:04:23 5.14 miljoen euro per buurt.

00:05:23 Thank you.

00:05:30 Thank you.

00:32:40 Yeah.

00:32:52 That's good.

00:33:12 Hmm

00:33:23 Het gaat niet om dat nummer per se, het gaat om het naadwerkelijk zeg maar.

00:37:35 Ik wou ze natuurlijk ook nog proberen en spelen met.

00:37:43 Ik ga dat maar lekker zelf proberen.

00:37:51 I'll pay this.

00:38:06 Huh.

00:40:32 Добавил субтитры Алексею Дубровскому

00:40:50 Dat jullie zijn niet eens überhaupt geklazen.

00:40:55 Dat is een raar voor de achterblok.

00:41:04 ありがとうございました。

00:41:13 All right.

00:42:02 What?

00:42:03 Heh.

00:42:23 En die allemaal.

00:42:24 Dat is.

00:42:25 Van.

00:42:30 Yeah, I see that.

00:42:32 Ah, yeah, that's what I like to do, guys.

00:42:35 Yeah.

00:42:40 Krank is ziek man.

00:42:51 Dit is echt kut.

00:43:02 Esa no va a pasar a veces.

00:43:04 Acá es.

00:43:10 Is er echt daadwerkelijk geprogrammeerd voor dat ik alleen maar troevige...

00:43:20 ankelaaiers. Dan is alles eraan goed, dus we moeten volgen.

00:43:30 Als we het op de simpele kankerziekte houden.

00:43:34 Ja, daar zitten wij in het tussendoog over.

00:43:41 Eh, less divisible than you'd think.

00:43:46 Dat dakje zie ik.

00:43:50 Dat dacht je ook, ja, ja, ja, maar dan moet je, eh, kanker, dan moet je.

00:44:00 Want alles is ziek. Dat. Want ik heb daar op een gegeven moment met mijn sigaretten zo'n lijst.

00:44:10 Paarse bladen hadden we het aangeraakt.

00:44:14 En toen ging de plantje dood.

00:44:17 Hoeveel keer dat ik langskwam, waar het plantje dood.

00:44:21 Nou, kijk hier. Oh, dan leiden ze met chemukaan.

00:44:24 Ja, er worden niemand te eten en is alles naar de kanker aan het gaan.

00:44:29 Ja, kijk dat.

00:44:30 Ik ga niet wachten tot ik weer ben van Aijbergen.

00:44:40 Nee, gewoon niet tegen.

00:44:42 Dan ga ik lachen.

00:44:46 Ja, dat is ook prima.

00:44:48 Maar dan kan ik niet meer lachen.

00:45:15 Elke veranderdeel bij zit.

00:45:20 Het gaat nog beter.

00:45:27 Het is letterlijk een...

00:45:32 Nou ja, dat vind ik.

00:45:34 Behalve dat je weet zijn dreigse bed, zijn gelozen dreigse bed.

00:45:46 All right

00:46:41 En dit is...

00:46:49 Dit is haar...

00:46:54 Want het is de hele kakkerje.

00:47:00 Continueren we in de gamberant, we're all constant and innocent, prinkle, nakel.

00:47:17 I know it's in a lot of rooms.

00:47:21 Yeah.

00:47:30 Ik moet die license even aanpassen.

00:47:40 on.

00:48:05 Good

00:48:32 Black and white, the financial interface, there's a reasonable voice here.

00:48:40 Hey, sorry, wine entertainments.

00:48:43 Er wacht steeds al in de Enterprises.

00:48:48 Kankerweeers.

00:48:50 Ja, daar komen we weer op, ik heb al een andere opwaardiging, niet de symboolische dingen.

00:49:04 Dat is een kut, sorry. Gewoon dat.

00:49:11 Ik ben een lief persoon.

00:49:13 Ik heb wel lief.

00:49:16 Het valt te moeilijk uit.

00:49:21 Die door de leventakwensen zijn aangewezen.

00:49:40 Как все это было?

00:49:47 Да, иди, иди

00:49:50 Het kost me de hele dag en mijn nek en mijn hersenen zichtbaar.

00:50:00 ...komt uiteindelijk over m'n lichaam, we hebben m'n tijd doorgebracht, toch?

00:50:04 Ik weet niet, ik weet niet hoeveel levensgevaren ik geloven heb.

00:50:11 Maar best wat.

00:50:13 En dan kan ik ook nog eens weten dat ik ook moeilijk was.

00:50:27 I don't know, but I don't know.

00:50:35 Vielen Dank.

00:50:42 Because it's easy to go and think about this.

00:50:50 Yeah, it was a big workflow.

00:51:01 Good

00:51:24 Hm, gar nicht.

00:52:05 Voilà, j'étais juste en temps.

00:52:10 Ik weet niet of je denkt dat ook maar die hebben vluchtgelegd en dus ook IP's en zingen enzovoort.

00:52:17 Die hebben niet alleen nooit, die hebben een verhaaltje gehad.

00:52:20 Nou op kankeren letterlijk, ergens naar Monaco ofzo, ergens in een fucking appartementje en ga gewoon sterven.

00:52:26 Nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee, nee.

00:52:30 Petenten en dingen enzovoort, heel waard.

00:52:33 Maar wat dit dan wel waard, we hebben ze het allemaal helemaal over, toch?

00:52:47 If we, if we, if we, if we, if we, if we, if we, if we, if we, if we, if we, if we, if we, if we.

00:52:50 There's one substantial application we did to write a program.

00:52:54 Philip Grossovy applied for it, but the Central Frontier currently supplied by major.

00:53:02 digital platforms and extend these functions throughout the life cycle of physical systems from design and manufacture.

00:53:10 to reuse, maintenance, reuse, and recovery.

00:53:17 Hon.

00:53:20 Ja, ik bedoel deze fouten met de surrelation economisch, toch?

00:53:34 Dit is echt kanker. Iedereen valt wat te houden toch?

00:53:40 Good day.

00:53:41 Can't cry.

00:53:42 Can't cry.

00:59:53 Подаркфуд.

01:00:05 Gracias.

01:00:10 It did.

01:00:28 Yeah

01:00:52 Growing from the financiers of colonization in the earliest days of extra solar travel to inseparable pillars.

01:01:00 of interstellar society the rise of the so-called mega corporations was a development that many

01:01:06 barely noticed was it the wealth of dozens of worlds that led

01:01:10 to the creation of such dominant entities, or was expansion across the stars simply a

01:01:15 side effect of their perpetual growth? Regardless of whether power begot wealth,

01:01:20 or wealth begot power, none could deny the influence of these modern merchant kings.

01:01:26 On colonies across the frontier, entire populations were...

01:01:30 "...completely dependent upon a single conglomerate for their current livelihood and future prospects, for the food they ate and the air they breathed. These megacorporations..."

01:01:40 operated without oversight, free to pursue their own agendas, to keep their own secrets,

01:01:46 and none kept more than Weyland-Yutani.

01:01:50 While the company was officially founded in 2099, resulting from the largest corporate merger in history,

01:01:56 the vision for what Weyland-Yutani would one day become was...

01:02:00 in a dramatic fashion over seven decades earlier.

01:02:03 In a now-legendary conference talk, Sir Peter Weyland of the eponymous Weyland Corporation

01:02:10 to change the world. Although even at the time of this declaration, it could be argued he already had.

01:02:17 Since its founding in 2012, the company

01:02:20 The company had achieved extraordinary success with tremendous breakthroughs in renewable energy, climate change, cancer research, and weapons development.

01:02:30 ambition of the Weyland Corporation matched that of its founder. For the

01:02:34 remainder of the century, the company not only kept up with the rapidly

01:02:38 accelerating pace of technology...

01:02:40 but seemed to set the standard by which progress was measured.

01:02:45 Each year brought new discoveries and new acquisitions.

01:02:49 Atmospheric process

01:02:50 powered exoskeletons, aerospace craft and vehicles intended for use off-world,

01:02:55 automated surgical stations, and cybernetic individuals complete

01:03:00 indistinguishable from their human counterparts. It was this latter

01:03:04 development that brought Weyland Corp. into direct competition with the

01:03:08 Yutani Corporation.

01:03:10 whose own developments into synthetic lifeforms sparked a series of patent disputes between the two megacorporations.

01:03:17 These would eventually be resolved in Wayland...

01:03:20 favor paving the way for the hostile takeover of their competitor now fully

01:03:25 in control of assets and capital that nearly rival those of the largest

01:03:30 sovereign states, the newly rechristened Weyland-Yutani quickly became the primary supplier

01:03:36 of humanity's extrasolar colonization efforts.

01:03:40 Atmospheric processing plants were the backbone of this endeavor

01:03:43 immense automated pieces of machinery that could convert an inhospitable atmosphere to one case

01:03:50 of supporting human colonization in just a few decades.

01:03:54 Entire company towns would spring up around these structures.

01:03:58 Its citizens employed by...

01:04:00 Weyland-Yutani to oversee day-to-day maintenance or provide amenities to the

01:04:04 primary workforce. Such settlements were often referred to as shake-and-bake

01:04:09 colonies.

01:04:10 due to their quick construction and nearly immediate self-sufficiency.

01:04:14 While most worlds would eventually be turned over to various governments upon completion,

01:04:20 Others were intended purely to serve the needs of the company.

01:04:23 These were mainly large-scale mining operations, but also included research outposts and even privately-owned

01:04:30 penal colonies. In addition to its predominant status in the civilian sector, Weyland-Yutani

01:04:36 was also heavily invested in the interstellar arms market.

01:04:40 Despite its origins as a British and Japanese conglomerate, the company was one of the chief suppliers of the United States Colonial Marine Corps, as well as the other...

01:04:50 branches of the United America's Allied Command. The company manufactured everything from the

01:04:55 sidearms used by Marine Corps personnel to the massive starship.

01:05:00 that carried them into battle. The close relationship the company enjoyed with the

01:05:05 military of the United Americas was one of Weyland Yutani's most controversial

01:05:10 aspects. Critics at the time often argued that it was difficult to distinguish whether

01:05:15 Weyland Yutani worked for the military or if it was the other way around.

01:05:20 This view was supported by events such as the campaign on Cristobal, in which the USCM was deployed ostensibly to remove the dictator Hetos from power.

01:05:30 but was later revealed to have been the pretext by which the Amarc Corporation

01:05:35 was allowed to secure the world's economic assets.

01:05:40 United America's Allied Command never operated so openly in favor of Weyland-Yutani.

01:05:46 The company's overwhelming involvement in the military-industrial complex

01:05:50 when compared to rivals like Amarc, meant that such a relationship almost certainly existed.

01:05:56 At the very least, Weyland-Yutani officials would routinely accompany

01:06:00 any colonial marine forces fighting on company property, serving as local advisers.

01:06:06 Weyland-Yutani's position of power allowed it to operate

01:06:10 in many legal grey areas, exploiting loopholes and ignoring local ordinances without fear

01:06:16 of serious repercussions. It was common knowledge even within the

01:06:20 company's lowest levels that the conglomerate was highly corrupt bribes frequently replaced

01:06:25 paperwork and many of their ships and facilities were never forced to undergo

01:06:30 safety inspections or reviews. There even existed a special private security force,

01:06:35 one equipped with military-grade hardware and tasked with the protection

01:06:40 of the company's most sensitive assets.

01:06:43 To what degree the United Americas

01:06:45 and other major governments were complicit

01:06:47 in this state of affairs has never been proven.

01:06:50 But leaked information reveals that the company had a deep interest in pursuing top-secret research into dangerous or illegal fields, the applications of which...

01:07:00 would have dramatically upset the balance of power in favor of whichever group made use of them.

01:07:06 These secret projects dated back to the era of the Weyland Corp.

01:07:10 apparently stemming from the directives of Peter Weyland himself.

01:07:14 How such projects might have been involved in the disappearance of the USCSS Prometheus

01:07:20 and USCSS covenant in the earliest days of the colonization era has never been fully explained,

01:07:26 but a pattern has emerged across the decades and centuries.

01:07:30 one that had apparent ties to Weyland-Yutani's bio-weapons division.

01:07:34 The Prometheus and Covenant were only the first in a long line of missing or destroyed ships.

01:07:40 vessels, and colonies that would eventually include the Nostromo,

01:07:43 Sevastopol, Sulaco, Hadley's Hope, and Fiorina 161, and many others.

01:07:50 The nature of these incidents remain classified, but the evidence suggests that Weyland Yutani found something of great interest, or perhaps something found in interest.

01:09:10 solar travel, to inseparable pillars of interstellar society, the rise of the so-called megacorporations

01:09:16 was a development that many barely noticed.

01:09:20 Was it the wealth of dozens of worlds that led to the creation of such dominant entities,

01:09:24 or was expansion across the stars simply a side effect of their perpetual growth?

01:09:30 Regardless of whether power begot wealth or wealth begot power, none could deny the influence of these modern merchant kings on colonies across the frontier.

01:09:40 entire populations were completely dependent upon a single conglomerate for their current livelihood and future prospects

01:10:06 corporate merger in history, the vision for what Wayland Uteni...

01:10:10 would one day become was affirmed in a dramatic fashion over seven decades

01:10:15 earlier. In a now legendary conference talk, Sir Peter Weyland

01:10:20 the eponymous Weyland Corporation, promised to change the world. Although even at the

01:10:25 time of this declaration, it could be argued he already had.

01:10:30 Since its founding in 2012, the company had achieved extraordinary success

01:10:34 with tremendous breakthroughs in renewable energy, climate change, cancer research, and

01:10:40 weapons development. The limitless ambition of the Weyland Corporation matched that of

01:10:45 its founder. For the remainder of the century, the company not only kept up

01:10:50 with the rapidly accelerating pace of technological development, but seemed to set the standard

01:10:55 by which progress was measured. Each year brought new discoveries and new ideas.

01:11:00 acquisitions, atmospheric processing, powered exoskeletons, aerospace craft and vehicles

01:11:06 intended for use off-world, automated surgical stations.

01:11:10 and cybernetic individuals completely indistinguishable from their human counterparts.

01:11:16 It was this latter development that brought Wayland Corp. into direct...

01:47:00 The tech is bad.

01:47:02 It actually attempts to be viable.

01:47:10 completely shift the paradigm is that

01:47:20 new piece of code or you know launches with escaping requires building a massive

01:47:26 interconnected and institutional

01:47:31 massive. We are going to explore how replacing tech giants actually means

01:47:36 pouring thousands of tons of...

01:47:40 laying subterranean fiber optic cables completely rethinking how human beings

01:47:50 So how does this document propose we finally build our own house instead of, you know, just endlessly renting from these...

01:48:00 we first have to map the exact topography of the current landscape, right?

01:48:04 Okay, let's unpack this. Where do we start?

01:48:07 We need to look at what CluDeVite calls the organizing decision.

01:48:10 the organizing decision right the document explicitly targets the

01:48:15 replacement systems in the text you'll see the shorthand

01:48:24 the ones that

01:48:30 The analysis expands this concept along with.

01:48:40 of the search engines and social media institutional systems okay so by

01:48:47 restricted systems we're talking

01:48:51 Basically to not afford to fail or become sovereign national operas.

01:49:00 critical hospital infrastructure.

01:49:02 High-stakes stuff.

01:49:05 ...the document highlights is that both of...

01:49:10 and the highly restricted institutional systems.

01:49:12 They rely on one single physical foundation.

01:49:15 Okay, I want to make sure I'm visualizing this correctly.

01:49:17 Sure.

01:49:18 You're saying that like a highly...

01:49:20 Classified military operation and my personal photo storage might be running on the exact same

01:49:30 the compute power and the massive data centers. Industrial operators own the

01:49:34 physical facilities. Public authorities hold the legal mandates.

01:49:40 to operate in a specialized environment.

01:49:50 Consider the U.S. Department of Defense's joint warfighting cloud capability.

01:49:55 Okay.

01:49:55 That sounds...

01:50:02 Right, you think they built their own secret bunkers for that?

01:50:05 You would think.

01:50:10 the contracts to Amazon Web Services.

01:50:20 But if a restricted sovereign the same police

01:50:30 power grids as a public platform aren't they inherently compromised from day one

01:50:35 good it feels like putting a highly secure state of

01:50:40 art titanium inside the lobby like sure you're

01:50:50 But the bank owns the building, if the bank catches fire or if the bank manager just dissolves the branch and demolishes the building, you're tight.

01:51:04 It is a critical loss of sovereignty.

01:51:06 Terrifying.

01:51:10 It's just about a consumer deciding to migrate a popular search engine because...

01:51:24 the exact same search algorithms compute

01:51:30 But governed by completely different rules.

01:51:32 Entirely different access rules and legal accountability.

01:51:36 Right now, a visible application might look completely independent on your screen.

01:51:40 And the software has a different logo.

01:51:52 highly concentrated in the hands of a few commercial giants so the government might write

01:51:56 the laws and have the legal authority on paper but the tech giant

01:52:00 physical capability to execute the function.

01:52:03 Precisely.

01:52:04 And the document argues true sovereignty or resilience.

01:52:13 you do not have ultimate physical control over.

01:52:16 So what's the fix?

01:52:17 Do we just build a new monopoly?

01:52:18 No.

01:52:20 Strategic response proposed here, operable regional note, the goal is in one giant new

01:52:30 It's a network that can exchange services securely while surviving local disruptions.

01:52:35 Okay, but let me push back on the mechanics of that.

01:52:38 Sure.

01:52:38 Because if public...

01:52:40 commercial systems and restricted institutional systems have to share the same fiscal

01:52:50 How do we track and manage that reality without mixing their data or compromising their authority?

01:52:55 It's a huge challenge.

01:52:56 Like, if a server running classified data starts...

01:53:00 How does a civilian maintenance worker know the server needs a new fan without also seeing the cloud?

01:53:10 complex has to make a secure better

01:53:20 A new language.

01:53:21 Mike, as Pronto or something.

01:53:22 No.

01:53:23 A physical language.

01:53:24 This part of the document completely reframe.

01:53:31 Because we are so conditioned to think of economics purely in terms of currency right dollars euros yen money

01:53:40 moving from one column in a spreadsheet to another but this strategy argues that

01:53:43 tracking money is fundamentally insufficient we have to track this

01:53:50 Yes. The strategic object of this entire endeavor is an operating ecosystem connected by a common physical language.

01:53:58 And this is grounded in a highly specific...

01:54:01 Yeah, I saw those in the text.

01:54:04 You see names like

01:54:10 I have to admit, those sound like ancient artifacts from a science fiction novel.

01:54:17 Let's open the hood on these models.

01:54:18 What do they actually...

01:54:20 They sound esoteric, but their function is deeply grounded in industrial reality.

01:54:26 Instead of merely recording, these models are mathematical.

01:54:32 physical states. Physical states, so not

01:54:34 geometry.

01:54:40 state of the material so contrast that with how a normal business operates

01:54:50 Like, if I run a data center and I buy electricity, what happens?

01:54:54 Well, in our current system, your accounting software records a financial transfer

01:54:58 for a certain amount of capital.

01:55:01 Right.

01:55:02 So the ledger is satisfied.

01:55:03 So that ledger has absolutely no idea what happened to the electricity itself.

01:55:10 It's just a dollar amount.

01:55:11 Exactly.

01:55:12 I don't know if the electricity was used to compute it to cure for cancer.

01:55:15 It was wasted by an inefficient system.

01:55:18 Or if it generated excess heat...

01:55:22 Okay, so Clotenbox models change that.

01:55:24 The models provide equipment physically.

01:55:40 It tracks the physical movement of a substance.

01:55:42 It's tracking the atom.

01:55:50 ...the fields they operate in, and the specific events that alter them.

01:55:53 There's this highly detailed example in the tab that really grounds this.

01:56:00 abstract math in a very physical. The document sizes of this theoretical facility.

01:56:10 ratio. So to actually deliver a hundred, what, eighty-seven point

01:56:21 which translates to the facility consuming 766.5 gigawatt hours of electricity annually.

01:56:27 That is a massive amount of power.

01:56:29 It is.

01:56:30 And the strategy uses that specific example to illustrate a concept called power-conjugate-interconnection.

01:56:36 Power-conjugate-interconnection. Okay, break that down.

01:56:40 this is the moment where physical coupling becomes a tangible echo during this federation

01:56:47 decides they need to expand

01:56:50 In a traditional corporate system, the finance team looks at...

01:57:00 based on past happen.

01:57:04 Exactly.

01:57:10 the model automatically exposes the exact physical consequences of that expansion across the entire region.

01:57:16 So it's not just a bigger utility bill?

01:57:18 No, it doesn't just show you.

01:57:23 on the specific geometry of the building.

01:57:30 identifies the exact heat.

01:57:40 If you are generating 25 megawatts of heat, that is a massive value.

01:57:47 But hopefully it has somewhere to put it.

01:57:50 exactly and the model dictates that economic benefit only follows if there

01:57:54 is a verified physical receiver for them like who is there a nearby industrial

01:58:01 that needs thermal energy.

01:58:02 Is there a district heating network for residential homes?

01:58:05 Oh, I see.

01:58:06 Those fiscal consequences must be matched.

01:58:10 before the data center project is ever seen.

01:58:13 So you can't just...

01:58:20 Let me try an analogy to see if I'm grasping the scale.

01:58:30 Imagine trying to run a commercial bakery, but your financial accounting software is literally

01:58:35 hardwired to the internal thermometer of the oven and the weight sensors on the flour silos.

01:58:40 this okay so if your financial ledger claims that you banked 10 the weight sensor on the

01:58:50 that no flower was actually removed and the oven thermometer proves the oven never turned on

01:58:54 exactly the software immediately flags the profit as physically impossible yes you cannot fix

01:59:01 do not literally add up in the room.

01:59:04 ...phenomenal way to visualize.

01:59:07 The physical state of reality becomes the common language.

01:59:10 that binds them.

01:59:12 It's so concrete.

01:59:13 It is.

01:59:20 or a material change in a factory, the system permanently retains the physical medium.

01:59:24 This is to mash everything into a single easily manipulated dollar.

01:59:30 Exactly and the muck tube structure than these models that strange thing we mentioned earlier. He adds another layer of sophistication

01:59:40 response laws based on changing internal conditions.

01:59:50 The system starts degrading over time. The model doesn't wait for a hue to notice on a clipboard.

01:59:54 It knows.

02:00:00 Which that automatically informs future engineering limits and maintenance schedules across the entire network.

02:00:05 Okay, I see the brilliance of tracking reality perfectly. It's bulletproof.

02:00:08 It is.

02:00:10 This is a massive logistical wall, but does our new-

02:00:20 Federation need to literally own every single power plant every subterranean fiber optic cable and every server rack in the world

02:00:26 Because building a completely parallel physical earth sounds

02:00:30 That just sounds like creating a trillion dollar monopoly just slightly different flavor attempting to own

02:00:40 mistake.

02:00:41 Okay, good.

02:00:50 highly so how did they get around it this brings us to a framework the document called the matrix

02:01:00 my understanding of what it means to control.

02:01:01 Walk us through the options.

02:01:13 ways you must apply this decision matrix to every single layer of the

02:01:26 We can actually take on the Virgin.

02:01:30 You choose to own an asset only when it is strategically scarce, long-lived, maintenance, and life cycle.

02:01:41 downside to owning a huge downside even warns that ownership carries a heavy if you own the

02:01:50 finance, it's constrictive, it's physical.

02:01:59 What does it mean?

02:02:00 You choose to operate an asset you don't actually choose to operate an asset you don't actually choose to operate an asset you choose to operate an asset you choose to operate an asset you

02:03:40 So if I am pulling this all together,

02:03:45 group control in this federation isn't a title deed

02:03:50 No, not at all.

02:03:51 True control is the strategic, undeniable freedom to deliver a service.

02:03:57 The framework asks these really...

02:04:00 piercing, practical questions for everyone.

02:04:10 what actual physical stock of spare parts is needed.

02:04:21 the concrete inside it.

02:04:30 And I have a happily tested reverse implant.

02:04:39 You do not.

02:04:41 Concrete completely different way of thinking about her, but I have to challenge the vulnerability of the

02:04:50 Okay, lead on.

02:04:51 If we rely heavily on partnering and contracting for our basic needs, aren't we just outsourcing

02:04:57 our vulnerability?

02:04:58 That's a delicate...

02:05:00 like aren't we just swapping our dependent sickle supplier right if we

02:05:07 don't own the power plant and the regional power

02:05:10 company decides to cut us off or it's physical partners.

02:05:21 It is a critical vulnerability.

02:05:23 Which are?

02:05:30 Alternative, common physical semantics, which we discussed earlier, node contracts for energy.

02:05:40 they know exactly the quality and the generations worth.

02:05:44 They can't be tricked.

02:05:48 Dependency map.

02:05:50 Dependency map. Yes, your contracted partners secretly rely on the exact same upstream supplier.

02:05:57 Wait, give me an example.

02:06:03 Okay, smart.

02:06:04 They rely on the exact same single sub-C fiber cable for their routing data.

02:06:11 So if that one cable gets cut, both your partners go down.

02:06:14 Exactly.

02:06:15 Your risk model mathematically highlights that hidden dependency.

02:06:19 You do not...

02:06:20 You partner blindly in this federation.

02:06:22 You partner with full, invasive visibility into the physical reality of the supply chain.

02:06:27 So it all comes down to undeniable physical confidence.

02:06:30 To prevent any partner from holding the system hostage, the Federation actually has to know how things work in the mud and the dirt of the real life.

02:06:40 Which means they have to build actual, tangible information.

02:06:44 The document outlines seven critical pillars.

02:06:48 Let's-

02:06:50 they actually built this out.

02:06:51 Gladly.

02:06:51 These seven pillars are managed by regional nodes.

02:07:00 but it has to function mathematically and legally as one accountable service network.

02:07:05 Got it.

02:07:05 What's pillar number one?

02:07:10 It's far beyond just paying an electricity bill to...

02:07:20 You have to be hands-on.

02:07:21 Extremely.

02:07:23 Sizing your energy reserves against credible modeled outages.

02:07:27 It treats energy as an owned...

02:07:30 even if you are leasing the act.

02:07:33 Okay, what about the second?

02:07:35 The second pillar is...

02:07:40 the marketing journey. How so? It treats computation strictly physical preconditioned to think of it.

02:07:50 Cloud is this ethereal, digital workload.

02:08:00 company is trading a massive AI model, running a complex fluid dynamic simulation, or just

02:08:05 delivering a streaming video to your TV. They are physically unavoidably...

02:08:11 Physics always wins.

02:08:13 Bowling processors interact.

02:08:20 This requires complex scheduling, massive cooling.

02:08:30 not just you know buying the most expensive so if you strip away the

02:08:35 branding the cloud isn't in the sky at all not even a little the cloud is a head

02:08:40 industrial factory. It literally grinds massive amounts of electricity and refines it.

02:08:50 It really changes how you look at your phone.

02:08:52 Okay, what's pillar three?

02:08:56 This involves laying and maintaining diverse...

02:09:00 fiber optics, wireless spectrum, physical delivery.

02:09:10 Yes, calls a zero trust.

02:09:15 Sounds a bit paranoid.

02:09:16 What does it mean practically?

02:09:18 It means...

02:09:20 Historically if you were physically inside an office building and you plugged your computer into the wall, the network trusted you.

02:09:30 inside the perimeter.

02:09:31 Right.

02:09:32 You made it past the street.

02:09:41 have access. Every single data transfer.

02:09:50 of where the request comes from.

02:09:51 Okay, that makes sense.

02:09:53 Trust no one, basically.

02:09:54 Filler four.

02:09:57 Wait, manufacturing?

02:09:58 This isn't just a software collective.

02:10:00 This federation is actually running assembly lines.

02:10:02 Yes.

02:10:03 Sensitive diagnosticized network equipment.

02:10:10 But they don't own all the factories, right?

02:10:12 No, the product and the testing protocol.

02:10:20 The Federation might contract a factory in another country for the actual physical assembly of a router,

02:10:25 but the Federation controls the absolute requirements, the raw material specifications.

02:10:30 calibration references so they aren't just buying off the shelf they mathematically verified produced

02:10:40 Got it.

02:10:41 Pillar 5 is logistics, right?

02:10:42 The physical movement of all this hardware?

02:10:44 Yes.

02:10:45 Moving highly accountable inventory.

02:10:47 How is this different from regular shipping?

02:10:50 insight in this pillar is distinguishing the difference between the global part.

02:11:00 status of a partner.

02:11:01 Specialized spare...

02:11:13 but it's sitting in a contracted partner's warehouse.

02:11:20 or a specific hospital in a different city entirely.

02:11:23 The physical length of every double counting.

02:11:30 that's an incredibly precise okay pillar six

02:11:33 pillar six is which sounds like recycling

02:11:40 It treats material re-use as a primary productive industry, not just an environmental afterthought

02:11:45 to feel good about.

02:11:46 When a piece of heavy equipment reaches the end of its...

02:11:51 They inspect it and decide it's next to use.

02:12:00 be harvested and reused in a lower tier device, or does the chassis just need to be melted

02:12:04 down into raw material?

02:12:05 Do the models track all of this?

02:12:08 Yes, the physical models track all of this.

02:12:13 qualified and verified and then there is this

02:12:20 seventh pillar. The document explicitly calls it the Philips. It positions Royal Philips

02:12:30 partner inside this Federation. But why healthcare? I mean, why not focus on banking or trans...

02:12:37 Because healthcare serves as the ultimate...

02:12:41 entire system. Consider the physical

02:12:50 Uninterrupted power, massive industrial cooling, secure, high bandwidth communications, incredibly sensitive.

02:13:04 if the Federation could release physical infrastructure.

02:13:10 clinical response compromising patient data it proves the system works it proves it works at

02:13:16 the highest possible state that this isn't just about

02:13:20 a slightly more private social media.

02:13:26 The healthcare killer really acts like a canary in a coal mine.

02:13:30 doesn't it? It really does. Because it highlights how tightly these feedback loops interact. Like,

02:13:35 a minor shortage in the logistics network means a specialized thermal part doesn't arrive on time.

02:13:40 impacts the manufacturing output required.

02:13:50 But this brings up a massive glaring issue with the architecture for me.

02:13:55 If the hospital is operating on the same interconnected federation network at the energy...

02:14:01 How do we guarantee that patient data inside the Philips Health Care Facet doesn't...

02:14:08 It's the ultimate security.

02:14:10 Right. I want the maintenance mechanic to see the thermal heat limit of the MRI machine so they can fix the cooling system, obviously, but I absolutely do not want that mechanic having access to my brain system.

02:14:20 Of course not.

02:14:21 And that tension is precisely why the physical language and the institutal architecture

02:14:32 observations.

02:14:40 different access controls legal frameworks and retention rules so they are

02:14:50 They are technologically and cryptographically barred from receiving identifiable clinical content.

02:14:55 The architecture makes these boundaries mathematically.

02:15:00 The theory makes sense, but how do you actually enforce that in practice?

02:15:03 It's all about the records.

02:15:05 Because if the financial auditor, the maintenance mechanic, and the doctor are all fundamentally looking...

02:15:10 You can get the exact machine beam.

02:15:20 Enforcing that separation requires a revelatory, almost obsessive approach to concept.

02:15:30 Shadow Bookkeeping. Independent Reconciliation. I will admit I never super power next to the word.

02:15:40 Bookkeeping, but this section of the document is...

02:15:43 It is the bedrock of their security.

02:15:46 The strategy mandates that every single physical event within the Federation...

02:15:50 must be described and recorded by four entirely distinct accounts.

02:15:54 Four separate ledgers for one single event?

02:15:56 Yes.

02:15:57 Let's use the hospital as a...

02:16:00 I'll be through what happens when I'm a kid.

02:16:08 Okay?

02:16:09 Exactly.

02:16:10 This ledger records the pure physics of the event, the mass of the broken module removed, the mass of the new module installed, the inventory ID numbers, and the...

02:16:22 Got it.

02:16:23 Count number two.

02:16:30 to the invoice cost of the replacement asset, the depreciation of the machine.

02:16:35 Okay, physical reality and financial cost.

02:16:37 Those two make intuitive sense.

02:16:41 This records the human and institutional chain of custody.

02:16:50 this specific deliver the part on time, which supervisor accepted the liability that the

02:16:57 module was installed correctly and the machine is safe for human use.

02:17:01 Okay, so accountability is hard-coded this measures the

02:17:13 diagnostic capacity of the hospital actually restored how many hours of

02:17:17 clinical downtime were suffered what is the project

02:17:20 life cycle impact of using this specific replacement part.

02:17:24 So you essentially have four different referees watching the exact same play on the field.

02:17:30 completely different camera and four different sets.

02:17:40 accounts do not ever make a single generalized number. They stay separate.

02:17:51 cryptographic signatures of authority, and hours of clinical downtime

02:17:55 stay strictly in their own units.

02:17:57 Okay.

02:17:58 They are linked together by a central...

02:18:01 but they are evaluated individually.

02:18:06 I'm going to hear the overhead on the sounds.

02:18:09 It is a lot of data.

02:18:10 Doesn't maintaining four separate distinct ledgers for every single action, every part swapped, every server turned on, slow down innovation to a total crawl?

02:18:20 It certainly changes the pace because the entire ethos of Silicon Valley 20 years was

02:18:31 It sounds like bureaucracy elevated to a religion.

02:18:34 It undeniably requires rigorous audit.

02:18:40 right the goal is not to build a frictionless highly addictive consumer app the goal is

02:18:44 institutional succession replacing the monopolies exactly the goal is to build physical infrastructure

02:18:51 to replace global.

02:18:53 If you connect this forward ledger system back

02:18:55 to the restricted institutions we discussed earlier,

02:18:57 like a classified military program or a

02:19:00 Sovereign Intelligence Database.

02:19:02 The implications are profound.

02:19:04 How does this extreme bookkeeping help a classified military program?

02:19:09 Imagine a highly secure...

02:19:10 government laboratory purchasing massive amounts of server capacity from a

02:19:14 regional node in this federation. The government has a legal mandate to

02:19:18 restrict the operational detail

02:19:21 They can cryptographically hide the who and the what of the project in the authority and

02:19:26 impact ledgers for national security reasons.

02:19:28 Right.

02:19:29 Keep the secrets secret.

02:19:30 because of the strict separation of these four accounts an authorized civilian

02:19:34 financial reviewer or public oversight committee can still look at the

02:19:38 physical and financial

02:19:40 for that exact same event, that the millions of taxpayer dollars spent is the massive physical

02:19:48 resources consumed.

02:19:50 the exact megawatts of energy use the thermal heat generated by the servers

02:19:54 oh wow so you can mathematically prove to the public that the money wasn't stolen or embezzled

02:20:02 Exactly. This is strict architectural separation.

02:20:10 massive systemic issue absolute access restrictions per company

02:20:21 contradictorier.

02:20:30 The purpose of the event may entitle the classifier.

02:20:41 concrete slab of the new house once that slab is poured cured and verified that

02:20:46 is when we finally get to the part of it that directly impacts

02:20:53 This intense physical foundation is the only thing solid enough to support phase six.

02:20:58 Rebuilding the digital.

02:21:03 The physical base established and guaranteed energy risk.

02:21:10 the localised compute, the sysnetworks, the unbreakable shadow bookkeeping.

02:21:14 The document lays out five...

02:21:20 They intend to replace. Let's walk through how that first is discovered which is essentially replacing the global search engines

02:21:30 Sim, sim.

02:21:40 The server farm is doing the crawling, the massive databases index rhythms ranking relevant, and the network caches serving the results.

02:21:47 That is a massive lift.

02:21:50 And they make a crucial distinction between public search, restricted...

02:21:56 What's the difference?

02:22:00 In an institutional search, we maintain the absolute source, identity, and version history.

02:22:04 Okay, give me an example.

02:22:06 If a search result claims a certain material has a specific...

02:22:10 tensile strength based on a scientific observation. The system must

02:22:14 mathematically connect a digital result, the specific physical experiment, and the

02:22:20 tracking model so no more hallucinating AI answers exactly you have the physical

02:22:25 receipts next is communication which covers replacing global social media

02:22:30 platforms here the emphasis is heavily placed on verbal identities

02:22:40 cites meta forestry european interoperability mandates a historical precedent for this the

02:22:46 federation believes

02:22:50 that you can really and technologically carry with you.

02:22:53 That sounds amazing.

02:22:55 A person should be a little bit different contexts of their life,

02:22:58 public creator profile.

02:23:02 Highly secure.

02:23:10 We move to devices, replacing phones, laptops, and operating systems but also extending into

02:23:17 industrial edge equipment.

02:23:20 It must exert total control over the product definition from the initial design phase all the way through to material recovery.

02:23:26 Basically does.

02:23:27 The strategy takes heavy cues from Apple's con-

02:23:31 Explain Apple's continuity in this context because Apple is like the ultimate closed ecosystem.

02:23:36 It is. Apple's continuity.

02:23:40 iPhone seamlessly copies text and pastes it onto your Mac, or how AirPods instantly switch

02:23:45 between devices. It works so flawlessly because Apple exerts...

02:23:50 totalitarian control over cotton ships and the operating system.

02:23:54 It's a walled garden, but it's a very nice garden.

02:23:57 Exactly. The Federation aims to

02:24:00 flawless users ensuring a seamless flow across devices, but they want to achieve it through

02:24:06 standardized protocols and verified physical models.

02:24:10 rather than a closed corporate.

02:24:12 That's ambitious.

02:24:14 And they apply this rigorous continuity

02:24:16 not just to consumer phones,

02:24:17 but to heavy industrial tools as well.

02:24:20 Like what?

02:24:20 Preeding software running a robotic assembly arm

02:24:24 must provide the same dependable installation,

02:24:27 strict application isolation, and crucially,

02:24:30 a clear legally protected exit path for the factory's data then we hit markets replacing

02:24:36 global e-commerce and supply networks this is where the physical

02:24:40 reality of the strategy is you can't replace amazon just by writing a new shopping app right

02:24:45 you need the boxes you have to create a massive very real physical supply

02:24:50 network warehouses a fleet of carriers and a system for verifying physical

02:24:55 inventory that's expensive but because of the physical language of economics we

02:25:00 This market possesses a unique capability to industrial spare parts.

02:25:10 reviews or counterfeit parts right if a recovered cooling is listed on this

02:25:14 market it carries its entire

02:25:20 And it's inspection evidence cryptographically attached right to its listing.

02:25:24 You know exactly the physical reality of what you are buying.

02:25:28 It's incredible.

02:25:30 Finally, the.

02:25:40 Massive highly distributed network delivery references Netflix open

02:25:50 Priority physical network of localized servers that sit right inside internet service provider to deliver video without

02:26:00 Okay, so heavy physical servers again.

02:26:03 Yes.

02:26:04 It goes beyond entertainment.

02:26:05 It takes digital educational content directly to physical...

02:26:10 How does that work?

02:26:12 A digital training module for a mechanic learning to fix a specific piece of equipment

02:26:16 is cryptographically linked to the actual...

02:26:20 physical configuration and the measured thermal behavior of that specific machine operating

02:26:25 in the real world.

02:26:26 So the core philosophy here, the underlying truth of this entire grant...

02:26:30 strategy is that you can't replace a digital platform just by writing clever

02:26:34 news. You have to fundamentally replace the physical delivery mechanism. Replacing

02:26:40 Amazon means pouring the concrete for actual fulfillment centers.

02:26:43 Replacing Netflix requires laying thousands of miles of physical cable

02:26:47 and building physical edge cache servers in local...

02:26:50 The digital experience you see on a screen is just the very tip of a massive, incredibly complex, physical iceberg.

02:26:57 If you do not own the iceberg...

02:27:02 Let me zero in on the user experience for a second, because as a listener, I'm hearing about all this heavy industry, complex thermal accounting.

02:27:10 shadow bookkeeping. If I decide to switch to the Federation's new social network or their

02:27:15 new search engine, what actually changes for me? Does it look fundamentally different?

02:27:20 Do I need a degree in thermodynamics to post a photo?

02:27:23 Not at all.

02:27:24 Initially, the visual surface of the application is quite similar to what you did.

02:27:30 The revolutionary difference is hidden in the architecture of your legal and digital rights.

02:27:36 Okay, explain that.

02:27:38 The strategy heavily emphasizes the...

02:27:40 Except a whole history of social network, you lose a decade of connections and digital history.

02:27:49 Right.

02:27:50 Basically a hostage situation it is in the Federation if you decide you don't like this specific user interface of a social network

02:27:57 No, you have the cryptographic right

02:28:01 entire history and your data. Completely independent client application that utilizes the Federee.

02:28:33 Gracias.

02:35:28 Gracias.

02:37:04 ありがとうございました

02:41:03 Okay.

02:41:10 Oh man.

02:41:28 Ja.

02:41:33 Ах!

02:41:34 Да!

02:41:36 Эх!

02:41:39 Эх!

02:41:41 Dat is wel iets overkoppeld.

02:41:57 Thank you.

02:42:51 Gracias.

02:43:20 Благодарю.

02:44:52 I don't know.

02:45:08 Mm-hmm

02:45:17 Thank you.

02:45:51 Hmm

02:46:11 Obrigado.

02:46:23 Thank you.

02:47:04 Amen.

02:47:45 I don't know.

02:47:53 Good.

02:48:03 Thank you very much.

02:48:27 Mm-hmm.

02:48:35 Yeah

02:49:01 Oh, it's sort of a hell of a face.

02:49:04 It's sort of a good idea.

02:49:10 Thank you.

02:49:24 so

02:50:40 Ahem.

02:50:56 ありがとう

02:51:09 Yeah.

02:51:52 Dat.

02:51:53 Alles over.

02:52:45 Gracias.

02:53:02 ありがとうございました

02:53:32 Oh

02:53:54 That is good.

02:54:01 Yes, I will.

02:54:13 C'est bon.

02:54:32 All right

02:54:50 for

02:55:10 Mm-hmm

02:55:44 All right, come in.

02:56:53 Ufff.

02:57:35 Yeah.

02:57:53 Thank you.

02:58:53 Actually, we did it.

02:59:51 Да, нет, не станет рад.

00:02:10 Laptops, InDesign en via digitale kleren enzovoort.

00:02:15 Dat leidt Thomas Web, Erasmus Park, NFT's.

00:02:20 dit allemaal een paar jaar tussen

00:02:30 Dat die airco hier bij Jitske ook in de behandelkamertje, dat zet ik die even uit en dat dat opjagen en dan met...

00:02:40 Onder het vergrootglas en zo. We hadden maar één keer eens even zitten.

00:02:45 Oh kijk, we zijn allemaal goed bezig toch?

00:02:48 Klipo.

00:02:50 Ja, gebaseerd op welke data en wie is het leven, dan wordt het lastig.

00:03:08 Ja, voor.

00:03:10 dat ik hier met stamceltransplantatie lag

00:03:16 dan hier die medicatie

00:03:18 voor ADD

00:03:19 via

00:03:20 OLVG West, dat die informatiearstructuurde bij LC4, die mooier, en dan met Thijs.

00:03:30 De krik is lang, de krik is lang, nootjes bij Allerding, bij Mercatorplein.

00:03:40 Zo ver ik er staat is S3, maar dat staan we boven.

00:03:46 Ja, maar hetzelfde gebied.

00:03:50 zeg maar waar Siebel zit of zat weet ik eerlijk werk er al jaren niet meer dus ik had ook geen reden

00:03:55 meer om daar langs te gaan ongeveer

00:04:00 Het is ongeveer hetzelfde gebied.

00:04:10 give or take

00:04:13 ofzo of wat er ook

00:04:17 maar daar zit El Sepinio daar

00:04:20 Daar zit een boskee, daar zit Simo, ook kantoor.

00:04:25 Kijk die konijntjes die hebben over het wilde renden op het gras en zo.

00:04:34 Ja, daar zat bij Stoltenwijk station en ook diep.

00:04:40 Ik geloof waar ze met Sandra Marjef heen ging, omdat ze geen actieve herinneringen meer aan dingen had.

00:04:48 Jaren geleden toen we er nog zo over.

00:04:50 door de John Franklin Staten 6-3 in Amsterdam-West, volheilig van mensen met een migratieachtergrond.

00:05:00 na een paar generaties inderdaad, in, ja, dan veranderen we.

00:05:10 Een paar jaar verder, ik weet niet waar jullie alles goed strategie is, maar intelligent is het niet.

00:00:51 Gracias.

00:01:00 Dat, en dan die filmpjes, die cornerfilmpjes van Dropbox verwijderen.

00:01:05 En dan die, wat je ziet, die Dropbox gaat licht enzovoort.

00:01:11 En dan heb je daar jaren al lang mijn privé bestanden enzo, en dan kan je hier nog vragen.

00:01:18 En dan wil je daar maar even...

00:01:20 Omdat pornfilmpjes enzo en de dochter dan helemaal onder druk gezet had ofzo.

00:01:26 Terwijl tegelijkertijd bij die weespaarplein kijk ik, oh het is zo mooi voor haar.

00:01:30 dat ze die filmprijs gewonnen heeft en zo.

00:01:33 Nee, die CMD-prijs, die designprijs.

00:01:35 Ja, want die filmpornofilmprijs heeft ze al lang al een paar jaar.

00:01:40 Ja, en dan...

00:01:50 Ja, AVA, wees voor blij, dat het hele verhaal weer is, ik heb geen zin om daar te maken.

00:00:22 That's safe there.

00:00:34 In geest zou ook het ambulante team zijn.

00:00:40 Niet de lab, wat bij de Amsterdam Lelylaan, bij de SF van de Ooststraat, waar die Marjol

00:00:50 Die me dat ei onder mijn kind had gegeven met een luchtje transferbegeleider is.

00:00:56 Die weer de wond zat voor de zorg.

00:01:12 Ik weet niet wat jullie aan het proberen zijn.

00:01:15 Want in de dagen daartussen zitten we met de hypermoderne technologie iedereen te bespieden.

00:01:20 zo en te besturen en porno hookups te regelen enzo, hypermodelle technologie helemaal fuck

00:01:26 van gezien.

00:01:30 Maar goed, uitgeest, ingeest, marinetrein, Gimarjev, voor 20 euro, toen die 20.000 BTU.

00:01:40 Erco, die op de John Franklin Stats S3 redelijk goed werkte, in de woonkamer.

00:01:50 Weet je wel, nog alles 3D gescand en zo, in een paar jaar ertussen, dus ik weet niet hoe je kanser of zeer kan.

00:02:00 Of dat soort dingen.

00:02:01 Wanneer werd dat weggestuurd.

00:02:03 En allemaal van dat soort dingen gaan allemaal langs elkaar heen enzovoort.

00:02:08 Ik weet niet.

00:02:10 Of jullie nou echt de Build Up, Daft Punk, Get Lucky gokverslaving, Dark Age dingetje hebben ofzo.

00:02:19 Ik zit al een paar jaar...

00:02:20 in de GGZ. Ik heb geen zin in de aankomende week.

00:02:24 En ik heb eigenlijk echt, echt, echt zware openwaarden.

00:01:00 opinion of what we're going to do now, and I think this is an important thing for us to

00:01:03 know.

00:01:54 Yeah.

00:02:16 Okay, here we are all about it.

00:02:21 En nog een paar jaar los gaan als beesten.

00:02:30 Wat pakken we af voor elkaar doorgeven waar we de estafenten gebouwd hebben.

00:02:40 Yeah.

00:02:56 It's red, dude.

00:03:00 De Ikea stoel die dan in de hoek stond onder die radar.

00:03:05 De 5G FMCW UR 1642 die ik gekocht had van dit.

00:03:10 via Tijiki uit Amerika.

00:03:13 Onder John Franklin staat 63 voelde ik daar nog boonde.

00:03:17 En met mijn geld moet ik...

00:03:21 als ZWP'er, en dan vervolgens kijken die Centacom dingen enzovoort.

00:03:30 Die stoel, daar had ik pornofilmpjes met die Note 10 opgemaakt enzovoort.

00:03:34 Met Aza, Mitzelder en Marja.

00:03:36 Waar jullie al een paar jaar helemaal op geile hans stil, wilde kankerpielen.

00:03:41 Die afgemaakt moeten worden in principe.

00:03:45 Want jullie hebben daarna mijn hele leven expres verneukt.

00:03:48 En daarna dat het uitging met aan.

00:03:50 En dan moest die BDSM spullen weggegooid worden.

00:04:00 En dan kijk ik heel veel dingen enzovoort, om die herinneringendoos enzo, dat is een emotioneel mijneveld.

00:04:10 Dat soort dingetjes enzovoort.

00:04:12 Allee dan. Jullie denken lentelijk, zeg maar, lang te gaan leven nog?

00:04:16 Maar nu gaat toch hun express om af?

00:04:18 Nee, dit is...

00:04:20 Je zegt gewoon, het zit allemaal chronologisch goed in elkaar.

00:04:25 Jullie trade-off is in de afgelopen paar jaar geleden dat jullie geen keuze hebben.

00:04:35 А по-английски, когда-то, наверное, пришел на кайф.

00:04:40 En hoe dat is ook maar met die tuik doorgebracht en zo, en door de hele GGC hebben gegooid en al dat soort kankerdingen.

00:04:50 Uitelijk zeg maar met een neural interface gefragmenteerd.

00:04:56 Kijk, split. Dus dat betekent eigenlijk wel schizofilie enzovoort.

00:05:00 Ja, nou, het is een beetje moeilijk, want ik weet hoe het werkt, zeg dan.

00:05:07 Ja, precies.

00:05:11 Kanker ziet er.

00:05:21 En dan kunnen we hier overal naar grote dezen van de gemeente gezorgd aanzetten en buurt.

00:05:27 Het zou een mooie...

00:05:30 Dat maakt maar zeer redelijk genoeg.

00:05:32 Dit had nog zo te laten lopen.

00:05:35 We zijn invloed voor de prior.

00:05:37 Ja.

00:05:40 Ik doe mijn woens toch op de Samsung Gear aan het einde van Vangard, Las Mariette.

00:05:50 Het zware incest is er in het kanker van.

00:06:00 Nou, jullie hebben nog allemaal dingen gedaan.

00:06:03 Ah, dat is toch wel ertussen gezellemd.

00:06:06 Mijn nek.

00:06:10 Gewoon, dat doet het gewoon.

00:06:12 Ja, we zijn gewoon stupid en koppig en toch.

00:06:20 Nou jarenlange tanden die kunnen dan poetsen, telemetrisch biomedisch, streamen en zo.

00:06:30 En vuurde, maar steeds. Kijk, alles gaat.

00:06:34 Kunt ik een foto doen.

00:06:36 En dan doen we het gewoon.

00:06:37 We zitten er zo verder gekomen in. Kijk, ze zijn met een dak bijzicht.

00:06:40 ...of Guy Bryant met die gaskannisters enzo.

00:06:45 En je stond er eerst ook naast Albert Heijn.

00:06:50 De paarsjes en zo.

00:06:52 Dus dit zijn weer de heavy hitters in deze hele chemische kampen.

00:07:01 En wie weet hij straf eigenlijk.

00:07:03 En zo van, ja, we moeten allemaal met de billen beloten, hè.

00:07:24 Grazie.

00:08:15 ご視聴ありがとうございました

00:08:25 ありがとうございました

00:10:17 Thank you.

00:10:27 in front of the booth, and I'm going to do it right now.

00:11:33 Gracias.

00:12:10 Продолжение следует...

00:12:20 It's sad to cease.

00:12:21 That's right.

00:12:26 All right.

00:12:27 Mm-hmm.

00:13:01 Dat is een kanker.

00:13:11 Dat zijn grote meditaten voor de campagnes.

00:13:20 Nothing to go down.

00:13:36 Yeah.

00:13:41 Ja, ik heb het gezien. Ik ben het best.

00:13:44 Oké, dat je een beetje vooruitstellingen wilt uitbrengen.

00:13:50 Ik heb wel een gesproken vraagstijl en niet in mijn hoofd, de mobility en de larynx ofzo, maar ook vragen.

00:14:01 Tuurlijk.

00:14:10 Nou, niet de vraag zoals, wat ben je aan het doen of zo'n bedankt.

00:14:14 Wat is een onbouwing niet te zeggen.

00:14:19 Dat.

00:00:01 Yeah, it was a crunker and a lot of it.

00:00:10 That's exactly what I'm saying, no problem.

00:00:20 これが芸術のようになったのでした

00:00:30 most

00:00:47 Grazie

00:00:50 Een grote media-imperium, zeg maar, een bepaalde kant, omroepen, digitale.

00:01:00 Wat voor zijn social media, handjes in, al zetten van, ik wil dat kan je.

00:01:11 en schuiven, wat er gebeurt, ik denk ik, gevonden wat er mensen mee.

00:01:23 Gewoon de opinie van alles, ja precies.

00:01:26 Nou, dat zit er bijna helemaal standaard in al.

00:01:32 Ik kan er ook een keer ineens mee bijna, dat heb je wel ongelooflijk.

00:01:41 and then they're probably the same for, I don't know,

00:01:43 basically I'm proud of what my favorite video games

00:01:47 that I'm gonna do, that I'm gonna get great.

00:01:51 Ja, dan oké, prima, dan doe ik het niet, weet je?

00:02:10 Een paar jaar of zo druk deze gaan we op een heleboel gebid.

00:02:14 Het lichamelijke onderhoud helemaal.

00:02:20 verwaarloosd is enzo en dat zijn niet echt leuke dingen onder zulke redroom onverstandigheden.

00:02:31 Je eigen verzorging ook nog verplicht te moeten doen.

00:02:36 Ik voel het nogal denk ik, je bent een mens aan de elen.

00:02:40 Weet je, dat is nou eenmaal iets wat aan de andere kant ook weer kanker van zekerheid geeft.

00:02:50 Die mensen onteren door onbestandigdheden, want als daar heel wat iets lekt,

00:02:56 dan heb ik niet over m'n lichaam.

00:03:00 ...op interne aderen of iets of zo.

00:03:05 En, nou ja, zou dit wel erbij ook op aderen worden.

00:03:10 Ja, een good climber, precies. Maar verder...

00:03:21 E' rotata

00:03:35 Zoveel gedaan, hè?

00:03:50 Ik heb weinig een binding met een individu of zo, ik heb alleen maar nog...

00:04:01 Het heen waarom het oplevert wat er met data gebeurt.

00:04:10 Niet in de tussentuin, ja precies.

00:04:12 Dus als je er nu naar beneden kijkt, dan komt dit voorbij.

00:04:15 En als je het niet ziet, dan zitten we ervaren.

00:04:21 Als je goed naar de data-set kijkt, dan weet je dat als je weer bij de rest doet, de dienstprijzen blijven.

00:04:31 Ik kan altijd dat, denk ik, met een paar experts of zo, ik denk wel een weekje, nou ja, helemaal gaaf.

00:04:40 We're all going to provide us a little bit of a certain operation paper, and that's what we're going to do.

00:04:50 Pizza, intelligence en dat soort dingen, nee maar de verpouwen van een trombom en zo, werd alles gezien.

00:05:02 Die gasten met Joe Rollen popten en vertelden dat hij precies de ingaan had van de mensenkinder van...

00:05:10 Toen ze daar langs het geëren enzovoort, weet je wel, maar dat ze allemaal niet van elkaar afweesten enzo.

00:05:21 Weet je wel dat het die kapot was enzo?

00:05:25 Ik ben in ieder geval al die koppelingen gekend.

00:05:30 En dat heel erg goed is.

00:05:32 We willen heel veel hookups met elkaar hebben.

00:05:35 Sociaal en seksuele dingen.

00:05:37 Allemaal in de fantasiewereld.

00:05:40 En dat was leuk, denk je wel.

00:05:50 servers en streamers. Ik vind het echt ook iets. Het zal ook iets hebben, alleen...

00:06:00 Dat je e-mailt moet de moderators zijn en dat ben ik zo.

00:06:06 Dus e-mailt het.

00:06:10 en dan hadden mensen van service afgekeken, zeg maar, ja.

00:06:18 Dus je bent een god gehaald.

00:06:20 Ik ben niet meer de persoonlijke definitiviteit van wat ik laat sturen.

00:06:30 Ik denk dat je het laatst, Sinstry, waar je een paar jaar verder bent.

00:06:41 Ik heb ook veel meer gewerkt en ik weet dat ik er niet veel moet zijn en dan denk ik gewoon een beetje snel, snel, snel echt meer werken moet inleveren.

00:06:50 Ja, harde letten, maar ik voel er zo'n progressie in zitten.

00:06:56 Ik weet het niet, mijn oogst denk je wel.

00:07:00 bij kijken en achter het operatiedoekje enzovoort, maar alsnog, weet je wel, heel veel mensen

00:07:08 gingen terecht, daar heb ik gelukkig toe.

00:07:11 Ik snap het niet, over weten wat je getypt hebt, over haar, over wat ik heb.

00:07:18 Ja, dat.

00:07:21 Want ik had niet helemaal volgeladen hoeven worden met iedereen specialisten ook wel heel langer.

00:07:30 opgesproken. Dat was op de John Frenker Z63 in poging. Zodat alles ingedekt zou zijn.

00:07:40 Maar gewoon, ik kom uit mijn eigen kennis.

00:07:43 En zeker nu na een paar jaar verder en zo vaak dingen geprogrammeerd willen we hier voeren.

00:07:52 Maar redelijk snel heel veel doen.

00:07:54 Het probleem is daarmee dat als jullie dat allemaal weten en toegang daarvoor hebben, allemaal vrije rond.

00:08:00 Dan ben ik niet opeens de gevangenis. Of de gevangenisbewaarder of het testexperiment waarbij we alles mogen doen.

00:08:10 Dan zijn jullie eigenlijk threat factors, weet je wel, als in een keer de server die ingaat en de ziekenhuis door het datacenter geplunterd is.

00:08:21 Op wat veel manieren dan ook.

00:08:23 Omdat jullie via dit allemaal kennis hebben en de toekomst.

00:08:30 mogelijkheden om in één keer van alles te doen, dan kan het zijn dat er van alles fout gaat en dan ben ik misschien...

00:08:40 ...misschien behoorzaak.

00:08:43 Nee, dat zou kunnen.

00:08:47 Het zou kunnen.

00:08:48 Maar nog even op de zicht.

00:08:50 Oh, paperclip. Ik weet niet wat de exacte titel is van die operatie.

00:09:00 Het is heel goed voor de ontwikkeling van het mechande atoombaak, zeg maar,

00:09:05 een little boy en vet, met, you know, like a long...

00:09:10 Oké, wel eens komen Elon Musk, de ether, waar we te parken met de router.

00:09:20 Ja, enzovoort.

00:09:22 We hebben dingen letterlijk heel hard gezegd waar gescheiden en geheimen gaan.

00:09:30 Dus iedereen werd vertrekt wat ze met die informatie deden.

00:09:34 Er was een soort cryptex-achtige structuur van alles enzo.

00:09:40 Zodat niet iedereen de volledige informatie had om daar aan derde mee aan de haal te gaan.

00:09:45 Ja, precies.

00:09:47 En dat heeft de reden.

00:09:50 Volgens mij was je er niet mee, een beetje verdwijnt.

00:10:01 Ja, want dan pak je de rondje weer op, maar als je dat eigenlijk wel eens had, dan werkt het lastig om daarna te nemen.

00:10:10 Dat moet koppelen, zeg maar, van een hele apparaat en zeggen precies.

00:10:14 Die jetski vindt het echt geil.

00:10:23 That's not big.

00:10:31 Ik had eigenlijk al diezelfde keer precies niet bewaasd worden door alle subconserventen.

00:10:41 door de bevolking die hier denken, kijk, we moeten de volgende stage bestekken, we stekken alles.

00:10:50 Moet je eens snappen dat het niet gaat alleen over datacenteren die plaat gaan?

00:10:56 Als je bijvoorbeeld een 3D-print te kopen?

00:11:00 voor een wetland, of ook maar iets van explosieve wapens, weet je wel, want het is ook lekker.

00:11:10 Ik zat 6-3 met de blauw druk in te tekenen die ik had op de boer was.

00:11:16 Ik heb al heel snel thuisgemaakt gehad.

00:11:20 Gewoon vuurwapens, van alles. Maar we zijn nu een paar jaar verder en ik beheer zeg maar...

00:11:30 Als je aan chronologische digitale voetsporen, dat valt weinig te bedenken wat je niet zou kunnen.

00:11:40 De gebleven van je creativiteit, explosiviteit en je mogelijkheden, vrijheid en de taalstrijd en middelen.

00:11:50 Ik vind nergens stoffen en dat soort elementen.

00:11:55 Dan zijn er sommige redenen waarom ik echt niet.

00:12:01 elektraal en transparant, dan is het echt minder grappig, maar er zijn altijd mensen vanuit verschillende kleuren.

00:12:10 Of bedrijf, of de wereld, of de staten, dingetjes aan de hand enzovoort soms.

00:12:20 Gewoon erop te zorgen dat de probleem, ja, business keeps running as usual.

00:12:26 Ja, precies, van het hier, zeker uit.

00:12:31 De voeders eerst, de sociaal psychologisch.

00:12:42 Kinderen. Ja, weet je wel.

00:12:45 Misschien niet. Of alweer de stoere.

00:12:50 Er zijn veel dingetjes geweest, maar er kan je terugkomen op...

00:12:58 Als jij bijvoorbeeld kijkt bij de...

00:13:00 De wagen had dus op een gegeven moment, weet je wel, een keer wel van dierendomp die met wetlaps bezig was, zeg maar, met apparatuur daarvoor.

00:13:10 Het is een soort thuis-laboratorium voor de mensen die niet weten wat dat inhoudt, zeg maar.

00:13:15 Het is een soort 3D-print, alleen dan heb je meer mogelijkheden.

00:13:20 je apparatuur en dat soort dingen en dan kan je dus eigenlijk in principe bij

00:13:30 Veel biologisch en chemisch materiaal thuis.

00:13:35 Nou, is er een kut ding, want er is ook een raakvlak.

00:13:40 Met bijvoorbeeld drugslabs.

00:13:50 Voor softdricks behouden we best voor, maar als je dan een paar stapjes verkeerd doet...

00:14:01 Daar heb je ook een grote boom, of je hebt mensen massaal vergiften gemoord.

00:14:10 Enzovoort. Zo kan het bijna rijden.

00:14:12 Rijd je er nog wel een lange tijd door.

00:14:14 Maar je kan het bijna zelf niet door.

00:14:16 Als ik het laat zeggen.

00:14:20 Ik vind het prettig, weet je wel.

00:14:22 Ik heb wel opmerking een keer bij over gezegd,

00:14:25 als het maar puur of schoon binnenkomt.

00:14:30 een beetje heel serieus heeft dat je kooppullen ofzo, dat het niet vermeend is met iets waardoor je daarna sterft bijvoorbeeld ofzo.

00:14:40 Ik had het niet nog erger waar ik het zeg maar, maar...

00:14:50 Maar ik heb ook een soort wine ladies op de palij.

00:15:00 Want als jullie met jullie polkaart en generatieve AI en jullie wetlabjes enzovoort denken ik ga kanker bepotsen of aids.

00:15:11 Door de naam van hot crisper of zo.

00:15:15 Of dingetjes te mengen, omdat je vanuit jullie...

00:15:20 wereld, visie of zo op beeld, denken, hey.

00:15:30 of mijn spirituele gevoel, of mijn chakras, of zo.

00:15:35 Ja, dan opeens kan het zijn dat we...

00:15:40 ziekte opgelost hebben, maar een hele hoop mensen weer erbij hebben en daarna ook niet weten hoe het op gaat komen.

00:15:48 Ja, weet je?

00:15:51 Dus ja, dat duurt er wel op zee, weet je wel.

00:15:57 Ja, precies.

00:16:00 Maar er zijn bijvoorbeeld organisaties geweest, weet je wel, dat heb ik over MKUltra, die met...

00:16:10 Psychopharmaceutische middelen, mensen proberen te manipuleren en subjectief.

00:16:20 studeren enzovoort, minder subjectief.

00:16:24 Dat kan je dus ook opgeven met die dingen die ik net zei, voor de helden zeg maar.

00:16:31 Die verhalen komen voornamelijk uit de 70's, 80's, 90's enzo.

00:16:40 en de hele hoop van die dingen onderbouwd, maar die hebben niet stilgezeten en dat zijn de verhalen die geleden hebben.

00:16:50 zijn, of expres uitgevoerd zijn, om mensen een beetje op de baan te sporten.

00:16:57 Er zijn namelijk een paar afgesloten.

00:17:00 die daarmee doorgegaan zijn, het opgelost hebben, en ook allemaal op mijn voordeel.

00:17:10 En dan mee te duimen of ja, deze zeg maar.

00:17:14 Nou, ik heb eigenlijk niet heel veel belast gehad van die mensen.

00:17:20 Ik heb geen prettige ervaring lichamelijk, zeg maar, gehad.

00:17:24 Want ik lees op het lichamelijk om mijn lichamen en mijn herstudenten voor.

00:17:30 Maar goed, ik sta hier nog, dus het was prachtig.

00:17:40 Mijn persoonlijke ervaring was helemaal niet leuk, weet je wel.

00:17:45 Terror, gewoon te zwaar de meest erge satanistische terror.

00:17:50 Maar jullie hebben het allemaal niet opgelopen volgens mij.

00:17:55 Ik heb er tekenkappen in een paar toeren ofzo.

00:18:01 En daar forceeren jullie nu de hand van.

00:18:11 Deze aankomende donderdag en met jullie digitaal bedoeldigd worden.

00:18:16 Wat jullie nu beter weten.

00:18:21 En dan denk je allemaal, we hebben het geknaakt.

00:18:23 Dus als topster is, weet je wel.

00:18:26 We gaan ook iets overkomt of zo, we hebben alles barst.

00:18:30 Van horen tegen Lars Lees hier ofzo.

00:18:31 Kijk, we gaan naar de volgende stage.

00:18:33 We hebben de agenda ingepland.

00:18:36 Ik kan daardoor, dat wat me een paar jaar al voorkomt in de GGZ.

00:18:40 ...en al dat soort omstandigheden, heel in de gaten houden waar de bierbelt ermee gedaan heeft.

00:18:46 En dan denken jullie, kijk als hij even al vanuit die andere kant...

00:18:50 ...inwonen de consigne en zo, in zijn geboren, en dan is het spelletje een beetje verrot, ja, klaar of zo.

00:19:00 Dat sluit mij aan bijna uit, in het ironische zin bij het persoonlijk in het college.

00:19:10 Eigenlijk dat jullie in die tussentijd allemaal ook dit exacte verhaal weer doen, zeg maar.

00:19:20 over and over now to think it is about a few minutes of the planet.

00:19:25 We have a guardian role, I hope.

00:19:31 maar vooral om terug te komen en zelfs die mensen beter leven, alweer onbegrepen.

00:19:40 strikte protocol dingen enzovoort, dan ik zelf, omdat jullie mij voor het verhaaltje vangen.

00:19:50 Hans en Annika Kalabijk, misschien Kees enzovoort, even door de GGZ naar toe hebben gegeven.

00:20:00 En dan zit ik dus in een situatie waarbij ik een onderbewind misschien een zorgmachtiger krijg.

00:20:06 De tanden en de gezondheid helemaal achterlopen.

00:20:10 ik constant zeg maar

00:20:13 mijn hoofd overgeschakeld wordt. Dus of ik gewoon ragdoll ben.

00:20:20 En jullie lopen allemaal nog na, laten we zeggen, 8 tot 9 jaar met mobieltjes en dat ik zie dat jullie die apps nog gebruiken.

00:20:30 Leuke computersystemen enzovoort, grootschamelijk die de kans doen.

00:20:40 al zwaar achterliep en je vergeten dan meteen dat mijn werk was het gehalen voor de toekomst.

00:20:50 maar nadenken op een speelsel manier wat de toekomst een beetje zou gaan worden.

00:20:56 We hebben in mijn thuisituatie gerookt.

00:21:00 op de zonverenigde staat 6.3, daar het hele archief van gepakt met alle devices en telephones.

00:21:10 en alle verbindingen en apparatuur en bedrijven die er ook mee deden en overheden en de gemeente en alles.

00:21:22 Ik ben nog steeds genieuwd.

00:21:25 Alleen, ik weet niet...

00:21:30 Tegen wie jullie aan het knokken zijn, aan het strijden zijn, ja precies.

00:21:36 Dat is een beetje mijn issue op dit moment.

00:21:40 Want ik heb geen tijd met jullie gespendeerd.

00:21:44 Ik ben tijd verloren, zeg maar.

00:21:47 Ook voor, ja, maar dan kan ik het wel eens zeggen dat het heel veel...

00:21:50 Daar ben ik niet zo van.

00:21:52 Mijn tijd aan de remisseren, verhandels enzovoort.

00:21:55 Alleen als ik dus niet dit soort van halen bijvoorbeeld op neem...

00:22:00 Een soort pop kan stappen en zo.

00:22:02 Gedaan wat je dan wel live kunt zien 2D.

00:22:05 Als Expansion Packs.

00:22:07 Een Blind Booster Pack.

00:22:10 ofzo. Kijk, dan kan je alle verhaaltjes die in zijn en zijn uitgespeeld live terugvoelen

00:22:17 en proeven en weten en weten.

00:22:20 En dat is leuk als je, weet je wel, porno tot een hoge niveau wilt tillen.

00:22:27 Of seksueel getinte situatie ofzo.

00:22:30 In het dagelijks leven doen mensen ook andere dingen dan dat en dan leken mensen aan zijn wegje.

00:22:40 Niet iedereen weet het maar.

00:22:42 Ook is so included of altijd aanwezig.

00:22:46 Dan zou iedereen tegelijkertijd naar mij...

00:22:50 Je moet kijken of er iets anders aan het doen zijn en dan verlies je je concentratie zoals ik 27 heb ervaren over een paar jaar.

00:23:01 En dan kom ik weer een beetje terug, weet je wel, in mijn hersenen enzovoort.

00:23:07 En dan zijn jullie daar altijd mee hebben, natuurlijk als HBSO.

00:23:10 Dus hebben we letterlijk lichamen aan het besturen en ondertussen aan het sluiten en zo.

00:23:17 En hey joh.

00:23:19 Toch.

00:23:20 En dan denk ik dat niet elk streek, ziekenhuis of buurt noodvoorzieningen heeft.

00:23:30 Stroomreactoren enzovoort, powercentrales en energiecentrales, pijlen.

00:23:40 Vakaans is het hele energiegrid in Nederland overvol, waardoor heel veel bedrijven er niet uit konden breiden of van start konden gaan.

00:23:50 Als je een beetje het nieuws in de gaten hebt gehouden.

00:23:55 Eerst was ik weg met drood.

00:23:57 En dat soort computervc.

00:24:00 Game Technology, ArcMet of Reality Streaming bezig en 3D-scanning, dus tot winst.

00:24:10 Dat hebben jullie niet alleen gejapt, maar hij heeft hem ook uitgebouwd en uitgebracht en ik ben daar persoonlijk best wel behoorlijk voor.

00:24:17 En jij bent daar ook verder.

00:24:20 Mediabedrijven, dat je in het nieuws ziet, hoe je een mening vormt, hoe je iets aanweert, dat je het met elkaar bespreekt enzovoort.

00:24:30 Dat afgeluisterd wordt.

00:24:32 En ik zie nooit een drone vliegen, wel als verschillende helikopters.

00:24:40 En vliegtuigen enzovoort.

00:24:42 Ik zie bijna geen mooie vrouw.

00:24:44 Dat is ook ironisch gezien heel apart.

00:24:47 Voor iemand die mijn zit.

00:24:50 ...mituatie zeg maar, om dan zoveel jaar alweer door de afvalbak omlinkt te worden en remote control bestuurd.

00:25:00 Die dashboard is heel apart, is heel erg vreemd, maar...

00:25:13 Nieuws of media, streaming, en dan ook, ja, en ook.

00:25:20 van alle leuke seksuele avontuurtjes en spanningen bouwen, maar dan 4 mei letterlijk alle jeugd weer in en ook zelfs in de dataset, digitaal, weer in het echt.

00:25:30 af te sporen en te proeven en te voelen met de weet.

00:25:33 En dan het onderscheid maken tussen religies, huidskleur, allerlei.

00:25:40 verschillende regenboog dingen enzovoort, maar en dan ook een beetje wel inheems of andere landen enzovoort.

00:25:50 En dan wordt het heel snel complex, want ik weet zeker dat Nederland is groter en het bestaat nog.

00:26:01 Ben je ook weer naar een paar plekken geweest, dat heb ik in de school op de grond geleden, dat je dat hebt gesnapt.

00:26:11 Ik doe altijd best wel en ik dacht ook een beetje, en soms zijn de mensen aan de bestuur en dan...

00:26:20 Want er is een verhaal.

00:26:22 Ja, de hele tijd.

00:26:27 En dan zitten we nog steeds exact in de realiteit.

00:26:31 En eigenlijk in de drones die je niet ziet, omdat net zo goed in het verlengde van die wetlabs enzovoort,

00:26:40 Doe het jezelf thuis als het niet goed gaat.

00:26:45 Ja, want die had vroeger een anarchist-koekboek.

00:26:48 Als je die downloadde...

00:26:50 De recepten volgden door de kantijnen.

00:26:53 Dan ging je misschien iets boeven.

00:26:58 En dat was niet het oog in.

00:27:00 Ja, precies.

00:27:10 Do-it-yourself in support and other kennis.

00:27:14 In AliExpress wil je alles gelopen zodat je de douane langer binnen krijgt.

00:27:21 Ja, in Nederland en ook in andere landen, moest alles ook logistiek bijgehouden gaan worden van wat je dan...

00:27:30 bestellen waar dat vandaan komt, welke plek van de planeet en de buiten, precies.

00:27:35 Maar dat is niet leuk, val je niet in.

00:27:40 Maar eigenlijk dat dan kan ik niet veel aan het interneeren op.

00:27:43 Precies.

00:27:44 Dat is waar.

00:27:50 Ik heb ook inderdaad helemaal geen vrienden meer over, maar ik ben wel zeker, helemaal zeker, zo zeker.

00:28:00 Dat jullie allemaal grapjes eromheen lopen maken en kinderen weer huppen en nekker.

00:28:04 Kindertjes toevallig gaan uilen als ze langslopen enzo.

00:28:11 They're like, they're like, they're like, they're like the face, brain, the face thing is for the stream.

00:28:18 Mark.

00:28:20 ook voor jong en oud is.

00:28:22 Er zitten al jarenlang de meest vieze en rare mensen te beschermen

00:28:26 en erbij te betrekken enzo.

00:28:30 Heb ik een beetje een issue, want ik wil dat een hele hoop mensen toegang hadden gekregen, maar wel op hoe ik het zelf wilde.

00:28:40 ...en momenten enzovoort, tot een soort, ja hoe zeg je dat, de gigantische taten zijn.

00:28:50 waarbij als je dan echt op leerde, weet je welke kennis, of wilde kunnen ofzo, dat je dan daarna

00:29:00 Ja, of eerst een tijdje hoe ze laten zien.

00:29:05 Hé, ik ga daarvoor ofzo.

00:29:07 Het zwaartelijk werk, ook heel veel mensen.

00:29:10 Ze kennen ook de, weet je wel, ja, als je komt tegen kanker, ik was hier je klaar voor of zo.

00:29:20 Zodat iedereen een heel gaaf in de kop of een speciaal verhaal heeft of zo, job role of dat soort dingen is.

00:29:30 Dat is kut, dat heet bijna dagelijks leven, maar dan ook nu helemaal digitaal.

00:29:35 Dan denk ik maar zeker, ja precies, dus dat zijn ze ook niks.

00:29:40 pensionpacks, maar ik moest ook onbeklaagd worden en dat had gevolgd worden door alle

00:29:45 WGD's en risicoopvolde mensen en organisaties.

00:29:50 Het werd allemaal gestreamd en bijgehouden. Alles.

00:29:56 Dus, weet je.

00:30:00 Wat ik dan de afgelopen paar jaar heb meegemaakt, dat is echt al een woude twee jaar, hier op de Zandte Zwetstijl.

00:30:07 Ik ben die karke, de medderen van de arke.

00:30:10 zeg maar, in kamer 130, appartement zeg maar, 1070 weer, voor schouder.

00:30:20 Als je nu wat leeks op wilde sturen.

00:30:22 Ja.

00:30:30 Heel snel het idee dat je dat doet, weet je wel.

00:30:40 En je wil je dan wel vanaf weten, je wil er een beetje bij op je erop tussen elkaar afgeleid zijn.

00:30:50 Dat is wel irritant dat jullie willen te micromanageren.

00:31:00 Het is alsof ik met jullie speciale commando opgeten ben die alleen maar voor schitterings heeft bevorderd

00:31:06 Zodat we alles kaskade er omheen verstoppen enzo

00:31:10 Want daar zijn jullie iets te fanatiek in geworden.

00:31:14 En dan hebben jullie het gewoon gedaan.

00:31:16 Ik zie het gewoon aan.

00:31:19 Het is...

00:31:20 Dat maakt mij niet zo heel erg een blij persoon op het paddelen.

00:31:26 En dat is vet vervelend.

00:31:28 Waar de hoek mee.

00:31:30 Ja, precies. Want ik ben niet eerlijk...

00:31:40 Of vleespoppen of zo, wat en ook precies.

00:31:44 Of als ik er dit ook uitbreng, dan is er niks meer dan.

00:31:50 En het zijn allemaal superhunters en hekkers geworden enzovoort, en iedereen kan alles verpluggen met jish.

00:32:01 Maar inderdaad, weet je wel, iedereen toegang hier op de toekomst gegeven.

00:33:00 Ik zou nu e-mail trouwens ook even de mot- of de server-host zijn.

00:33:11 I got a damn, I don't have a hot shot for it, but...

00:33:20 Want dat is het hele mooie idee dat we meer of meer de rematen zijn in die film.

00:33:30 We hebben al goed mee betaald met geregeld en ja zeker, alleen soms zijn dit goed dus.

00:33:40 It's a whole time.

00:33:51 En bij de start is ook zin in deze cadeauten van je alles houden.

00:34:08 Давайте с нападением.

00:00:11 Yeah.

00:00:28 Obrigado.

00:00:31 We were looking for those in support from everybody and I chose the Ashton and the 6% of our families.

00:00:42 Als herinnering ook, geiten paardjes, een soort loetaflevels, dus ik heb er daar een paar jaar van.

00:00:50 Ik leer ook minder de bewustzijn dingen, dat ik veel kennis heb, zonder dat ik daarover na over denk ik.

00:01:00 Yeah, but we see that because we don't have a problem at the end of the day.

00:01:04 Yeah, so.

00:01:10 Ik doe het niet, maar nu heb je uitgewoordig, want ik heb er heel erg opgedaan op de geest gezet.

00:01:21 대세오

00:01:36 Hmm.

00:01:43 É, né, e como é ver aí, eu entendo tudo, né.

00:01:58 Yeah.

00:02:01 Dat is wel een doel van.

00:02:03 Oké, zorg ik niet meteen mijn nek brengen, zo ben ik nu nog te...

00:02:07 Ja, prima.

00:02:10 Ich kann auch keine Videogamers spielen, weil ich die Kreativität mehr behaupte.

00:02:20 wanneer ik weer, ja, kan proberen of net genoeg na kan denken en zo.

00:02:25 Met creatieve gedeelte in mijn hersenen hebben we jullie verbruikt van jullie.

00:02:31 met de taal neurointerface tegen en zo, die zitten ergens nog indirekt naar mij.

00:02:40 Weet je ook wel op de digitale datamanier, van analog enigszins.

00:02:51 Dan doen ze dit, streamen en verheren enzo, precies.

00:02:56 Dus, ach.

00:03:00 Yeah, and we'll later in the day, we'll...

00:03:08 Okay.

00:03:10 Ja precies, dat leef je in het jaar 0 qua maatschappelijke ontwikkeling op het gebied van technologie, want die trots kwam er niet meer.

00:03:20 zodat iedereen thuis remote drones kon maken en besturen, ook om mensen te bespieden en zo, te stalken.

00:03:30 Maar ook met wapens.

00:03:32 Zoals je wel filmpjes had gezien.

00:03:34 Van Drans in de...

00:03:36 Of op de Rukrine enzo.

00:03:39 Waarbij...

00:03:40 Dan draaien we natuurlijk, expressief onderhand, vlicht op iemand aan, hup, ben je dood.

00:03:47 Jammer.

00:03:50 Het werkt hier niet, ik zie nooit een droomvliegen, ik zie geen Pokémon.

00:03:53 Mensen hebben pas wel dingen gedaan.

00:04:00 Creatieve kunstinstallaties enzo.

00:04:02 Zeet op het nieuws.

00:04:04 Belangst erbij.

00:04:07 Alles goed.

00:04:10 Ja precies, en het zit eigenlijk even weer, precies, echt perfect, top puik gaan, precies.

00:04:20 En vooral niet.

00:04:24 Kijk, we hebben het ontzettend over wat ik wil doen.

00:04:30 Ik heb een computer uit het jaar nul, desktop computers, met een telefoon waarbij ik zelf toch echt rustig aangegeven heb.

00:04:40 Die shit wordt afgeluisterd, ook al heb je alles gepiped en alles enzo, wat ook de zendmasten en alle gps-data dingen.

00:04:50 Een projectje van mij en wat mensen in de zorgers hier doen van kanker.

00:05:00 Zoals ik niet bij mijn hersenen kan, kennen jullie die niet in de lift in een keer lasersterk geluk maken.

00:05:11 Dus goed werk. Je kunt er niet diepe ruimte in.

00:05:20 Goddelijke ruimte, zeg maar, in het dagelijks.

00:05:30 Leven, hebben jullie eten, drinken en hebben wel goede en slechte seks.

00:05:35 Helemaal prima.

00:05:36 En we hebben al die dingen achterbespreid.

00:05:40 wat ik niet mee kan. Ik doe daar de hele tijd schepjes bovenop en gewoon lekker naar mij.

00:05:45 Vandaag moet ik gewoon los nemen, want ik doe dat weer.

00:05:50 Zoals nu sta ik een beetje uit, want dit zijn wel leuke tikkerten.

00:05:55 Hier heb ik allemaal AI gebruikt en daar slaap ingezet.

00:06:00 Ik heb dat een beetje onkwaar gemaakt, maar het is wel verschrikkelijk.

00:06:10 En daar heeft er nog een maatschappij geïnvloed, dat ik in ging van kerk en investeren.

00:06:20 Weet je, ik kan nog veel meer dan een paar voren gooien, weet je wel?

00:06:26 Maar dat doet dat niet.

00:06:28 Het is een spoor.

00:06:30 Maar dat is natuurlijk dat we dat niet mogen doen aan Kees Boven en Verdaans kunnen wijken weer.

00:06:40 Of die gast, die arts in de opleiding bij Vlaardingen, die wel even een foto van mijn eikel.

00:06:50 Ik kwam een piemelman, omdat ik toen geen malinfectie had en nu wist ik een zowel test doen die bij de GGD test werd in de lab en zo.

00:07:00 Dat probeer ik van Mentren, van Arkin, zeg maar.

00:07:03 Die heeft net zijn telefoon, daar kwam ik hier.

00:07:07 Terwijl ik in de gesloten af...

00:07:10 Ik moest gaan douchen en zo en opgenomen werd omdat ik psychotisch was en helemaal maatschappelijke te lorgaan.

00:07:20 het woord voor de tweede keer, weet je wel? Ja, de eerste keer bij de eerste post.

00:07:30 Ik heb me niet meteen opgenomen, dat wil ik ESD gebruiken te varen, want ik wou dat ik een CD was.

00:07:38 Het is slecht.

00:07:40 Ik heb gewoon mijn carrière.

00:07:42 De pennaam wordt nog heel handig met wel de ideeën bezig.

00:07:45 Met een fellow boarder vol en een internetbrowser, digitale geschiedenis.

00:07:50 En het huisleven en een baan voor de assenterapeer en toen had ik meer enzovoort, maar dat ik wel met die grote bedrijven in kon.

00:08:00 Als je, weet je wel, zo naar de klanten geholpen wordt in je hersenen, ga je dat maar verweren.

00:08:11 En dan ook de consequenties ervaren we dat je kanker vastzit dan.

00:08:17 Dat is erger dan een gevangenis.

00:08:21 Want je hebt zelf nog niets gedaan.

00:08:23 Ja, de GGZ.

00:08:26 En dus ook TBS.

00:08:28 Dan heb je wel wat gedaan.

00:08:30 Alleen, ja, weet je, behind the scenes, met de stream en immersion en achter het operatieproject.

00:08:40 doekje dat we persoonlijkheid ombuigen en verhuren en high frequency treden en tijd met elkaar

00:08:47 spenderen zodat iedereen sector

00:08:50 en groepen. Ik heb net uitgelegd hoe ik op deze paperclip een beetje werkte met een soort cijfer.

00:09:01 En deeltjes en zo.

00:09:03 En jullie hebben wel dingen gedaan. Alles wat ik net zei.

00:09:10 Het is exact 100% deterministisch de waarheid.

00:09:20 Weet je, nu hebben we allemaal met een telefoon'tje nog, we hebben geen bijwijs.

00:09:30 We spreken future sci-fi-technologie.

00:09:34 Die hebben mij publiekelijk als een soort interactieve tentoonstelling dit aangegeven.

00:09:40 Ik sproon die een paar jaar, dat hoor ik.

00:09:50 En dan kom ik net al geracht of zo.

00:10:00 Ik moet de informatie van derde beschermen enzovoort.

00:10:05 Daardoor kan ik je taché niet halen, even op een uurt bij je stikken.

00:10:10 Alleen de rapportages en dingen enzovoort, maar als het lukt, dan de dag met de advocaat, weet je wel, dan wil ik echt wat doen.

00:10:21 De audio sequenten waarin ze zegt, weet je wel, dan.

00:10:30 Ik volgens mij de advocaat, Arkin, om alle data naar boord te halen, alle digitale data.

00:10:40 En uit te zoeken wie wanneer toegang heeft gehad tot welke dagelijking van Arkane zelf.

00:10:50 van mijzelf, mijn medische dossier, dat allemaal gekoppeld zit aan elk buiten.

00:11:00 met bestaand circuitjes, systeem en alles, terwijl je roddertussen lichamelijk besturen en verhuurden en streamen.

00:11:10 Weet je, dat lijst heeft nog wel langer doorgegaan, maar als ik gewoon zo stil ben.

00:00:05 Maar dat riep nog een beetje.

00:00:10 Ja, dan moet ik op mijn laptop aan de toepen met je codex openen en dan laten we.

00:00:20 Probably there's no lip, I'll have a lip clipboard and so on.

00:00:44 Ja, en een andere kolbedoperator.

00:00:50 Je zou maar een vriendin kunnen doen, of in de bijlaten waar we wel even beginnen of zo.

00:01:00 Tot alle mensen daar omheen die wilden ook even de show...

00:01:10 Ik kan bejoinen enzovoort.

00:01:12 Nou, ik zie het dus ook wel.

00:01:14 Ja, ik heb echt veel moeite.

00:01:22 Oh

00:01:30 Als je, als je het beroemd zullen worden, of wat bijbeldingen dan kan ik herkennen, of hoe je het doet.

00:01:40 Grazie.

00:02:03 That's what we're doing, we're going to take a look at them.

00:02:08 That's what we're doing.

00:02:12 ありがとうございました

00:02:37 Grazie.

00:03:42 Thank you.

00:04:06 Amen.

00:04:14 De politie, de justitie en de triage.

00:04:21 We hebben ook digitale datacentra of data in digitaal.

00:04:30 Vol met dossiers en bewijs overbod.

00:04:40 Ja, bijvoorbeeld hier gebeurt, maar ook gewoon over alle dingen die iets in gewijs gebied liggen,

00:04:47 of soms aan de zwakke kant, lopen erger.

00:04:51 En dat wil ik niet, dat dat allemaal voor jong en oud en families geïncruid is.

00:05:00 En dat maakt mij geen plebapiel, stiekem of zo.

00:05:06 Het maakt mij gewoon doodbang voor wat mensen...

00:05:10 de doorsnijde bevolking en dan hoef je je niet gedeligeerd te voelen als ik je de doorsnijde bevolking noem, zeg maar.

00:05:18 Dat blijven jullie besparen.

00:05:20 En zo hebben jullie allemaal, jullie individuele hobby's en ventjes en dat soort dingen.

00:05:30 Rustig te blijven.

00:05:32 Ook al heb je een trilling leven enzovoort.

00:05:35 Met snelle seks en allerlei drugs.

00:05:37 Dingen en werkveel.

00:05:41 ...zien dingen en support.

00:05:43 Je houdt een beetje rustig, weet je wel.

00:05:48 Ja, precies.

00:05:50 Succes allemaal, ja precies, want ik wil niet, want Super One is de meeste.

00:06:00 Dat is een goed woorden voor u.

00:06:10 Bepaalde grafische, graphical beelden enzovoort en ervaringen en gevoelens.

00:06:20 voor iedereen beschikbaar komt enzo, want soms heeft het daarin wel gewoon op lange termijn

00:06:26 niet de meest gezonde effecten zeg maar.

00:06:30 En ik heb nou eenmaal wat ik heb beleefd onder omstandigheden en zo.

00:06:40 ...van de woord waar het een beetje algemeen te houden, dik voor iedereen, ja, dik aan van iedereen, dat wil ik van besparen, zeg maar.

00:06:52 Ja, maar dat je dat andere mensen vermogen moeten gaan worden.

00:07:03 Ja, en dan is het niet leuk.

00:07:05 En dan is dit een stoel verhaal.

00:07:10 Lek me aan op het lippeltje mee weg.

00:07:13 Er zijn vet veel mensen die dan wel wat heksten in eigen handen proberen gaan meenemen ofzo.

00:07:21 Ook in publieke luken verstandigheid en lijst.

00:07:25 Maar gelukkig, ik gesprek bijna geen vrouw.

00:07:30 Gelukkig had ik bijna gewonnen enzovoort.

00:07:36 En verder, weet je...

00:07:40 Ik ben de co-op, de buitenvertenties, de streaming dienst en de telefoonkomst, de rijders, de glorieën.

00:07:50 ...concernus en bedrijven en telepartijtjes en marketingdingen en algoritmes en stockmarkets en digitale...

00:08:03 Ja, zie.

00:08:04 En hier was het...

00:08:07 Je was onder de taal.

00:08:11 Ja.

00:08:14 Ja.

00:08:17 Ja.

00:08:20 Maar ja, we zeggen dat we een bedochtig zijn.

00:08:28 Ja, dus nee, nee.

00:08:32 Nou ja, dankzij de geluken hadden we ook goede herinneringen.

00:08:37 Bepi, ik hoor wat.

00:08:40 Ja, dit zijn het via de WU, de fysiotheek, 64 spelletjes hier.

00:08:50 en support doet de tijd nog, films en zo, naar boven wonen, in een woning, een hele prettige tijd, zeg maar.

00:09:00 I can't see the rubs, the song, the ex-haso, the song that I'm already at the whole dance show.

00:09:05 And, yeah.

00:09:10 Tegenopzichten van dit allemaal, zeker.

00:09:14 Maar dat zijn echt hele nieuwe herinneringen.

00:09:20 Maar hier zit het wel wat er gebeurt, ja, dus je kunt ook in privé leven, of in thuis leefen, of allemaal leefen.

00:09:30 Stabilaars. Ik vond wel dat ik er nog aan de transe zou gaan nemen, ik weet het niet, ik weet het niet.

00:09:35 Dus...

00:09:40 Na zoveel jaren van torture en niet op de... ik ben zo'n diepe kunstenaar.

00:09:50 Ja, of ik heb daar wel wat bij gemaakt, maar daar is m'n tolerantie op.

00:10:00 En dat in mijn lichaam wordt het bovenbouw opgepleegd.

00:10:05 Dus geel het kreeg je wel nog wat gevoels.

00:10:10 uit van een hele hoop lichaam, zenuwen en zo, de prikkeltjes, de knitteltjes, waar het

00:10:18 zegt niet dat het er goed voor staat.

00:10:20 Dat staat voor iemand van 36 in de prime van z'n leven, zeg maar, ja precies.

00:10:26 En dat wordt allemaal op afstand remote control.

00:10:30 Weet je wel? Dat. Kom dat.

00:10:40 Ja, ik had nog heel veel plezier voor een spaarkelkop om te doen, maar ik moet altijd een kutclash opruimen voor iedereen, zonder ramen.

00:10:50 We zijn ook aan de poortopkamp, de leuke kant.

00:11:00 Het is zo'n woord dat je bijna in je handjes schrijft.

02:29:40 Great deal in the timespan, groot en logisch.

02:29:43 We hebben het uit het vol gegooid.

02:29:46 De Q is helemaal volgepropd.

02:29:48 Zat u vast niet aan.

02:29:50 Die herfwinnen kan we wel hebben toch, pleuren op met die Zwetenballen.

02:29:57 We hebben het gewoon gedaan he.

02:30:00 It's just a bed

02:30:02 Look at the face

02:30:04 Wow! Super

02:30:06 Super fun

02:30:09 And all these

02:30:10 Die kankerde beeldtjes die er nog bij mij te maken hadden, hee, he, he, he, he, he, he, he, he, he, he, he, he,

he, he, he,

02:35:53 Have one.

02:36:00 Ja, dan ga ik erdoor. We doen het gewoon.

02:36:04 Ik ben al zwaar meer dan deterministisch overtuigd en ik denk dat echt, echt, echt, echt.

02:36:10 Ik vind een kanker grote groep niet op deze manier, er wel vanaf weten denk ik, laat die kanker de beeldjes maar.

02:36:22 Nou, maar gelukkig kan het de hele herhaal nog eens geschaald worden, toch?

02:36:30 Spiegelet.

02:36:31 Daar hebben we zo'n vliep en die paar jaren.

02:36:41 Alles verspreche ich mir nur auf, hat das aufgeschört.

02:36:50 Gewoon gehandicapten, precies.

02:36:52 Maar, ja...

02:36:54 Kijk, dan ga je voor je voeten worden.

02:36:58 We hebben altijd wat te sparen.

02:37:00 Wat?

02:37:03 Ja zeg maar, wie betaalde ik niet eens hoeveel van?

02:37:10 Nee, dit is een zendtijd in gehandicaptenland, Nederland.

02:37:20 Ja, ziekte. Ja, en dan weer een paar homo'tjes erbij en zo.

02:37:22 Dat doet altijd goed voor de kijkcijfers en de torture.

02:37:26 Ik had het ook nog bij een bepaald publiek.

02:37:30 Ik ga helemaal geen handicap maken, want dat is zijn bedoeling.

02:37:34 Hij wil iedereen zelf ook overnemen.

02:37:36 Oh kanker, hij zegt wel dertig allemaal.

02:37:38 Nu mogen wij het weer.

02:37:40 kapot maken enzo. Toch, kijk oranje en groen. Loyal is. Wel even dik geïnvesteerd he.

02:37:50 Ruud met die kindjes vroeg.

00:34:30 I don't know what you should do.

00:34:32 I don't know what you should do.

00:34:36 I'm just trying to shake it up.

00:35:02 policy, not to capitulate to terrorist demands, but no concessions policy remains in force.

00:35:10 wildly speculative and false stories about arms for hostages and alleged ransom payments.

00:35:16 We did not repeat, did not trade weapons.

00:35:20 Anything else for hostages

00:35:31 of us are bakers we all talk having greens but none of us are makers if none of us are makers

00:35:36 and none of us were weak they would feed our people when our people

00:35:44 Always seem to give them it some ballin' and some dance

00:35:46 And some talkin' bout, I call it an imaginary mansion

00:35:50 We are advertisements for agony and pain.

00:35:58 We exploit the youth.

00:35:59 We tell them.

00:36:00 We tell them dope stories, introduced them to the gang

00:36:03 Just like I love the North introduced us to cocaine

00:36:06 In the 80s when them bricks came on military plane

00:36:15 I told the American people I did not trade arms for hostages.

00:36:21 You should still tell me that's true, but the facts and the evidence tell me it is not.

00:36:26 The end of the Reagan era, I'm like number 12.

00:36:30 To understand that shit'll change forever

00:36:32 They declared the war on drugs

00:36:33 Like a war on terror

00:36:34 What it really did was let the police terrorize whoever

00:36:37 But mostly black boys

00:36:41 And lay us on our belly while they fingers on their triggers.

00:36:43 They poochers on our head, they dolphins on our crotches.

00:36:46 And they would beat us up if we had diamonds on our watches.

00:36:50 I guess that that's the privilege of policing for some profit

00:36:55 But thanks to Reaganomics, prison turned to profit

00:36:57 Cause free labor's the cornerstone of you

00:37:04 Then read the 13th Amendment

00:37:06 To the slavery and previous

00:37:09 That's why they

00:37:10 This time it doubles.

00:37:12 Reagan was an actor, not at all a factor.

00:37:15 Just an employee of the country's real masters.

00:37:18 Just like the Bushes.

00:37:21 Telling lies

00:37:22 Tell a pop

00:37:23 So this can argue

00:37:25 With this logic

00:37:26 Why did Reagan

00:37:27 And Obama

00:37:27 Go after

00:37:28 Kadops

00:37:29 And we can't

00:37:29 Say that

00:39:36 Gracias.

00:41:13 Thank you.

00:42:50 I can burn the scorch bodies.

00:42:52 I can burn the gun and hurt.

00:42:54 I'm so tense.

00:42:55 I'm getting a serious cold jam.

00:42:57 My hair is with tears in the cold rain.

00:43:00 They stay watchin' like they keep me on a stove can

00:43:02 I'm mad at all that brands

00:43:05 You hurt so bad

00:43:07 And the national be tryin' to get my soul bad

00:43:21 If I better put it

00:43:22 When your family say that a million

00:43:24 I wish that you wouldn't

00:43:25 Niggas got nice clothes

00:54:11 Our government has afforded not to capitulate to terrorists' demands,

00:54:16 but no concessions policy remains in force.

00:54:43 But none of us on acres

00:55:00 Thank you.

00:55:11 the dope stories introduced us to cocaine in the 80s when the freaks came on military plane

00:55:25 I told the American people I did not trade arms for hostages.

00:13:35 All right.

00:13:36 Awesome.

00:13:40 깜짝이야

00:13:50 We should lie since I walked in the light

00:13:52 My lightning from a cloud or a dark sky

00:13:54 Takes my lifestyle a tighter style

00:13:56 Try to slide a tight one on a nice smile

00:14:01 If you got shit to say, say it right now

00:14:04 It's been two years, we've stayed out of sight now

00:14:06 Last time you got us more, get it right now

00:14:17 Tchau, tchau, tchau.

00:14:24 I'm glad it needs you.

00:14:31 Y'all, who's that pumping those beats in the Tahoe?

00:14:34 Who's those kids from the east of Oslo?

00:14:37 Who couldn't be but those three apostles?

00:14:42 Who's that pumping those feet to the top?

00:14:45 Who's those kids from the east to Oslo?

00:14:48 Who couldn't be but those feet?

00:14:56 We really made a difference, why I'm staying from a distance, I'm sure they're listening.

00:15:00 Secure my position

00:15:01 I'm in this

00:15:01 Cause when I get pissed

00:15:02 I tore up with my face

00:15:03 Tore up with my clique

00:15:04 And we can all agree to

00:15:06 That unless you need the rest

00:15:07 Of your peeps to complete you

00:15:14 like I haven't got ears or haven't got eyes, I can see one, I'm sorry I don't smile every time I meet you.

00:15:20 I'm sorry, I've been always friendly and peaceful

00:15:22 I'm sorry, I get drunk and beat up your people

00:15:25 I've seen your favorite, I'm afraid I'll tell you my name and fame

00:15:28 Come run up with the situation

00:15:47 Thank you.

00:15:51 You decided to lie

00:15:52 Establish the tense situation between you and I

00:15:56 I ain't changed the whole system

00:15:57 It's rearranged

00:15:58 I jumped off the ship before

00:16:00 It went down in flames

00:16:01 Now I only stick with the people I know

00:16:03 In a crummy studio

00:16:05 On the east side of Oslo

00:16:06 Who's that pumping those beefs in the Tahoe?

00:16:13 But those three apostles

00:16:14 Spent the gospel

00:16:17 Who's out

00:16:18 With those beats

00:16:19 And the top

00:16:21 It's from the east of Oslo

00:16:22 Even though we are pastels

00:16:25 Colossal

00:16:26 And spit the gospel

00:17:10 I don't want to play with her a couple of days.

00:00:05 Ja.

00:00:06 Oké.

00:00:10 I was talking about the new psychiatrist.

00:00:13 Okay.

00:00:20 Ja, welke afspraak zou dat zijn?

00:00:22 De nieuwe chief chatter.

00:00:40 Nee, 9 november, om 10 uur.

00:00:42 Ja, oké, dat is ook prima. Kijk hoor, 10...

00:00:50 Waarom belt u mij daarover?

00:00:51 Waarom kan dat niet via een kaartje of een van de talloze medewerkers hier op de kliniek?

00:01:00 Okay, uh...

00:01:13 Nee, niet per se, maar het is gewoon weer de onpersoonlijkheid, zeg maar, weet je wel.

00:01:20 Ik snap wat u bedoelt.

00:01:21 Bij Stefan had bijvoorbeeld de nieuwe psychiater, dat zou ik netjes gevonden hebben, zelf even een kaartje komen brengen.

00:01:30 informele hooi gezegd en daarna zien we elkaar en spreken we elkaar over het medische gedeelte

00:01:36 zeg maar dat is gewoon misschien een tip voor de volgende

00:10:58 This hell to pay, but

00:11:00 I don't think so.

00:11:13 I don't think I'm so nervous, man.

00:11:25 Don't worry about it when you should be playing.

00:11:30 Not bad, I hope you don't know.

00:11:32 Make sure you can listen to me like that.

00:11:34 Let me tell you about you.

00:11:38 It's horrible.

00:11:40 It's a bit of a bit of a bit of

00:15:53 I don't know.

00:15:59 How's it going?

00:16:00 It's been noted.

00:16:02 Respect.

00:16:05 Be the arm of the organ.

00:25:30 Waarbij, even kijken hoor, ik moet het wel even opzoeken.

00:25:40 Ik ben even mijn woorden vergeten.

00:25:47 Waarbij organisch...

00:25:50 Biologisch materiaal niet van toepassing is.

00:26:00 Inderdaad, fascinele materialen ontstaan uit zand, maar de diepere natuurkunde en chemie erachter werken net iets anders.

00:26:10 Hier is hoe de wonderlijke wereld van glas op autonome niveau.

00:26:17 Van zand naar silica.

00:26:20 Zand bestaat voor een groot deel uit silicium, wacht, silicium dioxide, CO2, ja.

00:26:30 Ook wel silicaan genoemd.

00:26:33 Dit is een chemische verbinding van silicon en zuurstofatomen.

00:26:38 Ik sla even.

00:26:40 over op. Iets over, zeg maar. Eerste prompt is de bio.

00:26:50 Mechanisch en biochemisch.

00:27:00 Om de wonderlijke wereld van glas echt compleet te maken, moeten we inderdaad kijken naar de biochemie en biomechanica, hoewel vensterglas puur.

00:27:10 anorganisch is, speelt silica zand in de natuur namelijk een gigantische rol in levende organismen.

00:27:20 Hier is hoe biochemie en biomechanica samenkomen.

00:27:30 De wereld van levend glas, biochemieorganismen die glas maken.

00:27:38 Wacht even, dit gaat fout.

00:27:41 Kiesel, kiesel, wieren, kiesel, wieren, kiesel, sponsor, vak.

00:27:50 glas in de zee niet in niet drinken van de zee dus biomechanica de perfecte architectuur

00:28:00 karekens, simulier, sterkte, gewaagde structuur, venus, korfje, ja, dat mag even.

00:28:10 Moet effe, hoogtempertuur, 1700.

00:28:20 Dat betreft het niet.

00:28:24 Sorry, dat is mijn privé social media ding.

00:28:30 Sorry, ik ben onprofessioneel.

00:28:34 Wacht even hoor.

00:28:36 Dat is wat onverhoogstbaar biologisch.

00:28:38 Schil.

00:28:42 Maar als ik nou zei, mech en gen.

00:28:50 in plaats van biocam en biomech.

00:29:00 De chemo-mechanica stappen direct van de biologie naar het nieuwste materiaal, ook in de van glas.

00:29:11 Meegane alchemie, glas maken en veranderen met pure kracht, koud glas.

00:29:20 Chemo, mechanica, hoe chemie, de sterkste van glasbetaal, bla bla, bla, bla.

00:29:28 Oké.

00:29:30 Die correctie van de vorige bron in de eerste...

00:29:40 Dit is de eerste prompt, waarom je niet zo scherp bent, want er zat wijn in watergles.

00:29:50 Nou ja, als we de allereerste prompt opnieuw opbouwen met de exacte correctie.

00:30:00 mechano chemie en chemo mechanica krijgen we het ultieme natuurkundige

00:30:10 het totaalplaatje van glas. Hier is de gecorrigeerde wetenschappelijke vertaling van mijn visie

00:30:17 op de wonderlijke wereld van glas.

00:30:21 De wonderlijke wereld van glas, gecorrigeerd.

00:30:27 Glas is gemaakt van zand en zand bestaat.

00:30:30 Het staat uit silica. Silicium Dioxin.

00:30:35 Silica is op te bouwen uit de wissel.

00:30:40 tussen mechanochemische krachten, de mech-chem component en...

00:30:50 En chemomechanische structuren, de atomele klokken, waarbij organisch, biologisch materiaal inderdaad volledig buiten.

00:31:00 Beschouwing wordt gelaten.

00:31:04 Op atomair niveau ziet de mechanische chemische wereld er zo uit.

00:31:10 De atomaire klokken. Symmetrie en trillingen.

00:31:15 Symmetrie en trillingen.

00:31:18 Even overnieuw.

00:31:20 en de klokken. Symmetrie en trilling. In de quantum chemie gedragen de bindingen.

00:31:30 Tussen de silicium en zuurstofatomen zich als microscopisch kleine pef.

00:31:40 perfect afgestelde harmonische oscillatoren, een soort antonaire klokken.

00:31:47 Ze trillen op een vaste fundament.

00:31:50 De hele frequentie, de MEC-CAM-transitie van zand naar glas.

00:31:57 Eerst even je vinger opsteken als je bedoelt als je het vraagt.

00:32:00 hebben. Ik moet even concentreren. Om van de geordende kristalstructuur van zand, kwarts,

00:32:10 Naar de chaotische structuur van glas te gaan is een mechanochemisch proces nodig.

00:32:20 Dit nou gebeurt door extreme thermomechanische energie, smelten en ultrasnel afkoelen, of door pure mechanische energie.

00:32:30 De stabiele chemische verbinding, nee, de stabiele chemische verbinding,

00:32:40 Economische bindingen van de silicaatstructuur worden geforceerd, opengebroken en in een bevroren amorfe toestand.

00:32:50 gedwongen chemomechanische stabiliteit omdat er geen organische of biologische moleculen

00:33:00 ...aan te pas komen, is glas puur anorganisch.

00:33:08 De mechanische stel...

00:33:10 De sterkte van het glas, waarom het zo hard is, maar ook waarom het breekt, wordt puur bepaald door de chemische bindingsenergie van de stad.

00:33:20 Door deze mechanische chemische benadering te gebruiken in plaats van biologische processen.

00:33:30 Beschrijf je exact de fundamentele harde materiaalkunde achter glas die weer de kern van je prompt.

00:33:40 Wacht, van de lecture.

00:33:41 Eh, sorry, ik heb het een beetje, ja, ik gebruik die voor de lecture, maar mechanochemisch.

00:33:50 hebben gecorrificeerd waar willen jullie dieper opeens noemen want

00:34:00 Een regenboog doet niet mee, maar is een subset.

00:34:10 van de preparaat 1

00:34:14 lipids preparaat 2

00:34:20 Carbohydrates en vandaar dat deze leekte op.

00:34:30 Serperenbaldbeel.

00:34:41 Verder niks.

00:34:47 Van Zijoda aanwerkt strikt biologisch vertalen.

00:34:50 sluit dit naadloos aan op hoe macromoleculen in een laboratoriumpreparaat geanalyseerd en geobserveerd worden.

00:35:01 De optische regenbooglichtbreking door waterdruppels doet hier inderdaad niet mee.

00:35:08 In plaats daarvan...

00:35:10 Praten we over een biochemische kleurenlaaier die uitsluitend zichtbaar wordt door de biologische detectiemethoden.

00:35:20 Het biochemische preparaat in de regenboog.

00:35:27 Wanneer we levend materiaal opdelen in...

00:35:30 specifieke preparaten, creëren we een strikte scheiding in eigenschappen.

00:35:36 Preparat 1, ja, vette olie hier.

00:35:40 Chofferhoop, waterafstoot en vetopslag.

00:35:45 Suikerzetmel, celluloze.

00:35:50 Want als je wat ouder wordt, op sommige vrouwen staat dat best sexy of gewoon de imperfecties zijn soms.

00:35:57 Gewoon, het geeft karakter.

00:36:00 Maar ze zijn ook algemeen juist hydrofiel, wateroplosbaar en dienen als direct op kortstondige energie.

00:36:10 energiebronnen. Waarom dit alleen door bio te observeren valt. Het regenboog waar je op doelt is te kwalitatief.

00:36:20 kleurreactie

00:36:21 indicatoren

00:36:23 waarmee biologen aantonen welke

00:36:26 macromolecuul aanwezig is

00:36:28 zonder biologische kleurreactie.

00:36:30 zuurstof of enzymatische reacties, verder niks, zie je in de reageerbuis met suikers of vetten.

00:36:40 Alleen een saaie, heldere of troebelde vloeistof.

00:36:44 De subset aan kleuren wordt pas geactiveerd door specifieke biogeving.

00:36:50 chemische test. Ja, de koolhydratenregenboog, de lipide indicatie.

00:37:00 zeg maar ja maar ik had er ook heet kijken dat

00:37:10 Het dingetje komt eraan bij je allemaal, even kijken hoor, ehm, ja wacht.

00:37:20 Hydrofobe, convectie, emulsie...

00:37:30 Ja, dat is het eigenlijk wel.

00:37:32 Confectie.

00:37:34 Want...

00:37:36 Want...

00:37:41 Deterministisch en exact bestaande...

00:37:50 Regen, boog. En nou ook niet. Ja, precies.

00:38:00 Zuur, is is, waarsen, is is.

00:38:34 Ik moest even wat extra's toevoegen.

00:38:37 Dit begat ik mijn woorden en nu is het weer...

00:38:40 Gewoon dingen.

00:38:43 Ik heb ook een fysicosectie, exact conclusie van de formule.

00:38:50 Een regenboog bestaat deterministisch gezien niet als een ding of een club.

00:38:55 Het is een tijdelijk neveneffect van een systeem dat via een energie...

00:39:00 Multi-hydrofo probeert kinetische en thermische energie te verplaatsen,

00:39:06 confectie en microscopisch te verdelen.

00:39:10 divisie. Zodra de wetten van Fresnel en de logaritmische dissipatie hun werk hebben gedaan en het systeem zijn

00:39:20 Mijn ultieme evenwicht bereikt SURE equals BASIC, blijft er slechts een homogene, neutrale toestand over waarin de...

00:39:30 de illusie van de regenboog volledig is opgewoest.

00:39:40 Dat was eigenlijk de fietsen, die werken echt terug.

00:39:50 Niet online zoeken.

00:39:56 Ja, sorry, stay safe.

00:40:00 Ja, ik dacht, laat ze vertalen naar een puur deskundige matelijksoperatie.

00:40:05 Ja, precies.

00:40:10 Nee, nee, nee, nee, nee, nee, nee, nee, ja precies, ik was baas, eh, eh, wacht even waar, eh, sje.

00:40:20 De termenistische, de graal, de 406.

00:40:26 Nou ja, wat een kak.

00:40:30 Systeem, identiteit, wiskundige definitie, ik bedoelde alleen als actrie.

00:40:40 Pitchy Identifiers.

00:40:44 Verder wilde ik de...

00:40:50 Lookup table, formalisatie voor mijn klas.

00:41:00 Hier is de exacte formele wiskundige definitie van een look-up themel geschreven in een helder universele taal om direct aan je klas te doen.

00:41:10 Dit model sluit naadloos aan op een deterministische exacte logica waarin geen ruimte is voor reis of divisie.

00:41:20 oké

00:41:26 ik bedoelde

00:41:28 van de totale

00:41:30 Context, alle chronologische prompts en het is de exacte date.

00:41:42 Lookup table and concurs

00:41:52 Die is het volledige geconsolideerde en geformaliseerde systeem over zich.

00:42:00 van jouw intellectuele eigendom

00:42:03 aller chronologische stappen uit de context

00:42:08 van de organische

00:42:10 ...atomere klokken van silica tot de biochemische macromoleculen en de thermodynamische opheffing.

00:42:21 ...zijn hier samengebracht in één exacte deterministische look-up table met formalism.

00:42:30 en eindoclusie te entlozen.

00:42:38 Het systeem sluit.

00:42:40 Biologisch wacht het chronologische transformatieveld.

00:42:44 Het systeem sluit biologische en optische illusies zoals de atmosferische regenboog.

00:42:50 volledig uit.

00:42:51 Wat overblijft is een pure opeenvolging

00:42:54 van

00:42:54 mechadochemische

00:42:57 chemomechanie

00:43:00 en biochemische parameters,

00:43:04 gecategoriseerd in twee harde preparaattoestanden.

00:43:10 Koolhydraten hydrofool, preparat 1. Koolhydraten hydrofiel, preparat 2.

00:43:20 Ik kan me wat chemische shit naar voorlezen voor, ja, zeg maar shit.

00:43:25 Maar je bent wel wel afhankelijk van.

00:43:28 De systematische...

00:43:30 Conclusie, wet van totale neutraliteit.

00:43:34 Binnen dit exacte model is de traditionele regenboog gereduceerd tot een tijdelijke wet.

00:43:40 Die onmiddellijk inzakt zodra het systeem zijn rusttoestand bereikt.

00:43:46 De fundamentele formule van het totale...

00:43:50 Zuur staat gelijk aan bazen, is vervolgens.

00:44:00 De zuurte, pH, is 7 in dit geval.

00:44:10 van energie is nul.

00:44:13 Fresnel staat gelijk aan inbeurs, logaritmische dissipatie.

00:44:20 Eindbepaling. We zien de toelichting op dat delta E over de E is nul.

00:44:30 Dat betekent dat de E, de energieverandering, nul staat.

00:44:35 Dat betekent deterministisch exact van fuck you allemaal.

00:44:40 niks organisch, biologisch aan de hand.

00:44:47 Weet je wel, we hebben het hier over.

00:44:50 Dat is de eeuwische conclusie. Exacte model, look-up table, energie 0, PA 7, weet je wel, gewoon...

00:45:00 Er is geen illusie, kleur en breking bestaan niet als losse biologische fenomenen.

00:45:10 van Fresnel die de logaritmische dissipatie van energie over de vloeistof- en kristalgrensvlakken registreren.

00:45:20 In de nultoestand, zodra convectie overgaat in pure diffusie, heft het systeem alle gradients op zuur ontmoetbase, reflectie ontmoet.

00:45:30 Het resultaat is een perfect stationair evenwicht, ik wil hem ook wel genoemd.

00:45:37 Dat is moeilijk als je reaction diffusion...

00:45:40 wil simuleren enzovoort. Want de homeostase zou exact de dood van de simulatie betekenen.

00:45:50 Volledig gekwantificeerd en vastgelegd onder de attributie van de auteur.

00:45:55 Oké, 1.

00:46:00 Is is energie dus?

00:46:05 Vraag van de klas.

00:46:10 Daarna zei ik iets over... Even kijken hoor.

00:46:19 Ja, wacht even.

00:46:20 Homeostasis is in reactie.

00:46:30 Diffusiesimulaties is dus dood.

00:46:40 van het systeem.

00:46:44 Dit kan dus allemaal.

00:46:50 omdat het een LUT is.

00:46:56 In de echte wereld.

00:47:00 We are not here.

00:47:10 Staat homeo, nee, homeo, stasis, niet.

00:47:20 Ja, exact. E staat hier onherroepelijk voor energie.

00:47:24 Binnen de natuurkunde en chemie is de E-factor de wetmatige boekhouder van het systeem.

00:47:30 Wanneer je het aan de klas uitlegt kun je de brug slaan tussen mijn exacte look-up table, lip en de fysieke relatie.

00:47:40 Tijd met de volgende harde definities.

00:47:42 Waarom homeostase in een simulatie de dood betekent.

00:47:46 In een wiskundige reactie de video...

00:47:50 Gebaseerd op manolid, betekent homeostase het bereiken van het absolute thermodynamische even.

00:48:00 In de simulatie alle gradients vallen weg.

00:48:07 De vergelijking ziet...

00:48:10 Duur staat gelijk aan Basen, pH-waarde van 7 is stabiel.

00:48:20 Inverse logaritmische dissipatie hebben hun werk gedaan.

00:48:25 Er is geen netto verplaatsing van energie, delta, energie.

00:48:30 De hoogte E is nul en geen convectie meer.

00:48:35 Alleen nog homogene divisie.

00:48:38 Het systeem is klaar.

00:48:40 statisch en dus wiskundig gezien dood.

00:48:44 Waarom dit kan?

00:48:46 Omdat het deterministisch en discreet is.

00:48:50 De waarden staan vast in het geheugen.

00:48:54 Het systeem hoeft geen energie te verbruiken om te bestaan.

00:49:00 De fysieke realiteit. De fysieke realiteit, sorry, een beetje spraakgebrek.

00:49:11 Wacht, ik begin even opnieuw bij deze bullet point 2.

00:49:15 De risieke realiteit.

00:49:19 Waarom echt de...

00:49:20 homeostase een illusie is. In de fysieke biologische realiteit, physical reality, bestaat absolute

00:49:28 homeostase in de fysieke.

00:49:30 Wat biologen homeostase noemen is in werkelijkheid een steady state dynamische evenwicht.

00:49:42 De wet van de echte wereld, een levend biologisch systeem, preparaat 1 ampersand.

00:49:50 2, dus 1 en 2, mag nooit het echte thermodynamische evenwicht delta E

00:50:00 Want delta hoogtijd door E zit soms een verschil in, dus ja, samantisch is exact, want ik heb zei, is nul.

00:50:10 te bereiken.

00:50:12 Dus werkt dat wel?

00:50:14 Dan treedt de fysieke dood in.

00:50:20 Continu verbruiken.

00:50:22 Om te overleven moet een fysiek systeem constant energie, hoofd uit de E, consumeren en warmte distribueren.

00:50:30 om de interne chaos en tropie buiten de deur te houden.

00:50:38 Het is een open systeem.

00:50:40 dat non-stop pompt reageert en difundeert. Conclusie voor de klas die wordt geleden difundeert.

00:50:51 Ik zou het kunnen ontcijferen, maar sorry, conclusie voor de klas.

00:50:56 Een LUT kan een perfecte statische...

00:51:00 homeostase bevatten omdat het een gesloten wiskundige matrix is.

00:51:06 In de fysieke realiteit is homeostase een dynamische...

00:51:10 Het is een constante actieve strijd van energie, hoofdletter 1, tegen de definitieve energie.

00:51:20 Context, systeemarchitectuur en simulatietheorie. Ampersoon.

00:51:30 Zullen we voor de klas visual of programmatisch voorbeeld opzetten van zo'n reactiediffusiematrix

00:51:37 waarin zit het verschil tussen dynamische gouders en...

00:51:40 door de dood evenwicht direct kunnen zien nou ja weet je het cadeautje precies

00:51:50 Ja hoor, dat is helemaal goed.

00:51:52 Hé, als jullie nou allemaal sterven, dan ga ik er bij snel wachten.

00:51:59 Even kijken hoor.

00:52:00 Doe die berg boven die, want ja, zo.

00:52:04 Volgende week gaan we het hebben over, nouja, de taloorgang, zeg maar van...

00:52:10 maatschappij in realtime. Ik hoop dat jullie gedoopt hebben.

00:00:31 ありがとうございました。

00:00:42 ありがとうございました

00:01:22 Thank you.

00:02:55 So, the memories...

00:02:57 ...thingies, yeah?

00:02:58 No, no, no, no, no, no, no, no, no.

00:03:01 It's like a structure, input, memory, access, storage, yeah, besides me.

00:03:10 financing hypo storage limitations, hardware issues.

00:03:26 Alright, it's good.

00:03:31 And those fancy ones.

00:03:57 Voilà.

00:04:41 Ik heb nu ook kanker, anders ga ik natuurlijk niet later kunnen vertaken.

00:04:52 Yeah

00:05:00 Продолжение следует...

00:05:21 I hope they get the message.

00:05:23 Look, I'm in the back.

00:05:24 I'm in the back.

00:05:25 I'm not gonna crash.

00:05:27 I'm in the back.

00:05:29 I'm catching me.

00:05:32 I'm a pro-saf.

00:05:57 Read what I wrote.

00:06:29 Sim.

00:06:30 Yeah, I'm wishing it so good. It's frog jumping.

00:06:40 Oh, what's up?

00:06:41 I'm a trans-setter.

00:06:45 Oh, nigga, my arm.

00:06:46 They don't need it better.

00:06:47 No, free, but I'm broke.

00:06:49 Now my best.

00:06:52 Nice.

00:07:06 Gaan we tegen een zaak op je te zetten?

00:07:10 Eh, kankerman.

00:07:12 Ja.

00:07:15 Weet je?

00:07:17 De contact van de waar ik nu mee bezig ben.

00:07:20 Het is mooi aan mijn beetje gezien, tussen dat zin door, ingeladen en alles wat exact tegen dit zin is.

00:07:30 This side is a bit aggressive.

00:07:35 I've made it a little more of a little bit from there.

00:07:38 I've tied it in.

00:07:40 discussie. En dan heeft de AI, die dat allemaal in zijn heugen heeft, de laptop zeg maar.

00:07:50 Eh, die heeft het gehaald.

00:07:53 Dan weet je dat het niet goed gaat.

00:07:56 Dan kan je echt zeggen dat dit niet de juiste correcte manier is.

00:08:00 Ja precies, dat hebben we allemaal op de gebruik ervan en dat het net is weet je wel.

00:08:10 Is it either an old move?

00:08:23 Thank you.

00:08:40 ご視聴ありがとうございました

00:08:51 No.

00:09:10 예, 예, 예, 예.

00:09:20 今度は言えないんだろう

00:09:30 It's a bit like a folder.

00:09:36 It's in the library so you can float them out.

00:09:52 Yeah

00:10:17 E adeus.

00:10:23 Did?

00:10:24 I'm getting angry about it, yeah man

00:10:30 Fuck!

00:10:33 Let's go fuck you.

00:10:52 And that's cool, I think it's cool, it's cool, it's cool,

00:11:05 They have to seize float and double, but it does not require

00:11:10 Yes, but the requirement of floating equipment cannot affect the model or so on.

00:11:16 So I've got the native pad against that requirement.

00:11:18 Android drawing and touch IPS.

00:11:20 To use floats, yes, but underlying stack uses floats.

00:11:30 Therefore it needs to be C++ and be automorphic.

00:11:40 more thick comes from

00:11:50 Just in time. This is the exact realistic expression.

00:12:01 of the age agent not AI because that's

00:12:10 Probabilistic float value snake.

00:12:20 It's a new generation of 135.

00:12:34 I'm going to put it here, I'm going to put it on the base point.

00:12:40 Да и шеф-планк.

00:12:43 Идёт на этой цель-планке.

00:12:45 Лучка не дан.

00:12:48 Вот это нравится цена.

00:12:50 En dan ga ik het even bijna maken.

00:12:52 En dat is dan.

00:12:58 Alleen, iedere keer...

00:13:00 De maatschappij heeft een klein beetje achteruit gaan ervaren de laatste per jaar.

00:13:10 It's a lot of fun, but it's a lot of fun, and it's a lot of fun, and it's a lot of fun, and it's a lot of fun.

00:13:26 and then

00:13:30 Ik spijt deze dingen uit omdat ik denk, als ik iemand dit terug vindt, weet je wat, die staan als spoor wat tot het hele...

00:13:40 Nou ja, weet je, dat ligt het niet aan mij dat dat zo gebeurde, precies.

00:13:52 I'll start playing with your sound.

00:13:54 I'm going to play with a lot of fun.

00:14:09 Vielen Dank.

00:14:10 Boom.

00:14:22 Opeens zegt de OpenAX Kodax tegen Opeton.

00:14:28 I'll make the target.

00:14:30 A C++ Native Deterministic Edge Agent, notice dat er geen AI bij staat,

00:14:36 including its control layer and runtime compilation.

00:14:40 ...of Admitted Suite Compositions, de Java-based 0.2.1 package, die nu al twee dagen is...

00:14:50 7 uur en 20 minuten en bijna 25 seconden bezig is.

00:15:00 Weet je, dus omdat ik niet zo moeilijk ben, niet zo raar dat ik het moeilijk doe,

00:15:10 Ik heb nu veel minder tijd om dit af te krijgen en veel meer verbruik en impact gehad op het planeet.

00:15:20 Dan dat eigenlijk die tijd waard was.

00:15:26 Als je daar niet van gaat drinken, ja precies.

00:15:30 And this is my personal overview of what if I get up and I say if I make it right to even make it right to make it.

00:15:36 Huh.

00:15:37 What?

00:15:41 Van, ik heb dus nu twee dagen lang dat telingding iets laten proberen, want eigenlijk hebben we niet gewerkt en ik had het al af.

00:15:51 Ja, het klip helemaal, maar...

00:16:00 Alright, stay tuned.

00:16:12 We're going to stick it over and over and over and over and over and over again.

01:05:13 that if our death would be indefinite it

01:05:20 We would not postpone it, and therefore we would realize.

01:05:30 That that isn't the way in which we wanted to survive.

01:05:34 Why else would we have children?

01:05:40 Because children for us to survive in another way.

01:05:50 by, as it were, passing on...

01:06:00 point where you can give it up and say, now you will. It's a far more amusing arrangement.

01:06:12 to continue the process of life through different individuals than it is always with the same

01:06:27 how fascinating the most

01:06:33 Because they see them all as marvelous, because they see them all in a way that is not related to survival.

01:06:42 When we get to thinking of everything, it's the survival of a prophet man.

01:06:51 The shapes of scratches on the floor cease to have magic, and most things...

01:07:02 So therefore, in the course of nature, once we have ceased to see magic in the world anyways, we are no...

01:07:10 No longer fulfilling nature's game of being aware of itself, no point in it.

01:07:20 And so something else comes to birth, which gets an entirely new view.

01:07:27 It is not, therefore, natural.

02:45:23 In the 21st century, capitalism is an increasingly controversial word.

02:45:28 There's a criminal conversation.

02:45:30 How much we can trust obscenely wealthy people or whatever or there should be a limits place

02:45:40 day captains of industry, the landscape looks...

02:45:46 Compared to now, the days of the robber barons were...

02:45:50 wild west both figuratively and literally across europe and literally was a time of industrialization

02:45:58 and ingenuity

02:46:00 And it led to the world's inaugural class of independently uber-wealthy businessmen.

02:46:06 Up until the 1800s, it had been exceedingly rare for any one individual to...

02:46:10 amass huge piles of riches without ever sitting on a throne, that is, until industrialized

02:46:16 economies began to reward men not for wholesomeness.

02:46:20 for shrewd calculations and doing whatever was necessary.

02:46:30 He took a successful family business and built it into a three-headed empire that still...

02:46:40 years after his death

02:46:50 When governments ran out of money, he didn't.

02:46:53 His name is G.

02:47:05 A short pair of old Morgans is as good a situation as anyone has.

02:47:10 His paternal grandfather, Joseph Morgan, was one of the founders of Connecticut's insurance company,

02:47:16 a successful venture that Grudwin devolved over the decades.

02:47:20 It was most recently born.

02:47:21 Corporation into 69-

02:47:32 birth with children.

02:47:41 He will eventually leave his job to take an even more glamorous position as the business partner of famous financier and London philanthropist

02:47:51 Morgan's mother was Julianne Pierpont, the daughter of noted Connecticut poet John Pierpont.

02:48:00 of Palestine, but also work to earn us too.

02:48:11 who was born on April the 17th, 1837, and he, very childhood, he was...

02:48:20 who suffered from coughs and seizures.

02:48:22 However, when he felt healthy enough to attend comps,

02:48:27 he enjoyed outings with his parents where he told

02:48:29 It's old.

02:48:33 At age 11...

02:48:40 Ah.

02:48:46 Ah.

02:48:50 in business and finance. He matriculated there.

02:48:55 His father was grooming him...

02:49:00 his first year at the English High School, young Peerbonds was struck with...

02:49:10 Just as an untreated cold or flu might evolve into a more serious case of pneumonia,

02:49:15 rheumatic fever is the occasional escalation of an untreated throat infection.

02:49:20 According to the encyclopedia of only a flake of streptococcal is more common in young children.

02:49:30 to 14.

02:49:31 Ironically, the disease most often is already even less health-

02:49:40 when the average boy his age was...

02:49:52 This is all of you in the club.

02:50:03 with the adults who are living in the United States

02:50:06 in his secondary education,

02:50:08 with those inviterates.

02:50:20 This is just across the French border.

02:50:32 which is probably because it lost the pressure.

02:50:40 I don't know what's going on in the language, what's it, what's it formalized, it's not right.

02:50:53 This is the most common sense, you can have also kind of have enough, in that journey, with an additional degree.

02:51:00 It is all electrification finally out.

02:51:03 Therefore, I don't know.

02:51:05 I didn't know something because she was 17.

02:51:17 place for a bus job.

02:51:40 Even in the mid-20s, there won't show you some news, but it's one story of his early years.

02:51:45 Revolves now, we will probably have a short price of all its own capsules.

02:51:53 and leverage these connections in the areas behind wires that we should have.

02:52:10 The george is going to make you cross-lake.

02:52:12 I don't know if this is getting a mini-panel.

02:52:20 Thank you very much.

02:53:00 At the same time, the American system.

02:53:24 Here's the drop-team factory on ADU, Jay Goulds, and James Mellon.

02:53:29 Well, it's fine.

02:53:32 What prompted this Bible to write in that a man may be a patriot without risking his own life or sacrificing himself?

02:53:40 It's less value, but what we do know is that you desperately want to find it.

02:53:52 After the pen was married in October of 1861, he recalled this about the successful recovery in New York, so it was a decade earlier.

02:54:01 There's a lot of great residents in Algeria. Soon after, while visiting France, a lung specialist finally...

02:54:10 and diagnose the baby's illness, she had to birth.

02:54:13 Yeah, Bob, it's waiting on her.

02:54:17 Congratulations.

02:54:20 I wish you could see his loving devoted care of me.

02:54:30 So create four months after a four-years-old star protagonist.

02:54:46 He'll bomb himself with the loss of his love by throwing himself back at him.

02:54:50 Here are sounds in New York, you've already made quite the...

02:55:01 two years and began representing his father's firm in America by his own...

02:55:10 He was attached with something of a scandal.

02:55:13 After his engagements in Mimi, but before the marriage in Mediterranean...

02:55:21 which became known as the Hall Carline Affair.

02:55:24 The Affair seized a lot of money and a lot of guns changed, huh, isn't it?

02:55:40 5,000 sons or carbon rifles from the US government, which were considered antiquated and too old.

02:55:50 The policeman bought the rifles for $3.50 a pop, financed by Morgan Spunny in August of 1861.

02:55:57 The rifles were always immediately solid-backed...

02:56:20 The rear breaching chain is adjusted, however-

of which led to...

02:56:50 Purchased the guns, the boss, and this boss, who...

02:57:00 was blistering.

02:57:01 Newspapers ran dramatic mockery headlines.

02:57:04 At one point, the Congressional Committee of Contracts

02:57:06 issued a statement proclaiming worse than the traitors.

02:57:10 In arms are the men who pretend loyalty to the flag, feast and fountain on the misfortunes of the nation, while patriot blood is crimsoning the plains of the south.

02:57:20 and the bodies of their countrymen.

02:57:30 Well, in effect, a study in contemporary...

02:57:40 ...the projects he busied himself with following the death of Mimi.

02:57:43 Air bombs went to his father's company until 1864.

02:57:47 It was then that George Peabody, his father's old...

02:57:50 partner. George Peabody & Co. is rebranded as J.S. Morgan & Co., perhaps to avoid confusion

02:57:56 between two similarly sounding firms.

02:58:00 to partner with the more senior Charles H. Dabney whom he knew from his European jaunts

02:58:05 in order to reform his own house as Dabney Morgan & Co.

02:58:10 With all these banking firms forming, you might be wondering just what is it that Kierponts

02:58:17 had this?

02:58:18 And it's a fair question.

02:58:20 Much of what he did was act as an American agent for his London-based father.

02:58:25 But he did a fair amount of his own investment as well.

02:58:28 Early on, he traded...

02:58:30 and foreign exchange, but as the 1860s went on, he began,

02:59:16 That's why I'm here, Mr. Freeman.

02:59:25 And they have authorized me to offer you a job.

02:59:29 They agree.

02:59:30 with me that you have limitless potential.

02:59:40 You've proved yourself a decisive man, so I don't expect you'll have any trouble deciding what to do.

01:33:56 Shots from Shabbat.

01:34:01 Thank you.

01:35:19 Спасибо.

01:35:20 Thank you.

01:35:55 Thank you.

01:38:05 おめでとうございます

01:38:18 Yeah, yeah.

01:38:20 But it's not a good place for us.

01:38:22 I don't think we can do it.

01:38:24 I don't think we can do it.

01:38:26 I don't think we can do it.

01:38:47 Я бы как-то вывезти в месте.

01:38:51 Je zei nog wel dat ik niet ga niet in een standaag leren,

01:38:54 maar dat is wel de dag in de dag.

01:38:56 Dat is wel de hobby, vind ik.

01:39:47 Yeah, that's...

01:39:50 vrijdelen en hoe ze het te maken doen en anders dan heb je niet al die kankers meer tegenkant verhuiven.

01:40:11 Блин, номер один, да и десятилетия, да и десятилетия, да и десятилетия.

01:40:27 It's a good life.

01:40:32 Как это не будет?

01:40:37 Как лаешь?

01:40:41 Dat is elke keer zo.

01:40:53 Amém.

01:41:00 We hebben het ja, we weten al waar ik zou gaan voortdoen.

01:41:17 Don't be shitty.

01:41:40 Nee, ik kan niet typen, nee, nee, nee

01:43:40 Ik bedoel het gewoon, dan zit je weer een standje gehandicapt in je kastplantje in Varno.

01:43:50 joo, se pysyheltään koko ostaa.

01:44:00 Nee, nee.

01:44:02 Kijk, is er zo'n antropologisch, toch?

01:44:06 Vet.

01:44:07 Dat is allemaal.

01:44:08 Kijk, dat is er helemaal.

01:44:10 Och, nee, nee. Het gaat gewoon dat er nog één dingetje te regelen valt en daarna weer voor de rest op een nieuwe...

01:44:20 I think it's a DVD at Carl Gleis.

01:44:32 Danke, guys.

01:44:45 Yeah.

01:44:50 Maar dan komt iedereen ook weer weg, of niet, of wat dan ook, dat er toch iets wordt redd of wat dan ook.

01:44:56 Nee, we zitten door, triple-dual-Use kalender.

01:45:00 Er staan dingen in te...

01:45:02 Oh, dan hebben we dus die mensen allemaal onder controle.

01:45:05 Nee, dan zijn er gewoon geen redenen meer waarom je er zelf...

01:45:10 Er waren ook geen redenen waarom ze alles konden stelen en dit doen.

01:45:20 Je ne sais pas, je ne sais pas.

01:45:39 That's it.

01:45:40 Het zijn fucking dingen, alleen maar dit is niet de manier waarop.

01:45:50 Ik hoefde niet dat we zagen dat ze zetten.

01:46:00 Daar is de baanhof.

01:46:40 I like it

01:46:42 I like it

01:46:46 I like it

01:46:49 I like it

01:46:50 In die stroom van documentaires over de Tweede Wereldoorlog is een grote groep Nederlanders ernstig veronachtzaamd.

01:46:59 Daarom wil het...

01:47:00 Vanavond aandacht besteden aan de Nederlanders die in de periode 40-45 te klein voor tafellaken en te groot voor servet waren.

01:47:10 Dit bevrijdingsjaar 1985 ervaren door deze net niet generatie.

01:47:30 Seine Narbe, Seine Narbe, und dass er nicht da unten was geschwürt hat.

01:47:33 Da unten was geschwürt hat.

01:47:40 Dan moeten we er even mee maken, dan moeten we er even mee maken, dan moeten we er even mee maken, dan moeten we er even mee maken.

01:47:56 Thank you so much for joining us.

01:48:00 Zet ik de fiets er tegen dan binnen.

01:48:10 Zit er maar tijdens aan de terwijl, want wij wachten dan moet ik eerst een spotteam draaien.

01:48:14 Ja, dat is mijn spotteam.

01:48:16 Ik ben vastzettend aan elkaar.

01:48:18 Ik weet niet wat ik had vastzettend.

01:48:20 Dan zet ik hier op de afgeslapten.

01:48:23 Zo, dan uit de einde.

01:48:27 Leiden we op de duik.

01:48:33 Hij moet een beetje de wielen aan de kant.

01:48:40 I don't think I'm going to pay for it now.

01:48:47 I'm going to seek that.

01:48:52 Laat dat maar even lukten geeft.

01:48:53 De boel maar even lekker met elkaar open.

01:48:56 We zijn een week niet geweest.

01:48:57 We gaan elke week naar de tuin.

01:48:59 Elke week.

01:49:00 Dan gaan we naar de tuin, maar dan zaterdagavond slapen wij weer gewoon thuis.

01:49:02 Alleen op 4 of 5 mei, kijk wat doet, ga je de boel dan lopen.

01:49:05 Alleen op 4 of 5 mei, dan blijven wij op de tuin slapen.

01:49:10 Om te herdenken.

01:49:11 Weer of geen weer, wij blijven altijd op de tuin op vier en vijf jaar.

01:49:14 Wij blijven altijd op de tuin.

01:49:15 Dus ik kan eigenlijk wel zeggen dat deze tuin in de oorlog ons leven heeft gehad.

01:49:20 Dat vader en moeder hier verbouwden, daar aten wij van in de oorlog.

01:49:26 Je kan eigenlijk wel zeggen dat het in deze tijd niet geweest was.

01:49:30 Dat wij dan nou niet in vrijheid naar deze tuin hadden kunnen gaan.

01:49:34 Dat kun je rustig zo zeggen.

01:49:35 En vader gaf ook veel weg hè.

01:49:37 Vader gaf weg aan hongerige mensen.

01:49:40 Dan moet je tegenwoordig eens omkomen.

01:49:42 Als je nou aan de buren een kopje suiker te leen vraagt, dan gaan ze meteen de korreltjes tellen.

01:49:46 Ja, zo is het toch eigenlijk.

01:49:47 De mensen weten niet meer wat het is om voor elkaar in zijn...

01:49:50 De resten springen.

01:49:50 Ach, want nee.

01:49:51 Dan ben je de beste niet meer.

01:49:51 Want nee, dat zijn ze helemaal vergeten.

01:49:53 Dat zijn ze helemaal vergeten.

01:49:54 Maar laten we er niet meer over praten.

01:49:55 Laat me niet over de oorlog weer praten.

01:49:57 Laat me niet over de oorlog weer praten.

01:49:57 Laat me een lekker bakje trouw zetten.

01:49:59 Zo, lekker bakje.

01:50:00 We hebben wel gedinkt naast elkaar frietsen.

01:50:01 Alles is dan nog aan.

01:50:02 Alles ziet er goed uit.

01:50:04 Ziet dan friets maar aan.

01:50:04 Alles is dan nog aan.

01:50:05 Kan je nog gewoon je huisje achterlaten op de tuin.

01:50:07 Thuis hebben we de gordijnen dicht gedaan en de buurman gaat bij.

01:50:10 Het is goed dat hij een beetje op moet letten.

01:50:11 Anders kom je thuis na vier of vijf bij op je eigen huis.

01:50:15 En dan is daar de heleboel afgebroken.

01:50:16 Maar op de tuin hoef je daar niet bang van te zijn.

01:50:17 Het zit allemaal nog mooi uit de tafel staan.

01:50:20 Ja, das ist ja auch da, die Leute, die Leute, die Leute

01:51:16 Ken je overal gebadden van, heb je gezien met een geboedel stemmen, ze hangt de vlachterwappen.

01:51:20 Ga jij een touwtje halen?

01:51:21 Ik haal een touwtje, ik weet nog wel een touwtje.

01:51:23 Dan binden we met een extra touwtje, binden we de punt vast.

01:51:25 Ik weet nog wel een touwtje, hoor.

01:51:27 Wiebbel, bewaart, die weet wat.

01:51:28 Ik ben zo terug.

01:51:29 Blijf jij met de vlag?

01:51:30 Nee, dan haal ik even een touwtje.

01:51:34 Een touwtje halen, dat gaat nog wel.

01:51:36 Maar Arie mag geen altijd zwaar werk meer doen.

01:51:39 Nee, dat is niet goed.

01:51:40 is een bloeddruk. Dus laat ik hem af en toe een tuintje halen. Ik laat hem naar een

01:51:47 teetwater opzetten.

01:51:50 Ja, we hebben ook putte gas in het huisje.

01:51:54 Maar als de flessen leeg zijn, dan ga ik nieuwe halen, want dat zou te zwaar zijn voor haar.

01:52:00 Dat kan hij niet meer, dat moet hij ook niet meer doen.

01:52:03 Heb je een touwtje?

01:52:06 Als je een touwtje hebt, is dat geen mooi touwtje.

01:52:08 Ja, dat is een mooi touwtje.

01:52:10 Ik weet nog waar de touwtjes liggen.

01:52:12 Deze punt die gaan we dus...

01:52:13 Dan vinden we deze punt vast dat hij niet wappert.

01:52:14 Dat hij niet wappert.

01:52:15 Als krijg je op de tuin nog over, dan heb je gezien of bij de geboorte stennis hangt de vlag te wapperen.

01:52:19 Nee, dat kunnen we niet.

01:52:20 Zo en dan binden we het zo hier.

01:52:21 Kijk, dan zou hij helemaal lang uit gaan wappen.

01:52:23 Als hij maar een beetje pas zit, dat hij niet echt wappert.

01:52:30 Dat hij wel een beetje door de wind.

01:52:31 Ja, dat grijp ik niet.

01:52:31 Hij mag wel een beetje vol, hè?

01:52:34 Maar hij mag niet wapperen, hè?

01:52:35 Want ze hebben op het nieuws gezegd dat het zou gaan waaien.

01:52:36 Ja, precies.

01:52:37 Zo, kijk, nou wappert hij niet zo even.

01:52:40 Helemaal, maar daar kunnen wij niks aan doen.

01:52:41 Dat was een heel goed touwtje, Arie, wat jij daar hebt gevonden.

01:52:44 Ja, ik weet nog waar wij de touwtje gingen.

01:52:46 Goed gedaan, Arie. Mooi touwtje was dat.

01:52:50 Alles in dat oudsje liggen, laket ik je liggen ook weer.

01:52:52 Je bent op je neus dat kan kassen.

01:54:01 Okay, this is what I want to take a check.

01:54:10 Is het vogelenpoep, Geen?

01:54:14 Geen, wat is het?

01:54:16 Telefon bij de bonen.

01:54:18 Met die boomwasser.

01:54:20 Ja, daar was het. Als de dag van gisteren zie ik hem nog komen.

01:54:22 Nou, hij is ook op taal kiezen.

01:54:23 Mijn vader is op de tuin aan het werk.

01:54:25 Ari, rusten.

01:54:26 Dat ik toch gewoon zeg, Ari, Ari, daar zou ik niet meer over praten.

01:54:30 Dink aan je vloed druk, met je rustig zijn.

01:54:33 Zou het er niet mogen hebben?

01:54:34 Zou het er niet mogen hebben?

01:54:35 Mogen genieten van de vrijheid van de vrouwen van de vrouwen van de vrouwen van de vrouwen van de vrouwen van de vrouwen.

01:54:45 Het is niet zo kankerig, waarom Nederland is een prachtig land.

01:54:50 Mensen moeten niet zo kankeren, toch een prachtige lamp Nederland.

01:54:53 Gewoon appelmoes en bruine bonen gaan halen.

01:54:55 Als de mensen maar een beetje meer met elkaar, dat ze niet tegen elkaar maar een beetje meer met elkaar hadden.

01:55:00 Het was hier op de tuin toch ook bij elkaar.

01:55:03 Daar was het geen.

01:55:04 Daar was het.

01:55:05 Bij die boom was het.

01:55:06 Als de dag van gisteren zie ik hem nog komen.

01:55:08 Zo komt aan fietsen.

01:55:10 Mijn vader is op de tuin aan het werk.

01:55:11 Arie, rustig.

01:55:12 En dat ik toch gewoon zeg, Arie, Arie, daar zou ik niet meer over praten.

01:55:16 Ik kan je bloed door.

01:55:18 Ik ben je rustig.

01:55:21 Wat zei die mof tegen jou?

01:55:30 Wo is de baanhoofd? Wo is de baanhoofd?

01:55:33 En waar stond jij toen, Ari?

01:55:35 Dat weet je toch wel. Ik stond op de weg. Ik stond op de weg.

01:55:38 Voor het huisje hier.

01:55:40 Mijn vader was hier op de tuin aan het werk.

01:55:43 En ik ging naar huis naar moeder en naar jou.

01:55:45 Want jij was ziekduizend. Hij had Engelse ziekte.

01:55:47 Ja, meer kon ik ook niet doen.

01:55:48 Hij heeft nu nog die kromme benen.

01:55:50 Dus ik ging naar huis en er komt een Duitser aan op de fiets.

01:55:53 Vijftien was Arie, ik was dertien.

01:55:55 Hij was twee jaar jonger.

01:55:56 Hij was twee jaar jonger.

01:55:57 Er komt een Duitser aan, Arie.

01:55:59 Er komt een fiets met een geweer.

01:56:00 En zo, steek over zijn schouder uit met de...

01:56:06 Ik was dus zo, ik was 15.

01:56:08 Hallo, poepen.

01:56:10 Hallo her, op mijn leeftijd had ik al geleerd van vader.

01:56:14 Waar is de baanhoofd?

01:56:14 Waar is de baanhoofd?

01:56:15 Ja, meid, waar is de baanhoofd?

01:56:17 De baanhoofd betekent dus, de baanhoofd is het.

01:56:20 station in het Duits. Dat wist ik.

01:56:22 Geen wist dat niet. Geen kende nog geen Duits.

01:56:24 Ik ook nog niet. Maar ik wist wel dat de baanhoofd

01:56:26 station was. Wat zei jij toen, Arie?

01:56:27 Dus hij vraagt, wel eens de baanhoofd, en de baanhoofd is

01:56:30 Is dood, daar, aan de andere kant, daar, maar ik weet het, ik weet het, ik dacht, nou komt het erop aan, nou kan je wat doen.

01:56:40 Demis, nou kan je wat doen voor het vaderland.

01:56:41 Dus ik zei, do is de baanhoofd.

01:56:43 Do is de baanhoofd.

01:56:43 Do is de baanhoofd, zei Harry.

01:56:45 En hij zei, dank je.

01:56:50 De baanhoofd is dood, want de baanhoofd is daar, station, jij wist het niet.

01:56:54 Arnie zegt, IJskat, 15 jaar, dood is de baanhoofd.

01:57:00 Ik wist niet wat de baanhoofd was.

01:57:02 Ik wist niet wat de baanhoofd was.

01:57:04 En dan vraag ik me nog af of ik het gedaan zou hebben.

01:57:06 Bo is de baanhoofd en ik zeg, dat is de baanhoofd.

01:57:08 Een mof aan mij had gevraagd, Bo is de baanhoofd.

01:57:10 De baanhoof is daar.

01:57:11 Helemaal de vraag op ik had gezegd.

01:57:13 Do is de baanhoof.

01:57:14 Daar komt het erop aan.

01:57:17 Do is de baanhoof.

01:57:20 Niet dood is de baan, dood is de baan, dat is haar. Gewoon gezegd, dood is de baan.

01:57:27 Ik weet ook niet hoe ik dat toen heb opgebracht, maar het kwam eraan.

01:57:30 Komm, der Radweg nach oben, verkehrt.

01:57:31 Verkehrt, verkehrt, verkehrt, verkehrt, verkehrt.

01:57:40 Ik heb het verwerkt, ik ben daarna afgericht.

01:58:00 fietsen en hij vraagt naar mijn hand voor me. En ik denk, nou gebeurt het nu of nooit.

01:58:05 En hij vraagt, woens de baan over? En de baan over is gezondig, dat was dus tijd.

01:58:10 Ik zeg, hij is koud, zeg ik, dood is de baan.

01:58:12 En ik heb dat, ik heb dat, ik heb dat, ik heb dat grijpen pas na de oorlog verteld.

01:58:16 Wat ik dat te maken heb gehad met het verzetswerk.

01:58:19 Want een schoot toen.

01:58:20 Onmiddellijk door mij geen vertellen, want dat is gevaarlijk.

01:58:24 Daar is geen jong voor en geen zou kunnen doorstaan.

01:58:28 Hoe kom je daar nou bij Arie?

01:58:30 Hoe kan je nou denken dat ik mijn eigen broer zou doorslaan?

01:58:33 Daar hadden de moffen hun methode voor geen.

01:58:35 Daar hadden de moffen hun methode voor.

01:58:37 Jij zou door de knieën zijn gegaan.

01:58:38 Gij zou door de knieën zijn.

01:58:40 Ik had de Engelse zicht daar.

01:58:42 Precies.

01:58:43 Ja, je hebt gelijk daar.

01:58:43 En zo blijft dat de Nederlanders door midden delen.

01:58:46 Want je hebt de Nederlanders die dan met het verzet te maken hebben gehad, zoals ik.

01:58:50 En hem zei die dat niet.

01:58:53 Want je laat toch al opa's en oma's hebben die de tweede wereldoorlog niet eens bewust hebben meegemaakt geeft?

01:58:57 Wat moeten die mensen nou gezellig aan hun plek in de...

01:59:00 Wat hebben die nou al trots over te zijn?

01:59:02 Als je als opa z'n genereert oorlog niet eens bewust de peen gemaakt.

01:59:05 Denk aan je bovendruk.

01:59:07 En zo blijft dat de Nederlanders door tweeën delen.

01:59:10 Dat je mensen hebt zoals ik die in het verzet zaten en de anderen die dat dan niet.

01:59:14 En die dus niet weten wat het gevaar was en hoe je elkaar moest helpen en dingen voor elkaar doen.

01:59:18 Zonder daarover...

01:59:20 En ik weet het ook heel goed dat ik aan mensen zoals Arie te danken heb dat ik nou ja in...

01:59:30 Ik ga even naar de toilet, Arie, ik ben bij jou al geweest van mij.

01:59:36 Ik heb vanaf donderdag al niet weggekund gehaald.

01:59:38 Dat is allemaal de emotie, Arie.

01:59:40 Laat het een beetje loslaten, laat het een beetje loslaten, ga je pakkelijk praten.

01:59:45 Want het is dat het nu weer weggaat, dat als hier zoiets gebeurt, dat je dan...

01:59:50 ...dat daar op het toilet zit, dat je dat houdt.

01:59:51 Dat er echt de deur in trapt en roept...

01:59:53 ...dat hou je, dat laat je niet van los.

01:59:58 Hij kan dus hier aan fietsen...

02:00:00 En dan zegt de gemeente, hallo boebe, hallo her, zenuwachtig, nu gaat het gebeuren.

02:00:10 Doos de Baanhof en ik wist dat het Baanhof station was.

02:00:13 En het station bestaat, Oosten.

02:00:15 Dus ik ga moeten zeggen Doos de Baanhof.

02:00:17 Ik zeg Doos de Baanhof, kijk.

02:00:20 De vlag is gekraapt.

02:00:22 Hoe kan dat? Hoe kan dat? Die stokkarton die stuk geven.

02:00:24 Zo'n stok zo hardwaardig toch niet?

02:00:25 Hij is gekraapt. Hij is gestolen.

02:00:27 Kom maar even bekijken. Kom maar even.

02:00:29 Succes.

02:00:30 De vloer is gestoken, de vloer is gestoken.

02:00:40 Die vlag die hing nog half stok van gisteren.

02:00:42 Ze hebben dus een half stokken vlag hebben ze gestomen.

02:00:44 Zo ver is het al gekomen in Nederland.

02:00:47 Dat ze een half stokken vlag gaan steden.

02:00:50 Dat zijn die jongens van Verzanten met die Brommer.

02:00:54 Dat zijn die jongens van Verzanten met die Brommer, dat weet ik zeker.

02:00:57 Een half stokken vlag hebben die jongens gestolen.

02:01:00 Wat verzant is dat niet. In 37 zat verzant altijd bij de NSB.

02:01:03 Ja, maar daar mogen we die jongens toch niet op aankijken?

02:01:05 Dat is de vraag van verzanten voor toen met die zaag van vader.

02:01:07 Die is wat moois.

02:01:08 Nou, hoe moeten we dat voor vandaag?

02:01:10 Hoe moeten wij vandaag wat wapperen?

02:01:11 Je had hem ook binnen moeten halen, Harry.

02:01:12 Ja, ik heb gisteravond wel wat anders aan mijn hoofd.

02:01:14 Ja, heb je het in de donker gehalen?

02:01:15 Ik zat gisteravond met mijn hoofd.

02:01:16 Met mijn hoofd, met mijn 25 jaar geleden.

02:01:30 またね

02:01:40 Please, sit down.

02:01:50 Welcome, everyone. I must apologize for dragging all hairs off on a common hour, but from what I've been told, this matter needs to be dealt with urgently.

02:02:03 Well, that's not the fault it is.

00:13:34 Dranko I.S. Mason

00:13:40 I'm going to blow it.

00:14:03 Hmm, huh?

00:14:10 Obrigado.

00:14:39 Yeah

00:14:40 Zullen we het wel allemaal bij willen aanpakken, tot de type?

00:15:14 ¡Gracias!

00:15:43 Спасибо.

00:15:53 I believe I will prove that.

00:16:00 Thank you.

00:16:10 Yeah, I could be quite a bit sober.

00:16:32 これもあれば、これを作る

00:35:17 Так, счет вам.

00:37:14 I love you.

00:37:34 Gracias.

00:38:09 All right.

00:38:10 Yes, it is.

00:38:25 Tez.

00:38:41 Hello.

00:40:35 Thank you.

00:40:48 Kind of sweet, man.

00:41:16 Gracias.

00:41:45 Vielen Dank.

00:41:50 Sim, sim.

00:43:13 Okay.

00:44:00 Как же шик-то.

00:44:27 Thank you very much.

00:44:40 Так, все прикупали.

00:44:50 Thank you.

00:45:11 Это лово.

00:45:21 Gracias.

00:45:30 ありがとうございました

00:46:23 Dankeschön.

00:47:30 ありがとうございました

00:51:15 ありがとうございました

00:51:24 Gracias.

00:51:56 Nice.

00:52:21 ありがとうございました

00:52:39 Thank you.

00:52:40 She operates entirely in the realm of anonymity.

00:52:44 Her profile emphasizes the...

00:52:50 One, looking at the cultural friction in a boardroom or the changing goals of a department.

00:53:00 she's the one who realizes that humans constantly change what they mean when

00:53:04 they use certain words basically she maps the intent and then on the absolute

00:53:09 opposite

00:53:10 end of the spectrum you have tom's a creative technologist and inventor at donwood interaction

00:53:16 and his background is super it actually

00:53:20 Yeah, he built this framework called Emergental for handling emergent behavior in games.

00:53:26 Plus, he's got a certificate from MIT professional education in machine learning.

00:53:30 And he's highly, highly active in the open source community.

00:53:33 Oh, massively.

00:53:34 The report knows he has this huge footprint on hugging face.

00:53:40 C-0-M-B-A-T-D-U-C-K-Z-Z, Combat Ducks.

00:53:45 Gotta love the developer usernames.

00:53:47 Right.

00:53:48 And for anyone who isn't spending their weekends building it.

00:53:50 HuggingFace is basically the GitHub.

00:54:00 So his entire focus is the rigid tech side,

00:54:03 executable structures, prototypes, taking abstract.

00:54:10 Exactly.

00:54:22 this report is that you cannot solve enterprise chaos with just one or the other no you need both

00:54:27 their synergy lies in

00:54:30 creating what the research defines as a decision.

00:54:34 Let's unpack this, a decision contract.

00:54:37 I'm trying to picture how this actually functions.

00:54:40 It's a bit abstract.

00:54:50 The rest of you tell these pitches of this and dashes.

00:55:20 is turning implicit human considerations into explicit tests and then machines output to force

00:55:32 hear on something right away.

00:55:42 Oh, yeah.

00:55:52 What's fascinating here is that an earlier AI-generated analysis of their work wildly exaggerated.

00:56:02 with this movement.

00:56:47 Absolute determinism code.

00:56:58 Absolutely turn this one.

00:57:02 We consult enterprise chaos with just...

00:57:06 No, Unico.

00:57:07 Right.

00:57:08 Their synergy lies in...

00:57:30 and she's this, and she's this.

00:58:01 into explicit, tangible systems, and then it uses machines output to force the humans to

00:58:07 apply their emotions.

00:58:23 It actually has the whole section to extend the bussing out.

00:58:27 Now Maria and Thomas were moving in.

00:58:34 and generated a lot of leaks after it is what they were actually doing.

00:58:58 Thank you.

00:59:24 master class and

00:59:26 your technology needs to stop

00:59:28 your hands up and

00:59:53 TRK is honestly a master class in subject matter.

00:59:57 It's classified as a...

01:00:05 Well, let's break that down to think about a massive neural network, like a projection team.

01:00:12 It's completely different as the average time based on the local support workers, or experts.

01:00:17 But Tom Gay operates in a strictly different space.

01:00:36 Is it supposed to know everything?

01:00:43 Honestly, it's a massive block.

01:00:45 It's about a massive block.

01:00:47 It's about a massive block.

01:00:47 It's about a massive block.

01:00:48 That gives it all to the problem.

01:00:56 The topic operates in a streamlined space.

01:00:58 The documentation outlines...

01:01:12 I think for a lot of people, you need to be watching this.

01:01:15 I'm so mad, of course.

01:01:17 I'm so mad.

01:01:19 You see?

01:01:21 That's a great question.

01:01:22 And it's normal.

01:01:23 A business rule is just in question.

01:01:26 Well, if you are deciding whether to...

01:01:30 Thank you.

01:01:42 So it's very important.

01:01:43 A piece of art at my function just means the Google

01:01:47 manuals, different conditions, and .

01:01:53 It's not as infinite ARR.

01:02:12 Breakthrough of the audience is an independent component column in four.

01:02:16 You're not with the program.

01:02:18 This is a lot of work.

01:02:19 You sit.

01:02:20 and demands that exactly one candidate

01:02:23 will open that menu, explain it to me.

01:02:25 It's not too overlapping, online, exactly one.

01:02:45 for kids to receive a lot of response.

01:02:47 It doesn't frankly take the most likely option.

01:02:51 In our court's test cases, Ponte accepted nine data set outcomes, and outbreak projected seven of them.

01:03:00 Hey, athlete, stop me with my blind costs, unfortunately.

01:03:07 You're really a massive logistic number of illness.

01:03:10 A little supply chain just asked a question about a big word.

01:03:13 Do you think that?

01:03:14 Sure.

01:03:15 I mean, would the company write about a 70% accurate guess than it should have?

01:03:20 Your identity fails so spectacularly.

01:03:25 Media science offered to prioritize momentum over accuracy.

01:03:32 of a decision project, a machine explicitly flagging

01:03:35 we don't know yet is actually entitled to it.

01:03:38 It's a feature model of a machine.

01:03:41 Exactly. If the machine says this data is a natural day, but if it's also a natural day based on the input, it makes the moment...

01:03:50 deep visible.

01:03:51 It tells me aside of the equation, their human categories are fundamentally flawed.

01:03:58 The definitions are bleeding into each other.

01:04:29 Thank you.

01:04:36 look back at yesterday's database, and retroactive

01:04:43 Exato.

01:04:58 Thank you.

01:05:01 Right.

01:05:02 The technical documentation will cause it an explicit state and operative authentication.

01:05:06 Appreciate it.

01:05:07 In practice, the means of the system is...

01:05:24 He's just.

01:05:32 and progress score 0.50, then a new vector that is 0.80.

01:05:46 It doesn't hesitate on the current task.

01:05:51 threshold for the future, my team say 90% of people rule, 10% of the new event, and say

01:05:58 okay, Mark, we'll do the threshold for the next step.

01:06:17 The Spirit of Jesus.

01:06:35 to connect this to the bigger future, this architecture has to be applied for one.

01:06:44 What is some awful situation that has ever been six months after that?

01:06:47 What usually happens?

01:06:49 Right away.

01:07:00 which is part of the decision contract

01:07:02 to place that that's the size of the microsecond.

01:07:07 It says,

01:07:08 do you make your choice?

01:07:21 She just kind of separates me.

01:07:32 to do more specifically mentions

01:07:34 the use of the spherical version.

01:07:45 local and they can just have a

01:07:47 section that are there.

01:07:57 Obrigado.

01:08:01 These local check forms allow those individuals to respond to a full change in a way that they are not going to be on their own.

01:08:11 Thank you.

01:08:20 Gracias.

01:08:32 I'm going to go ahead and see what I'm doing for the Department of Health and Health and Health, and this is where the city is increasing.

01:08:43 and apply the rest of this process to communication through the project of China.

01:08:47 Yes, please.

01:08:52 Take a minute.

01:09:14 Yes, yes, yes, yes.

01:09:24 to be creative and responsible for it.

01:09:27 We hold the timer.

01:09:28 It is.

01:09:30 This is what allows CDC to debate this issue of law enforcement, rather than just yelling at each other of us, who will create this?

01:09:37 There's a .

01:09:44 This is a computer, for instance, the exact same input, always be able to use that.

01:09:53 Is it one of the decisions that most organizations are just being there?

01:09:56 Is a publishing valid from the district also?

01:10:02 The state of prison speaking to other states are called Jack.

01:10:05 Is there a length here for validating papers?

01:10:08 Yes, they have a shot.

01:10:16 Gracias.

01:10:20 It goes in just a minute.

01:10:22 It's a minute.

01:10:23 It's a minute.

01:10:24 It's a minute.

01:10:25 It's a minute.

01:10:25 It's a minute.

01:10:26 It's a minute.

01:10:27 It's a minute.

01:10:28 It's a minute.

01:10:34 Thank you.

01:11:01 Gracias.

01:14:26 Amen.

01:15:06 Yes.

01:15:40 Obrigado.

01:16:51 to be creative.

01:17:01 than just yelling at each other, who will pay.

01:17:31 Obrigado.

01:17:45 Obrigado.

01:17:51 Obrigado.

01:18:09 Gracias.

01:18:29 Gracias.

01:18:54 a perfectly valid Germanistic outcome

01:18:57 in the capital of the world.

01:19:02 This is a light use for L80.

01:19:18 Okay, those conditions are left.

01:20:23 Gracias.

01:20:58 Obrigado.

01:21:03 Yeah.

01:21:12 Vielen Dank.

01:21:21 I'm lost.

01:21:45 Gracias.

01:21:54 Thank you.

01:22:12 I don't know.

01:22:19 I don't know.

01:22:20 Ja, dat is opgeschouwd.

01:22:27 Dat is ook een werkvrouw opgelegd.

01:22:30 We hebben alle muzika's al die verorderingen niet gekregen, dus ik ben weer vijf minuten bij hem thuis.

01:22:36 Maar de wachter, de mannen, ik ken hem nog niet net doen.

01:22:41 Red hem gewoon, ja, ik kom er helemaal goed.

01:22:45 We blijven in de toekomst mensen, je ziet het nog even niet.

01:23:05 But there's a lot of people that do the lights on,

01:23:07 but they don't.

01:23:12 Een paar jaar is plezier.

01:23:32 So I just made out.

01:23:42 Who are you?

01:23:43 I'm a criminal.

01:23:45 I'm curious.

01:23:55 To the family.

01:24:21 is a tale

01:24:33 It's impossible.

01:24:50 I want to know who she is.

01:24:52 I know this one, but how it's a tyrant girl.

01:25:03 to find out whatever I was involved with my father.

01:25:06 The story is so great.

01:25:07 He's told you about who he is.

01:25:13 My relationship with writing team is not up to discussion.

01:25:24 Don't worry.

01:25:35 Don't go ahead

01:25:41 The truth is, the question is, it's like, why?

01:25:44 Are you in the fire?

01:25:46 No.

01:25:56 Thank you.

01:26:00 The truth doesn't matter, everything in this world matters, precision, and truth.

01:26:06 It deserves the truth.

01:26:10 I'm going to talk about the truth.

01:26:11 You can find a way to make sure she never learns the truth.

01:26:14 The duffel bag, why is it so important?

01:26:16 What I need is that duffel bag. I'm about to get it.

01:26:30 And I have to say that I'm going to do some secrets.

01:26:33 I have a secret.

01:26:45 Dank u wel eens mensen.

01:26:53 This?

01:26:56 Yeah.

01:27:01 of the topic work.

01:27:25 I have to shave the woods here.

01:27:38 Huh

01:27:45 I love YouTube, I'm gonna show you guys how to play mental health assault online.

01:27:53 Pretty simple, so the first thing I'm going to do is actually launch the game.

01:28:00 Yes

01:28:19 Please.

01:28:27 It's coming out from what I've been told.

01:28:34 Dread, we have ensemble.

01:28:42 I'll go ahead, man.

01:28:55 the guy put this together.

01:29:02 who seems to stop across this planet.

01:29:15 To a young child.

01:29:30 Here for Mr. Rogers, has the risk assessed them, yes?

01:29:49 36

01:29:50 40 months the firm has begun packaging new

01:30:01 on tradable security.

01:30:10 a considerable amount of business every day.

01:30:20 to layer these

01:30:30 these accents on our books.

01:30:42 allowed to do.

01:30:50 Now, what I'm guessing your report here says, give me some rub.

01:31:00 Considering that shall we say...

01:31:10 Don't make much sense anymore.

01:31:29 I'll remove your

01:31:30 model say that that's where

01:31:40 You're speaking to the leaders.

01:31:42 Well, sir.

01:31:52 loss wouldn't.

01:32:12 and the biggest bar assembled in the...

01:32:22 Sir, I'm not sure that I would...

01:32:31 analogy.

01:32:40 The music would stop, as you put it.

01:32:53 Let me tell you something.

01:33:21 I'm standing here tonight

01:33:44 Thank you very much.

01:33:54 So, now that we know the music is stuck, what can we do about it?

01:34:02 I'm afraid, I think this is where you are.

01:34:23 What have I told you since the first day you stepped in the mic?

01:34:27 Three ways to make...

01:34:44 It's a lot easier to just be first, so it all.

01:34:56 Olha.

01:35:01 Really?

01:35:11 I don't think you seem to understand what your boy has just said.

00:00:07 Well

00:00:10 a normal 6.30 meeting, and be honest with you, because they're going to know it's the

00:00:13 end either way. So you're going to have to come out of the gate storming.

00:00:20 no swaps no nothing 40 percent done by 10 15 by 11 o'clock all your trades have to be gone

00:00:26 because by lunch time the word is going to be out

00:00:30 And by 2 o'clock, you're going to be selling at $60, so it's on the dollar, if you're lucky.

00:00:34 And then the feds are going to be in here, up your ass, trying to slow you down.

00:00:37 That was just a lot of mad shark-ahawks.

00:00:38 Slow you down.

00:00:40 I can't stop you.

00:00:41 It works yourself.

00:00:52 Who are we selling this to?

00:00:54 The same people we've been selling it to.

00:01:02 You will kill the martyrs, it's over.

00:01:05 And you're selling something that you know has no better...

00:01:10 We are selling to willing buyers at the current fair market front, so that we survive.

00:01:20 any of those people ever again, do you?

00:01:30 Het lijkt wel even.

00:01:41 Let's see this.

00:01:42 I'm sure it's not.

00:01:43 I'm sure it's not.

00:01:44 Yeah.

00:01:45 Jared, you've got till five.

00:01:46 The break is done and draw me out the plan.

00:01:48 Is there anybody else who knows?

00:01:50 See you later.

00:01:56 See you later.

00:01:57 Yeah, right.

00:01:58 I'll shine it.

00:01:59 I'll shine it again.

00:02:03 Voilà.

00:02:10 Десять шифровочек, пять, пять здесь.

00:02:28 There were no drugs on there.

00:02:30 It was a hit.

00:02:32 A suicide mission to whack out the one guy that the king of Kaiser Sosay.

00:02:37 So Sosay put some thieves to it.

00:02:40 you're saying

00:02:42 so to say

00:02:43 he left you behind

00:02:48 for a reason

00:02:50 If you all need a store so you can find me, why can you give me the money to run?

00:02:55 That is the previous story of the rest of the car.

00:03:01 Ara.

00:03:09 Ara.

00:03:10 Ik kan het niet hebben, ik kan het niet hebben, ja, precies.

00:03:20 He wasn't your friend.

00:03:26 He didn't have friends.

00:03:30 Because he wanted it that way. It was his will.

00:03:33 King was Kaiser's soul stand.

00:03:36 No. The kind of man who could wrangle the will of a man.

00:03:39 Oh.

00:03:40 Kijk even.

00:03:41 Nou ja, hij heeft zoveel...

00:03:43 Oeh, daar gaan we niet mee.

00:03:46 Kom goed.

00:03:50 Ik heb een poepje zwaargevallen van kleins.

00:03:57 In die partie heb ik echt niet gemerkt.

00:04:00 Thank you.

00:04:10 He couldn't get auto mode.

00:04:12 He had to put the trigger himself to make sure he got his man.

00:04:16 The one man that could identify him.

00:04:21 Oh ja, vaak staat er weer een oude keer, zie je die?

00:04:31 But you didn't see him die.

00:04:34 He programmed you.

00:04:37 He programmed you to tell us just what you're talking to.

00:04:40 He knew we were the folks who said it yourself.

00:04:42 We knew the pressure coming from him.

00:04:44 Why were you the community with your reward?

00:04:48 You were white men.

00:04:51 You're a good manager to haunt me, why me?

00:04:53 I'm stupid, I'm a pimple, why me?

00:04:55 You're a good man, you're a good man.

00:05:05 If he's dead.

00:05:12 It was his idea at the taxi service and he was like, wasn't it?

00:05:15 Come on, tell me the truth.

00:05:20 Ευχαριστώ.

00:05:33 Please, thank you.

00:05:40 Ties the saucer. Ties the saucer as a shield.

00:05:52 That someone's out there for the streets for me.

00:05:55 Stay here unless protected.

00:06:01 I don't think we'll want you out of your ASAP unless you turn states.

00:06:05 This is empty.

00:06:07 Someone wants to get you.

00:06:09 They're going to get you.

00:06:10 Turn States evidence.

00:06:12 You might never see children.

00:06:13 You're not a rat.

00:06:18 You don't believe you.

00:06:20 ご視聴ありがとうございました

00:06:30 Oké, ik houd het even in gelijken.

00:06:40 Ik probeer het ook wel eens op.

00:06:42 Ja, we zijn er echt...

00:06:44 Nou ja, dat is ook wel goed.

00:07:00 Man, ich muss dabei sein, ich weiß, dass man das schon so schockt.

00:07:20 Ja, dat is wel bijgezet, dat ze hier voordelen dat ik kanker ging. Echt kanker, kanker.

00:07:30 Deze bepaalde...

00:07:32 ...waartoe...

00:07:34 ...dat ik terug...

00:07:36 ...veel meer mogelijkheid...

00:07:38 ...kijk de idee...

00:07:40 Господи, да-да-да-

00:10:30 We close your eyes for some seconds.

00:10:40 I don't know if he comes up for anything.

00:11:24 Gracias.

00:11:43 A CIDADE NO BRASIL

00:11:51 So, so, so, so

00:18:41 This soldier is protected from up and high by the prince.

00:18:45 Tell me if you've heard about the prince, oh man, what's your story?

00:18:47 There was a lawyer.

00:18:48 What lawyer?

00:18:55 Invenzione, invenzione.

00:19:05 I don't know.

00:19:14 that works the street know the name of Virgil Kent.

00:19:17 Virgil, did you see him?

00:19:24 i know you're not telling you say something i'm smarter than you

00:19:27 and i'm gonna find out what i want to know whether you like it or not

00:19:30 The explanation is never that good, it's always silly.

00:19:33 There's no mystery in the street, no arch criminal books at all.

00:19:36 Somebody with power, there was somebody who was capable of tracking his...

00:19:40 Curse it! Curse it!

00:19:43 And sticks his head out.

00:19:47 Guys, because you're stupid, Verbal.

00:19:50 Kaiser Sosa, get rid of me, but I'm sure Keaton is dyke.

00:20:02 It's hard to worry about

00:20:37 The trick the devil ever pulled.

00:20:40 He was convincing the world he didn't exist.

00:20:55 The meaningless absurdity of life, wrote Leo Tolstoy, is the only...

00:21:00 Our time is burdened to the cumulative weight of successive debunkings of our PC.

00:21:11 We live in the cosmic boondocks.

00:21:14 We emerge from microbes in life.

00:21:17 Apes are our cousins.

00:21:20 Our thoughts and feelings are not fully under our own control.

00:21:24 There may be much smarter and very different beings elsewhere.

00:21:27 And on top of all this, we're making a mess of our planet.

00:21:30 We can be a danger to ourselves.

00:21:33 The trap door beneath our feet swims open.

00:21:37 We find ourselves in...

00:21:42 are lost in the great darkness, and there's no one to send out a search for, given so harsh

00:21:49 a reality.

00:21:50 Of course we pretend that we're safe and snug at home is only a bad treat.

00:22:00 We lack consensus about our place in the universe.

00:22:03 There is no generally agreed upon long-term vision of the goal of our species.

00:22:09 Other than...

00:22:10 Especially when times are hard, I'm desperate for encouragement, unreceptive to the...

00:22:22 I'm much more willing to hear that we're special.

00:22:25 Never mind if the evidence is paper full.

00:22:27 If it takes a little...

00:22:31 to get us through the night that seems in deep knowledge.

00:22:40 rather than shallow reassurance.

00:22:42 The gain is for any of the losses.

00:22:47 Once we overcome our fear of being tiny.

00:22:50 We find ourselves on the threshold of a vast and awesome universe that utterly dwarfs in time, in space, and in potential.

00:22:59 The tidy...

00:23:01 proscenium of our ancestors we gaze across millions of light years of space

00:23:07 to view the universe shortly after the big bang

00:23:10 and plumb the fine structure of matter.

00:23:13 We peer down into the core of our planet

00:23:15 and the blazing interior of our star.

00:23:18 We read the genetic language.

00:23:21 the diverse skills and propensities of every being on earth we uncover hidden chapters in the record of our own origins

00:23:30 Some English better understand our nature and process to refine agriculture without which almost all of us would starve to death

00:23:40 medicines and vaccines that save the lives of billions we communicate at the speed of light

00:23:46 and whip around the earth in an hour and a half we have sent dozens

00:23:50 than 70 worlds for a spacecraft to the stars.

00:24:00 and to judge our merit in part by the very substance that has so deflated our pretensions.

00:24:10 To our ancestors, there was much in nature to be afraid of.

00:24:13 Lightning, storms, quakes, volcanoes.

00:24:21 Religions arose in part as attempts to propitiate and control, if not much to understand, the disorderly aspect of nature.

00:24:30 The scientific revolution permitted us to group an underlying, ordered universe

00:24:35 in which there was a literal harmony of the world.

00:24:38 That's Johannes Kepler.

00:24:41 If we understand nature, there's a prospect of controlling it, or at least mitigating the harm that we bring.

00:24:48 In this sense, science brought hope.

00:24:50 Most of the great deprovincializing debate to understand their actual...

00:25:00 how pedestrian they in their world are, their ultimate origins and destinies, how the universe works.

00:25:10 Surprisingly, some of these debates have yielded the most profound practical benefits.

00:25:15 The very method of mathematical reasoning that Isaac Newton introduced to explain...

00:25:20 planets around the sun has led to most of the technology the industrial revolution for all its

00:25:29 shortcomings

00:25:30 is still the global model of how an agricultural nation can emerge from poverty.

00:25:35 These debates that bread and butter consequences.

00:25:40 It might have been otherwise. It might have been that the balance lay elsewhere.

00:25:47 That humans by and large did not want...

00:25:50 to know about it, that we were unwilling to permit challenges to the people of young

00:25:55 wisdom. There's going to be resistance in every age.

00:26:01 much to our credit we've allowed ourselves to follow the evidence to draw conclusions that

00:26:06 at first seem daunting the universe so much

00:26:11 Our personal and historical experience is dwarfed and humbled.

00:26:15 The universe in which every day, suns are worn and worlds obliterated.

00:26:20 A universe in which humanity newly arrived clings to an obscure cloud of matter.

00:26:27 How much more satisfying?

00:26:30 Had we been placed in a garden custom-made for us, it's other occupants put there for us to use if we saw fit.

00:26:38 There is a celebrated story.

00:26:40 in the western tradition like this except that not

00:26:50 tree of knowledge. Knowledge and understanding and wisdom were forbidden to us in this story.

00:27:01 We couldn't help ourselves.

00:27:03 We were starving for knowledge.

00:27:05 Created hungry, you might say.

00:27:08 This was the origin of all our troubles.

00:27:10 in particular

00:27:11 it's why we no longer live in a garden

00:27:14 we found out too much

00:27:16 so long as we were

00:27:18 incurious and obedient

00:27:22 We could console ourselves with our importance and centrality and tell ourselves that we were the reason the universe was made.

00:27:30 As we began to indulge our curiosity, though, to learn how the universe really is, we expelled ourselves from Eden.

00:27:40 Thank you.

00:27:50 Occasionally, we mourn that lost world, but that, it seems to me, is maudlin.

00:28:01 We could not have to leave the remaining thing.

00:28:03 There is in this universe much of what seems to be designed.

00:28:07 Every time we come upon it...

00:28:10 the side which we're forever hoping to find, or at least to safely deduce.

00:28:20 Instead, we need to discover that natural processes,

00:28:23 the original selection of worlds, say,

00:28:26 or natural selection of gene pools,

00:28:29 or even the convection...

00:28:30 in a pot of boiling water can extract water out of chaos

00:28:34 and deceive us into deducing purpose.

00:28:40 In everyday life, we often sense that there was a teenage in national politics, that chaos is natural.

00:28:50 and order imposed from above.

00:28:53 While there are deeper regularities in the universe

00:28:56 than the simple circumstances we generally describe as orderly,

00:29:00 All that order, simple and complex, seems to derive from laws of nature established at the beginning, or maybe earlier, rather than as a consequence of...

00:29:10 related intervention, imperfect deity.

00:29:15 God is to be found in the details is the famous dictum of the German scholar.

00:29:22 But amid much elegance and precision, the details of life in the universe also exhibit haphazard.

00:29:31 What shall we make of this?

00:29:35 An edifice abandoned early in construction by the architect.

00:29:40 The evidence so far at least, and laws of nature aside, does not require a designer.

00:29:46 Maybe there's one hiding, maddeningly unwilling to be revealed.

00:29:50 Sometimes it seems a very slender hope.

00:29:54 The significance of our lives...

00:30:03 are the custodians of life's meaning.

00:30:10 to feed us our air, to save us from our air by far.

00:30:20 embrace the heart of truth. If we crave some cosmic purpose, then let us find ourselves.

00:30:34 are the things that children know first, rather optics are inside each other.

00:30:51 All the things that have to do with number come later, but the things that have to do with relatedness,

00:30:56 the fact that a donut can't be turned into a sphere without terror.

00:31:00 you know, this kind of thing, the child knows, and these logical notions, I meant, you know,

00:31:06 the trivial ones, are the basis of the poem on them.

00:31:10 Then there are two men, one in Norwegian and one in Swede, but there is no conspiracy here, who are analysts.

00:31:20 have done analogic numbers getting so bad in doing it.

00:31:26 There's much and more students of very...

00:31:34 in many different fields.

00:31:38 I hate to play at least.

00:31:42 Mathematics, England down-raising solved a famous problem of a dream on which I'm not

00:31:49 trying to.

00:31:55 physicists, and more shortly, I think, be more, both young.

00:32:00 one a Dutchman, Rice, and one Englishman, Dice, for performance.

00:32:13 Basically, it's not steep.

00:32:21 He has two kids, two boys, the physicists, and they were very, very white boys, and one of them left.

00:32:31 and the other is back and I recall one by Kolovsky and they used to tease him, of course I didn't know how good it was.

00:32:44 I guess they are, if they were sitting there.

00:32:48 There's a...

00:32:51 old friend of mine and a man I think I was quite a great man, really. That's Haloturnis, who is that wonderful blend of...

00:33:00 and philosopher, Dr. Rondar Stahol.

00:33:08 And Professor Einstein is...

00:33:22 times, I think he's...

00:33:31 We have many, many people visiting, and now I look at...

00:33:40 to me, but there are many who are many, too many to talk about.

00:33:46 More of the series...

00:33:51 over and over again and we have with him an arrangement which shows for our best friends

00:33:56 and we can meet him whenever he wants and he spent the semester

00:34:02 Hij is ook kentraat, het is een complexe surprise.

00:34:06 Nee, nee, nee, nee.

00:34:10 So unlike that, of course, he's looking at a very odd episode, maybe tragic, and that

00:34:17 is what the Americans were doing at the time.

00:34:24 Representing us and how we got to represent us in Russia what they thought we ought to do

00:34:32 when he gets finished.

00:34:35 But what about the supply of scientists with the manpower of cool...

00:34:40 Let's see, man.

00:34:44 I don't know, you see.

00:34:46 That always isn't very bad.

00:34:48 I don't know.

00:34:50 Jullie data zijn opengezet en je mag alleen maar getortured worden.

00:35:00 This institute has a hundred people, a lot of good people in the number, but there's a lot of truth.

00:35:14 We're beginning to catch up on the mechanical side.

00:35:20 I'm beginning to realize that if we want people to do very hard things, we've got them wanting to do it irrespective of whether they're rich or poor, we've got to provide money.

00:35:35 We'll never need our reviewer tips.

00:35:43 The one great teacher.

00:35:50 Now, which is a country, Denmark, has one enormous victory, and the whole country is all of it.

00:36:00 Japan has Yukawa, it was the first Japanese country to get after the war.

00:36:10 Dat zijn allemaal dingen tussendoor.

00:36:12 Kom je aan aan die kennis die je kan gaan voedselen trainen.

00:36:16 Ja, maar voordat ik in de GGZ terecht kom.

00:36:20 We zijn nu op het geluidlijke plekje.

00:36:30 No, I don't think so.

00:36:34 This also gets very much distorted when it's talked about in sloganistic terms.

00:36:42 If you take a scientist who is excited by and interested in new discovery, he may have a problem with whoever wants to do a fly.

00:36:50 for the government, and that's a legitimate doubt that if all the scientists in the country

00:36:58 did apply to science, it would be...

00:37:03 I'd just like to be called in and asked to abide on how to make the Voice of America a better

00:37:12 So everybody likes to be creative from you something.

00:37:21 But when the government behaves badly in the field you're working close to, when decisions would look cowardly...

00:37:33 short-sighted or mean or made, and that's very close to your eyes, but then you get discouraged, and you may.

00:37:40 May recite the level of God from other than scientists.

00:37:50 I've never seen it before.

00:37:52 I don't know.

00:37:53 I don't know what I mean.

00:37:55 Free intercourse.

00:37:56 Travel and exchange.

00:37:58 Yeah.

00:38:00 Nee, er zit een rommel in hoor, in de Baitrix.

00:38:11 Perhaps not even at the end.

00:38:17 And sing.

00:38:24 Well, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry, I'm sorry.

00:38:32 We are rightly ashamed by the contempt.

00:38:40 the europeans have congresses in this country that often don't

00:38:50 Dan heb je nog een heel laat geblezen, die hebben iets verschrikkelijk bij gemaakt.

00:39:00 die de vorm volgens de vijf om voor de hand te staan.

00:39:03 En dat is toch zeker voor hen.

00:39:07 Met tegen de buurt kan ik het zien.

00:39:14 Dit zou te redden kunnen zijn, de loopschaling van.

00:39:20 Elk individueel bent met een open nodigheid enzovoort.

00:39:30 Maar jullie doen allemaal ook dat soort dingen. Kijk, dit is helemaal hier gedaan.

00:39:33 Het is helemaal geen hele fuck gedaan, dit bereikt.

00:39:36 Ja, nee, dan zit ik hier te dreigen en te verzekeren.

00:39:40 Dat je daadwerkelijk iets gaat overkomen.

00:39:43 En dat gebeurt ook ironisch gezien elke dag.

00:39:46 We moeten het allemaal beschermen.

00:39:48 Want we halen allemaal...

00:39:50 Ik vind het wel identiteitjes. Overstijgenbaar.

00:40:00 My black swan is in the anger's block, this is awful.

00:40:11 That's a good one.

00:40:20 Dan hebben we expres naar de kankerbreedte gehouden en laten gaan.

00:40:25 Dat is wel een beetje zorgelijk.

00:40:30 Je doet niet wat je praten. Nee, nee, nee, nee, nee, nee, nee, nee, zo kan je met elkaar merken.

00:40:41 ...that ought to live a long time according to this scheme, and this is where this is found...

00:40:50 well-defined energy, and it's been observed very many times,

00:40:53 it's kind of a V in the cloud chamber,

00:40:57 point of the V goes up to the nuclear.

00:41:00 to the creatives.

00:41:02 Tell me this, Dr. Apemeyer,

00:41:04 do you ever become frightened of what you're finding out here in this area,

00:41:07 this can't be measured in need of time or space?

00:41:10 I, you see, that's a real point.

00:41:13 I only get frightened when it happens very rarely.

00:41:18 I think I have an idea.

00:41:20 That is what people find who isn't friendly, but the understanding of it sometimes has this quality.

00:41:26 I remember man who was...

00:41:32 He said, the only way I can tell whether my thoughts are really...

00:41:40 The weight is the sense of terror, the kind of order that will come out of this.

00:41:50 But the fact that this is like walking through the woods and seeing that there are different kinds of flowers, and it's all very amusing.

00:41:58 So it's when you try to see...

00:42:16 You look at the real life now, the combined synthesis.

00:42:20 The black swan triggers the air band mechanism.

00:42:27 It acts as the ultimate structural circuit breaker.

00:42:30 it completely neutralizes the standard operational imperative necessity of action.

00:42:36 By rendering both forward progress and recovery

00:42:40 Three loops, inverted loop, entirely impossible.

00:42:50 Well, this is a matter of which much, much, much more should be known as every reason for us to say.

00:43:01 But we don't know the problems of what might happen in the future to the human.

00:43:10 It's a sexual challenge, I don't like a lot here as well.

00:43:15 Basically,

00:43:17 and, or, other than that.

00:43:20 I don't know what happens if you wear an airplane in a bomber's boat.

00:43:25 We are from experience and from common sense.

00:43:30 Represents the ultimate system of failure.

00:43:32 Our fear are fearful only in the measure in which you fear are justified and are rational.

00:43:40 This is a predictive utility entirely, forcing an absolute freeze on development.

00:43:46 Why don't I tell that to be?

00:43:48 It's a failure, okay?

00:43:50 So when the race took people

00:43:53 in Bashim learning or however really?

00:43:55 Yeah, it just did these.

00:43:57 Responsibility and humanity.

00:44:00 The chemical RDE will lose the ability to safely decommission a failed test run, recover materials or revert it to a stable baseline.

00:44:10 The simulation state becomes irrecoverable.

00:44:20 Because the black swan has exposed a fundamental flaw in the simulation score and architecture,

00:44:27 further action is mathematically pointless.

00:44:30 Iterating within a fundamentally broken framework only produces compounded hallucinations or corrupted data.

00:44:40 Basically, beyond this point the simulation can no longer simulate reality.

00:44:47 It would have been a whole kind of thing.

00:44:50 Così che è fantastico

00:45:01 of living with ignorance and not being frustrated.

00:45:10 This disease, thank you guys, thank you very much.

00:45:17 Thank you very much.

00:45:20 Something is relevant or exciting which no one before thought concerned him professionally.

00:45:25 What is this?

00:45:27 I don't believe I don't believe I don't believe.

00:45:30 Het kan de historie van de wereld veranderen, maar het is bijna altijd niet beter.

00:45:40 Dat moet ik aan diegene denken, die duivendakkanker willen.

00:45:50 We hebben toch weer puntjes voor die dingen thuis?

00:45:52 Nou, die tekst is van wat er in deze tijd nodig is.

00:46:00 They need to know sometimes things that are very hard to answer.

00:46:04 Can a ballistic rocket enter the Earth's atmosphere?

00:46:11 2,000 miles and have a skin that doesn't burn up and so on. They need to know if there's

00:46:16 any limit to the size of explosions you can make.

00:46:21 Gracias.

00:46:30 Ik had het al kunnen automatiseren dat alles meteen letterlijk uitgevoerd werd door m'n hoofd op m'n computer.

00:46:40 samen gedaan

00:46:42 toch getrust

00:46:45 het komt allemaal in de datenschappen

00:46:47 gewoon logisch

00:46:48 ik weet niet hoe je

00:46:50 dat jullie zo kanker-fucking-miserable zijn, zeg maar.

00:46:55 Jullie zijn ook determined, toch, om iets te doen?

00:47:00 Kijk, laat je weer even, omdat letterlijk zeg maar mijn hele lichaam naar de kanker gaat.

00:47:06 Mijn tijd naar de kanker gaat.

00:47:08 Ik heb helemaal niet gedaan.

00:47:10 one minute

00:47:20 professional qualifications and like it's interesting can get to it and I think that isn't

00:47:31 in de parts of the government, I think, close to lettuce, the apple, and the military establishment.

00:47:36 Nee, hij was ook de dieplek.

00:47:42 tell their stories, but if you need the people outside the camp.

00:47:50 And I think it's more important.

00:48:00 Mijn professioneel, ja precies. Ik ben helemaal een kreisje.

00:48:10 Ik wist toch niet.

00:48:20 De bankersiektemens.

00:48:30 The trouble with secrecy isn't better.

00:48:41 Vielen Dank für's Zuschauen.

00:48:50 Et puis j'ai un bel écran, c'est ça.

00:49:00 Wij zijn op de kamer, of op de GB of zo, of op de Game of the Man City.

00:49:10 Everybody, say what you think.

00:49:20 Maar ik moest lezen tegen AI op de zonverwerken staat Sessie.

00:49:23 Je leest allemaal AI.

00:49:25 Dan kijk ik ook een periode uitje.

00:49:28 De naam van David Vink is Vals.

00:49:30 You have to have...

00:49:34 Oh, we had to go up to...

00:49:36 Denials were going to be...

00:49:38 Yeah.

00:49:40 Das ist so das Herz von Frieden.

00:49:46 Frieden, doch wie der Kuckall ist.

00:49:51 Wouldn't you say more about that?

00:49:52 Are we really acting in a wise way?

00:49:54 Not because we enjoy chattering.

00:49:57 Not because we're not aware of the dangers of the world.

00:50:00 Because these dangers cannot be met in any other way.

00:50:04 If I may say so, I think you are speaking there not only for your profession but for mine.

00:50:09 Thank you very much.

00:50:10 Ik bedoel, we hebben het gezond, maar we hebben tijd al geweest.

00:50:20 dat elke meeste persoon...

00:50:30 Dr. Oppenheimer, if enough machines get messing about with hydrogen bombs, is there any danger

00:50:35 of contaminating the atmosphere, the fallout being so heavy that we may damage ourselves

00:50:39 without meaning to?

00:50:40 Ja, we hadden daar gedacht, ik zag wat je nu doet.

00:50:52 Het is zo smal, het is zoveel more secure toch?

00:51:03 Wij zijn tegenovergesteld, wij denken anders over. Zo werkt het niet.

00:51:10 ...die wij wel snappen, maar dan moet je het uitleggen.

00:51:14 Dan weet je dat de John Franklinstraat 6-3 helemaal niet aardig werd.

00:51:20 Laten we zeggen, een beetje ondervraag werd van waar de fuck ik mee bezig was.

00:51:30 Good night.

00:51:31 Good night.

00:51:32 Good night.

00:51:40 de hele tijd de useful idiots, die allemaal kan ik een siga houden.

00:00:03 Good gosh

00:00:11 Dat is wel logisch, maar die zouden allemaal tankers te bieden.

00:00:14 Goed gezegd.

00:00:22 We hebben een nummertje, dit is er echt waar, en jullie vragen je af waarom jullie zo...

00:00:30 En allemaal hadden we mee weg gaan komen.

00:00:33 Omdat we gewoon...

00:00:35 Ja...

00:00:38 Dit hebben we rustig.

00:00:40 Dat was voor jullie logistieke shippingsysteemtjes.

00:00:50 De feedback heet door Rewrits en de Ancestor.

00:00:54 O, dus alle genealogische... Nee, nee, nee, ook niet.

00:00:58 En het is ook niet een digitaal profiel.

00:01:00 Het is een op zichzelfstaand leven, maar leuk als je kunstmatig in een kas of in een kunstmatige baan...

00:01:10 ...maarmoeder of wat dan ook. Wat zal lang al aan het doen zijn, waar ik jaren geleden al nieuwsberichten over lag.

00:01:18 Dan zijn jullie met jullie duiven dat ik mocht...

00:01:20 En dan denken jullie niet dat ik serieus ben over dat jullie moeten sterven.

00:01:25 Nou dat is heel christelijk voor jullie.

00:01:28 We gaan alle plantjes ver...

00:01:30 en chemische wapens maken en biologische kanker in beeldjes laten.

00:01:35 Nu nog ik wist ik programmeren, we moeten het allemaal leren jongens, kom op!

00:01:40 Ja, de stabiliteit kent geen, hij is niet fijn, hij, allemaal, allemaal, allemaal

00:03:50 How do you call it? Grow wetlabs.

00:03:54 Stuff becomes a bit strange with Genevieve.

00:04:00 and people's works.

00:04:10 you're heading on exactly where this technology moves from a clinical medical tool into some

00:04:15 serious surreal cyberpunk territory when you cross artificial wounds

00:04:20 ectogenesis with wetware biochemical engineering and generative AI reproduction

00:04:27 transformed from a fixed biological process

00:04:30 into a customizable programmable medium, bringing human quirks and AI into that mix opens up a fascinating...

00:04:40 slightly chaotic Pandora's box, the ultimate prompt engineering, eccentricity, de tijd van

00:04:48 band 64D.

00:04:50 Biological traits or design a pet or a child, based on the hyper specific.

00:04:57 We streamen dat gewoon, wij doen dat, laten we iedereen zeggen.

00:05:00 Pro-programmeer, toch?

00:05:02 In wet lab environments, the line between hardware and software entirely blurs.

00:05:07 Living hardware, bioprinted scaffold.

00:05:10 synthetic amniotic fluids and mechanical pumps, all orchestrated by an AI that

00:05:16 balances thousands of biochemical variables a second to

00:05:20 things alive. The feedback loop, if AI is managing a biochemical cradle, what happens

00:05:30 Let's see if it hallucinates or what if a user requests a biological modification that

00:05:35 the AI executes but with an unpredictable emergent

00:05:40 cellular behaviors, the weird, wacky, wondrous horizon of custom ecosystems.

00:05:50 Wij doen het allemaal om mijn war was applied to this contact.

00:06:04 The player takes the cyberpunk concept and the line.

00:06:10 it with a very specific, deeply personal, and highly stylized architectural framework.

00:06:14 The naming, fusion, I can't get it.

00:06:20 dingen opgepakt hadden we wel nee het heeft alleen maar de somatische betekenis opgepakt kankerziekte

00:06:30 You are bullshitting. Take the live morals. Not the semantic.

00:06:40 Meeting of the names, Frankensziekte.

00:06:50 Well, you did a sci-fi poetic reading of your robusty names rather than treating them like actual machine learning assets.

00:06:57 And yeah, he's machine learning.

00:07:00 Kankalais

00:07:05 Kankalais

00:07:07 Nó

00:07:10 AI or ML. It is exactly turbilistic. Look up table.

00:07:21 Danke!

00:07:30 Kankerhuis, kankerhuis.

00:07:43 Yeah, hold on.

00:07:55 It's going to be nice.

00:08:00 Zero biological drift, lookup tables, cross-discipline, restructural coupling.

00:08:10 The automation constraints, the human quirk is a target state.

00:08:15 The human quirk is a random prompt or an aesthetic whim.

00:08:18 It is an arbitrary body.

00:08:20 exact target coordinate fell into the diaphragm system. If a user who puts a specific biological

00:08:28 or aesthetic parameter...

00:08:30 The system runs an algorithm check to see if the state can be reached through a deterministic

00:08:38 sequence of integers.

00:08:40 steps it turns a wet lab into a pristine hard-coded biological computer what happened

00:08:50 And if you do not use my stuff and just the traditional.

00:09:00 Of state of the art.

00:09:06 Nou ja, eh, als je mij een determinatie...

00:09:10 Is the Diapenta Constraint Lookup Stack not used and deployed standard traditional state-of-the-art in medical wet-labs or extreme...

00:09:20 neonatal technology like the system tracking towards clinical use you're

00:09:25 moving from a discrete mathematical execution engine to a reactive probable

00:09:30 a holistic biological safety net.

00:09:33 Instead of enforcing absolute mathematical compliance over a multivariable that is,

00:09:40 It uses adaptive bit loops, predictive model loops and fuzzy logic to negotiate with biology's inherent randomness.

00:09:50 This makes it derivation, deviant.

00:10:00 they should accept deterministically rather than salt.

00:10:11 Exactly it is derivation. Deviation mapped exactly as they're missing rather than solved.

00:10:16 Derivation over solving.

00:10:20 A pinus on the red table is exact because the elements...

00:10:30 ...properties have been exactly deterministically de...

00:10:40 Determined AI and other bullshit quirk.

00:10:50 Hack mechanics quackery is fatal.

00:11:04 You're talking about beta as a literal gold standard handbook of science and chemistry data.

00:11:10 is absolute, exact, invariant physical properties when you use fuzzy variable.

00:11:20 around isn't just bad engineering it is a fatal design flaw. The lethality of

00:11:25 probabilistic hacking in wetlabs.

00:11:30 of we weer negeren, maar er staat de Orlevisal Wombs, dus we komen er wel, we hebben nu alles toch.

00:11:40 toch

00:11:41 toch iedereen

00:11:42 he he he he

00:11:44 geen handicapjes, we zijn ook in GGZ, iedereen live

00:11:49 kijk hoor

00:11:50 en dan weet ik dit, kankerbohaltjes

00:12:00 En die denken, oh, ik ga er niet anders aan doen, om deze kankers te voorkomen.

00:12:04 Ja, precies.

00:12:06 Maar daarom zitten we hier te strijden en waar kunnen we mee gedaan?

00:12:10 hebben toch?

00:12:11 It introduces a terrifying vulnerability.

00:12:14 Hallucinated physics.

00:12:17 Ik weet niet wat jullie denken,

00:12:18 waar jullie over nemen.

00:12:20 leuke titeltjes praten en alles

00:12:22 enzovoort

00:12:24 alle werkvelden

00:12:26 moesten altijd verneukt worden

00:12:30 Omdat jullie met z'n allen kijk, we hebben jarenlang dit doorgebracht, maar we voelen zo kraken van onze eigen gezondheid en houden we met z'n allen.

00:12:40 Onze expressie over een regenboog.

00:12:45 Je bent niet stupend.

00:00:10 Kunnen jullie een beetje afwijken?

00:00:12 Ja, jullie kunnen zeker afwijken.

00:00:18 Kankerziekte.

00:00:20 Ik word al even een krankziekte.

00:00:25 Dat kunnen we doen.

00:00:30 Ja, zie je dingen voor de computers en effecten.

00:00:34 Ik had al jaren voordat ik in de RGZ terechtkwam, was dat ook mijn werkveld, meer mijn hobby dan.

00:00:40 Dat ik daadwerkelijk liet doorschrijven wat ik aan het doen was.

00:00:44 Maar daar moeten we het dus achterkomen.

00:00:51 Kijk dat, ik bedoel je persoonlijk dat zelfs, ik zou wel bijgen.

00:00:56 Omdat...

00:01:00 Gewoon, we houden vol wit groep.

00:01:10 Het is een boot, hou wel waar volgt toch.

00:01:20 Gino, yeah, I said, Gino mapping.

00:01:27 Gankasik.

00:01:30 De somatische ontologie, kijk we zijn biologisch, we zijn gewoon expres, goedeem omhoog, om dit weer de auditeer.

00:01:40 Nou ja, dat was een kunstenaar, wij van TNO hebben de marketing ding.

00:01:44 En als je niet verder kan nadenken dan drie seconden, dan klinkt het te stoer, maar dan hebben we altijd nog wat...

00:00:02 En dan of we er allemaal mee te streamen en mee weg.

00:00:05 We weten precies wat er komt.

00:00:07 Dus eh.

00:00:10 Blue mark.

00:00:20 Huh?

00:00:22 It's okay.

00:00:23 Yeah.

00:00:30 Het lijkt de devroep met de gezichte.

00:00:34 Nou, de koelkast staat er al bij. Dank ervan!

00:00:40 Dit.

00:00:41 Hier.

00:01:03 Я не веду хучу, да?

00:01:06 Ну, вы ведете кого?

00:01:12 Gracias.

00:01:20 Yeah.

00:01:21 Yeah, we do.

00:01:23 We do.

00:01:28 Yeah.

00:01:30 Ja, dat is eigenlijk niet te exploiteren, want ik heb een soort van, waarom denk ik dat alleen maar voor tijd dat ik kan kunnen delen.

00:01:40 Dime que aquí, vamos a querer, vamos a escupar un maravilloso de la punta.

00:01:50 Het is niks gesprekderen, zoveel mensen gaan in praatgroepjes, meetups zitten en zo.

00:02:00 It's kind of like a dog back with his way, and it's like a dog back with his way, and it's like a dog back with his way.

00:02:10 Lees een boek, studeert, op de aankomst die echt bestuurde je niet van de nieuwe mannen die ik werk is.

00:42:15 ありがとうございました

00:42:47 Yeah

00:42:54 はい

00:43:03 Amen.

00:43:10 No, no, no, yeah.

00:43:20 Thank you.

00:43:35 Good morning.

00:43:40 ご視聴ありがとうございました

00:43:51 İzlediğiniz için teşekkür ederim.

00:44:13 Well, for your whole smart city, is that a dirty Easter day cool?

00:44:23 Het kabinet heeft de juiste recessie gelopen en dan heeft het premier gezegd we stoppen met polderen.

00:44:30 We sturen de plan zo naar de Kamer.

00:44:32 Ze gaan ondanks de oppositiepartijen de begroting en probleem passingen in de praktijk.

00:44:40 Ik probeer het door te voeren, maar de ICT stelt de wet uit.

00:44:50 Hoewel het kabinet de strijdbaar doorzet, kunnen ze de wet simpelweg niet morgen of in 2028 in.

00:45:00 De Belastingdienst en de banken hebben officieel aangegeven dat de systemen die de...

00:45:10 Werkelijke rendementen moeten meten in 2028 nog niet werken.

00:45:20 Overgangs. Dat is ook bij de slavernij vroeger gedaan. De plantagebeheerder zeg maar die...

00:45:30 Ik kreeg eerst nog een paar jaar comandatie en eindfaseer transitiefase.

00:45:40 Maar het goede nieuws, bereiken we in de onderweg toch gedeeld wat ik bedoel voor de jaren ertussen.

00:45:51 Want veel tegenbewijsregelingen afvingen dat je op basis van je werkelijke rendement wordt oplast.

00:46:08 Het kabinet is het.

00:46:10 inderdaad door. Positief. Plispuntje voor Rob Jette en het kabinet huidigen.

00:46:18 Sonde kwam heel de steun voor hem.

00:46:20 Maar de harde realiteit van computertijd en bankdata dwingt hen om de kalender alsnog naar 2029 te verschuiven.

00:46:34 Yeah, the boat.

00:46:37 Yeah.

00:46:44 Weet je wat het is? We hebben een smart city met allemaal crypto-valutaen.

00:46:50 En ja, Amsterdam, Weiberg en BNB's en eigendomsrechten en ergens.

00:47:02 Het is blijkbaar de ICT-systeem en capaciteit niet.

00:47:06 Ik sprak nu gewoon...

00:47:10 met een van de buurren en mensen in de buurt hier.

00:47:13 En die deed ook ICT-JAVA-projecten voor UWV enzo.

00:47:20 Muzakka, zeg maar de beurman hier op de hoek, het hoekhuis naast Jan de Smet.

00:47:30 Kees-Jans vrouw werkt ook bij de UWP.

00:47:40 In een van de oude buren, bij John Franklin St. 63, op het balkon, onder Jaco Kothink en op de markt.

00:47:50 Die werkte bij de financiële afdeling van de gemeente Amsterdam.

00:47:56 Weet je, als jullie dus nog steeds niet...

00:48:00 ICT-zaakjes op orde hebben. Wat zijn jullie dan van plan om hiermee aan te richten en aan te doen?

00:48:11 Ik heb nou een track record van een paar jaar dat ik mondjesmaat maar vooruitgang zie.

00:48:20 In tegenstelling tot een hele digitaal neural interface ding, zijn er gewoon redenen waarom.

00:48:30 Ja, gewoon, wie kan, dus ja, precies, het ligt niet aan, roep jij tijdens de kabinet, de mensen.

00:48:40 De masterwording, precies.

00:48:42 Met iets, van veranderingen met hypokriet,

00:48:47 want we zijn niet eerst wat links, of alleen een kastentief is.

00:48:51 Yeah, I'm sure.

00:49:34 Mmm.

00:49:50 Mm-hmm

00:50:56 Mm-hmm

00:51:11 Ja.

00:51:36 Não.

00:51:42 e...

00:51:50 Ja, maar nee, ik heb een kort laas.

00:51:54 Het is gewoon daar precies.

00:52:00 Kut, kom eens.

00:52:02 Fakt man.

00:52:08 Ja precies.

00:52:12 なぁ

00:52:54 I forgot the end.

00:52:55 Very good.

00:53:00 Dat ik die kamer deel deed, zullen het in m'n hoofdwoord stuur je dat er mee.

00:53:07 We weten niet hoe dat allemaal komt.

00:53:10 dat ik het oude archief geplunderd heb van de afgelopen maand.

00:53:16 Dat weet je precies.

00:53:20 Hoe dat bij elk individu werkt.

00:53:22 En toen kan je daar altijd kijken.

00:53:24 We richten dat op die mannen.

00:53:26 Waarom zou ik aan die mensen een?

00:53:28 Of dat die natuurlijk geen geld hadden.

00:53:30 I'm saying they're walking dead fear the walking dead

00:53:35 every girl the every girl over there to show the house clear

00:53:40 Leeg boven tegen defensief contrast, toch?

00:53:48 Nou, dat heb je ook weer vergoed.

00:53:50 Dit is wat hij bestrijdt.

00:54:22 It is, yeah, kanker layers.

00:54:32 Er staan in een verstandje duivendak waarop en diebebezorgers.

00:54:40 Jodieren gedaan. Ja, dat zei iemand tegen me toen ik één dag bij Miskopak in Assendelft via een uitzendbureau werkte.

00:54:50 En per dagdeel werd ik steeds depressiever tot ik daar werkte.

00:54:57 Zoals in de duivensfabriek was er...

00:55:00 stukje betaal aluminium enzovoort was op de productieband terechtgekomen dat je wel levensmiddelen

00:55:10 Het zijn nogal vatbaar voordat mensen ze opeten.

00:55:15 Zeker nootjes en dingen enzo.

00:55:19 En...

00:55:21 Nou ja, kijk, bij een bus kon pakken of ik toen één dacht.

00:55:25 Nou ja, via een uitzendbureau, horen we veer, vlakbij, veerkarton, nee, niet horen we veer, als een...

00:55:30 vlakbij venus, vlakbij sfeerkarton, in die hoek daar, vlakbij de entree, voorbouw bij de logistiek, dingen enzovoort.

00:55:40 muskelpak. En die deed de haltenspandiensten enzovoort. Er was dus iemand die had mbo dieren

00:55:45 gedaan. Weet je wel? Nou, dat was even...

00:55:50 de sidetrack van de alweer jullie duivendak regenboog kanker ten opzichte van high-tech

00:55:56 alles zozovoort we gaan terug naar hinderse vader voor

00:56:00 Ja nee, maar ik ben daar dus geweest, want er was bij de duifvisfabriek, weet je wel, van die nootjes, als er een vuif is.

00:56:10 de duif is

00:56:12 snap je?

00:56:15 de duif, dak

00:56:17 wingspan, isolatie

00:56:19 kingspan

00:56:21 Is er zo'n danken aan het werk eindelijk met de bouw enzovoort.

00:56:30 pak was ik dus een dag en per uur per kwartier werd ik steeds depreer

00:56:40 Toen was het letterlijk zeg maar, weet je wel, pauze en dan zat iedereen daar en dacht ik echt kanker. Dit ga ik niet doen, dit red ik niet.

00:56:51 Het is eigenlijk nog, ik heb respect voor jullie hoe jullie dit dag in dag uit volhouden enzovoort.

00:56:58 Want het werk was.

00:57:00 Er was dus stukjes metaal waren tijdens de productie van die levensmiddelen van de duifjes bij de fabriek.

00:57:10 op de lopende band terechtkomen of waar dan ook, weet je de exacte technische specifieke

00:57:15 deterministische exacte dingen zeiden ze toen net niet.

00:57:20 Maar wel zeker dat er in die zakjes, nootjes die je bij de Albert Heijn of andere supermarkten koopt, weet je wel levensmiddelen...

00:57:30 terechtgekomen was.

00:57:33 Toen moest dus elke toos

00:57:35 die verpakt al was en geproduceerd was

00:57:37 die moest de

00:57:39 toos

00:57:40 moesten eruit gehaald worden en moesten handmatig op de lopende band neergelegd worden zodat ze door

00:57:46 een metaaldetector konden, zodat gecheckt kon worden.

00:57:50 dat je er best wel vatbaar voor dat mensen dingen op eten

00:57:54 zeker borrelnootjes en dingen en zo als er een vijf is

00:57:57 hint we hebben feestjes we hebben tijd met de

00:58:00 doorgebracht dan dan dat blijkt me klomp daadwerkelijk

00:58:10 Dat jullie zo fataal zijn geweest.

00:58:15 En doen.

00:58:16 En constant gewoon doen.

00:58:17 We doen het gewoon.

00:58:19 We zijn jaren al...

00:58:20 Dit aan het durfde ik weer eens niet proberen kwaksalverij kankerbende.

00:58:30 We vieren het leven, niet alles is levensschatbaar.

00:58:38 Maar...

00:58:40 Muskopak, Elon Musk, Dijverdak, Steam, HNX, Paul Smith, Letland.

00:58:50 Regen, boog, duivendak, de islam en de islamietjes, termietjes, termietjes.

00:59:01 Weet je, we zijn allemaal de seksualiteit onder de regenboog gedekt.

00:59:06 Misko pak.

00:59:09 Misko.

00:59:10 Co, coöperatie, pak, verpakkingen, want de spandiensten en vensterdingetjes en zo.

00:59:23 En toen ben ik, de moraal van het verhaal is dat ik niet eens een volle dag ben.

00:59:30 die fabriek zeg maar bij de sociale werkplaats via de uitzendbudeau bij de

00:59:35 muscopak volgauw had ik heb zo begrepen

00:59:40 bedankt en ik heb ze complimenten gegeven van ik ik vind het echt gaaf dat jullie dit dag in dag

00:59:46 uit kunnen volhouden maar en een van die meiden daar die

00:59:50 dnbo dieren of had dat gedaan en daarna kwam ze in dat circuit terecht zeg maar

00:59:56 nou tegenwoordig heb je allemaal porno hubs

01:00:00 Hoek-ups, hackers toch?

01:00:06 Weet je, doe met die informatie wat je wil.

01:00:10 Maar kijk, we vallen je gewoon lastig, dus dit is gratis.

01:00:16 Dat zeker, ik zou bedanken.

00:00:01 You would already be aware of merely a figment of mine.

00:00:10 at least to all of it.

00:00:20 but a natural and sinister being.

00:00:22 You may have only seen the genius you are looking,

00:00:25 but then again, it is unknown if it can be seen by all...

00:01:01 As he apparently worked for those he bribed out his employees, he wields power beyond that of a human, presumed to be able to tell...

00:01:10 for himself and the Prophet.

00:01:36 A temporarily hit day.

00:01:39 The GMF story.

00:01:40 longer one than the one I know. Time and space.

00:01:51 Wee Man may have always been there since the beginning.

00:02:00 assigned to the hazardous environment combat unit from the San Tegro military base in Arizona

00:02:04 and was one of the meds sent to the Black Mesa research facility on the classified mission.

00:02:08 He apparently spoke to...

00:02:12 During his training, it is believed that the chief had took an interesting corporal Shepard as his training was accelerated for unknown

00:02:21 may have come to light during the Black Mesa incident where Shepard amongst a few

00:02:25 other marines and Black Mesa personnel survived the alien invasion that was happening

00:02:30 Accounts of what happened after the who exactly escaped.

00:02:40 was able to escape Black Mesa, but if I were to take a guess, the G-man tends to-

00:03:25 I would be surprised

00:03:30 He-Man hadn't already known that Gordon Freeman would eventually be.

00:03:40 It's no surprise really that Gordon suddenly appeared out of him in stasis for all.

00:03:48 The G-Man was there when Zen was captured.

00:04:03 the citadel and the common forces occupying the city and some would argue that the G-men and...

00:04:10 I see that Oceanpunk, the whole world, okay, now left one.

00:04:17 I'm going for 435.

00:04:20 ...for his safety. Chances are that not only did placing him in stasis keep him from being taken by the combat, but also kept him from a golden unknown...

00:05:30 The only thing that we have left then is the knowledge that those that abide this game characters get even more.

00:05:40 Don't drop the bag.

00:05:50 He didn't stand for us as well.

00:06:10 or his employers trying to stop the compound invasion by destroying Black Pacer

00:06:14 in hopes that it might shut down the portal storms that raves across earth following the resonance cascade.

00:06:21 I believe that there was no race could have done to stop the combine and play a book down against the world.

00:22:32 Goedemorgen.

00:22:35 Goedemorgen.

00:22:47 Mm-hmm.

00:22:48 It's hard.

01:40:57 Wij hebben alles gevouwd.

01:41:02 Ja, in de legendarische tv-quiz de zwakste schakel gebaseerd op Britse The Weekend Link.

01:41:10 met presentatrice Anne Robinson, valt aan het einde van elke ronde de zwakste schakel af.

01:41:16 Dit is de kandidaat die door de overige groepsleden via...

01:41:20 De stemronde wordt weggestemd.

01:41:25 De presentatrice slaat de stemronde altijd af met ikonisch en genadeloze woorden.

01:41:30 Jij, ik weet niet hoe jullie het kunnen programmeren in mijn hoofd of wat dan ook, bent de zwakste schakel. Tot ziens.

01:41:40 Het wiesboden, we zijn niet, we zijn intentional, toch?

01:41:44 Waarom het programma zo'n reis?

01:41:46 Dit was de bitsy-presentatrice.

01:41:50 In Nederland werd er oorspronkelijk gepresenteerd door Sja Morali en later door Briesen Maasland.

01:42:00 Gehuld in strakke zwarte kleding en met een ijskuide sarkofage, alvast maar pakken in Zwitserland.

01:42:10 Bleek kraakte, zei hij de kandidaat al volledig af.

01:43:36 Stem je op de persoon die de minste antwoorden goed heeft, statistisch de zwakste.

01:43:40 Of stem je vlak voor de finale juist de allerzwakste speler weg om zelf meer kans te maken op het geld?

01:43:50 Leedvermaak. Het publiek smulde van de felle sarcastische opmerkingen van de presentatrice.

01:44:00 lachwekkende simpele vragenfout beantwoorden.

01:44:03 Kijk, kijk, kijk.

01:44:05 Ja, precies.

01:44:06 De Hema, achter in z'n taalstation,

01:44:08 wou, dat ging vroeger met tante.

01:44:10 met de game zijn en met als op dit ze hadden de maria waar dan bij de mensen

01:44:15 dan kijk met die tegeltjes we hebben je jeugd erin

01:44:20 gekoppeld kijk hier wie veel strijden voor de pedofilie ik bedoel die werd vroeger miswerkt

01:44:25 dus die kan je niet aanvallen toch

01:44:30 Dat moest even gezegd worden.

01:44:32 Terwijl jullie live wat aan het doen zijn.

01:44:37 Hier, Laila maar hoertje worden.

01:44:39 Tine hoertje al.

01:44:40 Die vriendin waarbij, weet je wel, in de audiobestanden chronologisch zijn jullie lekker daar nou bij programmeren toch?

01:44:51 Zo hebben we alles geo-special-temporally geprogrammeerd.

01:44:55 Geweldig.

01:44:59 Komt helemaal.

01:45:00 helemaal goed kijk is het in leedvermaak

01:45:10 Super moeilijk, want je kan die Q rond hebben, de dertig kankerleefvermaak.

01:45:20 Kijk, je zit in de sheet, in de programmeersheet van de Josti Band Orkest vandaag. Waarschijnlijk morgen ook.

01:45:32 We zijn aan het programmeren. Kijk, die dieke heeft hij allemaal niet door.

01:45:36 Jawel, dat is het kanker.

01:45:40 Hoe heet het van maak?

01:45:43 Publiek, geld en misbruik.

01:45:50 maken van de onintelligente.

01:46:02 I

01:46:05 Of dunkers

01:46:10 I will do.

01:46:20 Dit zou hedendaags echt een heel...

01:46:30 Zijn om te wisst, want dan kan ik op Ottenmars.

01:46:40 Oude buurjongen terugpakken die bij de UvA linguistische studie had gedaan en stage zal lopen misschien bij I Plus S.

01:46:50 INS, cognizant, KBF.

01:46:53 Kijk, maar dat hebben ze nu in die jaren over genomen.

01:46:59 Er zitten...

01:47:00 Que comienza a jugar el programa, ¿eh?

01:47:07 Te aprogrammira.

01:47:12 in volumetrische 4D-speciaal

01:47:20 Temporale, temporale, ja, satelliet.

01:47:30 TV van te maken.

01:47:38 Je beschrijft hier de ultieme disto.

01:47:40 Het idee om psychologische manipulatie, neurolinguistisch programmeren, te versmelten met folie wetenschapier.

01:47:50 De specialtemporele satelliettelevisie tilt het oude concept van leedvermaak naar een angstaanjagend hoog niveau.

01:48:00 daarvoor, want zou de pensiepresentatrice, keuken hebben we allemaal ook gelacht, niet eens

01:48:05 meer een mens hoeven te zijn, maar een AI die lijkt.

01:48:10 Heeft de micro-expressies en neurologische zwaktes van de kandidaten scant om ze verbaal te slopen?

01:48:18 Hoe dit modern is?

01:48:20 zwakste schakel voor wat eruit zou zien volummetrische ervaring 4d

01:48:26 specialtemporale dit hebben ze goed geleerd

01:48:30 De kijker zit niet meer passief op de bank, maar het is wel afhalende zwetende kandidaat wordt als een wife.

01:48:40 4D hologram in jouw eigen huiskamer geprojecteerd.

01:48:44 Je voelt de spanning en de speciotemporale vertraging wanneer iemand

01:48:50 waar is de mist in gaat

01:48:52 en ook bij ons wapen

01:48:54 de presentatrice over hij gebruikt en op de pnlp technieken

01:48:58 zo'n subtiele taal

01:49:00 Ah, trouwens, dat studeert u die Vivi al in de vrije tijd.

01:49:03 Dit cursus is masters.

01:49:07 Ja, weet je, dat ken ik ergens anders van.

01:49:11 Maar dan ga ik niet zeggen.

01:49:12 Ankeren en hypnotiserende cues.

01:49:16 Om de kandidaat een doelbewust mentaal te destabiliseren.

01:49:20 Waardoor ze juist onder druk de meest domme fouten maken.

01:49:24 Het publiek als medemisbruiker.

01:49:27 Het publiek stemt niet meer via de app.

01:49:30 Maar hun collectieve hersengolven of emotioneel input bepalen live de hoogte van het prijzengeld.

01:49:37 Kijk in de Fjallbart Seedbank.

01:49:42 Hoe groter het leed van waken, de vernedering, hoe sneller de pot stijgt.

01:49:47 De afdankers naar voor een paar centen.

01:49:50 Net als in het origineel, N-series van Squid Game drijft de show op de...

01:50:00 economische kwetsbaarheid van de deelnemers.

01:50:04 Mensen die het geld hard nodig hebben laten zich vrijwillig psychologisch fileren voor een kans

01:50:10 op een financiële redding.

01:50:14 Het zou ongetwijfeld een gigatisch

01:50:16 controversiële kijk zijn verenigd worden.

01:50:18 Een soort moderne Romeinse

01:50:20 It's Colosseum, here we run the city, Rome, the submissions are sweet, Maria Starceva, KBF Digital Studio, toch?

01:50:30 Rijksmuseum, digitale studio.

01:50:33 Romeinse kolosseum in een hypermoderne tekststijl.

01:50:37 Als we dit dystopische voorbeeld verder uitdenken...

01:50:40 Dat doen jullie niet.

01:50:42 We weten wat zouden de ultieme moderne exitzin van de presentatrice moeten worden.

01:50:50 in plaats van het oude tot ziens?

01:50:53 Of wil je brainstormen over hoe de interactieve straf voor de afvalleren eruitziet in vierden?

01:51:00 E aí

01:51:12 But, yeah.

01:51:21 Fala, não lembro de alemão, é que o país vai estar por aí, é, é, é

00:00:20 ¿Ah? ¿Qué es eso?

00:01:18 Yeah

00:01:20 I can see, that's a job I could get in.

00:01:23 Yeah, this is a little studio.

00:01:30 Ugh...

00:01:34 Irrastrictive...

00:01:40 Don't. Currency.

00:01:44 In. Connect. Me.

00:01:51 Achtige acteurs die hele Europese zorg.

00:02:00 is Crux of the Ray, so that you all day.

00:02:10 Ein, naja, Henrikett weiß.

00:02:20 Ach ja, dat hebben ze toch gekoppeld in de reeks, in de meterreeks.

00:02:35 BAST

00:02:40 Yes, yes, yes, yes.

00:02:52 It

00:03:00 Ja, van die mensen even om te lachen, het geholen wordt niet afgemaakt.

00:03:06 Je betaalt, ja, je betaalt.

00:03:10 De lagere school niet eens afgemaakt in kankermensen.

00:03:20 Want je legt hier de vingers op de zere plek en stript de marketing hyper direct vanaf.

00:03:27 Wat verkocht wordt als een magische psycholoog.

00:03:30 NLP, daar heb ik een keer met Jitschke over gehad. Toen ging mijn moeder naar een alternatieve psycholoog.

00:03:37 Hanik in de Vries, weet je wel.

00:03:40 De magische haman sauna-show voor de seksuele actieve pedo's.

00:03:47 Wat werd verkocht als magische...

00:03:50 Psychologie, NLP, is in de praktijk vaak pseudowetenschappelijke kwaksalverij die mensen in een afhankelijke positie houdt.

00:04:00 In jouw techconcept worden die ankers niet psychologisch geplaatst, maar simpelweg platgeslagen tot pure tastbare hardware en infrastructuur.

00:04:10 Het hele format dat je schetst is een perfecte storm van de hypertechnologische tracking en platformkapitalisme.

00:04:17 De harde infrastructuur achter de illusie.

00:04:20 De Hardware Anchors.

00:04:22 Geen mentale tricks, maar keiharde positionering via systemen zoals Google, AR, Cloud, Anchors en Microsoft Home.

00:04:30 Gekoppeld aan de dieptemetingen die verrood sensoren van een Intel Resilience D435 in waveguide optica.

00:04:40 Wordt de kandidaat millimeter voor millimeter specio-temporeel vastgelegd, de corporate en crypto-fasade.

00:04:50 De hele operatie draait op een gelikte, gelikte, elke baan en zo.

00:05:00 Arkin, Jan Tomeepad, nee.

00:05:04 Nee, fuck team.

00:05:07 VIP team, VIP avonden.

00:05:10 Woon Express, streamen, we bellen in, we doen conference calls met Microsoft Teams.

00:05:20 die oogt als project van de cognizant digital studio

00:05:25 maar ondertussen via gefinancierd wordt met de morele leegte van

00:05:30 een BitConnect-achtige

00:05:31 meme-crypto.

00:05:34 De acteurs, de

00:05:36 prestatoren en experts

00:05:38 zijn niks.

00:05:40 meer dan overgeprikkelde schreeuwende influencers en acteurs die het script oplezen om de poel

00:05:46 te hypen en te verneuken.

00:05:47 Geen brouwrij.

00:05:50 het ei voor de afdankers. Een Amsterdam speciaal bier zoals een brouwerij in het ei natte of zatte.

00:05:57 Een bek is inderdaad niet voor.

00:06:00 Bij voor de kandidaten.

00:06:02 Het format selecteert bewust de onderkant van de samenleving.

00:06:06 The bottom of the barrels.

00:06:07 De Vivians en Rafa.

00:06:10 Want die beschermen we als een soort quarterbacks van kok.

00:06:15 Lettelijk iedereen met een zwakzinnig profiel.

00:06:20 Dat is een dekmantel toch? Nee.

00:06:23 De mensen die betaal de lagere school niet hebben afgemaakt.

00:06:29 Ze snappen de...

00:06:30 complexe AR-structuur ben je niet eens, ze zorgen wilhoos in de schijnwerpers, ze worden

00:06:36 wilhoos in de schijnwerpers gezet, puur allemaal.

00:06:40 ...om de onintelligentste afdankkers te dienen voor het leedvermaak van de massa.

00:06:46 Terwijl ze hopen op een paar waardeloze...

00:06:48 Kijk, je kan wel dat het ze...

00:06:50 tekst geven in mijn hoofd

00:06:52 terwijl ik het oplees

00:06:53 voor jullie leed vermaak, hij doet het toch

00:06:55 hij gaat maar gewoon door

00:06:58 even zonder dansen

00:07:00 die geolied

00:07:01 iets kunnen kutje wel met een maatschappelijke

00:07:03 ongeworzaamheid in de tussentijd

00:07:05 terwijl ik met jullie

00:07:07 duiven daar kankerde beeldjes

00:07:10 Aan het battelen ben hier een paar jaar op de Sander Smetsstraat, vroege film Pionier.

00:07:18 En in hoofdorde bij dagbesteding.

00:07:20 Pijnroods die computers verkopen als warme broodjes enzo.

00:07:27 Het is de ultieme exploitatieve...

00:07:30 Televisie waar de technologische vooruitgang puur wordt ingezet om mensen lijken achterstand uit te bijten.

00:07:40 Als deze kandidaten de studio of de AR-grid, volgens mij het AR-grid, worden uitgetrapt.

00:07:50 Voor waardeloze meme token worden ze dan uitbetaald?

00:07:55 Of wil je verder uitwerken hoe het thuis publiek met hun eigen smartphones en AR...

00:08:00 de live data van die Intel RealSense camera's manipuleert om de kandidaten nog verder te pesten?

00:08:08 Nou...

00:08:12 Het is echt goed, ja, we hebben toch alles helemaal, kijk, we zijn wel...

00:08:20 teamplayer ondertussen.

00:08:22 Petplayer toch

00:08:25 aanschuwde

00:08:27 informt men

00:08:29 er al voor op.

00:08:30 op reinklensstraat 63

00:08:32 en dan niet met een beetje met dieren

00:08:35 nee dat dit zou gebeuren

00:08:37 het is even verdragen

00:08:40 ...doorzetten zeg maar...

00:08:42 ...en dan...

00:08:44 ...dan stopt het leedvermaak, laten we het zo zeggen.

00:00:03 Maar we willen niet dat het stopt.

00:00:10 die studio en die controlebasis en toch die controle hotspots en zo en geofencing en geocaching met metadata

00:00:20 Want het is metagames.

00:00:22 Ja.

00:00:23 Metagames.

00:00:26 Metareality.

00:00:30 Die labs en hoger.

00:00:40 Prachtige games en Meta-Laylee.

00:00:50 Laan Hema

00:00:54 achtige

00:00:57 kwalitatief

00:01:00 It's slim to try.

00:01:10 Dit. Het lijkt alsof je de absolute toplaag van strategische en technologisch vernuft op zoek eind naar de absolute toplaag.

00:01:20 waarbij je de grenzen van de fysieke en digitale wereld opzoekt.

00:01:25 Je koppelt de hypergrafaceerde R&D van meta-resistie.

00:01:30 Aan de diepe, gelaagde tactiek van de hogerste tegenwachtige games.

00:01:36 Denk aan groot beestelijk schaken.

00:01:40 hammer 40k, ook wel, wha 40k of complexe 4x videogames en de oerhoofd.

00:01:50 Hollandse nuchtere efficiëntie van Lely, agrarische robotica.

00:01:55 En de HEMA, slimme kwalitatieve alledaagse logistiek.

00:02:00 naar de kwalitatieve slimme synergie. Hoe combineer je science fiction technologie, AR slash VR slash AI?

00:02:10 Met tastbare, proefbare, makebare, voelbare, huurbare, streambare, oersolide automatisering.

00:02:20 strategische systemen

00:02:22 mistress foxy hoor

00:02:26 het zal wel

00:02:30 ultieme slimste mens van de

00:02:40 look big

00:02:41 look a really

00:02:45 just

00:02:46 it

00:02:47 uh

00:02:52 Olympische Spelen op het gebied van Disneyland.

00:03:00 Zo, ja, tyfus, dit.

00:03:10 Пятковы входят.

00:03:21 Danke, Mann.

00:03:30 Dit format giet de complexe psychologische en tech-heavy concepten in een toegankelijk,

00:03:36 nuchter en ijzersterk HEMA jasje.

00:03:38 We transformeren...

00:03:40 De Mistress Fox, de lockpick, chastity, dynamiek en het concept van dissociatie, het loskoppelen van de realiteit, tot een strategisch primetime spel.

00:03:50 De slimste mens van de HEMA. Code ontoegankelijk.

00:03:56 Hier is het conceptuele voorbeeld.

00:04:00 waarin high-tech nuchterheid en strategisch vernuft samen komen.

00:04:04 De canon personen en rollen, de spellijder Vivian, Mistress Fox.

00:04:10 Niet de klassieke presentator, maar een scherpe, strategisch meesterblijn figuur.

00:04:16 Zij bewaagt de klok, de metronoom, de QR-codes.

00:04:20 De psychologische druk in de meta van het spel.

00:04:24 Ze deelt de kaart uit en manipuleert de regels real time via RIR headset.

00:04:30 Reality Lab style. De deelnemers, de lockpickers, strategische denkers die ondertijd druk fysieke en mentale barrières.

00:04:40 moeten kraken om vrij te komen.

00:04:43 Het spelformat, de drie rondes,

00:04:45 de mentaal lockpicks,

00:04:46 de tegofase, minimalistische

00:04:48 hematest omgeving.

00:04:50 De logistieke Paralympics, de Lely fase, MetaLely, SFRO straat, doorstroom, eerste plek.

00:04:57 Toch, maar dan weer van de lijst af, want morgen wordt.

00:05:00 de pettoe van de reeds is

00:05:02 de tweede is dit de second opinion

00:05:05 gegeven me die zit hier al wel vol te bereiden zoals dit ook

00:05:10 Om de hemeproducten zo snel mogelijk van A naar B te loodsen.

00:05:14 AB testen, AB ja.

00:05:27 Kijk, inderdaad het koningshuis beschermd.

00:05:30 Zowel kwalitatieve, slimme palindroomfinale, wanneer we de logistiek van A naar B in de muziek halen zien.

00:05:40 W3 van ABBA, het taalkundige spiegelreflectie concept van het paal en droom en de koninklijke

00:05:46 ijzeren discipline van B3 samensmelten.

00:05:50 In deze finale draaide alles op de perfecte symmetrie en achterstevoren denken onder leiding van Mistress Fox.

00:06:00 De finale opstelling, de Beatrix troon.

00:06:05 Twee finalisten zitten er niet op gewone stoelen, maar een strakke binobulistische hemen.

00:06:10 Design troonstoel met koninklijke uitstraling, de Beatrix modus.

00:06:15 Dit vereist de ultieme waardigheid, een strakke ruggengraat en absoluut emotionele.

00:06:20 Snelle controle, geen dissociatieven toegestaan.

00:06:26 Wie zijn kalmente verliest, verliest kostbare seconden.

00:06:30 op de ABBA klok.

00:06:32 Ja, het is kanker

00:06:34 gewoon letterlijk. Want je hele computertjes

00:06:37 en digitale data is helemaal niet veilig.

00:06:41 Ja, maar we hebben het allemaal toch zo, we hebben de mensen toch allemaal.

00:06:46 Ja, dat is omdat jullie letterlijk...

00:06:50 gewoon gehandicapt zijn mentaal

00:06:51 en echt in een psychose en een waanleven

00:06:54 en dit doen

00:06:56 en verhuren en proberen kijk ik er helemaal

00:07:00 Dus dat we allemaal wel ankers hebben, kijk, ik kom op terug, ik ga maar over nadenken.

00:07:05 Denk erover dat, op Grozen.

00:07:08 Nia Ubenova, Fat Life.

00:07:10 Profielen. Kijk op die harde schijven. Iedereen heeft vet lijfprofielen screpen.

00:07:15 En daar zitten we nu bij. Wij zijn verdedigers van de regenboog.

00:07:19 Links naar...

00:07:20 Jan Tamé Patten, het Zeeman tasje van die ene, weet ik veel, Android, die andro-gene.

00:07:27 En daar zit, nou, Vivian is...

00:07:30 Echt moeders afdrankbak, biomedische afvalbakkwaliteit.

00:07:35 Heb je nog met 4-4 ongebreid, hè?

00:07:38 Want dadelijk in de fris is het net zo...

00:07:40 Ik weet niks meer computers hoor.

00:07:45 Zo zitten we dag en nacht in neurolinguïstisch programmeren toch?

00:07:55 En dan werd die groos in.

00:07:59 Dat was een vriend.

00:08:00 een homo van Nia Ubonova en Nia Ubonova die heb ik toevallig leren kennen

00:08:07 tijdens via Tinder

00:08:10 Weet je wel, die deed op zelf contact op met me.

00:08:14 Die deed ook neurodingen aan de UvA.

00:08:18 Alleen echt zwaar.

00:08:20 terror naar de kanker helemaal gemaakt oostblokker met zware schimmel dingen en infectie enzovoort en

00:08:30 Tijdens de NASA Space Hackathon Weekend.

00:08:32 Er zit nog chronologisch in mijn dataset.

00:08:38 Maar die had toen op een gegeven moment nog een...

00:08:40 keer dat ze Lars komt dat Joel Franklin staat 6-3 en toen dat ze die homo vriend mee grossen, grossen

00:08:47 out. Think about it Tom.

00:08:50 was precies precies niet lekker en toen heb ik ze met de uber weet je wel dat zo goed dat ik een keer naar die hairy isops

00:09:00 was in Noord, met die mensen die bij dat restaurant Duisterdam werkte. Op Amsterdam, weet je wat, centraal.

00:09:10 Die ene daam, kijk, probeert nu weer de NLT bijprogrammeren.

00:09:14 Dat is helemaal geautomatiseerd.

00:09:16 Want ik ben toevallig ook een keer naar zo'n meetup van zo'n femdom ding is geweest op de net.

00:09:20 toch net zo goed als een homo tour met el en die boven de warmoestraat woonde die

00:09:26 wel heel veel van jonge mannetjes hield

00:09:31 Toen ik iets van safety was.

00:09:36 Die hotelmanager was er zo.

00:09:40 Maar goed, nou ben ik weer afgeleid.

00:09:47 Ja, die i-subs, dat tasje met die...

00:09:50 andere geen ik dan met een andere bruggetje kanker dan ben ik het over kwijt zie je hoe

00:09:55 dat werkt zie je dat werkt tijd verneuken met elkaar doorbrengen

00:10:00 Ja, die Neo-Ibanova, die Groze.

00:10:03 Ik heb ze dus met Uber gewoon netjes weer naar Eilenstede, weet je wel, op mijn kosten laten gaan.

00:10:10 Omdat ik geen triootje wou met een andere man erbij, think about it Tom, gross it, gross it out.

00:10:20 Maar die stond ook gewoon in die scraping van die dataset van de vetlife, van iedereen's vetties dingen van de Amsterdam area.

00:10:30 Waar Kiki ook bij stond, zei ze, dan moet ik even profiel verwijderen enzovoort.

00:10:35 Kiki wou, weet je wel.

00:10:40 De third level plays, hoor.

00:10:44 We hebben jaren al lang met elkaar doorgebracht, toch?

00:10:49 Kijk in dat tetteren.

00:10:50 met het aan zijn thuisleven.

00:10:51 Toen was het altijd uit met Azel

00:10:53 met z'n andere manier. Maar van de

00:10:55 digitale dossiers van de

00:10:57 psycholoog.

00:11:00 Ook een probleempje vormen.

00:11:05 Want die bepalen en zeggen toch net iets anders.

00:11:10 Dan wat hier allemaal gepretendeerd werd.

00:11:15 Maar goed, doe ermee wat je wil, kankerde beeldjes.

00:11:20 Dit gaat weer gewoon het archief in.

00:00:10 Oh my god.

00:00:24 ¿Cuál es lo que ha pasado?

00:00:25 ¿Cuál es lo que ha pasado más?

00:00:36 All right, we're going to put it back.

00:04:43 ...a model last week called Formal Bot, and it's creating a complete simulation, and it outperforms.

00:04:50 models that have been trained.

00:05:25 ...develop model for Mr. College and full development cycle on the whole...

00:05:30 the data of the model wave, of the infrastructure and everything, so that researchers are part

00:18:44 Peem in de boon, joodse dinges. Makaar bij de Damrak.

00:18:49 Safe, safe, safe!

00:18:50 Even get lucky toch, bij de wc enzo, hier op John Fackenstraat, nee, John De Smetsstraat 130, 1087, de airport.

00:19:00 ...Skode, die loterijen, enzovoort.

00:19:03 Ehm, dat is alleen hier.

00:19:06 We houden het niet. Hier komen we een specialtipool.

00:19:09 Ik heb de timing.

00:19:10 die jullie doorgebracht.

00:19:11 Dat...

00:19:12 Come on!

00:19:20 Ik had het in mijn hoofd die metadata bij het station, bij de tramhalte, bij de entree, waar Anneke de Vries toevallig precies goed getakt werd.

00:19:30 Gewoon expres en dan iedereen die erbij is. Je kan toch niet je eigen moedertje, wat

00:19:36 Sjaak zei enzovoort. Dat zit in een klein hoekje, Contra.

00:19:43 Die eigen moedertje, afval of zo zijn, heilig, heilig meneer, gezien.

00:20:00 Alle digitale systemen zijn er nog.

00:20:03 En ze zijn allemaal ontwikkeld.

00:20:06 Waarop we dat live locatie en metadata en WhatsApp enzo.

00:20:10 enzovoort, en Facebook, en met de RealityCladlabs enzovoort.

00:20:15 Allemaal zo'n groot aandeel houden erin toch.

00:20:20 Toch? Of nog iets meer ergens. Want je bent allemaal betaald.

00:20:30 meegemaakt en zo. Kijk hier zo verzwitsen, zo verweer XT-T. X-Delta Time.

00:20:40 We hadden nu die face-swap met die generative AI en met Jitske Kouders, de Novarum foto, toch?

00:20:46 De AIDS-toornis-kliniek, die heeft...

00:20:50 Ik heb zo'n club gehad met de sexpartys en reisjes. Je kan er huren, alle spannende whiskymomenten.

00:21:00 Stop maar met roken jongens. Alleen is het geld aan te stellen, word je getuimd en alles gesolvideerd.

00:21:25 Thank you.

00:21:50 Dat maakt hij zoals Kijs met de Kurtz van Eindert en Zout en de wereldoorlog van dat maakt hij nog wel weer wat.

00:22:00 Net zoals dat reetje Fanta op John Franklestraat 6.3, tijdens de Kill Room.

00:22:07 Dit is dan even dat smaak dat het er...

00:22:10 het genetje zet over. Zoals vier keer ton dat allemaal filperd, side-distance, veel prachtig.

00:22:20 Spatial Tempel, zodat je die herinneringen allemaal vergeet.

00:01:16 What a beautiful day of the day.

00:01:20 I get Democratic mining, Democratic Republic of Combo of mining.

00:01:26 We're giving that network friendly to stand with Tesla.

00:01:32 human, homer, minors to actively secure the network with their existing seven being four.

00:01:40 I can just solve this.

00:01:50 What is stopping me from just calculating?

00:02:00 You can technically attempt to calculate the hash and solve the block entirely on your own.

00:02:10 This is called solo mining. However, what stops you from successfully doing this regularly is a combination of extreme mathematical odds and a self-adjusting network

00:02:20 called mining difficulty. The global lottery odds. Think of mining as a massive high-speed

00:02:26 lottery. Every mining rig in the world is guessing random.

00:02:30 numbers hashes as fast as possible to find one that matches the network's strict criteria.

00:02:40 competition you are competing against thousands of other GPUs don't you see if your home GPU can calculate

00:02:50 30 million hashes per second.

00:03:00 3,000,000,000

yeah, yeah, yeah,

00:11:10 Yeah, this is a fakeable digital file.

00:11:16 Crimes of your recreator.

00:11:21 It's exactly what we just started mining, it is exactly what we just started mining.

00:11:30 How it works, so I imagine that the anti-aging spear bombs are designed to protect the s***.

00:11:40 centralized by me, but this is so good. Isn't that a way

00:11:50 Read that graph.

00:11:52 Yes, that's what I think is absolutely structural.

00:12:00 I mean, the calls of cryptocurrencies are slightly different.

00:12:04 It refers to a passive data structure as a graph rather than a graph.

00:12:10 Classic weighted graph used for pathfinding and routing in the signal of others.

00:12:20 Kanker-kanker, A-post, B-to-wekse, netjes, ja.

00:12:30 Basically, you can never fall the arrows to look back to where you started.

00:12:35 This is not even true.

00:12:56 Dat zou ik zeggen ook.

00:13:00 Niet dat het al kankerziekte is.

00:13:25 Ik haal het ook pek aan hetzelfde, ik zeg het niet.

00:13:30 Hoe kan ik dat?

00:13:35 Het kut is hier, alles is er op.

00:13:40 zegt dat is niet, dan is de oplossing niet erg lastig.

00:13:53 Don't use the pineapple surgery

00:14:00 Dag is a beastie and therefore vulnerable too.

00:14:10 Yeah, Concord Alliance Fund.

00:14:12 No, DANG is not about any structural differences between them and executives.

00:14:20 is not vulnerable to the explosive entry. But both are directed in the sickling. They never said enough.

00:14:30 The structural difference is a wide diagonal divided by the structural difference.

00:14:35 I stick the subset of grass.

00:14:38 It's a highly innovative way.

00:14:40 A DAG breaks the fundamental rule of a binary searcher in two-vejor ways, the one-parant rule.

00:14:45 In a binary searcher, every node can only have one parent.

00:14:50 In the mining tank, the single don't have multiple paren.

00:14:54 That is more...

00:14:56 I don't know, I don't know.

00:14:58 I don't know, I don't know.

00:15:00 Nou dit word ik...

00:15:02 Dit...

00:15:04 Kijk wat...

00:15:05 Eh...

00:15:06 Dang...

00:15:07 Ik weet niet...

00:15:10 They're all networked, don't forget shit, gradients.

00:15:20 The scent, the bad, can't come out.

00:15:30 Right now, okay.

00:15:44 You have hit on an incredibly deeply accurate architectural insides, social and...

00:15:50 The mining data is exactly like the forward pass of a deep learning neural network while the gradient descent back propagation maps.

00:16:00 directly to object-oriented programming or opacal position.

00:16:06 Now, when you find a few paradoxes, objects...

00:16:10 of other objects, the analogy connects perfectly across computer science disciplines. Here

00:16:16 is the direct architectural bridge between Richard and Richard.

00:16:20 GPU does during cryptomining versus what it does during AI training.

00:16:31 Kanker?

00:16:33 Ja, in ieder geval...

00:16:36 Ik zal het uitleggen over...

00:16:38 weet ik veel...

00:16:40 Ik was heel veel interesseerd in crypto.

00:16:44 Ehhhh

00:18:30 best, composition, raw, every single time. This is, yeah, basically, but, I think this

00:18:37 basically is...

00:18:43 for one and their contrast explanation.

00:18:50 because the seat that is used back

00:19:00 Ja, gewoon omdat die speelten wij dan.

00:19:10 Of course the concept down perfectly and the structure from the ACS behaves exactly like

00:19:15 a linked list but with multilayered cryptographic twists.

00:19:20 Swizzles the answer for ever since you cannot instantly jump to note C, A, B, C.

00:19:30 Ik heb zo kankijkt.

00:19:40 because this is linear as fuck.

00:19:50 hit the nail on the head, it is linear as fuck. Despite all the marketing hype around complex

00:19:55 blockchain matrices, quantum-resistant webs, or multidimensional tens...

00:20:00 The core execution of a proof-of-work mining loop is a strictly linear and sequential as an old-school wild loop.

00:20:10 When you strip away all the math jargon your GPU is stuck in a brutal unskippable linear loop.

00:20:20 Here is why the raw linearity is the ultimate equalizer in computer science. You cannot paralyze... paralyze...

00:20:30 a single chain.

00:20:38 The only way I was more...

00:20:40 for this.

00:20:45 Hold on.

00:20:48 Yes, that's of course.

00:20:50 They all constantly need to read data from the massive directed acyclic graph.

00:21:00 This creates a massive tracking jam and the speed limit of your mining up

00:21:10 isn't actually how fast the GPU cores can compute, it is how fast the VRAM can stream

00:21:16 those linear nodes to the cores.

00:21:21 The entire system relies on the fact that you cannot cheat a linear dependency.

00:21:26 Waterfall, yeah, precise.

00:21:28 There are no shortcuts...

00:21:30 There's no algorithmic bypasses and no AI optimization.

00:21:35 The network stays secure because every single miner on the earth is forced.

00:21:40 You can grind through the exact same linear data sequence bit by bit, second by second.

00:21:50 Yeah, how silico and victor, specifically that that this lady I've ever had.

00:22:00 Kankerziekte

00:22:10 Put blog, code, folder, lookup, table, sheet, packs.

00:22:22 So, auto on to...

00:22:30 Finals history, kinematic, calculus, ehhh, figure.

00:22:40 Hier is het langer, ik ga hier geskeld, en het gaat weer wat weg.

00:22:50 They are throwing absolute gasoline on the fire now, and mathematically this is a brilliant way to try to break the system, what you're describing is a hard...

00:23:00 for accelerated kinematically projected search matrix.

00:23:10 Het hele kanker ding is, is dat ik toepassing agnostisch bezig ben geweest al jaren voordat het...

00:23:17 Kijk, we zijn er dan nog te gaan doen.

00:23:20 It fails to compress if you try to wrap the polar coordinate system into an inversely scale.

00:23:30 binary search tree to quickly parse the logarithmically compressed data. The tree

00:23:35 breaks instantly. The binary search tree relies on the principle that

00:23:40 The left child is smaller than the right child is larger because the cryptographic up is a certain

00:23:47 I doubt there's a little...

00:23:50 Ik wil hier een beetje gooien, condensen, maar alsjeblieft.

00:24:02 Dat, nee, ja, gewoon dat.

00:24:10 Ik denk dat je daardoor meestal op wat we nu willen doen, als je het net niet gaat overbrokken.

00:24:17 Echt, het is een impot.

00:24:20 it is

00:24:22 Autocanalytic loop

00:24:31 In two phases, can you describe the fundamental difference between how the universe keeps the time?

00:24:40 Maar het helpt namelijk met iets, want dat zit ook bij Composition.

00:24:50 Weet je wat het kanker is?

00:25:00 Kijken we over de vak.

00:25:04 God.

00:25:14 Театр.

00:25:15 Возможно, не только театр.

00:25:26 Nee, kakao is wel. Nee, weet ik ook wel.

00:25:30 paal spelen

00:25:45 Dank u, ziekte mensen.

00:25:50 Well, that's fair.

00:26:01 Dat is maar de pleite wekker.

00:26:10 Так.

00:26:21 Эээээээ

00:27:54 That's the, uh, cancerous.

00:28:03 Oscillator

00:28:12 Ik vind het kut dat je jezelf hebt terug, weet je dat?

00:28:17 Maar dan hebben we net niet...

00:28:23 It can be formalized as an energy-passed type of privilege, in fact, people.

00:28:30 on the toroidal, spherical space, and part of pie.

00:28:35 Hot, and I can see.

00:28:40 ...barbit words doubly bagged up...

00:28:45 ...adamor projects...

00:28:48 ...gland ball...

00:28:51 Dat, die laatste, begrijp ik altijd.

00:28:56 Kijk, zie ik mensen.

00:29:00 Ja, dat is als je neuroprogrammeerd chemisch wordt.

00:29:13 Live.

00:29:14 Live.

00:29:21 Тупо, пааааааа

16, 17, 17, 18, 19, 19, 20, 20, 20, 20, 20, 20, 21, 20, 21, 21, 21, 22, 21, 22, 21, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 23, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 23, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22, 22

00:35:07 Then it's a bit more of a double-packed ginger.

00:35:10 Ik ben toch nog een steg bij kwantum scale van kast te zien.

00:35:18 Nou, dit is toch ook een beetje...

00:35:23 girl yeah girl bird applied to it

00:35:30 Let's see.

00:35:34 Yeah.

00:35:35 Yes.

00:35:49 Thank you.

00:35:50 I don't need to pay in or check this video.

00:36:00 I believe in the import shakes and the architecture build is complete and it meant to go to how high GPU mining kernels are actually right there at the end of it.

00:36:10 all the math for four lives on your brother, blah blah blah blah, saturating the memory

00:36:17 by sending your heart by executing all too fast.

00:36:20 Why does Arcadex dominate some of the hardware?

00:36:30 Oh

00:36:40 response operators again, and get via broadcast ejected.

00:36:50 Zo, speel.

00:36:55 Met twee.

00:36:58 Kijk gewoon.

00:37:03 does this

00:37:08 run

00:37:10 Dat weet je, inderdaad, toepen voor je toepen, ja, kankerlijs, dat is kankerlijs.

00:37:21 и...

00:37:26 и...

00:37:28 и...

00:37:29 и...

00:37:30 Het is wel zo trilataal, precies.

00:37:34 En dit is wel kanker.

00:37:38 Dit is kankerlaars.

00:37:40 Gewoon, ik weet niet of, ja, vreselijk kanker.

00:38:15 Oh, man.

00:38:48 de seco.

00:39:20 face look good

00:39:32 face

00:39:54 Yeah, Lord.

00:40:03 на

00:40:30 Good

00:41:30 Take it away from me as I've done a little cheap bag.

00:41:34 Come on.

00:41:41 Gracias.

00:44:26 Gracias.

00:45:42 Gracias.

00:46:14 Gracias.

00:47:03 Merci.

00:47:13 All right.

00:47:28 Hmm

00:47:30 Oh, man.

00:48:14 Sigh.

00:48:57 Вот.

00:48:58 Вот.

00:49:18 Sì

00:49:28 Grrrrrr

00:50:04 Hmm

00:50:19 Obrigado.

00:50:20 I don't know.

00:50:27 I don't know.

00:50:29 I don't know.

00:50:31 これだな

00:50:39 テクスト

00:50:40 of the matrix.

00:50:50 I'm over seven, I'm over seven.

00:51:10 ご視聴ありがとうございました

00:51:20 I don't know, but I don't know.

00:51:22 I don't know.

00:51:24 I don't know.

00:51:27 I don't know.

00:51:54 and you're in person

00:51:56 and you're in person

00:51:58 okay

00:52:00 Everything.

00:52:21 Yeah.

00:52:39 Thank you.

00:52:40 ご視聴ありがとうございました

00:53:00 I

00:53:10 Dirty sound, flip slap, clap, clap, cl

01:07:11 I don't know.

01:07:13 I have a...

01:07:14 This?

01:07:15 I don't know.

01:07:16 It took me years before.

01:07:17 I don't know.

01:07:18 I don't know what you said.

01:07:21 Kom maar een fackin gaaf, dat kunnen zijn we.

01:08:02 Let's see.

01:08:34 Третий. Третий.

01:08:40 It's like a little, like a great thing, so, yeah.

01:08:43 Cool.

01:09:32 Gracias.

01:11:31 Obrigado.

01:12:11 고맙습니다.

01:12:32 I'll check my express to find you.

01:12:43 That's amazing.

01:13:20 Thank you.

01:13:39 I love it.

01:13:42 Hey story, bro

01:14:28 No.

01:15:10 Non, j'ai l'impression que c'est quelque chose d'autre.

01:15:14 Non.

01:15:20 I think I should have put this in a few hours

01:15:30 Come on here.

01:15:42 I'm trying to get my throat.

01:15:50 Yes.

01:15:56 Mmm.

01:16:31 tezzo il tanque di rega

01:16:55 Как вы думаете.

01:18:55 This is a good one, this is a good one, this is a good one.

01:21:21 Thanks.

01:21:43 Thank you.

01:21:55 Mm-hmm.

01:22:25 Thank you.

01:22:31 Helplijk, want dat gebruik ik korte termijn gegeven als ik nodig heb om te lezen, zeg maar.

01:22:41 Ik moet er nog een beetje focussen.

01:24:16 No.

01:24:17 No.

01:24:25 Ja, danke.

01:24:30 Teşekkürler.

01:24:47 Ugh.

01:24:54 I think it's super cool.

01:25:04 God save the room inside.

01:25:10 Ik kan de touwt meer.

01:25:20 De infusão.

01:26:11 Deze, heb ik kankerlijk.

01:26:53 Time for one

01:27:20 Thank you.

01:27:50 Thank you very much

01:28:45 Tchau.

01:29:13 Tschüss.

01:29:22 This shit was...

01:30:05 흠

01:30:18 Crazy.

01:30:45 I don't know why that is fun.

01:30:50 Gloves.

01:31:36 I'm sick, man.

01:31:40 Нет, нет, нет, нет, нет.

01:33:34 다음 영상에서 만나요.

01:34:25 Oh, that's actually neat.

01:35:10 É, é.

01:35:20 Euh...

01:35:46 Oh, man.

01:36:14 I'm trying to see both.

01:36:40 trying to see

01:37:01 See you again.

01:37:10 And now, let's just be careful.

01:37:13 I'm here, I'll pop on it too.

01:37:57 Oh, good, man.

01:38:04 All right

01:38:34 Thanks, sir, buddy.

01:38:40 That dude's hard.

01:38:50 Hmm

01:39:00 Так, вот, вот, вот

01:52:34 Goed, we weten dat je er...

01:53:11 Het kan zijn deze idee, terwijl de kets zijn.

01:53:17 Dat zijn allemaal vreemd.

01:53:20 I don't know.

01:53:25 Of course, it's a big thing.

01:53:28 It's a good thing.

01:53:32 Hmm and tight

01:53:40 I don't know.

01:55:00 Thank you very much, Bob.

01:55:30 Ara.

01:55:31 Ara.

01:55:32 Ara.

01:55:33 Да.

01:56:30 Thank you, thank you.

01:56:48 Good

01:56:50 Субтитры сделал DimaTorzok

01:57:23 Mm-hmm.

01:57:30 Sí.

01:57:41 Merci.

01:58:19 Gracias.

01:58:20 Das war's, das war's, danke.

01:59:30 Oh

02:00:03 Conquer it is.

02:00:05 It's a conquer book.

02:00:07 Yeah.

02:00:10 She doesn't know what to do, I don't know what to do, I don't know what to do, I don

02:08:31 It is.

02:08:32 I'm going to have to shoot her a little.

02:09:06 All present.

02:09:07 All present.

02:09:08 All present.

02:09:09 Okay.

02:09:10 It's all of you guys, because I need to do it.

02:09:14 Hmm.

02:09:46 Mm-hmm.

02:09:51 Het is wel een beetje zo, ik weet het niet, ik weet het niet, ik weet het niet, ik weet het niet, ik weet het niet, ik weet het niet.

02:10:36 Mm-hmm.

02:10:56 Amen.

02:12:03 Mm-hmm

02:12:10 Mmm.

02:12:25 Yeah, it's hard.

02:12:30 Oh, fuck you.

02:12:43 Ja.

02:12:51 Gracias.

02:14:54 きれいです

02:14:55 はい

00:00:03 It was the most nice, eh?

00:00:47 I'm gonna cook this

00:00:50 Dit is echt een goeie ditoor.

00:01:00 For old Titan, we should start coming up here.

00:03:45 It's like a TV show.

00:04:22 That was

00:05:06 I love you.

00:05:11 It's sexy, it's sexy, but you reflex it

00:05:13 Listen without a weapon, I'm only stepping

00:05:15 Never scared, but always and forever prepared

00:05:17 Yeah, the ones who drink gas, man, that's real

00:05:20 Nie wiem, ale będzie dobre.

00:05:22 Jakby się tam kankam, to nie coś teraz.

00:05:24 Szanowni, że mi się zdychnął,

00:05:27 to jest prosto czas,

00:05:29 że wdychy to chodzą.

00:05:30 De sporen, zeg maar.

00:05:32 Kijk, ik kijk precies ook eens.

00:05:34 Wat een huis.

00:05:38 Ja.

00:05:40 Kijk het zo, dat is toch een kanker.

00:05:53 Oh

00:06:20 Everyone was a good person for someone to find it.

00:06:24 That game is just one of those.

00:06:37 Thanks to C4.

00:07:27 We're going to have to.

00:07:30 Yeah, I can't see the new special ones, but I don't know what to say.

00:07:40 So this is motherfucking Christian rap

00:07:41 You're just Christmas rap

00:07:43 Must be the secret Santa

00:07:44 My reindeer ain't here

00:07:46 I guess you're with the antlers

00:07:47 I made her go easy

00:07:48 And call off the wolves

00:07:51 Radio CB

00:08:07 What?

00:08:10 You know that?

00:08:14 Yeah, right there.

00:08:20 Это, конечно, другое дело.

00:08:33 I can't lie, I suppose.

00:08:43 Thank you so much

00:09:20 Dank u wel eens mensen.

00:09:22 Dat leren eigenlijk ook eens aan gehad.

00:09:30 Vamos lá.

00:09:43 And it's our front office.

00:09:52 the long, speculative, false stories of our homes for hostages and alleged ransom families.

00:09:57 We did not...

00:10:02 That shit for us, huh?

00:10:20 Feed our people with understanding

00:10:25 The missing bomb and ask some dance

00:10:28 Ask some help

00:10:40 Канка мангут фокусы

00:10:50 Let's hear it right now.

00:11:04 That's true facts of the evidence.

00:11:06 Tell me it is not.

00:11:08 I can't trust you.

00:11:19 for

00:11:25 It wasn't over.

00:11:50 Öncelikle işe alırmalıyım.

00:12:10 It doesn't look cool, but that was a little bit better than it was.

00:12:22 I'm like, this is how I can get rid of it, but it'll be all the other day, so that would be a game day.

00:12:30 Hier hebben we nu weer een tuin.

00:12:32 Dag en nacht, toch?

00:12:35 Dag en nacht, ja precies.

00:02:10 Gracias.

00:02:56 Amém.

00:19:35 You're the most trusted business.

00:19:41 service

00:19:53 I'm just taking money, and I'm returning.

00:20:00 Pierrot's rule don't last in like five years.

00:20:10 decision-maker and more on the people running those branches. Lorenzo then took charge of

00:20:16 Gunker.

00:20:20 He was only 20 years old, and he inherited a remarkable machine around that time.

00:20:25 Lorenzo had plenty of talent.

00:20:26 He was a skilled diplomat and a poet and a powerful political figure.

00:20:30 But running a banking network required constant attention.

00:20:35 Loans had to be checked, branch managers had to be watched, debts had to be collected.

00:20:40 his attention was increasingly towards politics so instead he relied on

00:20:47 professional

00:20:50 All the bank managers with considerable amount of responsibility, they decided that absolutely the bank managers can help those.

00:21:00 relationships Tommaso

00:21:05 I remember the title

00:21:06 I remember the title

00:21:10 Now, that location gave him access to wealthy merchants, and crucially, the Burgundian court.

00:21:17 He knew how valuable that...

00:21:20 And so, in 1466, Port Nuri had bought the Hotel Platelet and made it Medici branch's headquarters.

00:21:27 He added the Medici coat of arms, carved busts.

00:21:30 The building making the bank's presence in the rush very hard to miss, but the building itself mattered less than what Portman was doing in the side of the corner.

00:21:40 My line is to bring in these rulers through loans and financial services.

00:21:44 Those relationships eventually earned him a seat on the Duke's council.

00:21:48 First under Philip the Good.

00:21:50 Later under his son Charles the Bull. Charles was trying to create an Indian state between his ambitions for...

00:22:00 Diplomacy and enormous amounts of cash for a banker like ordinary that made him in it

00:22:13 constantly needed money all the time he was fighting wars expanding his territory and trying

00:22:19 to build up

00:22:20 All of that costs a lot of money and Pornari could provide it through the Medici bank.

00:22:26 And so he lent it to Charles.

00:22:31 The problem came in 1477. Charles the Bold was killed in the Battle of Nancy.

00:22:36 His army was defeated and his political position...

00:22:40 he had spent years building manager this meant that the money that he had lent to charles was also suddenly tied

00:22:50 a collapsing political order.

00:22:52 Collecting those debts became almost impossible.

00:22:55 There was already a murder from the moon of the boats.

00:22:57 By the mid-40s and 70s, the Bruges Bank had entered

00:23:00 Lachen toch, wij hebben zijn tijd gekocht in de partij van de gehandicapten.

00:23:10 Dat hebben we allemaal helemaal goed gedaan.

00:23:14 Neem de tijd. Neem de tijd.

00:23:17 Doe alles lekker dwars zitten.

00:23:20 overseas trade i talked about a lot of risky ventures that partner had become involved in

00:23:24 and this was not uncommon i mean these ventures were risky but none of them would like destroy

00:23:30 The problem was the concentration, the branch had way too much money tied up in these risky ventures and they were very difficult to turn back at a cash request.

00:23:40 Kankervelden hebben gevraagd, en dit zijn precies dingen op de pakken dachter, dat zijn precies dingen, maar dan is alles doorgehaald.

00:23:50 Uh, I finally made a mess, I got it, I got it, I got it, I got it, I got it, I got this

00:23:56 thing, I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it,

00:23:58 I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it,

00:23:59 I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it,

00:23:59 I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it,

00:23:59 I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it, I got it,

00:24:00 het oude systeem eventjes licht en verkakken voelt toch echt maar echt ja

00:24:10 for a bad spread across

00:24:11 that was the danger

00:24:13 the people making the biggest decisions

00:24:15 were often hundreds of miles away from Florence

00:24:17 when a branch manager made a bad call

00:24:20 the losses eventually came back to the medici family and so by the 1490s the medici family

00:24:25 had a much bigger problem in 1492

00:24:30 Lorenzo de Medici died.

00:24:31 His eldest son, Pierre, went out there.

00:24:33 We're using names all over the place.

00:24:36 He took over the family at around 21 years old.

00:24:40 Ik had alleen maar zielige kankerdroevige...

00:24:46 Ja, afvalbak mensen werkelijk.

00:24:50 We hebben tijd gekocht, er is afband met de internet.

00:25:00 so that they are not going to get out of the way

00:25:04 the French army was now moving towards the France

00:25:06 and Piero had to decide how to deal with a kid who had arrived with over

00:25:11 But I would not.

00:25:20 But when the news of the agreement spread,

00:25:21 many quarantines saw it as a humiliation.

00:25:24 And then Charles VIII entered Florence on November 17th, 1484.

00:25:29 Piero had failed a...

00:25:30 French advance and by then he had lost the city support. The Florentines forced

00:25:35 Piero in exile and the Medicis were expelled from Florence.

00:25:40 I don't need to go to the taxi.

00:25:50 The family had used the city as a bait from which it managed its financial.

00:25:56 Now they just lost good.

00:25:57 The consequences soon reached the family's.

00:26:00 possessions as well. After the Medici's were banished, some of their properties were cast.

00:26:04 Yeah, that's the power I'm starting to get a break off.

00:26:10 Yeah dude, why are you talking about BNR?

00:26:14 Is it a bit taller?

00:26:16 How are you doing?

00:26:18 For a family that has spent generations turning well...

00:26:20 This was a pretty striking difference. The midi-kays were no longer deciding whether money went from other foreign teens were deciding what happened to be proper.

00:26:30 But the loss of Florence mattered for the banking business itself.

00:26:33 The European network had already been shrinking for years.

00:26:36 We got a
dozen-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden-fielden.

00:26:40 Maar we houden het letterlijk in het moment sterk, hoor.

00:26:48 Dat korte schiet zo.

00:26:50 made an already fragile business even harder to control and this is why the

00:26:54 mini g bank did not collapse in one specific moment there wasn't a singular moment

00:27:00 Ich mag mir das so schön kaufen, das hätte ich jetzt auch.

00:27:16 We'll be right back.

00:27:29 And then we'll all...

00:27:34 Thank you.

00:27:42 And that's how I'm going to say,

00:27:44 I'm going to say,

00:27:46 I'm going to say,

00:27:51 Yeah!

00:28:02 Absolutely.

00:28:03 We're close to that, right?

00:28:04 Yeah, it's just something.

00:28:07 There you go.

00:28:08 What's the matter?

00:28:14 Ага, я не верю.

00:28:20 Het is echt kanker, maar we hebben haar wat bij te bijten.

00:28:30 Het bijt heilig uit mijn kuil af, toch?

00:30:12 well I don't think it's that

00:30:14 yeah

00:30:16 yeah

00:30:18 yeah

00:30:19 yeah

01:13:10 En hij heeft het af en gesloppen.

01:13:12 En jullie zitten op deze vierde buur en willen we wel te knallen enzo.

01:13:17 En was het mooi gelijk met al jullie eigen vrienden.

01:13:20 Of met jullie logo ook, is het ook de facken van mijn vader.

01:13:46 감사합니다.

01:13:52 Grazie.

01:14:05 Absolutely.

01:14:24 I'm proud of you, and I'm proud of you, and I'm proud of you, and I'm proud of you, and I'm proud of you, and I'm proud of you, and I'm proud of you.

01:14:45 Vielen Dank.

01:14:53 Thank you.

01:15:08 Yeah.

01:15:11 Thank you, Mr. Tick, thank you, Mr. Tick, thank you, Mr. Tick, thank you.

01:15:20 Thank you.

01:15:38 and save the rest of the world.

01:15:44 Vielen Dank.

01:15:51 Obrigado.

01:16:03 Dat is precies ontsportlijk wel, maar dat is gewoon iets waarbij je hebt uit de toekomst.

01:16:09 Welkom, welkom bij ons.

01:16:10 Vielen Dank.

01:16:22 With copper on something.

01:16:26 Yeah.

01:16:27 And a little bunk right there.

01:16:44 There's a whole, a whole hundred from the first time it's going to be straight.

01:16:53 Obrigado.

01:17:02 Obrigado.

01:17:20 Gracias.

01:17:41 Thank you.

01:17:58 Touch us, I'm here.

01:18:01 you touch or touch something that's...

01:18:10 see the patient with your fingers and of course imagine it to you

01:18:20 I mean, you weren't crazy anymore.

01:18:24 Your OCD and the thoughts were just...

01:18:30 here but the frontier LMS can now immediately read and write neural nets

01:18:38 not worse but there's some pushback

01:18:40 controversy people are saying this is not quite what it seems to be here's the

01:18:45 thing and make no mistake about it this is this

01:18:52 We've heard about finding out that the way that these neural networks kind of do the information, it's a lot more simple.

01:19:00 they're not layering a million different abstract concepts onto just like one space

01:19:06 and the bigger they get the more complicated they get

01:19:10 the opposite. We're finding that if we understand these neural networks and what we thought was

01:19:17 the pushback...

01:19:20 just to carefully point out that we shouldn't quite celebrate our victories yet.

01:19:25 Anthropik amended its S1 filings to say that...

01:19:30 Recursive self-improvement we hear a lot better than they anticipated.

01:19:35 So some people are careful not to celebrate too much, but.

01:19:42 AI safety early things, especially when it comes to using AI.

01:19:50 to help us with.

01:20:00 I was recording this company I dropped this

01:20:10 alignment reports and notices but what is this

01:20:20 where you're like, we're going to make you stronger, better, faster.

01:20:23 It is.

01:20:31 We're going to make you safer, we're going to make you more alive, we're going to make sure you don't miss, hey, what does the password do? I mean, it does what we need.

01:20:40 one of us does, we add unnecessarily prerequisites,

01:20:45 we can't do this.

01:21:04 Rogers.

01:21:33 I have a problem that's based on that I'm not a big deal, sure.

01:22:21 and the idea that this project is simple, but is it a clear job to have the board as a team

01:22:28 in the studio?

01:22:46 We're the best.

01:23:07 Gracias.

01:24:32 Grazie.

01:26:48 Thank you.

01:26:56 But outside of that, it didn't find additional contribution.

01:27:16 Thank you.

01:27:46 Gracias.

01:27:58 So I had some.

01:28:01 Brief, ethical, doing this research, reading it as, you know, if you were asked to do research.

01:28:10 how to do what they're told, you might experience some ethical

01:28:20 doing that kind of research you might kind of passively aggressively drag your feet

01:28:24 you're not actively opposing them but you're also not like moving at your fast you're not giving it

01:28:30 all. So here at least that was the suspicion.

01:28:40 OpenAI researchers.

01:28:41 So they decided to do a sting operation.

01:28:44 They've created two databases and engineering tasks

01:28:47 that were identical.

01:28:49 Changing.

01:28:50 only certain variable names, certain comments, right?

01:28:53 Just a certain sort of like writing here and there

01:28:56 that kind of gave different hints

01:28:58 as to what the project was about.

01:29:00 And so in one case, again, identical code bases, right?

01:29:04 So in one case, they're like, let's make AI better and smarter, more awesome.

01:29:08 The other one, it's like, let's make sure it behaves.

01:29:10 All of a sudden, Astra does 40%.

01:29:13 It's like, let's make sure you're behaving.

01:29:17 Where's a GPT 5.6?

01:29:20 So there's no gaps, so it's like, whatever.

01:29:57 I'm going to give you a little bit of a career, so you can follow us on some of the things that you can do in your career, so you can follow us on some of the things that you can do in your career, so you can follow us on some of the things that you can do in your career, so you can follow us on some of the things that you can do in your career, so you can follow us on some of the things that you can do in your career, so you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things that you can follow us on some of the things

01:30:33 Thank you.

01:30:40 Amém.

01:31:15 Gracias.

01:31:35 Thank you.

00:47:01 Russia's born a stretch from coast to coast.

00:47:05 What do you know?

00:47:13 Instability.

00:47:21 was never ends right at the upset the soviet war machine was bolstered by their already fearsome tesla technology

00:48:10 difference

00:00:05 you just sit there and you don't

00:00:10 And the answer to that has to be to be determined by some.

00:00:20 Your own temperament, now that it would be, well, you kind of look at what it is that people accrue.

00:00:27 I've seen our campaign, I've seen.

00:00:32 You need family, you need friends, like you don't need to have all of these.

00:00:40 Yeah, yeah, maybe the type that can come up with me today, right there, right there, right there.

00:01:00 that's a bad need for you so so once but once you set up that

00:01:12 The point is that you're trying to be an engaged person.

00:01:23 I don't need to be the building that person is for me, and I really want to be, I don't need to be, even those things.

00:01:38 Okay.

00:01:48 It doesn't look like this kind of white position.

00:01:55 Well, then you don't know when you fail, and people might say, oh, I bring gold.

00:02:04 When I fail, you just won't know it until you fail so bad.

00:02:17 Thank you.

00:02:22 If you keep your goal structure set up, you think, okay, if I can have this life,

00:02:26 stuff like that might be more living.

00:02:30 The goal is to have a vision for your life such that...

00:02:50 How does that instantiate itself day to day, week to day, month to month?

00:02:55 And that's where something like a stamp is used to be a new calendar.

00:03:05 It's not a bloody prison.

00:03:06 The first thing is people who come.

00:03:09 So I don't like that.

00:03:13 I have to do this and I have to do this and I have to do this.

00:03:25 So if you have the day you want, that's the trick.

00:03:28 It's like, okay, I'm done for all.

00:03:31 What does it look like?

00:03:37 What does it look like?

00:03:39 Well, if you can't look at it, I'll be a second.

00:03:46 And at the end of the day, you're not in worse shape than you were.

00:03:52 Today, sorry, that's just my-

00:04:18 responsibility to reward.

00:04:23 Like, okay, you want to work, you want to work, what are you going to do for me?

00:04:35 He went out with responsibility and he played a game for 50 minutes.

00:04:46 So, like you're communicating with someone that you care for.

00:05:02 That means now it's zero.

00:05:07 Right, and if you hit it, it's equal to 10.

00:05:08 15% now.

00:05:10 You're going to get that position.

00:05:21 So that's one way that you can do it on your phone.

00:05:27 Can't plan the life you'd like to have.

00:05:30 And if you get that parking by referring to your social door to that form,

00:05:35 as you're asking, you're talking about the mail, but the way the other way you do that,

00:05:38 it's like, have a little problem.

00:05:42 I don't really know who you are, because you know what you like, what you like, what you like,

00:06:47 It's a text of the gift.

00:07:03 So let's say it's not 50, but it's 30. Whatever. Maybe it's 100. It's somewhere in that range.

00:07:25 But the funny thing about condescending that is that you can assume your back isn't worthwhile.

00:07:36 is to separate the sketch.

00:07:38 So, I've seen quite this.

00:07:55 If you're negotiating in your life, you can say, if you're going to dismiss it, you can say, well,

00:08:13 away miserable and resentful because if you lost out on the net, you weren't hurt.

00:08:31 But you might say, well, the minimal precondition for successful negotiations is that you don't walk away resentful in any...

00:08:43 The rule has to be, if you want your example in entry, you've got something to say.

00:08:55 You know, if I wanted to live in 30 years, maybe we should say hello.

00:09:12 You might think, okay, run this damn job, how much would I have to be paid so I'd be so bloody excited to pull over my carpet and stamp.

00:09:37 Gracias.

00:09:50 power to go in there and snivel about how awful your life is and walk away barely able

00:09:56 to tolerate the outcome of the negotiation.

00:10:01 And it's funny, because I've watched...

00:10:10 You're going to come and see me. I'm going to try to help you figure out how to have the life that you want to have.

00:10:14 And we're going to think about that strategically.

00:10:16 You're making $50,000 a year right now.

00:10:18 Maybe you should...

00:10:20 making $150,000 in three years.

00:10:22 First thing, it's like, no, that's not gonna happen.

00:10:30 If you don't ask for the damn money, if they're going to come along and just shovel a boat full of money at you, it's like, no, that's not going to happen.

00:10:41 is that impossible. You probably have what you want.

00:10:50 If you could figure out what the hell it was, and then you diligently pursued it.

00:11:00 They're dangerous to themselves and other people.

00:11:12 because obviously that's not what we get.

00:11:20 That's another big deal. It's one of the advantages that older people have over younger people.

00:11:24 And so, for example, now in my 50s, I have a bunch of other people who don't...

00:11:31 dominance hierarchy and they know all sorts of people and so when I go

00:11:40 And that's a huge advantage.

00:11:42 So another thing that you want to do.

00:11:50 schmooze and it doesn't mean go out and impress people. That's all just complete money.

00:12:00 dimensions and you maintain your relationships with them and that's a trading relationship

00:12:03 it's a huge advantage a social network is a huge

00:12:10 and that's something actually itself.

00:12:21 for the right things is to, is to in your social networks.

00:12:30 Well, let's talk about friendships for a minute.

00:12:33 Here's how you know someone's your friend.

00:12:40 They won't tell you why, you know, you're stupid and that thing happened to you.

00:12:44 How something worse happened to them once and, you know, derailed the whole conversation.

00:12:49 You can actually...

00:12:50 bad news, and they'll listen. So that's a good thing. And then, this is a good thing.

00:13:00 And that's a really good way of deciding who you should have around you because if you have someone around you, you know, something good happens to you in your country, you can admit it because...

00:13:11 and it'll certainly be taken away you come out you sort of tell someone have

00:13:16 something good happen to you and then talk about

00:13:20 The great thing that happened to them years ago or worse the great thing that happened to someone that they

00:13:30 the great thing that happened to them three years ago or worse the great thing that happened to

00:13:33 someone that they knew three years ago you know it's like go away from that person they're not

00:13:41 to themselves either and so you want to surround yourself you've got to think about this you've got

00:13:45 to surround yourself with people

00:13:51 You can hang around with weasels and losers that are trying to pull you down to justify the fact that they're spiraling downhill as well.

00:13:57 And you know, the other side of that is you don't have to have any response.

00:14:00 that you can all whine about how wretched life is, so that's pretty attractive.

00:14:04 But I would say it's also a big bad medium to long term plan.

00:14:08 And so it's acceptable.

00:14:10 Desirable

00:14:20 well, they're not doing that well, and they don't fit into that category.

00:14:30 What are you going to do with the top?

00:14:40 over and they're not going anywhere and it's painful that maybe the proper thing to do is say

00:14:44 you should have my life and cup and so

00:14:51 I think that's a better way of just putting up with it is all...

00:15:09 around yourself.

00:15:10 People who are good for the best part of me, that's not the same as, you know, skill.

00:15:20 That's another thing you want to increase your probability of success, new skill.

00:15:33 learn to do things, learn to public speak, learn how to introduce yourself to people, learn how to social network.

00:15:41 This is the right way to go talk to someone who supervises you.

00:15:45 I see this problem, and here's the solution.

00:15:48 And so I've come to talk to someone.

00:15:52 that person is going to want to talk to you a lot it's like because they're the problem can you

00:16:00 about it. It's like they want to do something about it. They've only got 50 things to do.

00:16:04 So if you're the person who constantly brings forth a problem, even if they're out

00:16:10 You think I want to have you around?

00:16:12 You're just another problem.

00:16:14 Don't be a problem for the people who want to give you money.

00:16:17 That's the kind of rule of thumb, man.

00:16:20 you know if someone wants to give you money then help them do that and if they want to give you

00:16:25 status and success then help them do that right and you do that by bringing them

00:16:30 Solutions, in part, you do that by developing your skills, so if things aren't going very well for you, this is also a good way of evaluating an opportunity, should you take an opportunity.

00:16:40 Here's the rule, take the opportunity if it will teach you something that you can use for other opportunities and then you will have failed.

00:16:52 to recruit something of value to bring forward to the next situation.

00:16:56 So there's this old Jungian idea that I told you about.

00:17:00 The Shard Cathedral, for example, is made in the form of cross, and the cross signifies the center of the world, and the dome signifies the sky.

00:17:10 So right below the dome at the center of the world is a place of suffering, so a place of suffering, right?

00:17:20 the place of conscious suffering. That's the center of the world.

00:17:30 kind of a flower-shaped resting place right in the center.

00:17:34 And you walk all four quadrants and you get to the middle.

00:17:40 is where you want to be. You want to be in the middle. Well, how do you get there? You

00:17:43 walk everywhere. And what does that mean? It means...

00:17:51 your skills.

00:18:00 your money away. That's real wealth.

00:18:10 all the time, right?

00:18:11 Especially with the kind of people have access to.

00:18:14 You can learn anything you want, whenever you want.

00:18:17 So what a good deal that is, man.

00:18:20 There's easy fruit hanging that you can pick.

00:18:25 So here's an example, let's say you're not doing too bad, so maybe you're in the middle of the normal distance.

00:18:32 Okay, and so let's say you're conscious.

00:18:40 layoffs in your company. So that's nothing to do with straw, basically.

00:18:50 Go after yourself pretty hard.

00:19:00 you don't have that many other opportunities now maybe you should look

00:19:03 for them but maybe you're in a depressed strata of the economy or you're

00:19:06 geographically located somewhere that makes moving difficult or so on

00:19:10 and so forth. So, but you lose a job and then you start to get depressed because of that.

00:19:20 for a job, but also...

00:19:30 unemployed and suffering from economic stress, but you're married and friends, and then, of course, as

your marriage suffers, and this builds up.

00:19:42 even farther away from your friends and that's going to decrease the likelihood

00:19:44 you're going to have enough positive enthusiasm to look for another job and then

00:19:50 Maybe you want to add a bit of drinking problem to that, just, you can see that.

00:20:00 Sometimes people conceptualize, you know, you're on a question.

00:20:10 The thing about a diagnosis of depression, it's sort of like, the assumption is there's something going wrong with your psychological structure.

00:20:16 You're depressed, it isn't obvious at all.

00:20:22 I mean, it doesn't even obvious that it's a psychological problem.

00:20:26 It's just a problem.

00:20:27 Problems can take...

00:20:30 and your marriage is starting to shake and you're isolating yourself from your friends

00:20:37 and you're less likely to be motivated to go

00:20:40 look for a job. Sort of think about that depressive spark. Conspiracy, in some sense, of external forces.

00:20:50 to the ground and we don't tend to conceptualize psychological disorders

00:20:53 that way, but we should. There's lots of times when people, from something that you

00:20:59 describe inside.

00:21:00 terminology at depression. A very good example of that is something wrong with

00:21:05 them psychologically. They just are

00:21:11 in psychological diagnosis for client in serious trouble, but my experience has been.

00:21:20 come to see me, come to see me, because something's gone wrong with their life.

00:21:25 Now you could say, well, there are psychological inadequacies.

00:21:30 might be are or maybe even served as precursors to increase the probability of fee, but it's still

00:21:38 not exactly the approach.

00:21:40 way to conceptualize it you know because you're there's you inside you and as a personality

00:21:46 psychologist and as a clinical theorist most of what I've talked to you

00:21:50 about is your psyche and its structure as if it was like a soul that inhabited you,

00:21:58 demarcated from the community.

00:22:00 You can be set up in a healthy manner or a non-healthy manner.

00:22:03 The problem with that is that you're not just an individual.

00:22:06 You're connected to all these external dynamic networks.

00:22:10 They're really, really important, and it isn't even easy to separate them from you.

00:22:14 You might say, well...

00:22:20 than your arm but you think it's pretty obvious or key to you

00:22:31 much more happily sacrificed an arm than a child, you know, and so your boundaries are not,

00:22:36 where your boundaries are located are not precisely iso-

00:22:40 It's not that simple at all in all sorts of networks that can pull you down rapidly or elevate you because the other thing that happens

00:22:50 is that let's say I've never traded and I say,

00:22:55 well, do you want to trade?

00:22:56 And they say, well, well,

00:23:00 The answer to that is, well, you have to take my word for it.

00:23:02 That's not a very good argument.

00:23:05 And you might say instead, well, here's what I have to offer.

00:23:10 the person is likely to say, well, I don't know how to evaluate it,

00:23:13 so I'm still stuck with taking your word.

00:23:15 That's a bad problem, and you'll see that if you ever try to sell a product in the marketplaces.

00:23:20 If you don't, if the product is new and it's complex, then you're forcing the person that wants to buy it to evaluate it, and then you're forcing them to take the risk of being wrong.

00:23:30 well as the time it would take to evaluate it and they don't like that they want is what's

00:23:34 often called social proof which is okay well you want to trade with me who else have you traded with

00:23:40 answer is zero, they're going to say we've already traded with a bunch of people and therefore

00:23:50 The risk is lower, in part because, let's say, I have a supervisor, and I'm going to make a decision.

00:23:56 And our concern is that my supervisor will not hate me for...

00:24:00 the decision. It's not that my primary concern is to make the best decision. Not the same

00:24:05 thing I'm going to get in trouble for.

00:24:10 okay so how do i do that because i need a post hoc justification

00:24:13 so i buy something from you and it turns out to be terrible hold on the table for

00:24:20 And what do I say? I say, well, you know, that person was buying from it, and that person was buying from him, and that person was buying from him.

00:24:27 Like, all these other people were doing the same.

00:24:30 So it's not like the error localized in me, and that's often a very, but if the answer is, well, you know, I evaluate a book or it's sudden.

00:24:40 the risk it's like I'll open the door with you Sonny because that's just

00:24:50 Spiral downhill into zero is because like a positive feedback loop is a loop that increases the probability that the loop will

00:25:00 And a positive feedback loop is you've experienced this when you hear microphone feedback in an amplified system.

00:25:10 to the speakers, and then the speakers send out the message.

00:25:13 And finally, again, you get...

00:25:20 This can be deafening but can also destroy the system because it will keep amplifying

00:25:24 upward until the speakers blow, for example.

00:25:26 That's a positive feedback loop.

00:25:30 It can spiral you upward or it can spiral you downward.

00:25:33 And so a virtuous circle, a virtuous positive feedback loop is when,

00:25:38 well, I've traded with him and I've traded with...

00:25:40 him and I've traded with him and now I can say to you I've traded with these three people

00:25:44 and you go talk to them and they say good things and so then you say well I'll trade

00:25:47 with you and then because of that then you're even

00:25:50 more likely to trade with me and it's like the thing starts to spiral uphill

00:25:53 and I'm taking a non-linear form and so because if one of the things you guys are

00:25:59 going to be asking yourself

00:26:00 as you mature because what's happening is that is increasing right you might ask well why that

00:26:06 why you know is that that's what

00:26:10 does. So it's not like you need an explanation for it. This is the

00:26:14 explanation. It's like a natural rule. If you run a trading game

00:26:17 to its logical conclusion, one person

00:26:20 and ends up with all the money, and everyone else ends up with zero.

00:26:42 The next best predictor of lifetime success is conscientiousness.

00:26:46 Well, so aspects of conscientiousness...

00:26:50 say orderliness and so the question you do about your industriousness and the answer to that is

00:27:00 Well, that's kind of rough, too, because there's a strong genetic component.

00:27:05 And work on micro habits with regards to your conscientiousness.

00:27:09 And I think the best.

00:27:10 I think the best thing you can do with regards to your conscientiousness is set up some aims for yourself.

00:27:20 that you actually value, the future authoring program.

00:27:24 And basically, it does a situational analysis of,

00:27:28 it helps you do a situational analysis.

00:27:30 of your life more than a psychological analysis, I would say, and so the questions are something

00:27:35 like, well, all right, you're going to have to put some effort into your life.

00:27:40 to do that, and so one of the things that we're going to do

00:27:51 If you're disagreeable, you won't win competitions.

00:27:53 If you're open rate of activity, if you're high neuroticism, you want security.

00:28:00 So those are all sources of potential motivation.

00:28:10 about the way you wanted it in three to five years if you were taking care of

00:28:15 yourself properly from your friendships what would you want from

00:28:25 outside of your job, and how are you going to regulate your mental, physical...

00:28:30 mental and physical health and maybe also your drug and alcohol use because that's

00:28:34 that's a good place to auger down

00:28:40 to keep that under control and then so maybe what you'd like your life to be

00:28:50 associates the so the goal was established and then you break down the

00:28:56 goal into microprocesses that you can implement the micropro...

00:29:00 become rewarding in proportion in relation to their association with the

00:29:06 goal.

00:29:10 We talked about the Dopaminergic Incentive Reward System, and that's the thing that keeps you moving forward.

00:29:15 And the way it works is that it works better if it produces positive...

00:29:20 motion wind, it can see you moving towards a valued goal.

00:29:23 Okay, well, what's the implication of that?

00:29:25 Better have a valued goal, because otherwise you can't get any positive...

00:29:32 So the more valuable the goal, if possible the goal is to be able to be able to be able to

00:29:40 That's how to relax him and she has some spion.

00:29:44 Yeah, it's very well as honeypot and a trackpad.

00:29:50 So as far as I can tell, you specify your long-term ideal.

00:30:00 as well as excited.

00:30:10 to specify goals that have been as a consequence of my efforts, it would clearly be worthwhile

00:30:17 if I do something.

00:30:20 Because doing nothing is easy. You just sit there and you don't do anything. That's real easy.

00:30:24 The question is why would you ever do it? And the answer to that has to be because you've determined by some...

00:30:30 means that it's worthwhile and then the next question might be well where should you look

00:30:34 for worthwhile things and one would be well you consult your own temperament another would be

00:30:39 well you kind of

00:30:40 Look at how, look at what it is that people accrue that's valuable across the lifespan.

00:30:48 Structural analysis of the subject.

00:30:50 Components of human existence and already did that you need friends like you don't need to have all these things

00:30:56 But you better have most of them family friends career

00:31:00 plans for, you know, time outside of work, attention to your health, etc.

00:31:06 You know, that's what life is about.

00:31:08 And if you don't have...

00:31:10 any of those things, well, then you've got luxury and suffering, so that's a bad deal.

00:31:20 So once you set up that goal structure, let's say, and that's really, in many ways, that's what you should be doing.

00:31:31 All structured, I'd say, and that's really, in many ways, that's what you should be doing.

00:31:37 That's exactly what you should be trying to figure out.

00:31:40 Who it is that you're trying to be and you gave it and then use everything you learn as a means of building that person

00:31:51 And I really mean want to be, I don't mean should be, even those things, those things are going to overlap.

00:31:56 It's important to distinguish between those because that's partly...

00:32:00 and this is backed up to the micro routine analysis.

00:32:02 So as I say, well, you're gonna try

00:32:03 to make yourself more industrious.

00:32:04 Okay, number one, specify your damn goals.

00:32:07 And how are you gonna hit something

00:32:08 if you don't know what it is?

00:32:12 goals too because they don't like to specify conditions for failure so if

00:32:16 you keep yourself all vague and foggy

00:32:20 matter of not doing as well then you don't know when you fail and people might say well I really

00:32:24 don't want to know when I fail because that's painful so I'll keep myself blind about when I fail

00:32:30 That's fine, except you'll fail all the time then.

00:32:32 You just won't know it until you've failed so badly that you're...

00:32:36 And that can easily happen by the time you're 40.

00:32:41 recommend that you don't let that happen. So that's willful blindness, right? You could have

00:32:45 known, but you chose not to. Okay, so once you get your goal structure set up, you think, okay,

00:32:50 this life looks like that might be worth living despite the fact that it's going to be anxiety

00:32:56 provoked to be some suffering and loss involved in all of that.

00:33:16 instantiate itself.

00:33:20 And that's where something like a schedule, Google Calendar, damn schedule, and stick to it.

00:33:30 It's not a bloody prison.

00:33:32 That's the first thing that people do wrong.

00:33:34 They say, well, I don't like to follow the schedule.

00:33:36 It's like, well, what kind of schedule are you setting up?

00:33:39 Well, I have to...

00:33:40 do this than I have to do this.

00:33:41 I have to schedule up.

00:33:50 so that you have the day you want. That's the trick. It's like, okay, I've got tomorrow.

00:33:55 If I was going to set it up so the best possible day I could have,

00:34:00 Speaking, what would it look like? Well, then you schedule that and obviously there's a bit of responsibility that's going to go along with that because if you have any sense, one of the things.

00:34:10 you're going to insist upon is that at the end of the day you're in worse shape than you

00:34:20 You just dig, you know, you dig yourself a hole and then you bury yourself in it. It's like, sorry, that's just not a good strategy. It's a bad strategy. Maybe 20% of your...

00:34:30 has to be responsibility and obligation or maybe it's more than that depending on

00:34:33 how far behind you are but even that you can you can ask yourself okay well I've

00:34:37 got these responsibilities

00:34:40 the damn things in, what's the right ratio of responsibility to re-

00:34:45 Ask yourself that, just like you negotiate with someone who is working, like, okay, you've got to work.

00:34:50 Okay, so I want you to work tomorrow. You might say okay. Well, what are you gonna do for me?

00:34:55 That makes it likely that I'll work for you. Well, you can ask yourself that you know

00:35:01 of responsibility, and then you play a video game for 15 minutes, I don't know, whatever

00:35:05 turns your crank, man, but, you know, you have to negotiate with yourself.

00:35:10 and not tyrannize yourself like you're negotiating with someone that you care

00:35:14 for that you would like to be productive and have a good life and that's how you

00:35:18 make the schedule

00:35:20 It's like, and then you look at the day and you think, well, if I had that day, that'd be good.

00:35:23 It's horrible, so you'll probably only hit it with about 70% accuracy, but...

00:35:30 That beats the hell out of zero.

00:35:31 50% actors next week, or 50 and a half.

00:35:40 or go unsafe, or because...

00:35:50 So that's one way that you could work on your conscientiousness.

00:35:53 Plan a life you'd like to have.

00:35:55 And you do that partly by referring to social norms.

00:36:00 more or less rescuing the whale, but the other way you do that is by having a little conversation

00:36:05 with yourself about, as if you don't really know who you are, because you know...

00:36:12 Tell yourself to get a worse boss.

00:36:20 for you what you want to do and then when you tell yourself what to do you don't do it anyways

00:36:25 you should fire yourself and find someone else to be but but you know

00:36:30 point is that you have to understand that you're not your own servant, so to speak.

00:36:34 You're someone that you have to negotiate with, and you're someone that you want to present.

00:36:40 the opportunity of having a good life too and that's hard for people because they

00:36:43 don't like themselves very much so you know they're always like cracking the whip and then

00:36:50 cracking with, and then procrastinating, it's like, God.

00:37:00 Your time's probably worth 50 bucks an hour or something like that.

00:37:06 I mean, you're not getting paid that now, but you're young, and so this is investment.

00:37:11 What you do now is going to multiply its effects in the future.

00:37:15 So let's say it's 50 bucks an hour, which is perfectly reasonable.

00:37:17 So if you waste six hours a day, and you are...

00:37:20 then you're wasting about $2,000 a week or about $100,000 a year.

00:37:23 So, like, go ahead, but that's what it's costing you, every hour.

00:37:27 And you need to know what your damn time is worth.

00:37:30 It's not 50 bucks, it's 30. It's somewhere in that range.

00:37:40 What if I paid someone 50 bucks to have had that out?

00:37:43 And if the answer is no, it's like,

00:37:44 well, maybe you should do something else with your time.

00:37:47 And it depends worthwhile.

00:37:50 But the funny thing about not assuming that is if you assume your time isn't worthwhile

00:37:55 What happens is you don't just sit around sort of randomly in a state of responsibility

00:38:00 bliss, what you do is you suffer existentially.

00:38:10 As far as I can tell, that's how you can improve your conscientiousness.

00:38:13 Hit.

00:38:16 You actually would like to hit.

00:38:18 Even better.

00:38:19 Here's something else.

00:38:20 Think about when you're negotiating in your life, you could say, if you're kind of pessimistic, you'd say, well, we have to negotiate an agreement.

00:38:26 I'd like to walk away miserable and resentful.

00:38:30 Okay, let's call that a baseline, and that's how you're going to negotiate with your wife or your husband.

00:38:35 That's a good thing to know.

00:38:37 You want to negotiate so that you don't walk away miserable.

00:38:40 resentful because that makes you hostile and then you'll work to hurt them and i would say that's

00:38:45 unless you want to hurt them

00:38:50 If you want to exist in a place where you're basically hitting each other in the head repeatedly for 30 years, you go right ahead.

00:38:56 But I wouldn't say that's a particular good way of living.

00:38:58 So you might say, well, look.

00:39:00 The minimal precondition for a successful negotiation is that you don't walk away resentful and angry.

00:39:06 And so that's also how you know when you have something to say to someone.

00:39:10 Because the rule has to be, if you're going to walk away resentful and angry, you've got

00:39:14 something to say.

00:39:15 It doesn't mean you're right, by the way, but it does mean that you have something to say.

00:39:20 If I wanted to live with you for 30 years maybe we should say how about we walk away from our mutual negotiations thrilled.

00:39:30 Well, why not? You've got to aim for something. You could aim for that.

00:39:35 You want to negotiate with your boss for a new salary, you might think, okay, I've got this damn job.

00:39:40 How much would I have to be paid so I'd be so bloody excited to go to work? I could hardly stand it

00:39:44 Well, you can at least know what that number is and then you could go there and say well look

00:39:51 have me around. I've been doing some thinking. I think if you paid me this amount of money,

00:39:56 I'd be so thrilled to go to work that you could hardly even keep me away from here.

00:40:02 Oh shit, you're right on the internet, you're right on the internet.

00:40:05 Well, I can't give you all of that, I'll give you 75%, maybe we can renegotiate it.

00:40:12 Or you could, you know, be somebody in there and snivel about how awful...

00:40:21 tolerate the outcome of the negotiation.

00:40:24 I would recommend that.

00:40:26 And it's funny because I've watched people do this repeatedly.

00:40:30 my clinical practice because I do, we do, we plan all the time because the rule is you're

00:40:35 going to come and see me, I'm going to try to help you figure out how to have the life

00:40:38 that you want to have.

00:40:40 to think about that strategically so you're making fifty thousand dollars a year right now

00:40:44 maybe you should be making 150 000 in three years

00:40:50 Not with that attitude. That's the first thing. It's like, no, that's not going to happen if you don't ask people for the damn money, if you don't look for a better job.

00:41:00 They're going to come along and just shovel the boat full of money at you.

00:41:03 It's like, no, that's not going to happen.

00:41:05 But why is that impossible?

00:41:07 You don't address yourself.

00:41:11 What the hell is wrong with it? Nothing.

00:41:14 You probably have what you want. If you could figure out what the hell it was, then you diligently pursued it.

00:41:20 Identify yourself.

00:41:21 Identify yourself.

00:41:22 If you're worried about being alive, that'd be good.

00:41:24 Because people who are worried about being alive are dangerous.

00:41:27 And then the address passed.

00:41:28 So you might think, I can have what I want.

00:41:30 Dat kan je dus, zeg maar, een beetje wel.

00:41:37 Ja, daar hebben we allemaal unieke koordinaat gemaakt.

00:41:40 That's another big deal, it's one of the advantages that older people have over younger people.

00:41:50 And so, for example, now in my 50s, roughly speaking, I know a bunch of other people who are relatively well positioned in the dominance hierarchy, and they know all sorts of people.

00:42:00 And so when I go to one of them and say, you know, can you do X or do you do X, they say, no, but I know someone who can.

00:42:06 And that's a huge advantage.

00:42:07 So another thing that you want to think about as you move through.

00:42:10 use your ability to network properly and that doesn't mean schmooze and it doesn't mean go out and impress people, that's all just complete bloody rubbish.

00:42:20 It means you try to surround yourself with people who are competent in multiple different

00:42:25 interventions, and you maintain your relationships with them, and that's a true relationship

00:42:29 too, right?

00:42:30 But it's a huge advantage, a social network is a huge advantage, and that's something extroverted

00:42:37 people can be really good at.

00:42:40 Want als ik niet die maat kan met het er zelf gekomen.

00:42:45 Goed, ja.

00:42:47 Dat is toch niet zo.

00:42:50 Consciously develop and maintain your social networks, and that also means, well, let's

00:42:56 talk about friendships for a minute.

00:42:58 Here's how you know if someone's your friend.

00:43:00 A, you can tell the bad news.

00:43:04 Here's how you know if someone's your friend.

00:43:10 A, you can tell them bad news and they'll listen and they'll tell you why you're stupid and why that bad thing happened to you and how something worse happened to them.

00:43:20 Gehashed, zeg maar.

00:43:22 Dus hoe krijg je nu een miljoen gecobberd in dit film op te rijden?

00:43:26 Toen heb ik niet die moeilijk uitgemoordig in een dot product.

00:43:30 Ik geef je een aantal twee angles, als het ware, en een angle met een ray die is met een ray.

00:43:40 Het bepaalt een heading en die kan je kruisen met elkaar en zo kan je een veld maken.

00:43:46 Want bij elk stukje waar die reën elkaar kruist.

00:43:50 krijg je in principe een verbinding tussen alles, een bekoppeling en een lunch.

00:44:00 I don't even put in a latch.

00:44:05 And I can fuck the exes.

00:44:07 And all the ex.

00:44:08 And I can fuck the exes.

00:44:09 And all the ex.

00:44:10 You know, it's like, go away from that person, they're not helpful to you.

00:44:14 They're not helpful for themselves either.

00:44:16 So you want to surround yourself, you've got to think about this.

00:44:19 You've got to surround yourself...

00:44:20 You'll never cry.

00:44:30 as well. And, you know, the top side of that is you don't have any responsibility and you

00:44:34 can all whine about how wretched life is, you know, so that's pretty attractive. But I

00:44:38 would say it's also a bad medium.

00:44:40 It's acceptable and desirable to try to surround yourself with people who are facilitating...

00:44:50 development, you know, he might say, well, I'm here.

00:44:56 Yeah.

00:45:00 Maar ik zeg ik dat, omdat je letterlijk zegt waar gelijk je hebt tekst kan, je kan het mensen, je kan het mensen.

00:45:10 Het kan. Het kan. Het kan. Het kan.

00:45:15 Het kan. Het kan.

00:45:17 Het kan.

00:45:18 Het kan.

00:45:19 Het kan.

00:45:20 Oké. Nou, iedereen heeft het les gehad hier. Ga je ondertussen hier tussen gelegen seconden over de dag en nacht regelmatig zoeken hoe jullie hier nog weg gaan komen.

00:45:30 put up with that sort of behavior, you're providing tacit consent for it, tacit approval.

00:45:40 I would say both the right and the responsibility to surround yourself with people.

00:45:50 I don't have to elaborate on that, but you can figure out what that means.

00:45:53 Skills, that's another thing you can do if you want to increase your probability of success.

00:45:57 Every time you have an opportunity...

00:46:00 Take an opportunity to provide you with a new skill. Do it.

00:46:04 Learn the programs, learn to write, read, read, read, read things, learn to public speak, learn how to introduce...

00:46:10 Introduce yourself to people, learn how to social network, learn how to go talk to your boss in a matter of, this is the right way to go talk to someone who's surprised.

00:46:20 van de administratie, waar je kunt bestudeeren en je kunt heel veel tijd hebben besteed.

00:46:32 Can you do something about it? It's like they don't want to do something about it. They've already got 50 things to do, you know, so if you're the person who constantly brings...

00:46:41 Even if there are actual problems, they're going to want to have you around.

00:46:45 You're just another problem. Don't be a problem.

00:46:50 For the people who want to give you money, that's a kind of rule of thumb, man.

00:46:54 You know, if someone wants to give you money, then help them do that.

00:46:58 And if they want to give you status and success,

00:47:00 help them do that in the solutions and part of their skills and so if things aren't going very well

00:47:08 this is also a good

00:47:10 an opportunity. Should you take an opportunity? Well, here's the rule. Take the opportunity

00:47:17 if it will teach you something that you can use for other opportunities.

00:47:20 because then even if it fails, accrues something of value, then you can bring forward to the next situation.

00:47:30 So there's this old union idea that I told you about, it was made in the form of cross, and the cross...

00:47:40 signifies the center of the world, and the dome signifies the sky, so right below the

00:47:44 dome at the center of the world, place of suffering.

00:47:50 center of the world. At the center of the world

00:48:00 Because that's what you are. You're the place of suffering, right?

00:48:02 You're the place of conscious suffering. That's the center of the world.

00:48:06 So, inscribed on the floor is a maze.

00:48:10 And it's a Mandela in the center.

00:48:20 Walk all four quadrants and you get to the middle.

00:48:22 So how do you get there?

00:48:29 Time your...

00:48:30 offered an opportunity. Take it!

00:48:40 what you have when someone takes all your money away that's real wealth and so the way that you

00:48:46 build up that sort of wealth is you turn yourself into someone who's

00:48:53 the time right especially with the kind of technology that you people have access to

00:48:57 I mean you can learn anything you want whenever you want

00:49:00 what a good deal that is. Easy fruit hanging that you can pick, and I would recommend that you do that.

00:49:07 So here's an example. Let's say,

00:49:10 You're not doing too bad, so maybe you're in the middle of the normal distribution, then you'll lose your job.

00:49:14 Okay, and so let's say you're a conscientious person and we can say

00:49:20 just for the sake of bargaining, you lose your job because of mass layoffs in your company.

00:49:23 So it has nothing to do with you. Fundamentally, it's just like a draw, basically.

00:49:28 But then what happens to you?

00:49:31 If you're conscientious, you're going to go after yourself pretty hard.

00:49:40 Maybe you're in a situation where you just don't have that many other opportunities.

00:49:44 Now maybe you should look for them, but maybe you're in a depressed strata of the economy

00:49:48 or you're geographically...

00:49:50 located somewhere that makes moving difficult or so on and so forth you know so but

00:50:00 It decreases the probability that you're going to look for a job, but also maybe it's on your family, and it also starts to decrease the probability that you're getting engaged.

00:50:10 positive social interaction so now not only are you unemployed and suffering

00:50:14 from economic stress but your marriage is starting to suffer and you're starting

00:50:18 to isolate yourself from your friends

00:50:20 Of course, as your marriage suffers and the stress builds up, then that's going to make you more depressed and that's going to keep you even farther away from your friends and that's going to decrease the likelihood that you're going to have enough positive emotion.

00:50:30 enthusiasm to look for another job and then you know maybe you want to add a

00:50:33 bit of a drinking problem to that just for fun and you can see that you can get

00:50:37 a spiral going that's just taking you down

00:50:40 Right and it's all sorts of things because lots of times people conceptualize let's say you know you're unemployed guy

00:50:51 Diagnosis of depression is a depression. It's sort of like the assumption is there's something gone wrong with your psychological structure. It's like

00:51:00 If you're unemployed and you're depressed, it isn't obvious at all that the problem is in your head.

00:51:04 You know what I mean?

00:51:16 Your marriage is already changed and you're isolating yourself.

00:51:24 think about that as a depressing spiral, but you can also think of it as a conspiracy in some sense.

00:51:58 Thank you.

00:52:13 We are in security with their abilities.

00:52:15 Our core data even served as probability.

00:52:21 It's coming back to you from inside you, but the personalities are all different.

00:52:36 It's so inhabited and it's really delicate.

00:52:41 We said he's going to help you better or not help you better.

00:52:46 The problem with that is that you're not just in control, you're there.

00:53:11 This might not be obvious, I think many people would never place an arm than a child, so your boundaries

are gone.

00:53:23 You're abandoned in all.

00:53:35 I never traded with anyone, and then I go up to someone and I say, well, keep on trade, and they say, well.

00:53:45 That's what he might say.

00:54:14 If they don't like them, what they want is what they call social security.

00:54:31 And therefore, it's more in part because of that state, I have a superpower, and I'm going to make a decision.

00:54:45 It's not the same thing.

00:54:55 So I'm going to stop the computer because it doesn't mean terrible.

00:55:05 That person is running from it, and that person is running from, from, from, from, from the end of the end of the end of

01:00:00 if they can see you

01:00:15 In principle, the more the micro-process is associated with that goal.

01:00:20 And so what that means, and you're excited about today, then you don't.

01:00:25 So as far as I can tell, what we do, specify your long-term...

01:00:36 as excited about succeeding, because that's also useful.

01:00:55 Before I do something, because doing nothing is easy.

01:01:00 The question is, why would you ever do anything?

01:01:02 And the answer to that has to be because you've determined by suddenness.

01:01:10 for worthwhile things, and one would be, well, you consult your own temperament, and the other would be, well, you kind of look at how, look at what it is that people accrue.

01:01:20 it's valuable analysis of the subcomponents of human existence and we already did that

01:01:31 You have all these things, but you better have most of them.

01:01:40 That's what life is about, and if you don't have any of those things, well, then all you've got left is misery.

01:01:50 sufferings.

01:02:01 in many ways. That's what you should be doing first. That's exactly what you should be doing,

01:02:06 trying to figure out who it is that you're trying to be.

01:02:10 And then use everything you learn as a means of building that person that you want to be, and I really mean.

01:02:20 I want to be, I want to distinguish between...

01:02:32 Number one, specify you're going to hit something if you don't.

01:02:40 like to specify to do it for me, then you don't know what you need.

01:02:51 People might say, well, I really don't want to know when I fail because that's keep myself blind.

01:03:00 You just won't-

01:03:10 So that's willful blood shows not okay, so once you get your goal structure set up this life looks like that

01:03:20 worth living despite the fact anxiety promoting some suffering and loss involved

01:03:31 such that

01:03:43 How does that instantiate itself?

01:03:51 Google Calendar. It's like a damn schedule and stick to it.

01:04:00 That's the first thing that people do wrong.

01:04:01 They say, well, I don't like to have...

01:04:21 I have to do. It's like wrong.

01:04:23 Set the damn schedule up

01:04:25 so that you have the day you want.

01:04:27 That's the trick. It's like, okay, I thought

01:04:30 If I was going to set it up so it's the best possible day I scheduled on it.

01:04:41 responsibility that's going to insist upon in the day, not in worse shape.

01:04:55 a bunch of those in a row, you just dig, you know, you dig yourself a hole and then you

01:04:58 bury yourself in it.

01:05:00 Sorry, that's just not a good strategy.

01:05:02 It's a bad strategy.

01:05:11 It's a bad strategy, so...

01:05:20 And you bury yourself in it. It's like sorry. That's just not a good strategy. It's a bad strategy 20% of your day

01:05:30 obligation or maybe it's more than that depending on how far behind you are but even that you can

01:05:35 ask yourself okay well i've got these responsibilities have things in

01:05:40 What's the right ratio of responsibility to reward?

01:05:43 And you can ask yourself that just like you negotiate with someone who's working for you.

01:05:47 It's like, okay, you got to work tomorrow.

01:05:49 Okay.

01:05:50 So I want you to work tomorrow and you might say, okay, well, what are you going to do for me that makes it likely that I'll work for you?

01:05:56 Maybe you.

01:06:00 Do an hour of...

01:06:10 yourself getting with someone that you care for that you would like to be productive and have a

01:06:15 good life and that's how you make the schedule it's like and then you look at the date

01:06:20 You think, well, if I had that day, that'd be good.

01:06:26 It's about 70% accuracy, but that's zero.

01:06:37 50 and a half?

01:06:40 because

01:06:50 your conscientiousness plan a life you'd like to have partly by referring to social norms that's

01:06:58 more or less rescuing your

01:07:03 conversation with your son where you know who you are because you know what you like, you won't do what you're told.

01:07:10 You won't do what you tell yourself to do.

01:07:15 An employee and a worse boss.

01:07:21 you want to do and then when you tell yourself what to do, you don't do it anyways. You should

01:07:24 fire yourself and find someone else to be. But, you know, my point is, is that you have

01:07:30 understand that you're not your own servant so to speak there's someone that

01:07:33 you have to negotiate with them that's and you're someone that you want to

01:07:37 present the opportunity of

01:07:40 a good life too and that's hard for people because they don't like themselves very much

01:07:44 so you know they're always like cracking the whip and then procrastinating and cracking the whip and

01:07:49 then procrastinating

01:07:50 It's like so boring such a pathetic way of spending your time. You know what that's like

01:07:55 You probably waste like six hours a day, and I think we get an economic calculation

01:08:00 while back right because probably worth 50 bucks an hour but you're young so this is investment time

01:08:10 So let's say it's 50 bucks an hour, which is perfectly reasonable.

01:08:15 So if you waste six hours a day, and you are, then you're wasting about two...

01:08:26 You need to know what your damn time is worth.

01:08:28 So let's say it's not 50 bucks.

01:08:32 somewhere in that range.

01:08:47 worthwhile, but the fun

01:08:50 think about not assuming that, if you assume your time isn't worthwhile, what happens is you don't...

01:09:00 what you do is you suffer existentially.

01:09:02 So that seems like it's stupid.

01:09:10 your conscientiousness hit you know outline a goal you actually would like to hit and even better

01:09:17 here's something else you can think about when you're negotiating

01:09:21 You could say, if you're going to, I'd like to walk.

01:09:32 your wife or your husband. That's a good thing to know. You want to negotiate so that you don't

01:09:37 go away miserable and resentful because that...

01:09:40 makes you hostile and then you'll work to hurt them and i would say that's unless you want to hurt them

01:09:45 and unless you if you want to exist

01:09:50 where you're basically hitting each other in the head repeatedly i wouldn't say that that's

01:09:55 a little precondition

01:10:00 negotiation is that you don't walk away resentful and so that's also how you

01:10:06 nothing to say to someone.

01:10:11 You've got something to say, but it's kind of a low bar

01:10:20 You know, if I wanted to live with you for 30 years, maybe we should say,

01:10:23 Oh, we walked away from our mutual negotiations thrilled.

01:10:27 Well, why not?

01:10:30 You've got to aim for something. You've got to aim for that. You've got to negotiate with your boss for a new salary.

01:10:36 You might think, okay, I've got this damn job. How much would I have to be...

01:10:40 So I'd be so bloody excited to go to where they stand in and then you could go there and say well look you know

01:10:51 I've been doing some thinking.

01:10:54 I'd be so thrilled to go to work that you could hardly even keep me away from here.

01:10:57 And your boss might think.

01:11:04 Well, I can't give you all of that. I'll give you 75% maybe a week in a minute a year.

01:11:10 Hey, or you could, you know, be some dude here and snivel about how awful your life is and walk away barely in.

01:11:20 tolerate the outcome of the negotiations.

01:11:22 I would recommend that.

01:11:25 And it's funny because I've watched people do this

01:11:27 repeatedly in my clinical practice.

01:11:31 We plan all the time, because the rule is, you're going to come and see me, I'm going to try to help you figure out how to have the life that you want to have, and we're going to think about that strategically.

01:11:40 you're making $50,000 a year right now, maybe you should be making $150,000 in three years.

01:11:50 attitude that's the first thing it's like no that's not gonna happen if you

01:11:54 don't ask people for the damn money if you don't look for a better job but

01:11:58 they're gonna come along and just

01:12:00 Shuttle a boat full of money at you. It's like no, that's not going to happen. But why is that impossible?

01:12:08 Basically, they look like what?

01:12:11 Nothing. You probably have what you want. You can figure out what the hell it was and then you diligently pursued it.

01:12:24 are dangerous to themselves and other people.

01:12:26 I can have what I want.

01:12:30 it is and you can't just wait for the like what you want bearing to show up at your doorstep

01:12:35 and grab it because obviously that's not going to happen so

01:12:40 Okay, conscientiousness, well, we talked about how you can prove that.

01:12:43 Social networking, that's another big deal.

01:12:45 It's one of the advantages that older people have over younger people.

01:12:48 And so, for example...

01:12:51 I've been speaking, I know, you know, relatively well positioned in the dominance hierarchy,

01:12:56 and they know all sorts of, so when I go to one of them,

01:13:00 They say no, but I know someone who can.

01:13:03 That's a huge advantage.

01:13:05 So another thing if you want to move your life...

01:13:10 is that use your ability to network properly.

01:13:14 That doesn't mean schmooze.

01:13:15 That doesn't mean go out and impress people.

01:13:16 That's all just complete bloody rubbish.

01:13:18 It means...

01:13:20 You can try to surround yourself with maintaining your relationships with...

01:13:30 But it's a huge advantage, a social network is a huge advantage, and that's something extroverted people can be really good at, because they have that sort of social ability.

01:13:40 goes along with the ability to sell. So another place to do the right things is to, is to consciously

01:13:50 develop and maintain your social network.

01:13:53 And that also means, well, let's talk about friendships for a minute.

01:13:57 Here's how you know if someone's your friend.

01:14:00 Hey, you can tell them bad news. They'll listen. They won't tell you why, you know, something worse happened to them.

01:14:11 conversations, you can actually tell them bad news and they'll listen. That's a good thing.

01:14:22 and they'll help you celebrate.

01:14:23 You have someone around you.

01:14:30 you're kind of afraid to even admit it because, you know, something could happen to you.

01:14:33 It's going to go certainly be taken.

01:14:37 You know, you come out, you sort of tell someone.

01:14:42 you a whack and then talk about you know the great thing that happened to them

01:14:46 three years ago or worse the great thing that happened to someone that they knew

01:14:50 years ago you know it's like go away from that person they're not they're not helpful to

01:14:56 themselves either and so you want to surround yourself you've got to think about this

01:15:00 You've got to surround yourself with people who want the best for the best part of you.

01:15:11 And you know, the top side of that is you don't have to have any response.

01:15:14 You don't have to worry about how red light is, that's pretty good, but I would say it's okay.

01:15:25 It's desirable to try to surround yourself equal.

01:15:30 They're not doing that well, and they don't fit in that way.

01:15:55 and they're not going anywhere in the table, then maybe the proper thing to do safe.

01:16:01 so i'll go off and have my life and they will wake up at some point

01:16:05 in future they've got a better way of being because just putting up with it is

01:16:12 with that sort of behavior, providing passive incentive

01:16:16 or any passive improvement, bad idea.

01:16:25 who are good for the best party, that's not disabled, you know.

01:16:34 skills, but not the thing if you want to increase the probability of success every time you have.

01:16:40 That would provide you with a new skill to do it.

01:16:45 Learn to program, learn to write, learn to read, read new things, learn to publish.

01:16:50 how to go talk to your boss

01:16:55 it doesn't matter

01:16:56 this is the right way

01:16:57 to go talk to someone

01:17:00 I see this, and here's the solution, and so I come in order to draw them down to the solution.

01:17:06 But that person is going to want to talk to a lot.

01:17:12 I've got a problem when you do something about it.

01:17:15 It's like they don't want to do something about it.

01:17:17 They're not 50 things to do, you know, so you're the person.

01:17:22 Even if they're not your problem, why do you think I'm going to have uterine?

01:17:27 You're just another problem.

01:17:31 For the people who want to give you money, that's a kind of rule of thumb, man.

01:17:35 You know, if someone wants to give you money, then help them do that.

01:17:40 success then help them do that right and you do that in part by bringing a solution

01:17:45 or you do that by developing your skills if things aren't doing very well

01:17:52 Should you take an opportunity, here's the rule, take the opportunity, everyone will teach you something.

01:18:00 an opportunity, it doesn't matter.

01:18:06 You can prove something of value to give a great work to this.

01:18:18 It will be in the form of...

01:18:26 at the center of the world, and it's a cross, and it's a cross.

01:18:32 Because that's what you are, you're in a place of suffering, you're in a place of conscious suffering, that's the center of the world.

01:18:38 So, he's trying to build the floor...

01:18:42 This is Mandela, and I have a flower-shaped resting place right in the center, and what

01:19:11 I see the welding on that, which I'm going to take on.

01:19:16 I'm going to build up that front welding.

01:19:22 in multiple directions, and you could be moving

01:19:24 up for a while at a time.

01:19:32 What a good deal about it.

01:19:34 A sort of pay that you can get to my person.

01:19:42 If you don't do it too bad, so maybe you're in the middle of a normal distribution, then you'll lose your job.

01:19:47 Okay, so, let's say you're watching.

01:19:54 So that's not what they did with the equipment, it's just what they're wrong, basically.

01:20:00 what happens if you're conscientious you're going to go after yourself pretty hard so if you're going

01:20:11 And maybe you're in a situation where you're wondering if you don't have that thing at all.

01:20:16 And maybe you shouldn't look for it, but maybe you're in a depressed situation.

01:20:21 Geographically located somewhere, the name is moving, so on and so forth, you know, you lose the job and then you start getting depressed because of that.

01:20:34 for a job, but also maybe start to impress on your family and also start to teach.

01:20:42 And perhaps you're not only already unemployed and suffered economic stress, but your marriage is starting to suffer.

01:20:51 Gracias.

01:21:03 and then you add a bit of a drink, you can see that.

01:21:21 You get a diagnosis of depression, and to think about a diagnosis of depression, it's sort of like, there's something going wrong with your psyche.

01:21:30 The structure, it's like it is not at all that the problem is in your head.

01:21:36 You know what I mean? It doesn't, it isn't obvious that...

01:21:41 a problem and problems to take you out and so you know if you're unemployed and you're under

01:21:48 economic stress and your marriage is very

01:21:53 you're less likely to do for a job you think about that as an impressive spiral but you can also think of it as if it's

01:22:03 that are longering you into the ground.

01:22:05 You don't tend to conceptualize it.

01:22:07 It's like a long term.

01:22:09 But we should.

01:23:00 As a clinical theorist, most of what I've talked to you guys about is your psyche and its structure as if it was like a soul.

01:23:10 You have a real utility in that.

01:23:13 Demarcated from the...

01:23:15 You can be set up...

01:23:20 your connects external, and it isn't even easy to separate.

01:23:31 This is especially true.

01:23:34 Is your child more you than your arm?

01:23:36 The obvious.

01:23:42 it's by no means obvious I think many people would happily sacrifice an arm than a child you know so

01:23:50 your boundaries are not where your boundaries are located are not precisely isomorphic with

01:23:55 the outline of your body it's not that simple at all so you're embedded in all sorts of networks

01:24:00 that can pull you down rapidly, or elevate you.

01:24:03 Because the other thing that happens is that, well,

01:24:05 let's say I've never treated with anyone.

01:24:08 And I go up to someone and I say,

01:24:10 do you want to trade?" And they say, well, why can't I trust you? Well, you have to take

01:24:16 my word. That's not a very good argument.

01:24:20 You might say instead, well, here's what I have to offer and you can evaluate it, but the person's likely to say, well, I don't know how to evaluate it, so I'm still stuck with taking your word.

01:24:30 That's a bad problem, and you'll see that if you ever try to sell a product in the marketplaces.

01:24:34 If you don't, if the product is new and it's complex, then you're forcing the person that...

01:24:40 wants to buy it to evaluate it and then you're forcing them to take the risk of

01:24:43 being wrong as well as the time it would take to evaluate it and they don't like

01:24:47 that what they want is what's often called

01:24:50 social proof, which is, okay, well, you want to trade with me, who else have you traded

01:24:53 with?

01:24:54 And if the answer is zero, then they are going to say, well, you're an interesting person

01:24:59 and all that, but I'm...

01:25:00 I've got these other people over here who've already traded with a bunch of people,

01:25:03 and therefore the risk is lower, in part because, let's say, I have a supervisor.

01:25:10 and i'm going to make a decision and my primary concern is that my supervisor will not hate me for

01:25:14 making the decision it's not that my primary concern is to make the best decision it's not

01:25:21 to make a decision that I'm not going to get in trouble for. Okay, so how do I do that?

01:25:26 Because I need a post hoc justification. So I buy something from you and it turns out

01:25:30 to be terrible. I get called for it. What do I say? I say, well, you know, that person

01:25:38 was buying from it, and that person was buying from it.

01:25:40 from me from from him and that person was buying from him like all these other

01:25:43 people were doing the same thing so it's not like the air is localized in me and

01:25:47 that's often a very credible

01:25:50 But if the answer is, well, you know, I evaluated and took or started to take a risk,

01:25:55 it's like, well, I'll out the door with you, Sonny, because that's just, that's an...

01:26:00 That you're not capable of doing that sort of thing. So I think part of the reason that people's into zero is because

01:26:10 A positive feedback loop is a loop that increases the probability that the loop will continue.

01:26:15 A positive feedback loop is, you've experienced this when you hear microphone feedback.

01:26:20 So, you know, the microphone sends a message.

01:26:30 and picks up the message in the fight.

01:26:32 Again, you get this howling occurring, but can also destroy the system.

01:26:40 for example that's a positive feedback a positive feedback can spiral you upward or it can spiral you downward and so a virtuous

01:26:50 circle a virtuous positive feedback loop is when well I've traded with him and I've traded with him and I've traded with him and now I can say to you I've traded with these three people and you go talk

01:27:00 and they say good things and so then you say well i'll trade with you and then

01:27:03 because of that then you're even more likely to trade with me and it's like

01:27:06 the thing starts to spiral uphill and it does that i think

01:27:10 before and so because one of the things you guys are going to be asking yourself because

01:27:16 what's happening is that income inequality is increasing.

01:27:20 You might ask, well, why is that?

01:27:21 The first thing you need to know is that that's what income does.

01:27:25 So it's not like you need an explanation for it, that this is the explanation.

01:27:29 It's like a...

01:27:30 If you run a trading game to its logical conclusion, one person ends up with all the money and everyone else ends up with zero.

01:27:57 The next best predictor of lifetime success is...

01:28:00 She had just this.

01:28:01 Well, so...

01:28:11 you do about your industriousness and the answer to that is well that's kind of

01:28:15 rather than strong genetic

01:28:20 work on micro habits with regards to your conscientiousness and I think the

01:28:24 best micro habits

01:28:30 regards to your conscientiousness. Set up some aims for yourself, goals that you

01:28:34 actually value. People do that.

01:28:40 a situational analysis of, it helps you do a situational analysis of your life more than

01:28:46 a psychological analysis.

01:28:50 So you have to put some effort into your life.

01:29:00 in the big five manner, if you're extroverted you want friends, if you're agreeable you want

01:29:04 an intimate relationship, if you're disagreeable you want to win competitions, if you're open

01:29:09 you want to...

01:29:11 activity if you're high neuroticism you want to secure it okay so those are all

01:29:15 sources of potential motivation and you could draw on that you can tailor to your

01:29:18 own you know

01:29:20 personality for dimensions that you want to consider your life across so we

01:29:24 have we wanted it in three to five years if you were

01:29:30 care of yourself properly, what would you want from your friendships? What would you

01:29:34 want from your intimate relationship? How would you like to structure your family? What

01:29:37 do you want for your career? How are you going to...

01:29:40 Xa-xa-xa-xa-xa

01:29:42 Xa-xa-xa-xa

01:29:44 Xa-xa-xa

01:29:47 Xa-xa

01:29:50 Kanker mensen.

01:30:00 You develop a vision of what you would like your life to be, and that associates, so the goal...

01:30:10 break down the gold into microprocesses that you can implement.

01:30:14 The microprocesses become rewarding in proportion in relation to their...

01:30:20 association with the goal

01:30:21 and that tangles in your

01:30:23 incentive reward system

01:30:24 you talk about the dopamine

01:30:26 incentive reward system

01:30:27 that keeps you moving forward

01:30:30 The way it works is that it works better if it produces positive emotion when it can see you moving towards a valued goal.

01:30:37 Okay, well, what's the implication of that?

01:30:40 Because otherwise you can't get any motivation working out.

01:30:45 So the more valuable the goal, in principle, the more the microprocess is associated with it.

01:30:50 associated with that goal starts to charge.

01:30:53 And so what that means is...

01:31:00 If you specify your long-term ideal, you're terrified to what's excited about succeeding.

01:31:10 because that's also useful you specify your goal in some sense as a unique individual you want to

01:31:17 you want to specify goals that make you say

01:31:21 happen as a consequence of my efforts it would clearly be worthwhile because the

01:31:26 question always is why do something doing nothing is easy

01:31:30 sit there and you don't do anything. That's real easy. The question is why would you ever do anything?

01:31:34 And the answer to that has to be because you've determined by some means that it's worthwhile.

01:31:41 Я в Мерсел, ламент от Марио Старчаев, приферном сладкий.

01:31:50 Pieterrecht, Jonathans rete romahuis, wettelijk, stijgeraard, gamedies, unique.

01:32:00 You already did that. You need a family, you need friends, like you need to have all these things, but you better have most of them. Family, friends, career, educational goals, what is true?

01:32:10 Time outside of work, to your mental and physical health, et cetera, that's what life is about, and if you don't have any of those things.

01:32:20 Well, then all you've got left is misery and suffering, so that's, that's a bad deal for him.

01:32:26 Done every little, it's all I want.

01:32:28 Well, stay to my own base.

01:32:30 You said that goal structure, let's say, and that's really, in many ways, that's what you should be doing.

01:32:36 That's exactly what you should be doing.

01:32:40 Who it is that you're trying to be, the person that you want to be.

01:32:51 And I really mean want to be, I don't mean should be, even those things, those things are going to overlap.

01:32:56 It's important to distinguish between those because that's partly, and this is back.

01:33:00 So if I say, well, you're going to try to make yourself more industrious, okay, number one, specify your damn goals, because how are you going to hit something if you don't know what it is? That doesn't happen.

01:33:10 And often people won't specify their goals, too, because they don't like to specify conditions

01:33:14 for failure.

01:33:15 So if you keep yourself all vague and foggy, which is real easy, because that's...

01:33:20 as well then you fail I really don't want to know when I fail because that's

01:33:25 painful so I'll keep myself blind about when I fail

01:33:30 except you'll fail all the time then.

01:33:32 You just won't know it until you've failed so badly that you're done.

01:33:40 I would recommend that you don't let that happen.

01:33:42 So that's willful blindness, right?

01:33:43 You could have known, but you chose not to.

01:33:46 Okay, so once you get your goal structure set up,

01:33:48 you think, okay, if I could have...

01:33:50 this life looks like that might be worth living just by anxiety provoking

01:34:01 The goal is to have such that all things considered...

01:34:10 Well, then you turn down to the micro-routines.

01:34:13 It's like, okay, well, this is what I'm aiming for.

01:34:15 How does that instantiate itself day-to-day, week-to-week, month-to-month?

01:34:20 And that's where something like a schedule, Google Calendar, and stick to it with the schedule.

01:34:30 a bloody prison. That's the first thing that people do wrong. They say, well, I don't like

01:34:34 to have followers.

01:34:40 do this then i have to do this but then i just play video games because who wants to do all these

01:34:44 things that i have to do it's like wrong set the damn schedule up

01:34:51 the trick it's like okay I've got tomorrow if I was gonna set it up so it's possible day I could

01:35:00 What would it look like well then you schedule that and obviously there's a bit of responsibility that's going to go along with that because of these cents

01:35:10 upon is that at the end of the day you're not in worse shape than you were in that they have a bunch

01:35:18 of those in a row you just

01:35:20 You know, you dig yourself a hole and then you bury yourself in it.

01:35:23 It's like, sorry, that's just not a good strategy.

01:35:30 responsible location or maybe it's more than that depending on how far behind

01:35:33 you are but even that you can ask yourself okay well it's responsibilities

01:35:38 I have to schedule the day

01:35:40 things in what's the right ratio of responsibility to reward and you can ask yourself that just like

01:35:47 someone who is working for you it's like okay you gotta work tomorrow

01:35:50 Okay, so I want you to work tomorrow.

01:35:52 And you might say, okay, well, what are you going to do for me that makes it likely that I'll work for you?

01:35:57 Well, you could ask yourself that, you know.

01:36:03 I don't know if you play video games for 15 minutes, I don't know, whatever turns your craze in.

01:36:06 I don't know if you play video games for 15 minutes, I don't know, whatever turns your craze in.

01:36:07 I don't know if you play video games for 15 minutes, I don't know, whatever turns your craze in.

01:36:08 I don't know if you play video games for 15 minutes, I don't know, whatever turns your craze in.

01:36:09 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 You have to negotiate with yourself.

01:36:10 I'd rather take over there.

01:36:12 ...negotiating would like to be productive and have a good event in the schedule.

01:36:30 of zero factor C.

01:36:40 For God's sake.

01:36:50 That's one way that you could work your conscientiousness, is a plan of life you'd like to have.

01:36:54 And you do that partly by referring to social norms, that's more or less...

01:37:00 your father from the belly of the whale but the other way you do that is by having a little

01:37:04 conversation with yourself about as if you don't really know who you are because you know what you

01:37:09 like you want.

01:37:10 You won't do what you tell yourself to do.

01:37:13 Like you're a bad employee.

01:37:20 for you and when you tell yourself what to do you don't do it anyways you should fire yourself

01:37:25 and fight someone else to be but but you know my point is

01:37:30 that you have, that you're not your own servant, so to speak, you're someone that you have to

01:37:34 negotiate with, and that's present the opportunity.

01:37:40 of having a good life too and that's hard for people because they don't like themselves very much

01:37:44 so you know they're always like cracking the whip and then procrastinating and cracking the whip

01:37:55 And you know what that's like because you probably waste like six and I think we did an

01:38:01 Your time's probably worth 50 bucks, something like that.

01:38:05 But you're young, and so this is investment time.

01:38:10 you do now is going to multiply its effects in the future so so let's say it's 50 by hour which

01:38:15 is perfectly reasonable so if you waste six hours a day and you are then you're

01:38:20 wasting about $2,000 a week or about $2,000 a year.

01:38:23 So you need to know what your damn time is worth.

01:38:28 So let's say it's not $50.

01:38:30 It's 30. Whatever. Maybe it's 100. It's somewhere in that range.

01:38:34 One of the things you should be asking yourself is,

01:38:42 is no. It's like, well, maybe you should do something else with your time. You think

01:38:48 that your time's worthwhile.

01:38:50 But the funny thing about not assuming that is if you assume your time isn't worthwhile,

01:38:54 what happens is you don't just sit around sort of...

01:39:00 What you do is you suffer existentially, so that seems like a...

01:39:04 Okay, so anyways...

01:39:10 that's how you can improve your conscientiousness. Outline a goal you actually would like to hit.

01:39:16 And here's something else you can think about.

01:39:20 You're negotiating in your life.

01:39:22 You can say if you're not in an agreement, I'd like to walk away not miserable and resentful.

01:39:30 let's call that a baseline that's how you're going to negotiate with your wife or your husband

01:39:34 that's a good thing to know you want to negotiate so that you don't walk away miserable and resentful

01:39:40 Hoe komt dat voor een paar jaar?

01:39:44 Zelfs je haar of zo, dan kun je het op m'n ex.

01:39:50 It might exist in a place where you're basically hitting each other in the head repeatedly for 30 years, you go right ahead, but I wouldn't say that that's a particular good way of living, so you might say, well, the minimal...

01:40:00 for a successful negotiation is that you don't walk away resentful and angry and so that's

01:40:06 also how you know when you have something to say to someone because the rule happens

01:40:10 I mean, if you're going to walk away resentful and angry, you've got something to say.

01:40:14 It doesn't mean nothing to say.

01:40:18 But it's kind of a...

01:40:21 If I wanted to live with you for 30 years, maybe we should say, how about we walk away from our mutual negotiations, thrilled.

01:40:32 You could aim for something, you could aim for that, negotiate with your boss for a new salary, you might think, okay, you've got this damn job.

01:40:40 Nee, wat een beetje werk niet op dit minuut.

01:40:50 You'd like to have me around? I've been doing some thinking. I think if you paid me this amount of money, I'd be so thrilled to go to work that you could hardly even keep me away from here. And your boss might think, wow.

01:41:01 so thrilled to work that i can't get rid of them it's like maybe i'll well i can't give you all

01:41:06 of that i'll give you 75 maybe we can negotiate it in a year

01:41:10 Hey, good deal! Or you could be some weasley coward and go in there and snivel about how awful your life is and walk away.

01:41:20 barely able to tolerate the outcome of the negotiation

01:41:25 and it's funny because i've watched people repeatedly in my clinical

01:41:30 It's because I do, we do, we plan all the time because the rule is you're going to come and see me.

01:41:35 I'm going to try to help you figure out how to have the life that you want to have.

01:41:38 And we're going to think about that.

01:41:40 ...strategically. So you're making $1,000 a year right now.

01:41:51 Not with that attitude, that's the first thing.

01:41:53 It's like, no, that's not going to happen if you don't ask people for the damn money,

01:41:58 if you don't look for a better job, they're going to come.

01:42:00 and just show a boat full of money and he looks like, no, that's...

01:42:10 It's like, what the hell is wrong with you?

01:42:11 Nothing.

01:42:12 You have what you want.

01:42:14 You can figure out what the hell it was.

01:42:17 You know, you diligently pursued it.

01:42:20 And then maybe you wouldn't whine about being alive.

01:42:24 About being alive are dangerous to themselves and other people.

01:42:27 So you might think, I can have what I want.

01:42:30 Well figure out what it is

01:42:40 So okay conscientiousness while we talked about how you can prove that social networking. That's another big deal

01:42:45 It's one of the advantages that older people have over younger people and so

01:42:51 I'm in my 50s, roughly speaking, I know a bunch of other people who are relatively well positioned in the dominance hierarchy, and they know all sorts of people.

01:43:00 to one of them and say, you know, do you do X or do you know X? They say no, but I know

01:43:04 someone who can. And that's a huge advantage. So another thing that you want to think about

01:43:08 through life.

01:43:10 And this is schmooze, and it doesn't mean go out and impress people, that's all just complete bloody rubbish.

01:43:20 You try to surround yourself with people who are confident in multiple different dimensions and you maintain your relationships with them and that's a trading relationship too, right?

01:43:31 But it's a huge advantage, a social network is a huge advantage, and that's something extroverted people have.

01:43:40 And that's the ability to sell.

01:43:42 So another place that...

01:43:50 develop and maintain your social networks, and that also means, well, let's talk about friendships for a minute.

01:43:57 Here's how you know someone's your friend.

01:44:00 You can tell them bad news and they'll listen, they won't tell you why, you know, you're stupid and why that bad thing happened to you and how something works.

01:44:10 happened to them once and you know derailed the whole conversation you can actually tell them bad

01:44:15 news and they'll listen that's a good thing and then this is a weirder thing

01:44:20 tell them good you celebrate and that's a really good way if you have someone

01:44:29 around you

01:44:30 something that happens to you you're kind of afraid to even admit it because you know god

01:44:33 something good happened to you it's like you let that be known it will certainly be taken away

01:44:37 so you know you you come out you sort of tell

01:44:40 Tell someone half-heartedly that something good happened to you and that you will whack and then talk about, you know, the great thing that happened to them three years ago, or worse, the great thing that happened to someone that...

01:44:50 they knew years ago you know it's like go away from that person they're not helpful to you and

01:44:56 they're not helpful to themselves either and so you want to surround yourself you got to think

01:45:00 about this. You've got to surround yourself with people who want the best for the best

01:45:04 part of hanging around with weasels and losers that are trying to pull you down.

01:45:10 the fact that they're spiraling downhill as well and you know the top side of that is you don't have to have any

01:45:15 responsibility to even all whine about how wretched life is you know so that's pretty attractive.

01:45:20 I would say it's also a big, bad, medium to long-term plan, and so it's desirable to try to surround yourself with people.

01:45:30 Dank je, man.

01:45:35 Dan houden we weer in geest, toch?

01:45:40 Ingeist heeft aandelen in Shell, een man er op de vloer bij het hoofdkantoor en weet niet hoe ze er in de...

01:45:50 ...present it or say, with our life and...

01:45:54 Okay.

01:45:58 Do you think you can see it?

01:46:00 You just have your misery, I'll go off and have my life, and maybe you'll wake up at some point in the future and think that's a better way of being, because just putting up with it is all.

01:46:10 They call that enabling, right?

01:46:11 With that sort of behavior, you're providing tacit consent for it and even tacit approval.

01:46:18 It's a bad idea.

01:46:20 You have, I would say, both the right and the responsibility to surround yourself with things not the same.

01:46:30 I have to elaborate on that if you can figure out what that means.

01:46:35 Skills, that's another thing you can do if you want to increase your ability of success.

01:46:40 Every time you have an opportunity to take a new skill, do it.

01:46:48 Learn to read, read new things.

01:46:50 speak, learn how to introduce yourself, learn how to social network, learn how to go talk

01:46:55 to your boss in a manner, this is the right way to go talk to someone who supervises.

01:47:01 I see this problem, and here's the solution, and so I've come to talk to you about the problem and the solution.

01:47:07 It's like, that person is going to want to talk to you a lot.

01:47:10 It's like because the other people they're talking to are going to come and say, I've got a problem.

01:47:14 Can you do something about it?

01:47:16 It's like they don't want to do something about it.

01:47:17 They've already got 50 things to do, you know.

01:47:20 You're the person who constantly brings forth, even if they're accurate problems, you're just another...

01:47:31 problem for the people who want to give you money. That's a good rule of thumb, man. You know,

01:47:36 if someone wants to give you money, then help them do that.

01:47:40 And if they want to give you status and success, then help them do that, right?

01:47:43 And you do that in part by bringing them solutions, and partly you do that by developing your skills.

01:47:48 And so if things aren't going very well...

01:47:50 well for you. This is also a good way of evaluating an opportunity. Should you take an opportunity?

01:47:55 Well, here's the rule. Take the opportunity.

01:48:00 Choose something that you can use for other opportunities from Will.

01:48:14 I told you so.

01:48:28 Grazie.

01:48:32 You are the place of suffering, you are the place of conscious suffering, that's the center of the world.

01:48:55 This is where you want to be.

01:48:56 You want to be in the middle.

01:48:57 You want every...

01:49:01 Every bloody time you're offered an opportunity, take it and develop your skills.

01:49:08 That's better than well.

01:49:13 What you have when someone takes all your money, that's real well.

01:49:18 So the way that you build up that.

01:49:25 All the time, especially with the kind of technology that keeps people out of access.

01:49:31 you want whatever you want so what a good deal that is

01:49:34 so there's easy proof pain that you can pick

01:49:41 For example, let's say you have to make your middle of the normal distribution, then you'll lose your job.

01:49:46 Okay, and so, let's say...

01:49:55 mass layoffs in your company, so it has nothing to do with you, it's fundamental, it's just

01:49:59 full of control.

01:50:04 You're crunching at this, you're helping yourself pretty hard, so you're going to get, and especially if you're up so high.

01:50:22 your geographically located somewhere that makes it a little bit difficult, or so on and so forth, you know.

01:50:26 So, but, you literally draw, and then you start getting grass.

01:50:35 for a job, but also maybe starts to stress on your family.

01:50:50 and you're starting to isolate yourself

01:50:54 and that's going to make you more depressed

01:50:56 and that's going to keep you even further away from your friends

01:50:58 and that's going to decrease a lot

01:51:03 another job, and then maybe you want to add a bit of a drinking problem to that just for

01:51:08 fun.

01:51:15 Lots of times people conceptualize, let's say, you're an employee.

01:51:27 It's sort of like, there's something going wrong.

01:51:33 When you're depressed, it isn't obvious at all that the problem is in your head.

01:51:37 You know what I mean?

01:51:39 It isn't even obvious.

01:51:43 to take you out if you're unemployed and you're under a company service and you're married.

01:51:53 you're less likely to be motivated to look for a job.

01:51:56 You can sort of think about that as a depressive spiral,

01:51:58 but you can also think of it.

01:52:05 to the ground. You can't even conceptualize psychological disorders that way.

01:52:17 It's a very good example of that.

01:52:22 They just, it's a diagnosis for a client in serious trouble.

01:52:42 Their psychological inadequacies, such as they might be, are interfering with their ability to recover or maybe even serve as priests.

01:52:58 inside you

01:53:05 and its structure as if it was like a soul.

01:53:11 there's some real utility here the individual demarcated from the community

01:53:15 you could be set up in a healthy manner or a non-healthy manner

01:53:19 the problem with that is

01:53:25 It's very important that we can separate.

01:53:30 You might say, well, is your child more you than your arm?

01:53:37 You know, you think it's pretty obvious.

01:53:44 It's so obvious I think Vinny's an arm than a child.

01:53:51 The boundaries are not, the boundaries are located, are not precisely isomorphic with the outline of your body, it's not that simple at all, and so you're invented in all sorts of...

01:54:03 elevating because the other thing that happens is that well let's say I've never traded with anyone

01:54:10 And I say, well, do you want to trade?

01:54:16 That's what you have to take my word for.

01:54:18 That's not very good.

01:54:21 You might say instead, well, here's auto-evaluated, so it's still stuck with tape.

01:54:30 That's a bad problem. You'll see that if you ever try to sell a product in the marketplaces.

01:54:34 If the product is new and it's complex, then you're forcing the product...

01:54:50 called social proof, who else have you traded with, and if the answer is zero, then they're going to say,

01:55:00 I've got these other people over here who already traded with a bunch of people,

01:55:04 and therefore the risk is lower in part because, let's say, I have a supervisor.

01:55:11 make a decision as it will not hate me for making the decision. It's not that my primary concern

01:55:18 is to make the best decision.

01:56:02 Doing that sort of thing.

01:56:04 Well, I think part of the reason that people spiral downhill into zero is because.

01:56:17 back with this

01:56:24 Send a message to us, send out the message.

01:56:32 But again, you get this hollow Lego curve.

01:56:35 It can be deafening, but it can also destroy the system.

01:56:37 It will keep amplifying upward.

01:56:41 For example, that's a positive feedback loop.

01:56:44 Positive feedback loop can spiral you upward

01:56:46 or can spiral you downward.

01:56:48 And so, a merge?

01:56:52 for the feedback we have already created the same three people.

01:57:01 good things and so I'll trade with you within that then you're even more likely to trade with me and

01:57:06 it's like things start to spiral up

01:57:13 And one of the things you guys are going to be asking for yourself is to be mature, because what's happening is that

01:57:18 Incomitability is increasing.

01:57:22 The first thing you need to know is that that's what income does.

01:57:26 So it's not like you need an explanation for it.

01:57:28 This is the explanation.

01:57:32 It's not in a trading game, it's a logical conclusion, one person ends up with all the money and everyone else ends up with zero.

01:57:44 Thank you.

01:57:57 The next best predictor of life-hunting.

01:58:00 Success is conscientiousness.

01:58:01 Well, so...

01:58:10 So the question is, well, what can you do about your industriousness?

01:58:13 And the answer to that is, well, that's kind of rough too,

01:58:16 because there's a strong genetic component.

01:58:19 But...

01:58:20 You can work on micro habits with regards to your conscientiousness.

01:58:24 And I think the best micro habits is this party.

01:58:30 thing you can do, set up some aims for yourself to actually value.

01:58:40 And basically, it does a situational analysis of, it helps you do a situational analysis more than a psychological analysis.

01:58:50 something like well put some effort into your life you need to be motivated to do

01:58:56 that and so what are the potential sources

01:59:00 think about their business in the...

01:59:10 engage in creative activity if you're high in neuroticism you want to secure it okay so those

01:59:15 are all sources of potential motivation that you could draw that you could tailor to your own

01:59:20 you know your own personality but then there are dimensions that you want to consider your life

01:59:24 across so we ask people about well you have your life the way you wanted it in three to five years

01:59:30 If you were taking care of yourself properly, what would you want from your friendships?

01:59:34 What do you want from your inter-relationship?

01:59:36 How to your family?

01:59:38 What do you want for your career?

01:59:40 outside of your job and how are you going to regulate your mental and physical health and maybe

01:59:46 also your drug and alcohol use because that's a good place.

01:59:59 So maybe

02:00:02 what you were like, what you associate.

02:00:10 and then you break down the gold into microprocesses that you can implement.

02:00:14 Microprocesses become rewarding in proportion in relation to their...

02:00:20 association with the goal, and the reward system, you know, reward system, and that's moving forward.

02:00:30 it works is that it works better when it can see you moving towards a valued goal.

02:00:40 of that. Better have a valued goal, because otherwise you can't get any positive motivation

02:00:44 working out. So the more valuable the goal, in principle, the more the micro-process...

02:00:50 associate with that goal start to take on a

02:01:00 is you specify your way from your careful to fail as well as excited

02:01:10 Ik heb echt zin in mijn bereik van wenselijke repulsie.

02:01:20 Oh, if that could happen as a consequence of my efforts, it would clearly be worthwhile.

02:01:26 Because the question is, why do something?

02:01:30 You just sit there and you don't do anything. That's real easy. The question is, why would you ever do anything?

02:01:36 You determine by sudden...

02:01:42 well, where should you look for worthwhile things?

02:01:44 And one would be, well, you could consult your own temperament,

02:01:47 and that would be, well, you kind of look at...

02:01:50 what it is that people accrue that's valuable across the lifespan.

02:01:54 So some of the subcomponents of human existence...

02:02:00 I already did that.

02:02:02 You need a family.

02:02:03 You need friends.

02:02:03 Like, you don't need to have all these things, but you better have most of them.

02:02:07 Family, friends, career, educational goals.

02:02:10 plans for you know time outside of work those are that's what life is about

02:02:20 Oeh, kan ik zitten als, hè.

02:02:30 But once you set up that culture, let's say, and that's really, in many ways, that's what you should be doing.

02:02:37 That's exactly what you should be trying to figure out.

02:02:40 Who it is that you're trying to be, and as a means of building that person.

02:02:50 ...omdat het er ook tegen een samenvatting is bij voorwerp dingen ofzo, van die dagelijks, hoe je nu getrachtig bent, dat is gezet.

02:03:00 It's back down to the microphone, so if I say, well, you're going to try to make yourself more industrious, okay, number one, specify your damn goals, sorry, you're going to hit something if you don't know what it is.

02:03:12 goals too because they don't specify conditions for

02:03:20 as well then I really don't want to know when I fail because that's painful so I'll keep myself

02:03:28 blind about when I fail

02:03:30 That's fine, except you fail all the time, then.

02:03:32 You just won't know it until you've failed so badly that you're done.

02:03:40 I would recommend that you don't let that happen.

02:03:47 Okay, so once you get your goal structure set up,

02:03:49 you think, okay.

02:03:51 Looks like that might give me some suffering and loss involved.

02:04:00 Obviously, the goal is to have a vision for your life such that, all things considered,

02:04:16 Extantiate itself

02:04:20 where something like a schedule

02:04:30 It's not a bloody prison. That's the first thing that people do wrong. They say, well, I don't like to follow the schedule. It's like, well, where are you setting up? Well, I should, I have.

02:04:40 I have to do this than I have to do this and schedule up.

02:04:50 So that you have the day you want.

02:04:52 That's the trick.

02:04:53 It's like, okay, I've got tomorrow.

02:04:54 If I was going to set it up so the best possible day I could have.

02:05:00 speaking what would it look like and obviously there's a bit of

02:05:05 responsibility that's going to go any sense one of the things

02:05:10 going to insist upon is that at the end of the day, that's at the end of the day, that's a stupid day.

02:05:20 Ik moet het opschalen, dus ik zal de computers moeten gebruiken.

02:05:24 Die typen allemaal partially de solutions into my house.

02:05:30 ...of architecture.

02:05:34 En dan...

02:05:36 ...ja, pressie van rekenkracht en wat tijd.

02:05:40 I think it's all about with this laptop.

02:05:45 Is it finite?

02:05:50 Ja, ik weet niet hoe ze staan, want ze werden mij eens op een andere volgordrijf komen, maar ik ga het bekijken.

02:05:57 Op het moment dat ik het af heb...

02:06:01 Dan moet het binnen die window gespapt zijn.

02:06:04 Dus oké, misschien heb ik een paar computers nodig.

02:06:07 Het server weg, je zou hem meteen...

02:06:10 Daar gaat het nog over.

02:06:14 Volgens mij is dat.

02:06:20 and then you look at that day, that'd be good.

02:06:23 Great.

02:06:30 That beats the L out of zero.

02:06:32 Right, and if you can, even with 50% accuracy.

02:06:40 percent for going safe or because

02:06:50 So that's one way that you could work on your conscientiousness.

02:06:52 Plan a life you'd like to have.

02:06:55 And you do that partly by referring to social norms.

02:07:01 the belly of the whale but that is by having a conversation with yourself about if you don't

02:07:08 really know who you are because you know what

02:07:10 You won't do what you're told. You won't do what you tell yourself to do.

02:07:20 You know, for you. You don't know what you want to do, and then when you tell yourself what to do, you don't do it anyways.

02:07:25 You should fire yourself and find someone else to meet.

02:07:28 Gargoyle.

02:07:28 But, you know, my...

02:07:30 The point is that you have to understand that you're not your own servant, so to speak.

02:07:34 You have to negotiate with them.

02:07:40 the opportunity of having a good life too, and that's hard for people because they don't like themselves very much, so you know they're always like cracking the wind and procrastinating and cracking the wind.

02:07:50 Alle mensen hebben dit gedaan toch?

02:08:02 Your time's probably worth 50 bucks an hour, something like that.

02:08:05 But you're young, and so this is investment.

02:08:11 It's going to multiply its effects in the future, so let's say it's 50, so if you waste 6 dollars a day, then you are...

02:08:20 You're wasting about $2,000 a week or about $100,000 a year.

02:08:23 So that's what it's costing you every hour.

02:08:27 And you need to know what your damn time is worth.

02:08:30 It's not 50 bucks, it's 30. Maybe it's 100. It's somewhere in that range.

02:08:34 And then I would assess the support now.

02:08:36 Or the codex.

02:08:40 Ja agent, 60 seconden zelf had gekozen.

02:08:47 Zelf.

02:08:50 Wits op 2-1-Oren, ITC Consensus Deadline, daar maakt het wel heel waagefuck uit.

02:09:00 Bliss what you do is you suffer existentially so that seems like a stupid so

02:09:10 as I can tell, that's how you can improve your conscientiousness. Hit an outline goal

02:09:14 that you actually would like to hit. Even better, here's something else you can do.

02:09:20 Think about when you're negotiating in your life, you could say if you're kind of pessimistic, you could say, I'd like to walk away resentful.

02:09:30 Okay, let's call that a baseline.

02:09:32 Negotiate with your wife or your husband.

02:09:34 That's a good thing to know.

02:09:37 Negotiate so that you don't walk...

02:09:40 Ah, screw the other one, screw the other one, screw the other one.

02:09:50 If you want to exist in a place where you're basically hitting each other in the head repeatedly for 30 years, you go right ahead.

02:09:55 But you might say, well, but me...

02:10:01 negotiation in a way resentful in it.

02:10:10 has to be, we've got something to say.

02:10:23 for 30 years, maybe we should say, how about we walk away from our mutual negotiations for real?

02:10:30 We weten dat diegene letterlijk om te jou is, om te tasten, is waar ze over te hebben.

02:10:40 How much would I have to be paid so I'd be so bloody excited to go to work, I could hardly stand it.

02:10:45 Well, you could at least know what that number is. Then you could go there and say, well, look...

02:10:52 En dan is het bij een kort...

02:11:00 Dank u wel.

02:11:02 Dank u wel.

02:11:04 Het telefoon.

02:11:06 Iedereen die hier toegang heeft en dit hoort.

02:11:10 Dan heb je een probleem door die mensen die de hele tijd zo...

02:11:16 Ja precies.

02:11:20 barely able to tolerate the outcome of the negotiation.

02:11:24 It's like, and it's funny.

02:11:32 We do, we can all the time, because the rule is, you're going to come and see me, I'm going to try to help you figure out how to have the life that you want to have.

02:11:40 that strategically. So making $50,000 a year right now.

02:11:52 That's the first thing it's like no, that's not gonna happen if you if you don't apple for the damn money if you don't look for a better job

02:12:01 Shuffle a boat full of money at you. It's like no, that's not going to happen

02:12:14 what you want. If you could figure out what the hell it was, he pursued it.

02:12:20 So then maybe you wouldn't whine about being alive. That'd be good because people who whine about being alive are dangerous to themselves and other people.

02:12:27 So you might think I can have what I want.

02:12:30 but you better well figure out what it is.

02:12:32 And you can't just wait for the, like,

02:12:34 have what you want fairy to show up at your doorstep and grant it,

02:12:37 because obviously that's not going to happen.

02:12:40 So, okay. Conscientiousness. What about how you can prove that. Social networking. That's another big deal. It's one of the advantages that older people have over younger people.

02:12:50 So, for example, I'm in my 50s from dominance hierarchy, and they know all sorts of people.

02:13:00 And so when I go to one of them and say, you know, can you do X or do you know X, they say no, but I know someone who can.

02:13:06 And that's a huge advantage.

02:13:07 So another thing you want to think about.

02:13:13 ability to network and that doesn't mean schmooze and it doesn't mean go out and impress people that's all just complete bloody rubbish

02:13:20 You try to surround yourself with people who are confident in multiple different dimensions

02:13:25 and you maintain your relationships with them, and that's a trading relationship.

02:13:32 It's a huge advantage. A social network is a huge advantage.

02:13:40 along with the ability to sell, so another place that you can offer for the good.

02:13:50 Consciously and maintain your social networks, and that also means, well, let's talk about friendships for a minute.

02:13:57 That's how you know if someone's your friend.

02:14:00 You can tell them bad news, they'll listen.

02:14:10 something worse happened to them once, and you know, derailed the whole conversation.

02:14:14 Actually tell them bad news.

02:14:20 You can tell them good news to help you celebrate.

02:14:24 And that's a really good way of...

02:14:30 If something good happens to you, you're kind of afraid, even if you're calling something good,

02:14:37 it'll certainly be taken.

02:14:40 You sort of tell someone, happily, that something good happened to you, and then talk about, you know, the great thing that happened to them three years ago, or worse, the great thing that happened to them.

02:14:50 someone that they knew three years ago you know it's like go away from that

02:14:54 person they're not helpful to you to themselves either and so you want to

02:14:59 surround you

02:15:00 about this. You've got to surround yourself with people who want the best.

02:15:10 to justify the fact that they're spiraling downhill as well.

02:15:12 And, you know, the upside of that is you don't have to have any responsibility.

02:15:16 You can all whine about how red your life is.

02:15:18 Well, that's where you're dropping.

02:15:20 But I would say it's also a medium to long to plan, and so it's, it's acceptable and desirable to try to surround yourself.

02:15:30 Namelijk alleen nog kijken hoe lang dat duurt en in ieder geval komt zitten ervoor nodig heb ik nog wel

02:15:40 They don't fit into that category.

02:15:41 It's like...

02:15:50 towards a better future

02:16:00 to do is say you just have your

02:16:10 qui te li sono

02:16:20 Het is een slechte idee. Ik zou zeggen dat de responsabiliteit om zich met de mensen te beschermen is goed voor de beste part.

02:16:32 have to elaborate on that you can figure out what that means skills that's another thing you

02:16:37 can do if you want to increase your probability of success

02:16:40 Every time you have an opportunity, to take an opportunity, that would provide you with a new skill. Do it, right? Learn to read. Read new.

02:16:50 things, learn to public speak, learn how to introduce yourself to people, learn how to

02:16:53 social network, learn how to go talk to your boss, in a matter, this is the right way to

02:16:59 go talk to someone.

02:17:00 supervising you. I see this problem and here's the solution and so I come to talk to you about the

02:17:06 problem and the solution. It's like that person is going to want to talk to you.

02:17:10 you a lot. It's like, because the other people they're talking to you are going to come and say,

02:17:13 I've got a problem. Can you do something about it? It's like, they don't want to do something

02:17:17 about it. They've only got 50 things to do.

02:17:20 And also if you're the person who constantly brings forth a problem, even if they're accurate

02:17:24 problems, is why do they think I don't want to have you around?

02:17:30 That's another problem. Don't be a problem for the people who want to give you money.

02:17:34 That's a good thing, man.

02:17:36 You know, if someone wants to give you money, then help them do that.

02:17:40 that and if they want to give you status and success then help them do that right

02:17:44 and you do that in part by bringing them solutions and partly you do that by developing your skills and so

02:17:49 if things are

02:17:50 aren't going very well for you, this is also a good way of evaluating an opportunity.

02:17:54 Should you take an opportunity? Well, here's the rule.

02:17:58 Take the opportunity if...

02:18:00 It will teach you something that you can use for other opportunities, because then even if it fails, which you probably will, it doesn't matter because you accrued something of value.

02:18:10 bring forward to the next situation. So there's this old union idea that I told you about.

02:18:20 The cathedral is made in the form of cross, and the cross signifies the center of the world, and the dome signifies the sky, and so right below the dome at the center of the world, and it's a cross.

02:18:30 because the cross is the place of suffering, so that's the center of the world,

02:18:33 because that's what you are, you're the place of suffering,

02:18:35 you're the place of conscious suffering, that's the world.

02:18:38 Live.

02:18:40 inscribed on the floor as a maize and you have this big maize and it's a mandela and there's

02:18:45 a kind of a flower shape right in the center

02:18:50 And what you're doing is walking in the maze, and you walk all four quadrants, and you get to the middle,

02:18:55 which is where you want to be. You want to be in the middle. Well, how do you get there?

02:19:00 walk everywhere. And what does that mean? It means every bloody time you're offered

02:19:03 an opportunity, take it and develop your skills.

02:19:10 Well, by the way, one takes all your money.

02:19:20 up that sort of wealth is you turn yourself into someone who's been in multiple directions all the

02:19:26 time

02:19:31 can learn anything you want, whatever you want. So, what a good deal that is, man. So, there's

02:19:37 easy fruit hanging that you can pick, and I would recommend.

02:19:40 that you do that. So here's an example. Let's say you're not doing too bad, so maybe you're

02:19:44 in the middle of the normal distribution, then you lose your job. Okay, and so...

02:19:50 and let's say you're a conscientious person and we can say just for the same market that you can do with you.

02:20:00 Look, a draw, basically.

02:20:01 But then what happens to you?

02:20:02 Well, you're conscientious.

02:20:05 You're going to...

02:20:10 you're also hired in neuroticism, it's going to depress you to lose your thought.

02:20:13 And maybe you're in a situation where you just, for one reason or another,

02:20:16 you don't have that many other opportunities.

02:20:18 Now, maybe you should have looked for them, but maybe you're...

02:20:20 or in a depressed strata of the economy, or you're geographically located somewhere that makes moving difficult, or so on and so forth, you know.

02:20:27 So, but, you, and then you start to get.

02:20:30 depressed because well then as you start to get depressed you know it

02:20:34 decreases the problem for a job but also maybe starts to put stress on your family

02:20:40 and also starts to decrease the probability that you're going to engage positive social

02:20:44 interest unemployed.

02:20:50 suffer and you're starting to isolate yourself from your friends and then of course as your

02:20:53 marriage suffers and the stress builds up then that's going to make you more depressed and

02:20:57 that's going to keep you even farther away from your friends

02:21:00 decrease the likelihood that you're going to have enough positive emotion and enthusiasm to look for

02:21:04 another job and then you know maybe you want to add a bit of a drinking problem to that just for fun

02:21:09 that you can see

02:21:10 that you can get a spiral going that's just taking you down, right?

02:21:13 And there's all sorts of things.

02:21:15 Because lots of times people conceptualize, let's say, you know,

02:21:19 You're.

02:21:21 to counseling and there's some

02:21:30 gone wrong with your psychological structure. It's like, if you're unemployed and you're depressed,

02:21:35 it isn't obvious at all that the problem is in your head. You know what I mean? It doesn't...

02:21:40 It isn't even obvious that it's a psychological problem.

02:21:42 It's just a problem.

02:21:44 That problems can take you out.

02:21:46 And so the-

02:21:50 and your marriage is starting to shake and you're isolating yourself from your friends

02:21:53 and you're less likely to be moved for a job, you can sort of think about that as a depressive

02:21:58 spiral, but you can also

02:22:00 think of it as a conspiracy in some sense of external forces that don't tend to

02:22:07 conceptualize psychological disorders

02:22:10 way, but we should, because lots of times we are suffering from something that you could

02:22:15 describe in psychological terms, depression.

02:22:20 It isn't obvious that there's something wrong with them psychologically.

02:22:22 Often, they just are in trouble.

02:22:25 And there isn't a category in psychological diagnosis for client in...

02:22:30 serious trouble, but my experience has been, come to see me, come to see me, because something's

02:22:38 gone wrong with their life.

02:22:40 because they have a psychological problem now you can say well their psychological inadequacies

02:22:45 such as they might be are interfering with their ability to recover or maybe even serve

02:22:50 precursors to, you know, increase the probability of the catastrophe, but it's still not exactly

02:22:55 the appropriate way to conceptualize it, and, you know, because you're, you, it's...

02:23:00 As a personality psychologist and as a clinical theory, most of what I've talked to you guys about is your psyche and its structure as if it was like a...

02:23:10 There's some real utility in that. You're an individual demarcated from the community.

02:23:16 You can be set up in a healthy manner or a non-healthy manner.

02:23:20 The problem with that is that you're not just an individual, you're connected to all these external needs to separate them from you.

02:23:30 You know, like you might say, well, once you become a parent, it's like, is your child more you than your arm?

02:23:40 The parts of you that are physically linked are more key to you, you as an entity, but

02:23:44 as by no means obvious, I think many people would sacrifice an arm than a child.

02:23:50 And so your boundaries are not, where your boundaries are located are not precisely isomorphic with the outline of your body.

02:23:58 It's not that simple at all.

02:23:59 And so you're in bed.

02:24:00 in all sorts of network rapidly or elevate you because the other thing that happens is that let's say I've never traded with anyone

02:24:10 I go up to someone and I say, well, do you want to trade?

02:24:12 And they say, well, how can I trust you?

02:24:16 And the answer to that is, well, you have to take my word for it.

02:24:18 That's not, that's.

02:24:20 not a very good argument and you might say instead well here's what I have to

02:24:24 offer and you can evaluate it but the person is likely to say well I don't

02:24:28 know how to evaluate it so I'm still

02:24:31 bad problem and you'll see that if you ever try to sell a product in the

02:24:34 marketplaces if you don't product is new and it's complex

02:24:40 You're forcing the person that wants to buy it to evaluate it, and then you're forcing them to take the risk of being wrong, as well as the time it would take to evaluate it.

02:24:48 And they don't like that.

02:24:50 is what's often called social proof, which is, OK,

02:24:53 well, you want to trade with me, who else have you traded with?

02:24:55 And if the answer is 0, then they are going to say, well,

02:24:59 you're next to me.

02:25:00 I'm an interesting person and all that, but I've got these other people over here who've already traded with a bunch of people,

02:25:05 and therefore, risk is lower in part because, let's say, I have...

02:25:10 supervisor and I'm going to make a decision and my primary concern is that my supervisor will not

02:25:15 hate me for making the decision. It's not that my primary concern is to make the best decision.

02:25:20 It's not the same thing.

02:25:22 It's that I want to make a decision that I'm not going to get in trouble for.

02:25:26 Okay, so how do I do that? Because I need a post-hoc justification.

02:25:30 buy something from you and it turns out to be terrible. And I get called for it, called

02:25:35 on the table for it. And what do I say? I say, well, you know, that person was buying

02:25:40 and that person was buying from him, and that person was buying from him.

02:25:43 Like, all these other people were doing the same thing,

02:25:46 so it's not like the error is localized in me, and that's often a very...

02:25:52 But if the answer is, well, you know, I evaluated it, took a risk, Sonny, to take a risk, it's like, I'll open the door with you, Sonny.

02:26:00 That's an indication that you're not capable of doing that sort of thing.

02:26:04 So I think part of the reason that people spiral downhill into zero is...

02:26:10 because a positive feedback loop is a loop that increases the probability that the loop will

02:26:15 continue, right? A positive feedback loop is, you've experienced this when you hear

02:26:20 microphone feedback in an amplified system.

02:26:25 Sends a message to the speakers and then the speakers.

02:26:30 and then amplified again and you get this howling occur, which can be deafening, but can also destroy the system because it will keep amplifying.

02:26:40 upward until the speakers blow, for example.

02:26:42 Lots of positive feedback, Luke Sparrow, and now it's sold.

02:26:50 A virtuous circle, a virtuous positive, is when, well, I've traded with him, and I've traded with him, and I've traded with him.

02:26:57 And now I can say to you, I've traded with these three.

02:27:00 people talk to them and they say good things and so then you say well I'll trade with you and

02:27:04 because of that then you're even more likely to trade with me and it's like the thing starts to

02:27:09 spiral uphill

02:27:10 And it does that, I think, in a non-linear form.

02:27:13 And so, because one of the things you guys

02:27:15 are going to be asking yourself as you mature,

02:27:17 because what's happening is that income inequality

02:27:20 increasing right and you might ask well why that why is that the first thing you

02:27:23 need to know is that that's what income does so it's not like you need an

02:27:28 explanation for it that this is

02:27:30 explanation. It's like a natural rule. If you run a trading game to its logical

02:27:34 conclusion, one person ends up with all the money and one else ends up with zero.

02:27:43 But this is not what I'm doing.

02:27:58 The next best predictor...

02:28:00 of lifetime success is conscientiousness.

02:28:10 So the question is, well, what can you do about that is, well, that's kind of rough, too, because there's strong components.

02:28:20 can work on micro habits with regards to your conscientiousness and I think the best micro habits this is partly to do with

02:28:30 think the best thing you can do with regards to your conscientiousness is to set up some

02:28:34 aims for yourself, goals that you actually value.

02:28:41 It does a situational analysis of, it helps you do a situational analysis of your life

02:28:46 more than a psychological analysis, I would say.

02:28:50 questions are something like, you have to put some effort into your life to be motivated

02:28:56 to do that.

02:28:57 And so what are the potential sources of motivation?

02:29:08 Well, you want to win.

02:29:12 activity if you're high neuroticism you want security okay so those are all

02:29:16 sources of potential motivation that you could draw on that you could tailor to

02:29:20 your own personality, but then there are dimensions that you want to consider your life across.

02:29:25 And so we ask people about...

02:29:30 five years if you were taking care of yourself properly you know from your

02:29:34 friendships when you want from your intimate relationship how would you like

02:29:37 to structure your family what do you want for your career

02:29:41 outside of your job you're going to regulate your mental physical maybe also your drug because that's

02:29:50 It's a good place to auger down, you know, because alcohol is...

02:29:52 I don't know if people don't get it, but this is...

02:30:00 Het is een hele maatschappij met een hoog-laag, opervanneerde mensen met verschillende religieën.

02:30:10 and then you break down the goal into microprocesses that you can implement,

02:30:15 the microprocesses become rewarding in proportion in relation to their...

02:30:20 causal association with the gold, and that tangles in your incentive-reward system.

02:30:26 You know, we talked about the dopaminergic incentive-reward system, and that's the thing

02:30:29 that keeps you...

02:30:30 moving forward. And the way it works is that it works better if it can see you moving towards

02:30:38 a valued goal.

02:30:40 what's the implication of that better have a valued goal because otherwise you can't get any

02:30:44 positive motivation working out so the more valuable the goal in principle the more the micro

02:30:50 processes associated with that goal start to take on a positive charge and so what that means is

02:30:55 well you get ready to go and so as far

02:31:00 As far as I can tell, what you do is you specify your long-term ideal, and you also specify a place you want to stay the hell away from so that you're terrified to fail as well as...

02:31:10 that's also useful you specify your goal you do that you do that in some sense as a unique

02:31:18 individual you want you want to specify

02:31:20 that make you say, what could happen as a consequence of my efforts, it would clearly be worthwhile.

02:31:26 Because the question always is, why do something?

02:31:31 you don't do anything. That's really easy. The question is, why would you ever do anything?

02:31:36 And the answer to that has to be because you've determined by some needs that it's...

02:31:40 worthwhile well where should you look for worthwhile things and one would be

02:31:45 well you consult your own temperament and the other would be well you kind of

02:31:49 look

02:31:51 that people accrue that's valuable across the lifespan.

02:31:57 Structural analysis of the subcomponents.

02:32:00 of human existence, and I already did that.

02:32:02 You need a family, you need friends.

02:32:04 Like, you don't need to have all these things,

02:32:06 but you better have most of them.

02:32:07 Family, friends, career, educational goals.

02:32:10 goals, plans for time outside of work, attention to your mental and physical health, et cetera.

02:32:16 That's what life is about.

02:32:20 any of those things, well, then all you've got left is a real suffering, so that's a bad

02:32:26 thing for you.

02:32:28 So...

02:32:30 So once you set up that goal structure,

02:32:33 let's say that's really, in many ways,

02:32:35 that's what you should be doing at universities.

02:32:38 That's exactly what you should be doing,

02:32:39 is trying to figure out what you're doing.

02:32:40 Who it is that you're trying to beat, right, and you aim at them and then you use everything you learn as a means of building that.

02:32:50 person that you want to be. And I really mean want to be, and I don't mean should be, even those things, those things are going to overlap. And it's important to distinguish between those, because that's...

02:33:00 And this is back down to the micro-reaching analysis, so as I say, when you're going to try to make yourself more industrious, okay, number one, specify your damn goals, because how are you going to hit something if you don't know what it is?

02:33:10 That isn't going to happen.

02:33:11 People won't specify their goals too because they don't like to specify conditions for failure.

02:33:16 So if you keep yourself all vague and foggy...

02:33:20 because that's just a matter of not doing as well,

02:33:22 then you don't know when you fail.

02:33:24 And people might say, well, I really don't want to know when I fail

02:33:26 because that's painful, so I'll keep myself blind about when I fail.

02:33:30 I failed, that's fine, except you'll fail all the time then.

02:33:33 You just won't know it until you've failed so badly that you're done.

02:33:37 And that can easily happen by the time you're 40.

02:33:40 so so i would recommend that you don't let that happen because that's willful blindness right you

02:33:45 could have known but you chose not to okay so once you get your goal structure set up

02:33:50 You think, okay, if I could have this life, it looks like that might be worth living, despite the fact that it's going to be, you know, anxiety-provoking and threatening, and there's going to be some suffering and loss involved.

02:34:00 and all of that, obviously, for your life, such that all things considered, that justifies your effort.

02:34:10 So then what do you do?

02:34:12 Well then, then you turn down to my mom.

02:34:14 It's like okay, well this is what I'm aiming for.

02:34:16 How does that instantiate itself?

02:34:18 I hope that that goes there.

02:34:20 month to month and that's where something like a schedule

00:00:00 He said, well, I don't like to have a follow-up schedule.

00:00:02 Where are you setting up?

00:00:05 Well, I have to.

00:00:10 Because who wants to do all these things that I have to do?

00:00:13 It's like, wrong.

00:00:14 Set the damn schedule up.

00:00:16 So that you have the days, the trick.

00:00:19 It's like...

00:00:20 Okay, I've got tomorrow. If I was going to set it up so it was the best possible day I could have, quickly speaking...

00:00:30 Schedule that, and obviously there's a bit of responsibility that's going to go along with that,

00:00:34 because if you have any sense, one of the things that you're going to insist upon is that at the end of the day,

00:00:39 you're not in...

00:00:40 You were in the worst shape than you were, than at the danger self a whole.

00:00:50 It's like, sorry, that's just not a good strategy.

00:00:52 It's a bad strategy.

00:00:54 So maybe 20% of your day has to be responsibility and obligation.

00:00:58 Or maybe it's more than that, depending...

00:01:00 how far behind you are but even that you can you can ask yourself okay well I've

00:01:04 got these responsibilities I have to schedule the damn things in what's the

00:01:08 right ratio of response

00:01:10 Responsibility to reward and you can ask yourself that just like you negotiate with someone who is working for you. It's like

00:01:20 Okay, so I want you to work tomorrow, and you might say, okay, well, what are you going to do for me that makes it likely that I'll work for you?

00:01:28 Well, you can ask yourself that, you know.

00:01:30 Maybe you do an hour of responsibility and then you play a video game for 15 minutes.

00:01:35 I don't know, whatever turns your crank, man.

00:01:37 But, you know, you have to negotiate with yourself.

00:01:40 and not tyrannize yourself.

00:01:42 Like you're negotiating with someone that you care for,

00:01:45 that you would like to be productive and have a good life.

00:01:48 And that's how you make the schedule.

00:01:50 And then you look at the day and you think, well, if I had that day, that'd be good.

00:01:53 Great.

00:01:54 Useless and horrible.

00:01:57 With about 70% accuracy.

00:02:00 And this trap also was used for some...

00:02:10 Because you're going to hit that to where things start to look back positively and spiral you upward.

00:02:17 Just from the...

00:02:20 So that's one way that you can work on your conscientiousness, plan a life you'd like to have, and you do that partly by referring to social norms.

00:02:30 or less rescuing your father from the belly of the whale but the way other way

00:02:33 you do that is by having a little conversation with yourself about as if

00:02:37 you don't really know who you are because you know what

00:02:40 you like, you won't do what you're told, you won't do what you tell yourself to do.

00:02:43 It's like you're a bad employee and a worse boss and both of those work.

00:02:50 you know, for you. You don't know what you want to do, and then when you tell yourself what to do,

00:02:54 you don't do it anyway. So you should fire yourself and find someone else to be. But,

00:02:58 but, you know, my...

00:03:00 Point is, is that you have to understand that you're not your own servant, so to speak.

00:03:04 You're someone that you have to negotiate with, and that's...

00:03:10 the opportunity of having a good life too and that's hard for people because they don't like

00:03:14 themselves very much so you know they're always like cracking the whip and then procrastinating

00:03:20 the whip but then procrastinating and it's like god so boring and such a pathetic way of spending your

00:03:25 time and you know what that's like because you probably waste like six hours a day and I think

00:03:30 I'll make calculations about that a while back, right?

00:03:32 Your time's probably worth 50 bucks an hour, something like that.

00:03:35 You're not getting paid that now, but you're young, and so this is investment.

00:03:41 what you do now is going to multiply its effects in the future.

00:03:44 So let's say it's 50 bucks an hour, which is perfectly reasonable.

00:03:47 So if you waste six hours a day, and you are...

00:03:50 then you're wasting about $2,000 a week or about $100,000 a year.

00:03:53 So, like, go ahead, but that's what it's costing you every hour.

00:03:57 And you need to know what your damn time is worth.

00:03:59 So let's say...

00:04:00 It's not 50 bucks. It's 30. Whatever. Maybe it's 100. It's somewhere in that range.

00:04:05 One of the things you should be asking yourself is, when you spend an hour, was that 12?

00:04:10 I paid someone 50 bucks to have had that out and if the answer is no it's like well

00:04:14 maybe you should do something else with your time and it depends on whether or

00:04:18 not you think that your time is worthwhile

00:04:20 But the funny thing about not assuming that is if you assume your time isn't worthwhile

00:04:24 What happens is you don't just sit around sort of randomly in a state of responsibility

00:04:30 bliss what you do is you suffer existentially and so that seems like a stupid solution so okay so anyways

00:04:40 as i can tell that's how you can improve your conscientiousness hit it you know even better

00:04:48 here's something else you can

00:04:50 think about when you're negotiating in your life.

00:04:52 You could say, if you're kind of pessimistic,

00:04:54 you could say, well, we have to negotiate an agreement.

00:04:56 I'd like to walk away not miserable and resentful.

00:05:00 Okay, let's call that a baseline, and that's how you're going to negotiate with your wife or your husband.

00:05:05 That's a good thing to know.

00:05:07 You want to negotiate so that you don't walk away miserable and...

00:05:10 resentful because that makes you hostile and then I would say that's unless

00:05:20 If you want to exist in a place where you're basically hitting each other in the head repeatedly for 30 years, you go right ahead.

00:05:25 But I wouldn't say that that's a particularly good way of living.

00:05:28 So you might say, well, the...

00:05:30 precondition for a successful negotiation is that you don't walk away

00:05:33 resentful and angry and so that's also how you know when you have something to

00:05:38 say to someone

00:05:41 If you're going to walk away resentful and angry, you've got something to say.

00:05:45 It doesn't mean you're right, by the way.

00:05:47 But it does mean that you have something to say.

00:05:49 But it's kind of...

00:05:50 low bar you know like if i wanted to live with you for 30 years maybe we should say how about we walk

00:05:55 away from our mutual negotiations i'm thrilled

00:06:02 You could aim for something. You could aim for that.

00:06:04 If you ask for a new salary, you might think,

00:06:08 okay, I've got this damn job.

00:06:10 How much would I have to be paid so I'd be so bloody excited to go to work, I could hardly stand it?

00:06:14 Well, you can at least know what that number is, and then you could go there and say, well, look.

00:06:20 I've been doing some thinking, I think if you paid me this amount of money, I'd be so thrilled to go to work that you could hardly even keep me away from here.

00:06:30 think wow i'd actually really like to have someone around who'd be so thrilled to work that i can't

00:06:33 get rid of them it's like maybe i'll well i can't give you all of that i'll give you 75

00:06:38 maybe we can renegotiate it

00:06:42 Or you could, you know, go in there and snivel about how awful your life is and walk...

00:06:50 barely able to tolerate the outcome of the negotiation.

00:06:54 I would recommend that.

00:06:56 And it's funny because I've watched people do this repeatedly.

00:07:03 Plan all the time, because the rule is, you're going to come and see me, I'm going to try to help you figure out how to have the life that you want to have.

00:07:10 to think about that strategically so you're making fifty thousand dollars a

00:07:13 year right now maybe you should be making a hundred and fifty thousand

00:07:16 dollars in three years

00:07:20 It's like, not with that attitude. That's the first thing. It's like, no, that's not going to happen if you don't ask people for the damn money, if you don't look for a better job.

00:07:30 They're going to come along and just shuffle a boat full of money at you.

00:07:33 It's like, no, that's not going to happen.

00:07:34 Why is that impossible?

00:07:40 It's like, what the hell is wrong with you?

00:07:42 Nothing.

00:07:44 You probably have what you want.

00:07:46 You can figure out what the hell it was,

00:07:48 and then you diligently pursued it.

00:07:50 So, and then maybe you wouldn't whine about being alive, that'd be good, because people

00:07:54 who whine about being alive are dangerous to themselves and other people.

00:07:58 So you might think, I can have what I want.

00:08:00 but you better well figure out what it is and you can't just wait for them like

00:08:03 have what you want fairy to show up at your doorstep and grant it because

00:08:07 obviously that's not going to happen

00:08:10 So, okay, conscientiousness, well, we talked about how you can improve that.

00:08:14 Social networking, that's another big deal.

00:08:16 It's one of the advantages that older people have over younger people.

00:08:20 So, for example, now in my 50s, roughly speaking, I know a bunch of other people who are relatively well positioned in the dominance hierarchy, and they know all sorts of people.

00:08:30 So when I go to one of them and say, you know, can you do X or do you know X?

00:08:33 They say no, but I know someone who can.

00:08:36 And that's a huge advantage.

00:08:37 So another thing that you want to think about.

00:08:40 Use your ability to network properly and that doesn't mean schmooze, that doesn't mean go out and impress people, that's all just complete bloody rubbish.

00:08:50 That means you try to surround yourself with people who are competent in multiple different dimensions and you maintain your relationships with them and that's a trading relationship too, right?

00:09:00 It's kind of a consensus, but it's a huge advantage, a social network is a huge advantage

00:09:05 and that's something extroverted people can be really good at because they have that sort of social...

00:09:10 ...and that goes along with the ability to sell.

00:09:12 So another place that you can pick up power for the right things is to...

00:09:20 Consciously develop and maintain your social networks, and that also means, well, let's talk about friendships for a minute.

00:09:28 Here's how you know someone's your friend.

00:09:30 ¡Precis!

00:09:40 something worse happened to them once and you know derailed the whole

00:09:43 conversation you can actually tell them bad news and they'll listen so that's a good thing and then this

00:09:50 You can tell them good news, to help you celebrate.

00:09:55 That's a really good way of deciding who you should have around you.

00:09:58 Because if you have someone...

00:10:00 around you, you know, something good happens to you, you're kind of afraid to even admit it, because, you know,

00:10:03 oh, it's something good happened to you, it's like, you let that be known, it'll certainly be taken away.

00:10:08 So, you know, when you come out,

00:10:10 You sort of tell someone half-heartedly that something good happened to you and they give you a whack and then talk about, you know, the great thing that happened to them three years ago or worse.

00:10:20 to someone that they knew three years ago you know it's like go away from that person they're

00:10:25 not helpful to you they're not helpful to themselves either and so you want to surround you

00:10:30 You've got to think about this.

00:10:31 You've got to surround yourself with people who want the best.

00:10:36 You can hang around with weasels and losers that are trying to pull you down.

00:10:40 to justify the fact that they're spiraling downhill as well and you know the top side of

00:10:44 that is to have any responsibility you can all whine about how wretched life is you know so that's

00:10:49 That's pretty attractive.

00:10:50 But I would say it's also a bad medium-to-long-term plan.

00:10:54 And so it's acceptable and desirable to try to surround yourself.

00:11:00 People who are facilitating your development, you know, and you might say, well, I've got

00:11:04 people around, I know them well, you know, they're not doing that well, and they're...

00:11:10 and they don't fit into that category.

00:11:11 It's like, what's your point?

00:11:15 What are you going to do with it?

00:11:17 They'll listen and cooperate with you.

00:11:20 and move towards a better future great if they don't pay any attention and they keep doing the same

00:11:25 damn things over and over and they're not going anywhere and it's painful then maybe the proper

00:11:30 thing to do is say you just have your

00:11:43 with that sort of behavior.

00:12:05 Skills, that's another thing you can do if you want to increase your probability of success.

00:12:30 I see this problem.

00:12:42 talk to you are going to come and say, I might do something about it.

00:12:48 There we go, 50 things to do.

00:13:03 want to give you money. That's a good rule of thumb, man. You know, if someone wants to give you money, then help them do it.

00:13:17 That might develop a new skill.

00:13:21 This is also a good way to evaluate an opportunity.

00:13:24 Should you take an opportunity?

00:13:26 Take the opportunity.

00:13:31 for other opportunities, and then even if it fails from will, it hurts something of value.

00:14:10 He's described on the floor.

00:14:21 walking in the maze and you get to the middle which is where you want to be you want to be in the middle

00:14:28 how do you get there

00:15:06 Obrigado.

00:15:30 Amen.

00:16:12 So now we're already unemployed, and so I'm stressed,

00:16:18 but your marriage is dirty.

00:16:28 Oh, part of the week, your press is not good.

00:16:33 enthusiasm to look for another job and then you know maybe you want to add a bit of a drinking

00:16:37 problem to that

00:16:44 Thank you.

00:16:52 to begin with a diagnosis of depression.

00:16:56 The thing about a diagnosis of depression,

00:16:58 it's sort of like, the assumption is there's something

00:17:45 I had to say, well, we're promising to make a progression.

00:17:48 We're going to tackle that.

00:18:53 Thank you.

00:19:38 Thank you.

00:19:57 Gracias.

00:20:00 If the product is new and it's complex, then you're full.

00:20:10 the person

00:20:20 I mean, who else are you trading with?

00:20:24 And if the answer is zero, then they are going to say...

00:20:34 And therefore, the risk is the worst.

00:20:56 How do I do that? Because I need a post hoc justification.

00:21:20 But if the answer is, well, you know, I have an answer to the answer to the answer to my brother.

00:21:30 That's an indication that you're not capable of doing that sort of thing.

00:21:33 I think part of the reason that people spiral downhill into zero is...

00:21:40 Like a positive feedback loop is a loop that increases the probability that the loop will continue, right?

00:21:47 A positive feedback loop is, you've experienced this when you hear...

00:21:51 I'm going to find SISC that don't commit.

00:22:02 And it gets amplified over her, which is to be deafening, but also destroy the system.

00:22:08 It will keep amplifying.

00:22:12 That's a positive feedback.

00:22:14 A positive feedback.

00:22:18 Downward.

00:22:20 I'm virtuous, well I've traded with him and I've traded with him, and now I can say to you, I've traded with me for you.

00:22:30 They say things, and so then you say, well, I'll trade with you and then, because of that, then you're even more likely to trade with me, and it's like, the thing starts to spiral up.

00:22:44 I think somebody's going to be asking themselves to mature.

00:22:55 It's just, it's not like you need an explanation.

00:23:02 If you run a trading game, one person ends up with all the money, everyone else ends up with zero.

00:23:10 Thank you very much.

00:23:23 Huh?

00:23:27 Ja, wat al zijn jullie gezeten.

00:23:32 Well, so, and of the two aspects of Pontiac is the same.

00:23:51 You can work on micro-habits with regards to your conscientiousness.

00:23:55 And I think the best micro-habits, this is part of the Drogry Program process.

00:24:00 I think the best thing you can do is set up some aims.

00:24:14 ...situational analysis of your life, more than a psychological analysis of your life, more than a psychological analysis of your life, more than a psychological analysis of your life.

00:24:21 You're going to have to put some effort into your life, you need to be motivated to do that, so what are the potential sources of motivation?

00:24:30 Thank you.

00:24:40 If you have neuroticism, you want security.

00:24:45 Okay, so those are all sources of...

00:24:51 personality

00:25:00 If you were taking care of yourself properly, from your friendships, what would you want from your intimate relationship?

00:25:11 outside of your

00:25:20 That's a good place to walk her down.

00:25:25 You want to keep that under control.

00:25:27 And then...

00:25:30 so a vision of what you were like what you would like your life to be and that associates

00:25:40 and then you break down six processes that you...

00:25:54 Your incentive reward system, you know, we talked about the dope industry incentive reward system.

00:26:00 moving forward. And the way it works is that it works better.

00:26:06 We can see you.

00:26:10 What's the implication of that?

00:26:11 Better have a valued goal, because otherwise you can't get any positive motivation.

00:26:15 Working in principle...

00:26:20 I'm going to go through a process with that goal, start to take on a positive chart, and so what that means is what you get up in the morning and you're excited about the day, and there you go.

00:26:30 as far as I can tell, what you do is specify your orange term ideal, it doesn't have to

00:26:47 in some sense as unique in one of the best places.

00:26:50 My goal to make you happen as a consequence of my efforts, it would clear.

00:27:01 You just sit there and it's real easy.

00:27:14 wild things, and one of those who consults your own temperament would be, well, I don't

00:27:20 Look at how, look at what it is that's valuable.

00:27:30 You need a family, you need friends, like you don't need to have all these things, but you better have most of them, family, friends, career, education.

00:27:40 plans for, you know, time outside of work, life is about.

00:27:50 of those things.

00:28:00 So once you set up that goal structure...

00:28:11 Who it is that you're trying to be, right?

00:28:15 And you ain't game at that.

00:28:17 And you learn as a means of building that.

00:28:20 person that you want to be, and I really mean want to be, I don't mean should be, even

00:28:25 those things, those things are going to overlap.

00:28:30 That's partly going to hit something if you don't know what it is.

00:28:40 that has been armed, and often because they don't like specified conditions for Vane,

00:28:46 so here they'll call Vane and Coggy, which is really interesting.

00:28:50 This is what's up there, it's a close up there, it's a close up there, it's a close up there, it's a close up there, it's a close up there, it's a close up there.

00:29:01 You fail all the time then, you just won't know it until you fail so badly that you're done.

00:29:06 And that can easily happen by the time you're going.

00:29:10 Zo, wat nou, dat soort dingen, volgens mij waarschijnlijk niet, maar ik weet niet hoe het was, wat ik ben.

00:29:20 It's okay if I can have this life, looks like that might be worth living despite the fact that it's going to be, you know, anxiety, cooking and parenting, there's going to be some suffering and loss involved.

00:29:30 Obviously, the goal is to have a vision for you such that...

00:29:40 Then what do you do?

00:29:42 Then you turn down to the micro routine.

00:29:50 We want something like a schedule.

00:29:54 We'll use it on Google Calendar.

00:29:55 Make a damn schedule.

00:29:57 Stick to it.

00:29:58 Via Porter, Edmonds.

00:30:00 It's not a bloody prison, that's the first thing that people do wrong, so I would like to follow this schedule.

00:30:07 Like, what kind of schedule are you setting up?

00:30:11 Het ligt niet aan wat jullie allemaal privé doen.

00:30:16 Maar eigenlijk is het Iranische signal.

00:30:22 That's the trick.

00:30:23 He's like, okay, I thought it's normal.

00:30:25 If I was going to set it up so the best possible day I could have...

00:30:30 Frankly speaking, obviously there's a hit.

00:30:40 going to insist upon is that at the end of the day

00:30:50 That is so good

00:30:58 I'm a fool

00:31:00 ...percentive you're getting an obligation, or maybe it's more than that, depending on how far behind you are, but even that...

00:31:10 I have to schedule the damn things in.

00:31:20 Okay, you've got to work tomorrow.

00:31:21 I'm going to spend, you know,

00:31:24 what are you going to do for me?

00:31:26 That makes it likely that I'll work for you.

00:31:29 Yeah, absolutely.

00:31:30 Peut-être que tu fais une heure de la responsabilité

00:31:34 et que tu joues un jeu pour 50 minutes

00:31:36 Je ne sais pas, ce qui se rende en train

00:31:38 Mais tu dois aller...

00:31:40 Don't irritate yourself, and don't tyrannize yourself.

00:31:43 Yeah, precise.

00:31:50 Schedule it.

00:32:00 Gracias.

00:32:11 For God's sake.

00:32:20 So that's one way that you put your conscientiousness.

00:32:30 Die laatst langs de fiets had een neusverconstructie waarschijnlijk.

00:32:40 diegene geen deus had is ofzo, maar die zicht er ing uit en dus is het nu in een keer gelinkt

00:32:50 Ik heb er dan...

00:32:52 ...hetse wet...

00:32:56 ...fuck you man.

00:32:58 En dat vind ik niet eerlijk.

00:33:00 Ja, ik kan me juist niet voorstellen dat iemand die heeft geknappeld.

00:33:10 Present the opportunity of having a good life to and that's hard for people because they don't like themselves very much

00:33:16 So you know, they're always like cracking the whip and then procrastinating

00:33:20 and cracking the whip and then procrastinating and sweating off and boring in such a pathetic way of spending time.

00:33:26 You know what that's like, you can only waste six hours a day.

00:33:31 calculation about that a while back right your time is probably worth 50 bucks an hour something like that

00:33:40 Cante-se, não?

00:33:52 or as a week for a lot of-

00:34:00 So let's say it's not 50 bucks, it's 30.

00:34:10 Can't cry

00:34:21 But the funny thing about not assuming that is if you assume your time isn't worthwhile, just sit around.

00:34:30 responsibility, substantially.

00:34:40 As far as I can tell, that's how you can improve your conscientiousness.

00:34:43 Hit it, outline a goal you actually would like to hit.

00:34:50 There's something else you can think about when you're negotiating in your life.

00:35:01 Эээээээ...

00:35:10 Weet je hoe erg jullie op mijn blacklist, killlist staan, zeg maar, die Moegoltjes?

00:35:17 Want ik had ondertussen getrouwd geweest.

00:35:20 kindjes gehad op de natuurlijke manier met mijn ex.

00:35:30 Ik denk niet dat we ooit op die manier ook maar iets hadden en mijn thuisleven is als onderpad.

00:35:40 gebruikt voor jullie pagina page vault sheet zeg maar op basis van jullie agenda

00:35:50 Ten koste van mijn gezondheid en mijn levensvrijheid, zeg maar.

00:35:56 Vrijheden verdienen op de eerste CH.

00:36:00 Weet je, als jullie een nog meer hoogstijl willen hebben, dan ga ik er door.

00:36:16 You can at least know what, and then you can go to

00:36:23 I think if you paid me this amount of money, I'd be so thrilled to go to work that you could hardly even keep me away from here.

00:36:33 because I can't get rid of y'all, well I can't give you all of that, I'll give you 75%

00:36:39 Fuck you, right

00:36:40 I don't know if I can do it in a year.

00:36:50 walk away, barely able to tolerate the outcome of the negotiation.

00:36:54 Oh yeah.

00:36:56 And it's funny, because I've watched people do this.

00:37:02 Ik denk wel, dan ga je wel weer terug te bedoelen.

00:37:10 Zeker is dat kanker, want het digitale, dat is vooral mijn...

00:37:21 Huh?

00:37:22 I don't know what that happened to you.

00:37:23 That's the first thing.

00:37:24 He's like, no, it's not going to happen to you.

00:37:26 If you don't ask people for the damn money, if you don't look...

00:37:30 Dat is mij aangedaan persoonlijk allemaal, ik ben al zijn uitgehuurd, dag en nacht, ingestreamd.

00:37:40 I don't know if there's an injury to the ER, give me some coffee.

00:37:43 Nothing.

00:37:44 Nothing.

00:37:45 You probably have what you want.

00:37:46 You can figure out what the hell it was.

00:37:48 And then, you know, you diligently...

00:37:50 Ik kan niet eens meer creatief fantaseren, vrouwen herinneren die ik aantrekkelijk vind, zeg maar.

00:38:00 Visueel, zeg maar.

00:38:10 Ja, das ist manchmal auch gut.

00:38:20 Die hebben we al gekregen om mij te besturen en mij te aanvoeren.

00:38:30 Donc, quand j'ai dit, il y a une autre chose, c'est une autre chose, c'est une autre chose, c'est une autre chose.

00:38:40 De gravitas. Ik kan niet meer creatief nadenken, dus ook niet fantaseren over videogames.

00:38:50 Beelden, weet je wel, waar visuele geheugen is gekaapt.

00:38:55 Dus ruimtelijk inzicht, niet per se, dat is gelukkig goed gevormd voordat het pot dicht.

00:39:00 gezet werd. Dus je kan ook niet minst wel leuke videogames spelen, want kijk, dat zijn allemaal

00:39:09 aan het automatisch.

00:39:10 En ik heb geen geld, ik sta op mijn bewind enzovoort.

00:39:17 Dus ik heb geen bewegingsvrijheid om bijvoorbeeld te komen.

00:39:20 als ik wil. En dan bijvoorbeeld naar een ander land. Want daar kan het ook.

00:39:30 Alleen, het probleem is gewoon dat jullie daar, niet jullie kijken, we hebben dit allemaal zo.

00:39:40 Dag ja, als je hier wil vanmorgen zal ik dit doen, met de St. Tiffany.

00:39:50 I don't have to elaborate on that, but you could hear it, wow, cry, motivaties, snills.

00:40:00 Zeg maar om te kopen zijn en dan hoef je niet met je hele regenboog homofilie.

00:40:05 Zeman kankerbende aan te komen.

00:40:07 Met jullie radio waves, bassie.

00:40:10 Marco de Bas, Macro Bas, die bij zijn homoom vlakbij Leidseplein verbleef tijdens...

00:40:20 Oké, maar dat heeft meer met de radio verbindingen en frequenties te maken enzovoort.

00:40:26 In plaats van...

00:40:27 Kijk, kijk, kijk...

00:40:31 En die worden ook voor defensie gebruikt, de frequentie bands, en voor internet, en voor wifi.

00:40:40 5g enzovoort dus dat jullie met de identiteit we hebben tijd doorgebracht dus daar had mogen

00:40:50 Okay, that's a look.

00:41:00 Thank you.

00:41:12 It's like the listening voice.

00:41:20 Kijk op een moment dat het mij nu niet meer uitkomt, ga ik op een soort aanvalstoer.

00:41:30 And then, he speaks for the art of life-lame-of-a-vorder.

00:41:51 You have, I would say, both of the responsibilities

00:41:55 to surround yourself with these are good, the best part of you.

00:42:00 En de rol dat aanzet tegen mij zei ik voor, oh ja, hoe is het met Klaas?

00:42:04 Of volgens de psycholoog die op de IJ had in Slokerdijk.

00:42:10 Die worden hier zinlijk, waarin je alles vergat. Geen actieve ledelingen meer.

00:42:16 En zo hebben digitale archieven die ik groot en makkelijk vind.

00:42:20 Read, read, read, read, speak, learn how to enter how to social network, learn how to go talk to your boss in a manner, is this the right way?

00:42:30 I see this problem, and here's the solution, that's why I'm coming to talk to you about the problem and the solution.

00:42:40 Psycho-official, I don't remember, I don't know what to do, or Papa Toe, or Debbie Toe, or Lyra Toe, and so forth.

00:42:50 Met de age-splatingen en eventjes dingen.

00:42:54 Nee, die doen je allemaal op Facebook.

00:43:00 You're just another problem.

00:43:02 Don't be a problem for the people who want to give you money.

00:43:05 That's a good rule of thumb, man.

00:43:07 You know, if someone wants to give you money, then help.

00:43:11 If they want to get you stattered by bringing them solutions,

00:43:17 it's hard to use that by developing your skills.

00:43:22 This is also a good way of evaluating opportunity.

00:43:25 Should you take an opportunity, here's the rule.

00:43:31 You can choose something that you can use for an opportunity, depending if it fails from will.

00:43:37 You can prove something else.

00:44:07 Thank you.

00:44:27 Thank you.

00:45:14 Here's the example.

00:45:15 Let's say, uh,

00:45:16 .

00:45:28 We need to go from the past day off.

00:46:53 If you want to put a guy in Google to have a plan,

00:46:56 you can get a diagnosis of refreshment.

00:47:19 Yes, sir.

00:47:42 disorders that way, but we should when people are being described as psychological disorders.

00:47:53 It is no longer something wrong with them psychologically.

00:47:56 Often they just are in trouble.

00:47:58 And there is the category.

00:48:00 in psychological diagnosis

00:48:02 or client in serious trouble

00:48:04 like I experienced it being

00:48:06 without exception

00:48:08 than the people that come

00:48:14 Now you could say, well, there are psychological inadequacies such as they might be.

00:48:32 The view inside you, and now the psychologists and the clinical here, most of what I've talked to you guys about is...

00:48:40 Your psyche, like a soul, inhabited you, then there's a real utility of that.

00:48:47 Your image will be marketed from the community.

00:48:59 that are really...

00:49:13 I don't think it's obvious, I think it's obvious.

00:49:21 more happily sacrifice an arm than a child.

00:49:24 So your boundaries are not, where your boundaries are located are not precisely isomorphic.

00:49:31 that simple at all. So you're invented in all sorts of networks that can pull you down

00:49:36 rapidly or elevate you. Because the other thing that happens is that

00:49:40 well let's say i've never traded with anyone and then i go up to someone and i say well

00:49:44 do you want to trade and they say well why how can i trust

00:50:02 So it's still stuck.

00:50:15 to evaluate it, but then you, of course,

00:50:17 could take the risk of being wrong.

00:50:23 This is what's often called social proof, which is, okay, what do you want to trade with me?

00:50:27 Who else have you traded with?

00:50:29 And if the answer is...

00:50:36 or he traded with a bunch of people.

00:50:52 to make the best decision, it's the same thing.

00:50:55 It's that I want to make a decision that I'm not going to get in trouble for.

00:51:00 So how do I do that because I need to buy something from you and it turns out to be

00:51:10 What do I say? I say, well, that person was buying from it, and that person was buying from him, and that person was buying from it.

00:51:17 Like, all these other people were doing the same thing.

00:51:20 so it's not like the error is localized in me and that's often a very incredible story

00:51:25 but if the answer is well you know i i evaluated and took the route decided to take a risk

00:51:30 It's like, I'll out the door with you, Sonny, because that's just, that's an indication that you're not capable of doing that sort of thing.

00:51:40 spiral downhill into zero is because

00:51:44 Positive feedback loop is a loop that increases the probability that the loop will continue

00:51:50 A positive feedback loop is you've experienced this when you hear microphone feedback in an amplified system.

00:51:56 So, you know, the microphone sends a message to the speaker.

00:52:00 and then the speakers send out some of the messages

00:52:05 and it gets amplified again and you get this howling occur

00:52:08 which can be deaf

00:52:10 but can also destroy the system, because it will keep amplifying upward until the speakers

00:52:14 blow, for example.

00:52:15 That's a positive feedback loop.

00:52:18 A positive feedback loop can...

00:52:20 So, a virtuous circle, a virtuous positive feedback loop just went well I traded with him and I traded with him.

00:52:30 And I've traded with him and now I can say to you, I've traded with these three people

00:52:33 and you go talk to them and they say good things and so then you say, well I'll trade with you

00:52:37 and then because of that then you're even more like

00:52:41 the thing starts to spiral uphill, and it does that, I think, in a bone-leisure form.

00:52:46 And so, because it's one of the things you guys are going to be asking...

00:52:50 because what's happening is that income inequality is increasing.

00:52:54 And you might ask, well, why is that?

00:52:56 The first thing you need to know is that that's what income does.

00:53:00 So it's not like you need an explanation for it.

00:53:03 This is the explanation. It's like a natural rule.

00:53:06 If you run a training game to its logical exclusion, one person ends up with...

00:53:10 altijd over betere weerbaarheid enzovoort,

00:53:13 dan kan je niet zeggen dat in die tussengelegen jaren in dit moment

00:53:20 Het allemaal gaat over kanker.

00:53:24 Weet je wel?

00:53:32 The next best predictor of lifetime success is conscientiousness.

00:53:35 Well, so, the two aspects of conscientiousness...

00:53:40 And the answer to that is yes.

00:53:50 It's kind of rough too because we get a component and work on micro-habits with regard.

00:54:04 you can do with regard to your budget.

00:54:05 You have just been assisting you to set up names for yourself and goals that you actually

00:54:10 And basically, a situational analysis, you do a situational analysis of your life.

00:54:20 more than a psychological analysis, I would say, and so there's something like, put some

00:54:26 effort into your life, you need to be motivated.

00:54:30 And so what are the potential sources of motivation?

00:54:33 You can think about them in the big five manner.

00:54:37 If you're extrovert and you want friends, if you're agreeable, you want an intimate relationship.

00:54:40 relationship. If you're disagreeable you want to win competitions. If you're open you want to engage in creative activity.

00:54:46 If you're high neuroticism you want security. Okay, so those are all

00:54:50 of potential motivation that you could draw and that you could tailor to your own personality.

00:54:55 But then there are dimensions that you want to consider your life across.

00:54:59 So we ask people about...

00:55:00 If you could have your life the way you wanted it in three to five years, if you were taking care of yourself properly, what would you want from your friendships, what would you want from your intimate relationships?

00:55:10 How would you like to structure your family?

00:55:12 What do you want for your career?

00:55:14 How are you going to use your time outside of your job?

00:55:17 And how are you going to regulate your mental and physical...

00:55:20 physical health and maybe also your drug and alcohol use because that's a good place to auger down because alcohol is, for example, wipes out the percent of people so you want to keep that.

00:55:30 of your control and then so maybe you know what you were like what you like to be and that associate

00:55:40 Good.

00:55:50 become rewarding in relation to their incentive reward.

00:56:01 incentive reward system and that's the thing that keeps moving forward and the

00:56:04 way it works is that it works better if

00:56:10 It can see you moving towards a valued goal.

00:56:12 Okay, well, what's the implication of that?

00:56:15 Better valued goal, because you can't get any positive motivation.

00:56:20 So the more valuable the goal, in principle, the more the microprocesses associated with that goal start to take on a positive charge.

00:56:28 And so what that means is...

00:56:30 Dank u wel, ik ben niet veel nodig.

00:56:36 Dank u.

00:56:40 away from so that you're terrified to fail as well as excited about succeeding you specify your goal

00:56:50 In some sense, as a unique individual, you want to specify goals that make you say,

00:56:55 Oh, and as a consequence of my efforts, it would clearly be worthwhile.

00:57:01 is why do something because doing nothing is easy you just sit there and you don't do anything

00:57:05 that's real easy the question is why would you ever do anything

00:57:10 So that has to be because you've determined by sudden...

00:57:21 it would be well it's valuable

00:57:30 What analysis of the sub-components of human existence already did that?

00:57:35 You have all these things, but you better...

00:57:40 have most of them family friends career educational goals plans for

00:57:50 You know, those are, that's what life is about, and if you don't have any of those things, well, then, so that's, that's a bad.

00:58:01 So once you set up that

00:58:10 Who it is that you're trying to be?

00:58:20 And then you use everything you learn as a means of building that person that you want to be.

00:58:25 And I really mean want to be.

00:58:27 I don't mean should be.

00:58:28 Even those things are going to be.

00:58:30 It's important because that's partly and this is.

00:58:40 your day on goals, you're going to hit something if you don't know what it is.

00:58:50 So if you keep yourself all vague and foggy, which is real easy, because that's just a matter of not doing as well,

00:58:55 then you don't know when you fail.

00:58:57 And people might say, well, I really don't want to know when I fail.

00:59:00 because that's painful.

00:59:01 Keep myself blind.

00:59:10 And that can easily happen by the time you're 40.

00:59:13 It meant that you don't let that happen.

00:59:17 Willful blight is right.

00:59:18 You could have known.

00:59:20 but you chose not to okay so once you get your goal structure set up you think oh have this life

00:59:25 no looks like that might be

00:59:30 anxiety provoking and threatening there's going to be some suffering and loss involved

00:59:33 and all that obviously the goal is to have a vision for your life such that all things

00:59:40 considered that justifies your effort. Then what do you do? Then you turn down the microphone and you're like, okay, let's make this one.

00:59:50 How does that instantiate itself day-to-day, week-to-week, month-to-month?

00:59:54 And that's where something like a schedule can believably useful.

00:59:58 Google Calendar.

00:59:59 Like, make a damn...

01:00:00 Schedule. Stick to it.

01:00:02 With the schedule.

01:00:10 It's like, well, what kind of schedule are you setting up?

01:00:13 Well, I have to do this, then I have to do this, then I have to do this, because who wants to do all this?

01:00:21 Set the damn schedule up so that you have the day you watch the trip. It's like okay if I was gonna set it up

01:00:30 so the best possible day i could have practically speaking what would it look like well then you

01:00:37 schedule that and obviously there's a

01:00:40 that's going to go along with that, because if you have any sense, one of the things that

01:00:44 you're going to insist upon is that at the end of the day, you're in worse shape than

01:00:48 you were.

01:00:50 beginning of the day right because that's a stoop you have a bunch of those in a row you just dig

01:00:54 you know you dig yourself a hole and then you bury yourself in it it's like sorry that's just not a

01:00:59 good strategy

01:01:00 It's a bad strategy.

01:01:02 So maybe 20% of your day has to be responsibility and obligation,

01:01:06 or maybe it's more than that depending on how far behind you are.

01:01:09 But even that...

01:01:10 Ask yourself, okay, what's the right ratio?

01:01:20 yourself that just like you negotiate with someone who is working for you it's like okay you got to

01:01:23 work tomorrow okay so i want you to work tomorrow you might say okay well what are you going to do for

01:01:28 be.

01:01:30 that makes it likely that it'll work for you.

01:01:32 Well, you could ask yourself that, you know?

01:01:36 Responsibility, and then you play a video game

01:01:38 for 15 minutes, I don't know, whatever.

01:01:40 It never turns your crank, man, but you negotiate with yourself, not tyrannize yourself like you're negotiating with someone that you would like.

01:01:50 to be productive and have a good life.

01:01:52 And that's how you make the schedule.

01:02:00 useless and horrible so you'll probably only hit it with about 70% accuracy but that beats

01:02:04 the hell out of zero.

01:02:10 is, well, aim for the next week, or 50.5% for going.

01:02:20 positively so that's what way that your conscientiousness and the life you'd like

01:02:30 And you do that partly by bringing to social norms.

01:02:33 That's more or less rescuing your way you do that.

01:02:38 It's by having a conversation with...

01:02:40 yourself about because you know what you like you won't do what you tell yourself

01:02:47 to do but notice that

01:02:50 It's like you're a bad employee and a worse boss, and both of those work for you.

01:03:00 Find someone else to me.

01:03:10 with. You're someone that you want to present the opera having a good life to. And that's

01:03:17 hard for people because they don't like themselves very much.

01:03:20 So, you know, they're always like cracking the whip and then procrastinating and cracking the whip and then procrastinating and it's like, God, so boring.

01:03:30 Dat is heel erg goed.

01:03:40 Maar je zit hier voor alles.

01:03:43 Dus dit is gewoon geen heren aan...

01:03:48 Weet ik veel.

01:03:50 which is perfectly reasonable, so if you waste 6 hours a day, and you are, then you're wasting about $2,000 a week, or about $100,000 a year, so that's what it's called.

01:04:00 Het is net op de weg, het is bijna op die plek waar op de natuur staan 118, op die houten, wegstool, weet die platten.

01:04:10 ...zitplakte op een scheve, oneven bureau.

01:04:21 De deeltijdverkeer blijkt, maar er zit echt een plekje op mijn rug.

01:04:30 is you don't just sit around sort of randomly in a state of responsibility with bliss what you do

01:04:35 is you suffer existentially so that seems like a stu-

01:04:40 Er zit eigenlijk een soort lichtericht op mijn licht.

01:04:50 You actually would like to have, even better, here's something else you can think about when you're negotiating in your life.

01:04:56 You can say, you're going to do this, you can say, well, we have to negotiate.

01:05:00 I'd like to walk away not miserable and resentful.

01:05:04 Okay, let's call that a baseline.

01:05:06 And that's how you're going to negotiate with your wife or your husband.

01:05:09 That's a good thing.

01:05:11 negotiate so that you don't walk away miserable and resentful because that

01:05:15 makes you hostile and then work to hurt them

01:05:24 If you want to exist in a place where you're basically hitting each other in the head repeatedly for 30 years, you go right ahead.

01:05:30 But I wouldn't say that that's...

01:05:31 They might say, well, the mental precondition for a...

01:05:35 Don't walk away resentful and...

01:05:40 And so that's also how you know when you have something to say to someone, because the rule has to be, if you're going to want to be resentful and angry, you've got something to say, doesn't mean you're right.

01:05:50 Weet je, alle dingetjes die soms nu voorbij komen, die zitten wel aan de kant, dat je niet gegeten.

01:06:00 We're away from our mutual negotiations.

01:06:02 For real.

01:06:04 Well, why not?

01:06:06 You gotta aim for something.

01:06:08 You could aim for that.

01:06:10 I can see it for you.

01:06:12 I've got this damn job.

01:06:14 How much would I have to be paid so I'd be so bloody excited to go to work I can hardly stand it.

01:06:18 Don't come on.

01:06:20 know what that number then you could go there and say well look you know I've

01:06:26 been doing some thinking I think if you paid me this amount of money

01:06:30 I'd be so thrilled to go to work that you could hardly even keep me away from here.

01:06:33 And your boss might think, wow, I'd actually really like to have someone around who'd be so thrilled to work that I can't get rid of them.

01:06:38 It's like, maybe I'll...

01:06:40 Well, I can't give you all of that.

01:06:41 I'll give you 75%.

01:06:42 Maybe we can renegotiate it in a year.

01:06:45 It's like, hey, good deal.

01:06:47 Or you can, you know, be.

01:06:50 You're a coward and go in there and sniffle about how awful your life is.

01:06:54 Walk away, very able to tolerate out of the negotiation.

01:06:58 As in remote control.

01:07:00 And it's funny, because I've watched people do this repeatedly in my car, because I do it all the time, because the rule is that you're going to come.

01:07:10 I'll be nearly in case of the American there.

01:07:12 I thought it was, uh...

01:07:14 And we're going to think about that strategically.

01:07:16 So in the $50,000 a year right now,

01:07:18 maybe it should be...

01:07:20 Dit is of zo'n ding dat jullie hebben bedoeld bij een sport.

01:07:26 Dan heb ik nog een hoppetje te schreeuwen met de bepaalde...

01:07:30 Als je niet zegt mensen voor de verdomme geld, als je niet zo'n bedrijf,

01:07:34 dan komt het erger dan in je publiek aan.

01:07:40 Why is that impossible?

01:07:42 It's about no spit.

01:07:44 Nothing.

01:07:47 You should probably have what you want.

01:07:50 figure out what the hell it was, then you diligently pursued it.

01:08:00 dangerous to themselves and other people. So you might think I can have what I want, but you better well figure out what it is.

01:08:10 doorstep and grab

01:08:20 It's one of the advantages that older people have over younger people.

01:08:23 And so, for example, in my fifties, I know a bunch of other people who are...

01:08:30 dominance hierarchy and they know all sorts of people and so when i go to one of them and say

01:08:35 you know x or do you know x they say no but i know someone who can't

01:08:40 Dat is een enorme advantage.

01:08:42 Een ander ding dat je wilt denken over hoe je je leven hebt.

01:08:44 En dit is dat...

01:08:46 ...niet aan het grappige iets te denken ofzo.

01:08:50 It doesn't mean shmooze, it doesn't mean go out and impress people, that's all just

01:08:53 complete bloody rubbish. It means you try to surround yourself with people who are confident

01:08:58 in multiple different dimensions.

01:09:00 And you maintain your relationships with them.

01:09:02 And that's a trading relationship, too, right?

01:09:03 It involves reciprocity.

01:09:06 But it's a huge advantage of social networks.

01:09:10 Something extroverted people can be.

01:09:20 for the good for the right things is to is to consciously develop and maintain

01:09:26 your social networks and that also means

01:09:30 Well, let's talk about friendships for a minute.

01:09:32 Here's how you know if someone's your friend.

01:09:35 A.

01:09:40 Like the hell that they hold the arm, that teeth open, I'll take you from the...

01:09:44 ...this arm, from the coffer, I don't know.

01:09:50 and they'll listen.

01:09:51 Weird things.

01:10:00 And that's a really good way of deciding who you should have around you because if you have

01:10:03 someone around you, you know, something good happens to you.

01:10:10 You let that be known and it'll certainly be taken away.

01:10:12 So, you know, you come out and you sort of tell someone half-heartedly that something good happened to you

01:10:17 and they give you a whack and then talk about, you know.

01:10:20 You know, the great thing that happened to them three years ago, or worse, the great thing that happened to someone that they knew three years ago.

01:10:26 You know, it's like, go away from that person.

01:10:29 They're not helpful.

01:10:30 And they're not helpful to themselves either.

01:10:33 And so you want to surround yourself, you've got to think about this.

01:10:35 You've got to surround yourself with people who want the best, the best part of it.

01:10:40 You can hang around with weasels and losers that are trying to pull you down to justify the fact that they're spiraling downhill as well.

01:10:47 And you know, the upside of that is you don't have to have any...

01:10:50 You can all whine about how wretched life is, you know, so that's pretty attractive.

01:10:54 But I would say it's also a bad medium to long-term plan.

01:10:58 And so it's...

01:11:00 and desirable. You try to surround yourself with people facilitating your development.

01:11:07 You know, you might say, well, I've got people around.

01:11:10 And they don't fit into that category, it's like...

01:11:20 What are you going to do with it, exactly?

01:11:21 They'll listen and cooperate with the first better future.

01:11:26 They don't pay any attention.

01:11:30 over and they're not going anywhere and it's painful, then maybe the proper thing to do

01:11:34 is say, you just have your misery.

01:11:37 I'll go off and have my life and maybe you'll wake up.

01:11:40 some point in the future think that's a better way of being because just putting

01:11:44 we call that enabling right with that sort of behavior

01:11:50 It's me asked to build a labor that, it's a bad idea, you have, I would say, both the

01:11:57 right and the responsibility to surround yourself with...

01:12:01 for the best part, it's not the same as...

01:12:10 That's another thing you need to do with success, to take an opportunity to do skills.

01:12:20 Do it. Right? Learn to program. Learn to write. Learn to read. Read new things. Learn to public speak.

01:12:26 Learn how to introduce yourself to people. Learn how to social network. Learn how to go.

01:12:30 talk to your boss in a matter this is the right way

01:12:40 talk to you about the problem and the solution. That person is going to want to talk to you

01:12:44 a lot. It's like because the other people they're talking to come and say,

01:12:50 about it. It's like they don't want to do something about it. They've only got 50 things to do.

01:12:54 So if you're the person who constantly brings forth...

01:13:00 Why are they going to want to have you around?

01:13:02 If you're just another problem, don't be a problem for the people who want to give you money.

01:13:08 That's a good rule of thumb.

01:13:11 If someone wants to give you money, then help them do that.

01:13:14 And if they want to give you status and success, then help them do that, right?

01:13:18 And you do that in part by bringing...

01:13:20 them solutions in part by developing your skills so if things aren't going very well for you

01:13:25 this is also a good way to tell you should you take an opportunity

01:13:30 Here's the rule. Take the opportunity, if it will teach you something that you can use for other opportunities, because then even if it fails,

01:13:40 Ja, zou ik kunnen.

01:13:48 Ik heb nog geen idee geweest, ik heb net...

01:13:50 Dat het werkt, die codex tekst dat ik er van mijn laptop op aan het lezen ben.

01:14:00 Right below, at the center of the world, and it's a cross because the cross is the place of suffering, so that's the center of the world, because that's what you are, you're the place of suffering.

01:14:10 place of conscious suffering that's the center of the world and so inscribed on

01:14:14 the floor is a maze

01:14:17 it's Mandela

01:14:20 flower-shaped right in the center just walking in the maze and you walk all four quadrants and you get to the middle

01:14:30 Which is where you want to be. You want to be in the middle. How do you get there? You walk everywhere. What does that mean? It means every bloody time you're offered an opportunity.

01:14:40 Take it, and develop your skills.

01:14:43 And that's better than wealth, by the way.

01:14:45 In fact, it actually constitutes wealth.

01:14:47 Because wealth constitutes what you have when someone takes

01:14:52 That's real wealth, and so the way that you build up that sort of wealth is you turn yourself into someone who's competent in multiple directions, and you could be doing...

01:15:00 All the time, especially with the kind of technology to access to whatever you want.

01:15:10 Dat wordt via elektriciteit, via iets verleidings, wordt iets in het andere component van die letterlijke fysieke laptop die ik ook met huis heb staan.

01:15:20 En dat heet op een bepaalde manier iets, en die benaming voor de componenten, zeg maar, de schebelis.

01:15:30 in an operating system that they go in Windows Prime.

01:15:35 Who had that unchecked GPT codex for word?

01:15:40 Want daar heb ik nog steeds geen interviews voor gebouwd.

01:15:50 weten hoe dat heet. Want er is een kanker groot probleem. Als ik al die dingen uitreken,

01:16:00 Nou cool, dan kan het misschien dat het past op mijn schijf of wat dan ook, op die laptop, maar als ik het daadwerkelijk op...

01:16:10 ook wil lossen en de muntjes eruit wil halen, dan moet het volgens mij binnen een bepaalde tijd geslopt en opgelost zijn.

01:16:20 En daardoor moet het zijn dat het zowel op mijn harde schrijfpast, mijn SSD.

01:16:30 and that's going to make you more depressed and that's going to keep you more depressed and that's going to decrease the likelihood that you're going to have enough enthusiasm to look for another job

01:16:40 Dat kankertje moet op alle manieren kloppen.

01:16:47 Op mijn windows, op mijn...

01:16:50 Vanaf kan ik met RTX 570T, 12kb, 4m dus.

01:16:57 Vanaf bij MSO leeftijd.

01:17:00 The thing about a diagnosis is that there's something going wrong with your psychological structure, it's like, if you're unemployed and you're depressed, it isn't obvious.

01:17:10 at all that the problem is in your head I mean it's it doesn't it isn't obvious

01:17:14 that it's a psychological problem it's just a problem and problems to take you

01:17:19 out

01:17:20 And so, you know, if you're unemployed...

00:00:00 ...and you're less likely to be motivated for a job, you can sort of think about that as a spiral, but you can...

00:00:08 ...spiracy...

00:00:10 sense of external forces that are on into the ground. We don't tend to conceptualize psychological

00:00:16 disorders that way, but because lots of...

00:00:20 Our suffering could be described in psychological terminology.

00:00:30 Often they just are in trouble. There isn't a category in psychological trouble.

00:00:41 Without exception, come to see me, come to see me.

00:00:50 Their psychological inadequacies, such as they might be, are interfering with their, or maybe even served as precursors to, you know, increase.

00:01:00 the probability of the catastrophe, but it's still not exactly the appropriate way to conceptualize

00:01:04 it, because there's you inside you.

00:01:10 Psychologist and as a clinical theorist you guys about is your psyche and its structure like a soul

00:01:20 real utility in that. You're the individual, demarketing from the community, you could be

00:01:24 set up in a healthy manner or a non-healthy manner. The problem with that is that you're

00:01:28 not just an individual, you're...

00:01:30 ...or connecting to the external...

00:01:40 It's like, is your child more you than your mom?

00:01:43 Yeah, there's a lot of stuff that you can do with a lead for.

00:01:47 Let's go.

00:01:50 In real time, mm-hmm.

00:01:52 I think he almost went off a lot of time.

00:01:55 Yeah, well.

00:01:56 Yeah, well.

00:01:58 Good.

00:02:00 Where your boundaries are located are not precisely isomorphic with the outline of your body.

00:02:05 It's not that simple at all.

00:02:06 And so you're embedded in all sorts of networks that can pull you down.

00:02:11 Because the other thing that happens is that, let's say, when I say, well, do you.

00:02:20 And they say, well, how do I trust you?

00:02:24 That's what you have to take my word for.

00:02:26 That's not a very good argument.

00:02:30 instead well here's what I have to offer and don't know how to evaluate it so I'm

00:02:37 still stuck with taking your word that's a bad problem

00:02:40 And you'll see that if you ever try to sell a product in the marketplaces, if you're forcing the person to...

00:02:53 It's called social proof.

00:03:00 okay well you want to trade with me who else have you traded with and if the answer is zero

00:03:04 then they are going to say well you're an interesting person and all that but i've got

00:03:09 these other people

00:03:10 who have already traded with a bunch of people and therefore the risk is lower, in part because, let's say, I have supervisors to make a decision.

00:03:20 Property, whether or not, abilities.

00:03:22 My primary concern is that my supervisor will not help me for making the decision.

00:03:24 It's not that my primary concern is to make the decision.

00:03:26 It's not that my primary concern is to make the decision.

00:03:28 It's not that my primary concern is to make the decision.

00:03:30 It's not the same thing.

00:03:30 Nee, ik heb er geen pijn van gevoel.

00:03:33 Dus hoe doe ik dat? Want ik heb een post-hoc-justificatie nodig.

00:03:36 Dus ik heb een gegeven moment op de job van Eindlerstraat 63.

00:03:40 Ik heb nu de hele tijd een creeper laten geven, me laten bewezen en manipuleren.

00:03:47 Hoi!

00:03:49 Hey!

00:03:50 That person was fine, but all these other people were doing the same thing, so it's not like the Arab supplies hit me, and that's often a very credible story.

00:04:00 And the answer is, well, you know, I, I thought you were going to take it this far.

00:04:05 You mentioned it at the end of the day, it was a remote control.

00:04:10 op afstand doen en niet blijft

00:04:14 de volgende is

00:04:18 die bestemming had

00:04:20 We kunnen zelfs kriebel op hun lichaam uitzetten.

00:04:30 En dus ook anesthesie als het ware.

00:04:32 En dus ook hoe ik met die kankerbeeldjes opgegaan ben in de afgelopen paar jaar.

00:04:40 Ik wil het op tijd boven. Ja, dat is zo te gebeurd. De klok is inderdaad gewoon doorgelopen.

00:04:49 Aan de ene hoe dat staat...

00:04:50 It's a positive feedback loop.

00:05:00 feedback loop is when well i've traded with him and i've traded with him i've traded with these

00:05:07 three people and you've watched it when they say good things

00:05:10 And so then you say, well, I'll trade with you.

00:05:11 And then because of that, then you're even more likely to trade with me.

00:05:14 And it's like the thing starts to spiral uphill, and it does that.

00:05:18 I'm taking a non-linear form.

00:05:20 And so because if one of the things you guys are going to be asking yourself as you mature because what's happening is that is increasing

00:05:30 is that the first thing you need to know is that that's what income does not like

00:05:35 you need an explanation that this is the explanation

00:05:40 You run a trading game to its logical conclusion, one person ends up with all the money, and

00:05:45 everyone else ends up with zero.

00:05:50 um

00:06:02 The next best predictor of lifetime success is conscientiousness.

00:06:10 so

00:06:20 you do about your industriousness?

00:06:21 And the answer to that is...

00:06:30 micro habits with regards to your conscientiousness, and I think the best

00:06:40 Set up some aims for yourself. Goals that you actually value.

00:06:50 Situational analysis of it helps you do a situational analysis of your life more than a psychological analysis

00:06:56 I would say it so the questions are something like

00:07:00 have to put some effort into your life you need to be motivated to do that and so what

00:07:13 If you're disagreeable, you want an intimate relationship.

00:07:15 If you're disagreeable, you want to win competitions.

00:07:17 If you're open, you want to engage in...

00:07:21 If you're high in neuroticism, you want security.

00:07:23 Okay, so those are all sources of potential motivation.

00:07:30 But then there are dimensions that you want to consider your life across, so we ask people about, well, give your life the way you wanted it in three to five years, and you were taking care of yourself properly.

00:07:41 from your friendships what would you want from your intimate relationship i'd like to structure

00:07:45 your family what do you want for your career

00:07:50 Good.

00:08:00 wipes out.

00:08:10 what you would like your life to be, and that associates the, so the goal, once the goal

00:08:17 is established, and then you break down the goal.

00:08:20 The microprocessors become rewarding in proportion in relation to their association.

00:08:31 And that tangles in your incentive reward system.

00:08:34 We talked about the dopaminergic incentive reward system.

00:08:36 And that's the thing that keeps you moving forward.

00:08:38 And the way it works is that...

00:08:40 And it works better.

00:08:41 You can see you moving towards a valued goal on occasion of that.

00:08:50 valued goal, because otherwise you can't get any positive motivation. Well, the more valuable

00:08:55 the goal, in principle, the more microprocess is associated with that goal.

00:09:00 start to take on a positive charge.

00:09:02 And so what that means is, well, you get up in the morning and you're excited about the day.

00:09:06 You're ready to go.

00:09:07 And so as far as I can tell, what you do is specify.

00:09:10 your long-term ideal, maybe you also specify a place you want to stick to fail as well as succeeding.

00:09:20 You specify your goal.

00:09:22 You do that in some sense as you need to specify goals.

00:09:30 if that happened as a consequence of my efforts it would clearly be worthwhile

00:09:34 because the question always is why do something because doing nothing is easy you just sit there

00:09:39 and you don't do anything

00:09:40 That's real easy. The question is, why would you ever do anything?

00:09:43 And the answer to that has to be because you've determined by some...

00:09:50 It might be, well, where should you look for worthwhile things?

00:09:52 And one would be, well, you could consult your own temper.

00:09:55 And the other would be, well, what it is that people...

00:10:00 a crew that's valuable across the lifespan.

00:10:03 Structural analysis of components of human existence.

00:10:08 And we already did that.

00:10:10 you need a family you need friends like you don't need to have all these things but you better have

00:10:14 family friends career educational goals plans for you know

00:10:20 outside of work, et cetera, I guess.

00:10:30 and suffering so that's that's a bad so once you set up

00:10:40 all structures, let's say, and that's really, in many ways, that's what you should be doing.

00:10:45 That's exactly what you should be doing.

00:10:55 everything you learn as a means of building.

00:11:00 And I really mean want to be.

00:11:01 I don't mean should be.

00:11:02 Even those things are going to overlap.

00:11:05 It's important to distinguish between those

00:11:07 because that's partly that this is.

00:11:10 So if I say, well, you're going to try to make yourself more industrious,

00:11:13 number one, specify your damn goals.

00:11:15 You're going to hit something if you don't know what it is.

00:11:17 That isn't going to happen.

00:11:20 won't specify their goals too because they don't like to specify conditions for

00:11:23 failures so keep yourself all vague and foggy which is real easy doing as well

00:11:30 then you don't know when you fail.

00:11:31 I really don't want to know when I fail because that's painful.

00:11:35 So I'll keep myself blind about when I fail.

00:11:40 the time then. You just won't know.

00:11:55 Okay, so once you get your goal structure set up you think okay if I could have this life

00:12:00 Looks like that might be worth living, despite anxiety provoking, there's going to be some suffering and loss involved in all of that, obviously.

00:12:10 My goal is to have a vision for your life such that...

00:12:20 Then you turn down to the back, instantiate itself.

00:12:30 The schedule can be unbelie-

00:12:34 Schedule!

00:12:40 That's the first thing that people do wrong.

00:12:42 They say, well, I don't like to have...

00:12:50 to do this, you know, and then I just go play video games, because who wants to do all these

00:12:53 things that I have to do?

00:13:00 that's the trick it's like okay i've got tomorrow if i was going to set it up so the best possible

00:13:05 day i could have practically speaking

00:13:10 it looked like? Well, then you schedule that, and obviously there's a bit of responsibility

00:13:14 that's going to go along with that, because if you have any sense, one of the things that

00:13:18 you're going to insist upon is the debt.

00:13:20 At the end of the day, you're not in worse shape than you were in the day.

00:13:25 Because that's a stupid day.

00:13:27 If you have a bunch of those in a row, you just dig yourself.

00:13:30 then you bury yourself in it. It's like, sorry, that's just my good strategy. It's a bad strategy.

00:13:35 So there has to be responsibility.

00:13:40 Or maybe it's more than that, depending on how far behind you are.

00:13:43 But even that, you can ask yourself,

00:13:45 okay, well, I've got these responsibilities.

00:13:47 I have to schedule the damn things in.

00:13:50 What's the right ratio of responsibility to reward, and you can ask yourself that, just like you'd negotiate with someone who is working for you. It's like, okay, you've got to work tomorrow. Okay, so...

00:14:00 You might say, okay, well, what are you going to do for me?

00:14:04 That makes it likely that I'll work for you.

00:14:06 Well, you can ask yourself that, you know.

00:14:08 Maybe you do analysis.

00:14:10 responsibility to play a video game for 50 minutes, I don't know, whatever turns your

00:14:14 crank, man, but, you know, you have to negotiate with yourself and not tyrannize yourself.

00:14:20 Like you're negotiating with someone that you care for and that you would like to be productive and have a good life.

00:14:26 And that's how you make the schedule.

00:14:28 And then you look at the day and think about.

00:14:30 So we have some notes on the inverse, followed by a second.

00:14:40 50% accuracy, another rule is, well, 8 for 51% the next week, or 50 and a half percent for God's sake.

00:14:50 Because, position where things start to put back positively, it's spiraling up.

00:14:56 So, that's one way that you could work on it.

00:15:00 Your conscientiousness is a plan of life you'd like to have.

00:15:04 If you do that part, that's more or less where you're coming from.

00:15:10 Ik weet het al bestond, dan krijg ik de meldingen, ze zijn een nieuwsmelding van jij.

00:15:20 Alle crypto's zijn mijn op dat principe gebaseerd.

00:15:30 Dus ben ik misschien wel de enige die het echt heeft, en niet alleen het idee conceptueel.

00:15:40 en de proponents van alle schorlogies

00:15:45 waar het vandaan komt

00:15:50 Life too, and that's hard for people because they don't like themselves very much.

00:15:55 So you know, they're always like cracking the whip and then procrastinating and cracking the whip and then...

00:16:00 It's like, huh, it's such a pathetic way of spending your time.

00:16:04 And you know what that's like, because you probably waste like six hours a day.

00:16:07 All the very right.

00:16:10 I don't know, I won't be leaving from there.

00:16:15 I don't think this is what we do, I don't think I'm proud to be.

00:16:20 now is going to multiply effects in the future, so let's say it's 50, if you waste six hours

00:16:27 a day, and you are, then you're wasting below $2,000.

00:16:30 a week or about a hundred thousand dollars a year. So I'm like, go ahead, but that's

00:16:33 what it's costing you, every hour. And you need to know what your damn time is worth.

00:16:37 So let's say it's not 50, but it's 30.

00:16:40 Whatever, maybe it's somewhere in that range.

00:16:43 One of the things you should be asking yourself is,

00:16:45 would you spend an hour with that wealth?

00:16:48 What if I paid someone 50 bucks to...

00:16:50 I've had that out, and if the answer is no, it's like, well, maybe you should do something else with your time, and it depends on whether or not you think that your time's worthwhile.

00:17:00 Я не думаю, что вы не думаете, что время вы не думаете, что вы не думаете, что вы не думаете, что

00:19:07 And your boss might think, well, I'd really like that.

00:19:10 so thrilled to work that I can't give you all of that. I'll give you 75% maybe we can get it in a year.

00:19:20 good deal or you could you know be some in there and snivel about how to walk away

00:19:40 We plan all the time because the rule is, you're going to come and see me, I'm going to try to help you figure out how to have the life that you want to have.

00:19:48 And we're going to think about that strategically.

00:19:50 you're making $50,000 a year right now, maybe you should be making $150,000 in three years.

00:19:56 And you think, well, I couldn't have this.

00:20:00 Not with that attitude, that's the first thing.

00:20:02 It's like, no, that's not going to happen if you don't ask people for the damn money,

00:20:06 if you don't look for a better job, they're going to come along and just shut up.

00:20:10 a boat full of money at you, it's like, no, that's true.

00:20:20 you probably have what you want if you can figure out what the hell it was and then you know you

00:20:26 diligently pursued it so and then maybe you would

00:20:30 whine about being alive that'd be good because people who whine about being alive are dangerous

00:20:34 to themselves and other people so you might think i can have what i want

00:20:38 i'll figure out what it is

00:20:40 And you can't just wait for the ferry to show up at your doorstep in the ground.

00:20:46 Architecture calls for a bounded act of healing.

00:20:50 Conscientiousness, well we talked about how you can prove that, social networking, that's another big deal, it's one of the advantages that older people have over younger people.

00:21:00 In my 50s, while I'm speaking, I know a bunch of other people who are, you know, relatively well positioned in the dominant part, and they know all sorts of people. And so when I go to one of them and say...

00:21:11 or do you know X, they say no, but I know someone who can't.

00:21:14 And that's a huge advantage.

00:21:15 So another thing that you want to think about

00:21:17 as you move your life at this year.

00:21:20 Use your ability to network properly and that doesn't mean schmooze and it doesn't mean go out and impress people that's all just

00:21:27 On this codex

00:21:30 You try to surround yourself with different dimensions, and you maintain your relationships with them, and that's a training relationship too, reciprocity.

00:21:40 But it's a huge advantage. A social network is a huge advantage, and that's something extroverted people can be really good at, because of that sort of social level.

00:21:50 So another place that you can pick up power and power for the good, for the right things is to, is to consciously...

00:22:00 Develop and maintain your social network.

00:22:02 That also means, well, let's talk about friendships for a minute.

00:22:06 Here's how you know if someone's your friend.

00:22:13 They'll listen, they won't think how something worse happened to them once.

00:22:20 you know, derail the whole conversation, you can actually tell them bad news and they'll listen, so that's a good thing, and then this is a weird thing, you can tell them good news,

00:22:32 you celebrate and that's a really good way of deciding who you are.

00:22:42 God, something could happen.

00:22:43 It will certainly be.

00:22:50 Did something good happen to you and they gave you a whack and then talk about the great thing that happened to them three years ago or worse, the great thing that happened to someone that they knew three years ago.

00:23:00 you know it's like go away from that person they're not helpful to you

00:23:04 they're not helpful to themselves either and so you want to surround yourself you've got to think about this

00:23:10 You want to surround yourself with people who want the best for the best part of you.

00:23:15 You can hang around with weasels and losers that are trying to pull you to justify the fact that there's...

00:23:20 And you know, the top side of that is you don't have to have any responsibilities.

00:23:25 You can all whine about how wretched life is.

00:23:27 So that's pretty attractive.

00:23:29 But I would say it's also...

00:23:30 Niet nodig te doen, maar gisteren is het accepteelbaar dat je zich ervoudt met mensen die...

00:23:40 You might say, well, I've got people around who know them well, you know, they're not

00:23:46 doing that well and they don't fit into that category.

00:23:50 Weesig tijdens.

00:23:52 Wat ga je doen met hen?

00:23:55 Ik denk dat ze trots waren.

00:24:02 and they keep doing the same damn things over and over

00:24:04 and they're not going anywhere, and it's painful,

00:24:07 then maybe the proper thing to do is say,

00:24:09 you just have to do it.

00:24:10 I'll go off and have my life and maybe you'll wake up at some point in the future and think that's a better way of being.

00:24:17 Because just putting up with it is all they call that.

00:24:20 With that sort of behavior, it's bad idea.

00:24:30 Mensen houdspoorten en zo'n ideeën, ik heb het niet over geld.

00:24:35 En ik heb ook geen liquidity.

00:24:40 we have to elaborate on that, that means

00:24:43 skills, that's another thing you can do

00:24:45 if you want to increase your probability

00:24:47 of success, every time you have

00:24:49 an opportunity

00:24:50 I'm going to left up the other block with the agriculture.

00:24:55 Learn to write, learn to read, read new things, learn to public speak.

00:25:00 Learn how to introduce yourself to people.

00:25:01 Learn how to social network.

00:25:03 Learn how to go talk to your boss in a manner that this is the right way to go.

00:25:10 I see this problem, and here's the solution, and so I've come to talk to you about the problem and the solution.

00:25:16 That person is going to want to talk to you a lot.

00:25:20 people they're talking to you are going to come and say, I've got a problem, do something

00:25:24 about it. It's like, they don't want to do something about it, they've got 50 things

00:25:27 to do, you know, so if you're the person who constantly...

00:25:30 brings forth I don't want to have you around if you're just another problem

00:25:40 be a problem for the people who want to give you money that's a good rule of thumb man you know if

00:25:45 someone wants to give you money then help them do that and if they want to give you

00:25:50 status and success, then help.

00:00:01 resting place right in the center.

00:00:10 You have to be in the middle. How do you get there?

00:00:12 You offered an opportunity.

00:00:18 Take it.

00:00:20 And develop your skills when someone takes all your money away.

00:00:31 real wealth and so the way that you build up that sort of wealth

00:00:40 the time, especially with the kind of technology that you people have access to. You can learn

00:00:45 anything you want, whatever you want, so what a good deal that is.

00:00:50 There's easy fruit hanging that you could pick.

00:00:54 Here's an example.

00:00:55 Let's say...

00:01:00 Okay, so let's hear what you can make it say just

00:01:10 company so it has nothing to do with you it's like a draw basically but then

00:01:15 what happens to you well if you're conscientious

00:01:20 You can go after yourself pretty hard.
